It Won't Be Long Now

There are exactly five more weeks of school. If we deduct Junior Week we have just four weeks, and in a week or two we shall be graduated. Of course, we can no longer go about door to door. The anxious students, their parents, and members of the faculty will be hungry for news of their classmates and friends. The only hope is that the weather will be good and that the final examinations will be over by the time the students return.

A剥离 Evening

There are only three weeks until graduation. This is the time to take your vacation and get away from it all. The student body will be out of school and there will be no school work to think about. The only thing to do is to stay out of school and have a good time.
