**Library renovated**

by Natasha Richardson

The campus library has undergone a number of changes in the past few months. The reorganization and renovation will continue for the next 2-3 years as a result of Cerrar Library moving out of the campus library building.

In 1980, Cerrar and ITI’s libraries existed in separate locations. The Cerrar library was located in the Loop. The ITI library was on campus.

At that time Cerrar was a special library, in that it was open to the public, but not directly supported by taxes. Its collection focused on medicine, science, and technology. ITI’s collection on the other hand, concentrated on the sciences of science and engineering.

Over a period of three years both libraries were expanded, and in 1982 they moved into one building. Since then the largest change was the creation of space in ITI, which meant that the building would be constructed on ITI’s campus.

Although the libraries shared a building, and ITI made a contract with Cerrar so that Cerrar would run the major operations, they shelved their collections separately. ITI’s books and facilities were kept on one side, Cerrar’s on the other. Assuming that the arrangement would be permanent, Cerrar had got rid of many of its books and many of its journal subscriptions because they were too bulky to be kept.

For ten years the arrangement worked well, but then Cerrar’s financial base eroded. As a result, its collection could not keep up with the rate at which medicine, science, and technology were advancing. Cerrar didn’t have sufficient funds to enhance its collection of monographs and periodicals, or any libraries (which is not a periodical). It was able only to make five much needed changes before it failed to make cutbacks in the journal subscriptions.

Cerrar’s management then decided to find out where the largest percentage of its users were coming from and to look for a way to get money from them. Cerrar found that most of the users were affiliated with ITI in some way. It then asked President Martin for an additional $2000 per year. The request was denied. Cerrar was then forced to look for other alternatives. In the late 1970’s the decision was made to leave the ITI campus.

**Martin cuts Appendices A,B**

by Ned Liddell

The release of that plan at the start of the school year prompted the ITI faculty to formulate alternative proposals to balance the ITI budget, without reduction in faculty. It also sponsored seminars dedicated discussions of the exact meaning of tenure and academic freedom.

The group responsible for coming up with an alternative plan by October 15 is the University Faculty Planning Committee. It was organized under the guidance of Dr. Frederick Ernst, current head of the ITI Faculty Senate. The full committee is made up of five subcommittees, one from each of five college of ITI (Arms, Lewis, Kent, Stuart, Architecture/Planning/Design).

It was the progress of that faculty group which so impressed Dr. Martin that he changed his own position on what steps ITI should take to meet the demands of the immediate future.

**An open letter from Pres. Martin**

The grass roots evolution of the University Faculty Planning Committee, described your memorandum to me dated September 24, 1984, is one of the most constructive events in ITI’s recent history. Together with its component College/School Faculty Planning Committees, it provides a rational and positive mechanism for direct faculty involvement in the forward planning of the university. It does so because its structure exactly maps the administrative organization of the Board of Trustees. These are necessary correspondences for effective planning by all recognized parts of the university governance structure. Consequently, I am pleased that the Senate Coordinating Committee will recommend to the Faculty that this be made a standing committee rather than an ad hoc committee. I endorse this action with enthusiasm -- informed and effective faculty involvement in long range planning for university advancement is a long sought personal goal.

The Committee, even in its ad hoc form, has already made significant progress in addressing the immediate, short range problem we face—specifically the 1985-86 operating budget. Administrative budget planning for that year was predicated upon a reduction of $925,000 of the direct instructional costs of the university. This plan accomplished this reduction through the elimination of 24 faculty positions. However, as of September 28, 1984, through the actions of the Deans and the Lewis College Faculty Planning Committee, chaired by Dr. Anthony Wojcik, reductions of about $811,000 have been made. At least another...

**Computer/Library fee explained**

Within the next couple of weeks, every IIT student will receive in the mail a bill for $9 per credit hour to cover the use of computers and library facilities. Some students may have received their bills already.

Each new student was mailed a letter last June explaining that "...IIT has engaged in a major program to upgrade library and computer support. To cover the cost of the upgrading processes it was decided that a fee should be charged in proportion to the number of credit hours taken. The fee is not applicable to IIT/V students. IIT will use the money to pay back a loan of approximately $3.7 million that was borrowed 8 years ago. According to President Martin, the funds will also be put toward the Cerrar's share of the library building by ITI at a cost of $31.57 million (issue article this week). Also, $600,000 was needed to purchase additional computers for the IIT campus.

Upon reviewing IIT's financial situation and the ways in which other colleges maintained their facilities, President Martin and his advisors decided that a per credit hour fee would be the fairest method of raising the funds. The decision was made at a meeting in the middle of the '84 spring semester. Since tuition for the '84-'85 school year had already been set and the charge was intended to be pro-rated according the student use of the facilities, the charge was not added to the tuition fee. IIT averages $125,000 credit hours per year including summer school. The fee will bring in approximately $625,000.
Technology News will have a display table set up at the Organization Fair on Tuesday, October 2 (see map below). Our staff meeting will be held at the table at 12 noon. All interested students welcome.

Writers earn 90¢ per column inch. Typical articles range from 10-20 inches. That's a lot of $$$.

P.S.-Find out how you could get on of the NEW Tech News t-shirts.

Do you know me? I designed the IIT campus, but still no one knows who I am. If you want to be famous, be a writer for Technology News instead.

All Invited!

IIT Organization Fair
Tues., Oct. 2, 1984
Noon - 2 p.m.
East HUB Corridor
Meet the leaders!
Learn more about the organizations!
Find out about upcoming events!

sponsored by the DOSL office

Don't miss it!

Anti-Technology Challenge

All you have to do is think up a fantastically funny caption for the photo and send it to Tech News (5th floor Main Building) where it is awaited with bated breath.

The prize is the nearly overwhelming thrill of seeing your name in print.

Caption: _______________________________
Name and Phone: ____________________

Good Luck with the Anti-Technology Challenge!
EE careers

EE and all interested students don't miss this good opportunity! Just in time for Moralar interviews. Come to see our presenters: Adolfe F. Petriss, principal staff engineer of automotive & electronics groups, from General Motors, and about contracts, opportunities. Also learn more about careers in electrical engineering, choosing a company, getting your won patents, etc. Thursday, Oct. 4, 12:10 p.m. in 16 Auditorium. Refreshments will be served.

This is part of the continuing series of discussion on careers and opportunities in EE sponsored by HKN and IEEE chapter. Watch for coming speakers from IBM, Illinois Bell, GE, COM.

Free tutoring

Grades on your first papers and essays our lower than you'd like? Free tutoring for any ITT undergraduate with writing problems is again available from the Humanities Department Writing Clinic. Students who want help should make an appointment by calling x3365 or by visiting the writing center in the first floor of the HUB. Anyone interested in reflecting on the sacred scriptures and relating their meaning to contemporary life is invited to participate and to determine the texts to be examined. Visit the website at www.gospelofmark.com. The program is coordinated by the Chaplain's Office and the Inter-Religious Student Council.

Sunday Service

The third meeting for the AIAA will be held on Tuesday, October 10th at 12:15 p.m. in the WU changing room. This will be the open meeting in the ITT Chapel. All interested students are welcome. The students, who do not attend, may be interested in participating in the event.

Women leaders

On Tuesday, October 3rd at 12:30 p.m. the DSOIL Office will be hosting the 3rd Annual Women Student Leaders Reception. Deadline for applications will be October 1st. The DSOIL Office is located in 155D. Women student officers and major committee chairpersons may participate. For more information call J. Dowie at 5380.

All notices are sent to J. Dowie.

CTA passes

CTA passes are on sale the last five days of each month at the Commons lower window, Monday to Friday from 8:45 to 1:30 and 2:30 to 4:45. The passes are available to student discounts and faculty discounts. CTA tokens are on sale every day of the month. Tokens are sold in 10 packages for $8.50.

WU staff and students may use this service for purchasing their tokens and passes from the Commons at no extra charge.

TRAVEL ENTHUSIASTS: Register for the annual Travel Fair on Monday, October 30th, 2003 at 12:00 p.m. in the Commons. For more information, call 331-1000 or stop by the Career Services Office in 100. Be sure to ask about the American Express Card and the Student Travel Card.

RESEARCH Catalog of 16th Annual American Economic Development

American Red Cross

Attention Co-ops

After a successful first meeting, the ITT Co-op Organization will be holding its second meeting on Thursday, October 5th at 12:15 p.m. in the HUB (Hermann Hall). Please check the daily events sheet regarding exact room location, and please feel free to bring a pencil.

A petition calling for Co-op pre-registrations will be circulated at the meeting. Also, we will begin developing the ITT Co-op Newsletter. This will be a place for Co-ops to communicate with each other and get to know other Co-op companies. To top it off, Dr. Ronnohra and Debbie Ryan are to be guest speakers at the meeting. Their main focus will be on Co-op interest retention, as well as insight on the upcoming job markets. All interested coop students are urged to attend.

Finally, we would like to congratulate the following co-op students on being appointed to the executive of the organization: Kevin, Secretary-Treasurer; Dan McCullin, Publicity Chairman; Bill Nordrock, Student Representative for US and Social Chairman; Heidi Smith, Co-op student, as well as many others, have provided fresh ideas, support, and enthusiasm for the upcoming semester. If there are any questions of comments, feel free to call Eric Keimann at 5437123.

Study Religion

The ITT student and faculty religious study group "The Bible and You Today" will hold an open meeting this Tuesday, October 2nd at 12:15 p.m. in the HUB. Anyone interested in reflecting on the sacred scriptures and relating their meaning to contemporary life is invited to participate and to determine the texts to be examined. Visit the website at www.gospelofmark.com. The program is coordinated by the Chaplain's Office and the Inter-Religious Student Council.

Out of the blue

The Jeffersonian at the University of Illinois will hold an open meeting on Thursday, October 5th at 12:15 p.m. in the HUB. Anyone interested in reflecting on the sacred scriptures and relating their meaning to contemporary life is invited to participate and to determine the texts to be examined. Visit the website at www.gospelofmark.com. The program is coordinated by the Chaplain's Office and the Inter-Religious Student Council.

Need help?

Having problems with your homework? The AIAA is offering tutoring in Physics, Calculus, and lower level Chem and Mech courses. Stop by 112 EIT Monday, Wednesday, and Friday from 3:30 to 5:00.

Women leaders

On Tuesday, October 23rd at 12:30 p.m. the DSOIL Office will be hosting the 3rd Annual Women Student Leaders Reception. Deadline for applications will be October 1st. The DSOIL Office is located in 155D. Women student officers and major committee chairpersons may participate. For more information call J. Dowie at 5380.

CTA passes

CTA passes are on sale on the last five days of each month at the Commons lower window, Monday to Friday from 8:45 to 1:30 and 2:30 to 4:45. The passes are available to student discounts and faculty discounts. CTA tokens are on sale every day of the month. Tokens are sold in 10 packages for $8.50.

WU staff and students may use this service for purchasing their tokens and passes from the Commons at no extra charge.

Service station

On Tuesday, October 16th, at 12:30 pm at the ITT Service Station, Owen College. Station will be offering a workshops on "Washing Your Auto," and "How to Handle Car Emergencies." A drawing will be held amongst workshop participants for 500 dollar prizes. Sign-up in the DSOIL Office if you wish to attend.

Logo contest

WOU presents the "Logo Contest," commencing on October 1, 1984. Pricers include the following:

Look for details in Tech News.

The end is near

The schedule for the last two weeks of the semester will be similar to the schedule shown in the student center. The classes normally held on Monday, Tuesday, and Wednesday will meet on Tuesday, Monday, 10, 1984 (to replace Labor Day). The classes normally held on Monday will meet on Sunday, December 16, 1984 (to replace Thanksgiving Day). The classes normally held on Tuesday, Monday, 12, 1984 (to replace Thanksgiving Day) will be held, either day or evening on December 15, 1984, (to replace Thanksgiving Day). Finally, held on December 15, 1984 (to replace Thanksgiving Day) as scheduled for the registrar undergraduate day classes, and the normal class meeting time for all classes, evening or Saturday classes. This arrangement provides an equal number of meetings for each course and has been approved by the Council of Deans.
Technology news

viewpoint

October 1, 1984

Technopinion asks:

How do you feel about the Cubs winning the division title?

Randy King, ME

“I waited 39 years. I hope I’m not 65 the next time they do it.”

Johnny Hu, ARCH

“It’s great not only for the Cubs but also for the whole city. I hope they go all the way.”

John Talladreviews, ME

“Nice that the Cubs won, but I wish the Stings would get more recognition. They won their division also.”

Kurt Pearl, CHE

“It’s about time! Have a beerrrrrr!!”

Jennifer Dand, ARCH

“I didn’t know about the Cubs till the morning after.”

Mike Patson, ARCH

“I would have liked a subway series, but I’m glad one team won, just in time for me to get here.”

Peter Bauer, ME

“I remember back in ’45…”

Mel Hata, MATH

“It’s a shame more regular Cub fans won’t be able to see the playoffs.”

Dorren Smith, ME

“I’m a 3rd generation Cub fan. Win or lose, Cubs are the best.”

John Power, EE

“I’m not mad about the Cubs winning. I’m mad about Fairfield fans.”

Putting the “ten” back in tenure

by Joe Gattone and Jim Trice

So, now it’s up to the faculty. President Martin had his chance, now it’s the faculty’s problem. Everybody remembers the September 10 issue of Tech News, when a matter of great concern to everyone was made known. Referred to by the students as the “faculty vs. administration” issue, it has become the most talked about event since the arrival of the new batch of freshman females.

Everyone has an opinion about how the university can be “saved,” but we have not heard one workable plan. Being great visionaries, we have redefined tenure and formulated the sure-fire plan that will guide IT safety through the next decade. It identifies and corrects the most serious problem the university faces: the male-to-female ratio.

(For any dorm resident, this means the number of boys to number of girls. You see, the closer this number is to one, the better.)

(1) Current method of female retention is grossly inadequate and highly outdated. Giving them lower ranks in the arts will not work. While drawing these precious commodities to certain colleges of the University (as they are drawn to money), the plan neglects students with real majors, like us. Something must be done.

Consequently, we propose the creation of the “Help Us Get Ten” (HUC) committee. Its five-year mission is to seek out and retain rare, new females. To boldly go where no recruiter has gone before.

As for tenure, here are ten basic requirements which must be met before any faculty member can achieve tenure:

1) Times Arrived. Sauntering in at ten minutes past the hour or rushing in five minutes early in order to break requirement two will not be tolerated.

2) Must say Hello. Upon entering the class the professor must greet the students with a cheerful, “Hello,” gain their attention, and begin lecturing in a casual, and friendly manner. Professors must not begin the lecture in mid-sentence, completing an interruptive thought from the end of the last session.

3) Mode of speech. To be considered eligible for tenure, a professor must not speak in monotone. In addition, three out of five words must be recognizable as English or some derivative, partial or otherwise.

4) Legible writing. All symbols, words, and numbers must be recognizable as symbols, words, and numbers. For these professors who experience difficulty with this requirement, a class in the Palmer method will be available on the fourth floor of Farr Hall.

5) Dynamic lecture. Any professor who falls asleep during his own lecture will not be considered for tenure.

6) Chalk dust. Professors must accumulate at least two lectures worth of chalk on the back of their jacket in a creative and colorful design. This serves the following purpose: to provide comic relief for students subjected to violations of requirement five.

7) Equal opportunity. Male professors must make eye contact with at least three non-female students per lecture. However, female professors must make eye contact with at least three non-female students per lecture.

8) Wardrobe. Professors must purchase and maintain an alternative set of clothing. Only pants and jackets worn for the purposes of accumulating chalk, may be worn for two consecutive days.

9) Female exemption clause. Female professors need not meet requirements one, three, four, or six to be considered tenured.

10) Genie, kind, and understanding. Perhaps, as the faculty considers viable policy options, they will find necessary it to consult us. We freely offer our services and further details to our plan.

Why not you too?

Survey

A "comprehensive college" (one with more than 1,500 students, a liberal arts program and at least one professional program)

ATS encourages would-be leaders

On October 9th at 10:00 p.m. in the Hermann Hall Mezzanine in Room 300, the Association of Tech Students (ATS), the student government, will be holding its third meeting of the semester.

ATS feels it is important to demonstrate how you spent some of your free time. Therefore one of our goals is to initiate a leadership transition which would be set to the prospective employer. ATS also plans to publish the Connections Telephone Directory, which has been out of publication for the past two years.

ATS is responsible for the College Bowl program too. College Bowl is like a fast-paced trivial pursuit game where organizations compete with each other. The all-star team, selected by the judges, goes on to play in the regionals.

At the last ATS meeting the communications chairpersons were chosen. They were Amy Yang-Sweeney, David Mok-Curriculum, Brian Porter, Communications; Charlie Hannon, College Bowl; Maria Toro, Leadership Transitions; Payson College Teacher Evaluation, Joe Gration, Tech News Governing Board Rep., Evelyn Szygelski; W. O. Governing Board Rep.

It is hoped that student organizations will acknowledge the search for a new campus. DOD has been trying to encourage student organizations to become more involved in the community. We would like to encourage DOD to consider the effort of the student organizations and to consider the impact of their decisions on the overall campus.
Spring Thing is Back!!!

During the week of October 15 to October 20, hundreds of students here at ITT will compete for prizes totaling $800.00 cash!!

A treasure hunt will be open to any ITT student. Clues will be posted at 12:30 p.m. daily in the HUB. (The first clue will be printed on this page on October 15. The treasure will be a record breaking $1000.00 cash! (Think of the number of UB movies you could go to with that!)

Starting Thursday, teams will participate in various events including the annual trike race, an intertube race, a balloon toss, a tug of war, and a pyramid building contest. Activities will end with the awarding of prizes Saturday afternoon. The first place team will be awarded $500.00 cash, Second place: $200.00 cash, Third place: $100.00 cash.

Thursday night, everyone is invited to the Bog for the New Year's eve party of 1984. ITT's own Studebaker John and the Hawks will perform live.

Teams of 5 - 10 people can register October 8 - 17 in the HUB Director's office for a mere $25. Anyone can be on a team.

$25 for fun and the chance for $500. How can you beat it? Watch UBSH for more details or contact Mike Vilk at x 3074.

Focus on the Arts

Chicago Chamber Brass

"Outstanding" and "Excellent" were just two of the words used to describe the Chicago Chamber Brass after their performance here last semester. Their music ranged from traditional pieces to more contemporary show tunes and was always enjoyable.

Once again, the Chicago Chamber Brass will be playing at ITT. Their performance will take place on Friday, October 8 from Noon - 1 p.m. in the HUB gallery lounge.

Union Board is a student programming organization bringing entertainment to the ITT campus.
The day after

by Phillip Quarli and Ret Marut

The logo contest

Contest rules: On an 8½ x 11 inch blank piece of paper, place in the upper right hand corner in block letters, your name, social security number, and telephone number. On the other side of the paper design a logo with the theme "WOU-88.9 FM." Originality, clarity, uniqueness, and neatness will be used as criteria for final judgement. Students of IIT only for this contest (WOU! staff excluded). All winners are final. Remember, this contest will conclude when 25 entries are received, so get your entries in now. Stay tuned to WOU 88.9 FM for further details.

Not just any hangover, either. We're not talking about your everyday, run-of-the-mill, god-I-wish-I-never-started hangover. Being on a mission of immense wisdom and strength, Ubum could only be provoked by a hangover of equal wisdom and strength. A thousand iron-hard little men tap daintily on his skull, cheered on by a thousand nuclear explosions in his stomach. His mouth felt as if it had been painted with linen, and every time he moved his head, it threatened to come loose. This was a hangover that could have evicted entire armies in the past, a hangover that could sink a thousand ships and level a supermarket. In short, Ubum was not feeling well.

To top the whole thing off, he had no idea where he was. The room was in order, and the entire area was dominated by a huge HO scale train set with over a dozen model trains on it. It was just another train set made seemingly ashore, yet the topping was what really awakened the pup completely momentarily Ubum.

"By Mitra, Cron, and Disney," spoke the confused superhuman, his voice only a shadow of its normal balasiform intensity, "where am I? What is this infernal place?"

"You're on the fifth floor of Main Building, and you're in a hell of a lot more trouble, fella. Just hold it right there!"

The hostile voice came from a sinister-looking person wearing a uniform who stepped through the room's only door into time to hear Ubum's plan for enlightenment?

"Trouble?" asked the non-swapped commander. "For detailing a tiny train? Someone must have put that train there after I lay down to take a nap. Who would you be, citizen?"

""The uniformed man stepped up to the semi-conscious Ubum and put a pair of handcuffs on him. "I ain't no citizen, I'm Officer Gargantuan of the Campus Police, and you've done a hell of a lot more than that. You had a busy night, fella. Don't you remember any of it?"

"Ubum stared at the handcuffs, knowing he could snap solid steel with a flick of his eyebrows, and considered the question. "I remember having a sociable drink with a friend in the Bog, but everything is a bit hazy after that. I don't remember too much of it. Why do you ask?"

"Gargantuan snorted. "A Sociable drink?" he replied, mimicking Ubum's melodious baritone voice. "According to the manager, you emptied the better part of fifteen pitchers. After that, you assaulted some ROTC students and hustled up a table. Remember that?"

"Why, said Ubum. "I guess I did work up a powerful thirst at that. And I recall that it was the manager who asked me to something about the -"

"Shut up," said Gargantuan. "I ain't finished. After you left the Bog, we got reports of a lunatic outside the HUB drop-kicking squirrels into Wissenschaft Hall. The lunatic fits your description. This morning we found six holes in Wissenschaft, about $5000 damage, and six mashed up squirrels. We scraped another off the outside wall. You remember any of that?"

"Ubum shook his head, causing fresh waves of nausea to wash over his massive body. His sensitive nose identified garlic and cream-crusted cake on the officer's breath.

"I don't support you remember drinking Peulitist fountain dry either," asked the officer, rolling his eyes about in his head.

"According to one witness, you ate thirteen pigeons that were asleep near the fountain."

"Ubum eyes snapped open. "Pigeons?" he repeated. "I thought they were pieces of seaweed. I wondered about the boxes, though."

"Meatballs!!!" shrieked Gargantuan. "Those were birds! Pigeon, no less! How could you think they were meatballs, of all things?"

"Well," replied the slightly confused guard, his head swiveling about wildly, "I didn't think they were meatballs. I there a law against eating those birds?"

"I don't think so, but I do think you should have your head examined!"

"I agree," replied Ubum, feeling his head gingly. "It does not feel quite as normal now."

"Shut up. I haven't finished. After you ate the birds, we have no reports on you for about an hour."

---

The after Effects of Riff Raff

There was a man lying on the ground with his head on the railroad tracks. At first glance, he appeared to be dead. At a second glance, he still appeared dead, but was not. His powerful lungs sucked for air but steadily, and his mighty heart beat five times each sixty seconds. The man wore a stained white t-shirt, and had a thick mop of dark hair. It was none other than the famous Edmunds, new album, 'Riff Raff,' has just been released on the Columbia label. Musician working on this album includes Jeff Lynne, John David, Terry Williams, and Paul Jones. This is his ninth solo album.

Riff Raff is an energetic album. The rough beat and Mavis Staples of the music has its roots in the music of Buddy Holly, Chuck Berry, and other music of the '50s. The music is a little smoother than some of his earlier works. The first eight tracks are quiet, spaced intently, with hardly a break in the intensity. These songs seem to be an interesting mix of rockabilly from the fifties with the hard driving beat of the eighties. They are easy to listen to while being boring or unenlightening.

The last two songs provide an unexpected shift in the direction of country music. "How Could I Be So Wrong" is the only slow song on the album. It has a very strong country flavor, complete with a gospel-like choir. The last song, "Can't Get Enough" picks up the tempo again with a full-blooded rockabilly rhythm. The influence of some of Elvis Presley's music can be heard in this one.

"Riff Raff" is a consistently good album and ideal if you like dancing to rock and roll.
The band has been setting up and testing equipment for an hour. The excitement is slowly mounting. The jukebox is starting and the band’s amplifiers scream, “testing, testing one two three!” The band tries to engineer the best sound possible. The crowd pushes to a corner as once in a lifetime. The magazine, fire up their machines and begin to jam. They launch into a high powered set with their own brand of rock and R&B fusion. They perfectly bridge the gap between “black” and “white” music. The audience is ready for this. Now, however, amid this is the second time that band has played at the BOG. Their return was welcome and expected, judging from the crowd reaction.

This latest incarnation of Ooze Magazine has been together for about a year. The band is led by brothers Keven, on lead guitar, and Robbi Smith on guitar and vocals. Chris "Chris" Hammon, guitarist, has been with Big Twist and the Mellow Fellows, John Mayall, and the Coasters. Drummer Burt formerly of Deamott, and bassist Robert Haun round out the spirited quintet. John is the newest member of the band and replaces George Garcia.

Ooze played all original material staged from rockers like "Tina" to songs with "Open Up and Say Ahh." It seemed that Ooze covered everything. Their musicianship was excellent and they played together so well that the evening felt like a real band. The quality of the music was so good the entire audience was captured and sold on the sound that people started dancing.

Ooze Magazine has been recording some of their music and they hope to be able to get an album out over the next few months. When they do, there is no doubt that it will be a bigger one since people started to hear about this group. This Thursday in the Bog, Peter Dunne and the Rhythm Flames will be opening up for Ooze. The band has one of the highest sales in Chicago and the rest of the band isn’t so shabby either.

Library
continued from page 1
In 1979 President Martin made notice to denavigate from the YW year lease in its contract with Crescor. The resulting five year denavigation clause expires this fall, so the contract made in the early 1980's will become void.

In 1981 the University of Chicago agreed to assume control of the John Crerar Library. The library will no longer exist as a separate corporation. Since the original contract between Crescor and IIT had provided that in this situation IIT would have to buy Crescor’s share of the building, IIT was paying $3.1 million to cover that bill. Payments will be made between now and December 31st. At that time the building will be exclusively under IIT's control and solely for the housing of IIT's collection.

Crerar spent three years identifying the books it had in common with the University of Chicago's library. It is now trying to raise money by selling them. IIT's library has bid on various portions of the books to increase its own collection of scientific and technological information. Crerar accepted his bid and will turn over to us 18,000 monographs and 86,000 journal volumes. IIT also accepted Crerar's federal depository document (100,000 volume equippage of pamphlets, booklets, etc.)

The problem of refurnishing and renovating the building on campus has now arisen. With its collection, Crescor also took its furniture. IIT is left with a sparsely furnished building with huge holes in the 22-year-old carpet where shelves once stood.

In addition to reconfiguring and repainting the new furniture to improve the atmosphere, IIT will be repairing, tapering the roof, replacing windows, and repairing the fruit stairs.

Funding for the renovation was provided by a $500,000 McCormick Charitable trust grant. IIT will get 1/3 of that amount per year for three years. Library officials report that the grant only covers 1/2 of the renovation to the building currently underway. Other funding is being supplied by foundations, individuals, and alumni.

A goal of $10 million has been set to pay the freight. This includes the building purchase and renovation and $5 million for new books and computers.

Other plans for improvement in the arrangement of the facilities have been made. A 20 foot circulation counter will be built at the entrance on the lower level. Circulating materials will all be moved downstairs so that users who only need to check out or return books will not have to go upstairs. All of the reference materials will have been moved into the lower level. In addition, the current business library materials have been moved into the main library collection.

To maintain smooth operation IIT hired a director, David Powell. Previously, a Crescor staff member was designated to be in charge of the Kemper collection. Also, a reference librarian will be transferred from Crescor's payroll to IIT.

New services include a telephone renewal service, on-line database searching, user instruction on computer terminals, interlibrary loan from national, state, and other local sources, and a service to get library materials to IIT, VST students.

Appendices continued from page 1

"There is tangible and significant progress, there are the key words," Dr. Martin told Tech News on Friday. He also commented that his letter of September 28 to Dr. Ernst tells the whole story. That letter is published in its entirety in this issue of Tech News. "There usually was a September 30th deadline on the letters of termination for 24 faculty members for 1985-1986. I am actually dissuading the institution of my own Board. If any president has ever put his confidence in his faculty, I have.

Dr. Ernst, Faculty Senate leaders, pointed out that "this is first step, not a last step. There has to be follow through in the next few years. We can't just go back to business as usual."

The Faculty committee still has the task of producing an alternative proposal for balancing the budget, to be presented to Dr. Martin by October 15. The next meeting of the IIT Board of Trustees is October 19.

The complete text of "ITT in the Decade 1985-1995" including Appendices A and B was published in the September 10, 1984 issue.

Letter continued from page 1

10,000 reduction is required and will be achieved. Some of these proposed reductions are not permanent, but they do buy time while more permanent solutions are sought. Permanent solutions for 1986 and beyond are required because these periodic times will be with us for the next decade or longer.

The emergence of this new Faculty Committee, the effectiveness of the Deans and the Lewis College Faculty Planning Committee in reducing direct institutional costs for 1985-86, is convincing evidence of significant tangible progress toward a balanced budget for 1985-1986. In fact, using ITT's different from those proposed by the Administration in August, I believe that ITT has reached a new state of institutional balance. The faculty is committed to responsible participation in controlling its own expenditures to meet its professionalism, and their corresponding impacts upon university operations.

Thus, assuming that the progress toward a balanced budget for 1985-86 already achieved together with the additional progress that will be accomplished by October 15, 1984, I will:

1. Withhold the invoice of any faculty termination for the 1985-86 year.

2. Recommend to the Board of Trustees on October 19, 1984, that the Policy in Appendix A of the recommendations is withdrawn with ITT for The December 1985-95 specifically the Policy Regarding Termination Resulting From Program Reduction be discontinued.

3. Recommend the elimination of Appendix B - Procedure For Faculty Staffing of IIT for The 1985-86 Academic Year.

It is vital to understand that higher education is no longer a luxury in ITT in particular, will be in difficult financial straits throughout the remaining decades. We must face the fundamental fact that ITT, and all other institutions of higher education, must significantly change their mechanisms, processes and policies which allow reductions, expansions and realignments to faculty resources to respond to changing needs. IIT's New University Faculty Planning Committee has the opportunity to lead the way in the solution of this problem, setting an example for the entire country. The responsibility of a faculty in a mature University can use the fundamental principles of collegiality and professionalism to address a strong national and institutional problem.

Sincerely,

Thomas L. Martin, Jr.
President

ATT continued from page 3

The benifit in having a representative attend a meeting, the basic function of the representatives organization which would assure a constituency for the rep. ATT is now being considered by positions outside of the assemblymen and executive council.

Once again students are the driving force behind ATT and to accomplish the 94-95 goals will take the cooperation of many students. ATT hopes that all organizations will select a rep to attend council meetings. If any of these committees sound interesting, please stop by and attend the meetings.

Bowling
continued from page 1

Mary Beth Rico, sophomore

Any female interested in joining the bowling team should contact Coach Binder in the Coliseum. Hall Information Center.

Eleven of the twenty six games for the bowling team are against opponents only. These games are in the Middle Illinois Bowling Conference which is made up of teams from Chicago area schools. The other games are with teams in the Central Illinois Conference.
PC’s come to IIT

by John Malvihill

In the spring of last year IIT purchased 23 IBM personal computers for the Academic Computer Center. They are located in the basement of Stuart Building in the Information Processing center.

The computers were purchased with some of the funds acquired from the new library/computer fee which was instituted this fall.

The personal computers were purchased for two main reasons. Our is to instruct the staff in the many uses and the power of the micro-computer. The other reason is to involve students from all fields in the world of the micro-computer.

Several software packages were made, including Framework, Dbase III, IBM Writing Assistant, and Waterloo University Language Package which includes Fortran, BASIC, Pascal, AP1, WSL, COBOL, and Assembler.

The personal computers are currently being used by the Staurt School of Business and the IIT English Department for word processing and other related uses.

However, the center is open to everyone. A complete guide can sign up to use a computer. The computers are also connected to the VAX and PRIME computers for access to other classes.

REALITY WARP II

WAIT A SECOND... WE'RE GOING INTO DANGERS TO DUEL ARMORED TROLLS WITH SWORDS? IT'S CALLED APPROPRIATE TECHNOLOGY, SORAR. I'M GUNNIN' FOR THAT ONE.

SEVERLY INJURED, I DON'T THINK YOU SHOULD BE UP AND ABOUT. DON'T WORRY, I WAS ONLY TRYING TO GET BOXED INTO THAT PLACE, AND I DON'T THINK I CAN DO ANYTHING NAR. MAYBE WE CAN FINISH THIS LATER. COME WITH ME.

HIT THE GUNS, AMISH GIRLS! COME WITH ME. I PROMISE IT'S NOT WHAT IT SEEMS. IT'S ADVENTURE TIME WITH CHARLIE'S MOTHERS.

I'VE ALREADY PLOWED THROUGH TWO COMPLEX CARTRIDGES...

I'M WEARING THE POP SWORDS AS ANGELS. I LOOK LIKE A SNOW WHITE.

IT MIGHT BE A STRUGGLE. I'M ALREADY HAVING A HAIRED SCALP LIKE IT.

HEARD OF EM-EXCEPT FOR ONE. HE'S IMMOLATED THEM. NO EYEPATCH ON HIS EYEBALL. HOPE I'M NOT THE ONLY ONE HERE.

ONLY TO BE CONTINUED...

I HAD HOPED TO NEVER SEE FEARWORLD AGAIN. BUT HERE I AM, AND IT'S KIND OF BEAUTIFUL...

WE'RE TREKKING IN SEARCH OF THE TWO KINDS OF THINGS THAT OFFER, TOWARDS THE STEEL FARMER'S COMPOUND.

FROM THERE, WE COULD AT LEAST FIND OUR WAY AROUND. FEARWORLD IS BIG... I'D THINK A THOUSAND TERRIBLE LATE SAYS ABOUT THE THINKING.
IIT sails to third

This past weekend (Sept. 21), IIT traveled to Detroit, Michigan for the Slooip Championships. Differing from other regattas, this regatta has only one class in which each school competes directly against other schools. Nine different schools competed, thus there were nine separate races. Competing for IIT were Gary Winer, Aaron Houston, and Tom Menna.

IIT took third place. In the point race, we acquired 1 first place, 3 second places, and 1 third place. We tied Univ. of Michigan right up until the last race. (University of Michigan ranks highest among the schools of the Midwest Collegiate Sailing Association (MCSA)). This indicates one of two things: either IIT is increasing in proficiency of U of M is decreasing in skill. We know we are getting better.

The ranks of the school are as follows: I - Miami of Ohio, 2 - Univ. of Michigan, 3 - IIT, 4 - Ohio Wesleyan, 5 - Notre Dame, 6 - Michigan State, 7 - Northwestern, 8 - Western Michigan, and 9 - Kent.

The Saturday sailing program is also coming along well. This past week 11 people attended, with all of them getting out on the lake and sailing. If you are interested, (you really should take advantage of this opportunity), come to the weekly Tuesday meetings of the Sailing Club in the HUB to learn more.

How to interview companies all over the country in a single day.

BPI-SOURCE™
The Satellite Communications Recruiting Network.

If you are graduating with a technical degree, ready to find out what jobs await you, here's an opportunity you won't want to pass up. Come to the premier telecast of BPI-SOURCE, the Satellite Communications Recruiting Network. We bring major companies and their career opportunities to you, the high tech college grad.

How it works.

Major technical company presentations will be transmitted to 30 U.S. campus communities from a satellite 23,000 miles up. You'll watch their presentations live and in full color. A representative from each company will talk about their philosophy and job opportunities. And then proceed to take you on a video tour, show products, tell about the area, or have other employees give views about working for the company. Following each company's presentation, you may ask questions and see the answers.

What companies are participating.

Among the companies telecasting live to your campus are Sperry Computer Systems (formerly Sperry UNIVAC) including all domestic operating units, nine divisions of Belltronix, Inc., five groups of Combustion Engineering, Inc., the Federal Aviation Administration and three operations of the National Security Agency. There will also be a special presentation, "Space Station... The Next Logical Step," by NASA.

Featured speakers include Polly Rash, Director of Marketing at Satserv (formerly with Public Service Satellite Consortium), Dr. Russell Drew, Vice President of Student Career Development of IEEE, and Dr. Marvin Centron, author of Jobs of the Future.

How you'll benefit.

Through this one day video teleconference, you'll learn about many career opportunities that are awaiting you. BPI-SOURCE gives you, the student, a chance to learn valuable and helpful information about each company.

Participating companies are recruiting students majoring in all engineering disciplines including aerospace, chemical, civil, electrical, electronic, industrial, mechanical, all disciplines of computer sciences, plus majors in aviation management, math, physics and all other technical degrees. Admission is free. High achievers and above average grades are welcome. And no registration is required. In addition to the company presentations, question and answer periods and featured speakers, there will be special door prizes including BPI-SOURCE T-shirts, T.I. Scientific Calculators and a surprise Grand Prize. We'll also have helpful information on each company to take with you.

The BPI-SOURCE presentation is Oct. 13 at the Ballroom, Herman Hall, Room 402 and will include a live morning telecast at 10:00 a.m. CDT and a live repeat approximately 3 hours later. Choose the telecast that best fits your schedule.

Pick up further information including presentation schedules at the placement office or call: BPI-SOURCE 1-800-328-4032
by Jim McNaught

The soccer team chalked up two impressive victories this past week, beating Olivet Nazarene 1-0 on Saturday Sept. 22nd and embarrassing Judson College on Wednesday Sept. 26th by a score of 4-0. In the first game, the Grubbich brothers, Nick and Mike, dazzled the defense of Olivet with an awesome offensive display consisting of a hat trick by Mike and two goals by Nick. Throughout the 90 minutes of play, IIT controlled the course of the game and toyed with the opposition's Artesia, scoring at will. IIT's defense was so solid, it enabled its crafty stopper, Monofac Hollis, nicknamed "the fox," to advance on the offensive line where he scored two goals. Also scoring a goal were midfielders Johnny Aparicio and Johnny Bono and forward Steve Aparicio. Olivier scored its only goal on a free kick late in the second half which denied the Scots Hawks of a shutout. The game against Olivet Nazarene was exciting but IIT's victory over Judson College was much more satisfying for its players. Judson had a very talented team but IIT, with its superior skills, totally outplayed the team which had defeated them by two or three goals in previous years. The offense of IIT played as if they were in the World Cup, making goals, passing, creating space and fighting for every ball. Judson tried to fight back with its own defense but failed against IIT's brick wall defense which includes stopper Monofac Hollis, sweeper Jim McNaught, fullbacks Trino Romero and John Tallarivo, and goalies Horst Stange. Monofac Hollis scored the second goal in on a breakaway set up by senior midfielder Jhamil Bonn. Midfielder Johnny Aparicio pounded the second goal in on a volley from 20 yards out. Forward Marcus Chambers scored the third goal, devastating Judson's goalie on a point blank shot that was assisted by forward Mike Grubbich from a corner kick. Nick Grubbich put the finishing touches on Judson, scoring the final goal on a head ball through the overextended hands of the goalie. On Wednesday Oct. 3rd, IIT hopes to avenge last year's narrow defeat against their downtown rivals from Roosevelt University and boost its record to 4-2. All IIT soccer booster club members will be admitted free to the game.

Soccer schedule
Oct. 3 Roosevelt A 3:30
Oct. 10 North Central A 4:00
Oct. 17 Purdue U 4:00
Oct. 24 U of C A 4:00

Want to move up quickly?
- Earn $1000 a month during the school year
- As a freshman or sophomore, you could complete your basic training during the six-week summer sessions and earn more than $1000 during each session
- Juniors earn more than $1000 during one ten-week summer session
- You can take free civil aviation lessons
- You're commissioned upon graduation

If you're looking to move up quickly, look into the Marine Corps undergraduate officer commissioning program. You could start off making more than $7,000 a year.

Wanted: you can be one of us.
