Faculty discusses staff reduction document

On April 11th IIT's faculty met to discuss the controversial document entitled "Procedures and Standards for Layoffs, Mergers, and Eliminations." At that meeting they approved a revised version of the document (see April 19 issue of Technology News).

Last Friday, April 19th, Dr. Margaret Huyck from the Psychology department made a brilliant presentation in lieu of the University Faculty Planning Committee to the Board of Trustees, in support of the original document. The Board met for two consecutive days after the document was presented to them.

Dr. Frederick Ernst, present Chairman of the University Faculty Planning Committee, said that he feels the Board probably did not adopt a specific version of the document yet, because they didn't seem eager to decide. The decision of the Board has not yet been released. However, Ernst reported that all six of the UPPC representatives came away from the Trustees meeting with a feeling of optimism.

On May 31st the new Faculty Senate Officers will be installed as required by the Senate Constitution. The new chairman will be Dr. Bob Roth (from the engineering department). Dr. Kenneth Hass of the Environmental Engineering department will retain his position as recording secretary. Corresponding Secretary will change from the School of Architecture to the Math department. The chairman (continued on page 7)

IIT Placement Coordinator leaves

by Linda Partridge

Jeff MacQueen, the IIT Placement Coordinator, is leaving for a better job that offers more opportunities to attract more businesses to recruit at IIT. However, because of the job vacancy, these projects will be delayed.

For example, the Placement Office continues to be the liaison between the full-time permanent placement of students and the companies. However, 80% of the graduates placed at the end of the school year are engineers because many businesses think that IIT produces engineers only. One project would be to design a system for better searching and selecting candidates for all departments.

MacQueen says the position of Placement Coordinator is a good job and IIT's enjoyable, but the pay would have to be increased by about 50% to be comparable with other industries.

MacQueen believes that the placement position will continue to be like a revolving door for employees if things don't change. "The point is," says MacQueen, "there is a lot more competition for these positions than people think. The Placement Coordinator should be a professional position and it's not a good job." A degree in Business Administration is required for the job.

Teacher evaluation program to begin

The end of the Spring semester marks the beginning of a new teacher evaluation program at IIT. Rayney Collins, Vice-President of ATS and chairperson of the Teacher Evaluation Committee, hopes to have the evaluation forms distributed before the end of this week.

There are two significant aspects of this new program which distinguish it from the evaluation forms already in use. First, the new evaluation forms will be available to all IIT students. As it stands now, it is left up to the individual colleges whether or not they will administer teacher evaluations. Second, the questionnaire has been designed by students for students.

Ranay suggested that it is the letter point which has caused some uneasiness among the academic deans. Overall, the administration supports the new teacher evaluation but at the same time warns that the Teacher Evaluation Committee should guard against students' preconceived emotional reactions to the new program. The student reactions are what the new program is all about.

IIT students to receive Strykers

Twenty-five of IIT's most outstanding students were honored last Wednesday April 26th at the Annual Stryker Distinguished Awards Banquet. The awards are given for distinguished service and contribution to campus life at IIT.

The awards are presented to their contributions to every aspect of campus life. For example, Linda Lee, a senior in the Institute of Design, won the IIT Campus Market category. Michael Mass, a senior in Architectural Design, received the Honor Roll for his work on the campus layout, and doing the yearbook. She began her business in 1962.

Michael Mass established his venture MS, Inc., in January 1964. He does computer consulting, hardware installation, programming, and software installation. His organization is comprised primarily of himself, but he occasionally does contract work, supervising and approving all the work he subcontracted out.

Sema's business, Char-le's Superrine Auto Detailing, provides personal-ized car cleaning service to his customers. He sets up an appointment, picks up the car, details its owners specifications, runs a safety check, and returns the car to his client. He has been in business since 1982 and has plans to hire two drivers this summer.

His Honorable Mention winner Jimenez is the owner of Astilla Vending, a venture which he started earlier this year. He provides and stocks coffee and continuous on page 7

Tech Entrepreneurs announce winners

Three IIT students who have started and currently run their own businesses have won Tech Entrepreneurs' 2002 Student Entrepreneur of the Year Contest. Linda Lee, a senior in the Institute of Design, won the On-Campus Market category. Michael Mass, a senior in Architectural Design, received the Honor Roll for his work on the campus layout, and doing the yearbook. She began her business in 1962.

Summer jobs
Summer will soon be upon us. A summer job is an excellent way to gain work experience, as well as earning money for your education. Companies are already beginning to contact the Placement Department for their summer needs. So get online with the Placement Department (Farr Hall: Room 407, ask for Lisa Mechnic) right away!

IEEE meeting
Attention EE and IEEE students, the IEEE will conduct a general meeting on Thursday, May 2nd in the E1 auditorium. The main topic will be an overview of the IEEE in the coming years and what elections will take place. It is encouraged that those Electrical Engineering students who are not members yet should attend this meeting. The meeting will be running from 12:10 to 1:00 pm. For those of you who already are IEEE members the meeting will provide you with very useful information for next year’s activities. Hope to see everyone there.

Look for Dinosaurs

Holy Bible
This Tuesday, April 30, “The Bible and You Today” group will react on the final stage of Christ’s mission as given in St. Mark’s Gospel, namely the composition of the Last Supper, the sacrifice narrative, the arrest and trial. The IIT community is welcome to participate in this Inter-Christian event at 12:15 pm in the Field Conference Room of the HUB.

SWE meeting
The Society of Women Engineers will hold their final meeting on Wednesday, May 7, 1985 at noon. Special refreshments will be served. All members should attend and bring a friend.

Graduate school
Thinking about Graduate School? Applications are available at the Office of Graduate Admissions in Pearson 254. Phone: 567-3609.

Don’t be lazy
“Overcoming Procrastination” is the title of this week’s Counseling Center Workshop to be held on Friday, May 3rd from 12:15 to 1:15 in the HUB Mezzanine.

Want to be a DJ?
WOU is looking for people with an interest in radio broadcasting for the Fall of 1985. If you are interested in joining our staff, submit an application to WOU Radio, May 7th at noon on the 9th floor of the Main Building in the WOU Office.

Writing winners
The Humanities Department is pleased to announce winners in IIT’s 1984 writing contests: Kris L. Lee, for the Lily-Daisy Prize for her essay “A Debt to Howard Griffith’s Courage”; William S. Saylor will have the Mollie Cohen Poetry Prize for the poem “The Story of Creation.” Sean Wasko will receive first place in the Edwards-Lewis Prize for fiction with the story “Mike Hamilton.” And Eren Chavez has taken the second place prize with his story “A Morning in Jalpa.” Awards will be presented in a ceremony open to all interested members of the IIT Community on Monday, April 29, at 3:00 in Life Sciences 106.

Big weekend
The International Visitors Center of Chicago will hold its annual Lincolnwood Weekend on May 3-5, 1985. International students who have participated in this event in the past agree that it is one of the highlights of their time in the U.S. Students will stay with individual American host families while visiting Springfield, our State Capitol, and other areas in central Illinois. The cost to students is only $55 for the weekend, which includes transportation, lodging and meals.

Orientation program
A new program has been designed for freshmen orientation and will be taking place in June 24-25, July 11-12, July 22-23, and July 29 (Saturday). Each of these dates will provide an overnight experience for the new students, in the residence halls. An occasion has been provided each of the evenings by organizational representatives to meet with the new students. If your organization would like to participate in these events, you need to contact Janice Dawson in the Student Life Office ext. 3000 before May 8th for details.

We’re banking on your future.
At The First National Bank of Chicago, students from Illinois can borrow

- up to $2,500 a year for undergraduate studies
- up to $5,000 a year for graduate studies
- up to $3,000 a year for Auxiliary Loans to Assist Students

To request an application, call us at (312) 407-3413 or 407-3420.

ATS holds nominations for officers
On Tuesday, April 23, the Association of Tech Students will announce the nominees for the executive positions of ATS. The elections will be held on Tuesday, April 30 and Wednesday, May 1.

In Search of Sex at IIT by Conrad Pilgrim

let’s talk sex.
No, not the sweaty, groaning type of sex that occupies so much of our waking thoughts and so little of our waking time. I’m going to keep on a much more harped-up tone: sex as in male and female, specifically between the two.

Even more specifically, relations between the two at IIT.
I can almost hear you groaning! Oh, no, not another blatantly anti male/female article by some half-assed writer who wouldn’t know a hormone from a fallopian tube! I thought we passed that stage sometime last semester?
Well, hey, I thought that, too.

Then my editor told me to whip up an unbiased report on how seemingly adult men and women interact here at IIT, the biggest party school for blocks around. It had a novel ring to it, I thought. Here I would have an excuse to ask strange women and men who they thought about the opposites sex here at IIT. I knew I could enjoy an assignement such as this, even if I did get me kicked out of a dorm room in Lewis. What good will this report do, though? I mean, IIT is not the cultural or social center of the world; it is a backwater, populated with the usual scum that lived in algae

tidied ponds. Any such report will not make a whit of difference to the average student. Still, it might be fun to do.
The basic sex-related problem at IIT is the male to female ratio. I mean, face it, folks, there’s one hell of a lot more guys out there than girls.
This is, of course, not our fault; it’s a situation handed down to us by our collegiate ancestors. Only recently have women been enrolling in Tech schools in any large numbers, challenging the old tradition that women do best as Home Ec or English majors looking for an MFA degree. It was all they were expected to be able to handle. After getting my butt kicked on many exams by the girls that sit behind me in class I am inclined to disagree. It’s not no longer a question of whether women can handle high tech subjects; the question these days is, are they treated as equals?
The majority of the women I talked to said that there was a lot of prejudice running around the campus, especially in engineering fields. “A lot of prototols don’t think women are capable of the same things men are,” said one disgusted female engineer. “They aren’t always open about it, but a lot of them are.”

None of the men I spoke with claimed to have seen any discrimination in the class- room. This suggests that the women that claim they have been discriminated against are lying or paranoid; teacher discrimination is a very ugly subject and most people go about it very carefully. These professors, however, come from a different Taft generation than today’s student. Any prejudice they have about women could be seen as a vestige or generation gap, and nothing else.

But is it restricted to the older generation? How do the students view the gender gap? IIT women are not what you’d call the cream of the crops,” said one fraternity member. “It’s like when you’re drunk at a bar and you realize all the good-looking ones are taken. Then you just have to cope.”

IIT men are often rather socially inept guys,” countered a sorority girl. “They don’t know how to handle having a drink; they’re too wrapped up in their majors.”

What we have here, is a failure to communicate. When you ask someone at IIT about the opposite sex, you’re going to hear a lot of nasty remarks usually saved for political rallies and churches. And yet, despite their jibes at each other, they interact, both socially and intellectually. Perhaps there is a kind of unspoken contract between the two camps.

"What the men at IIT are going to have to realize is that the women here are a cross-section of the world without the country. They’re not cows and they’re not all bitches,” explained a female business major. "The difference is that they’re all intelligent and proud of it."

So what are IIT men looking for? One student said that there are some good-looking women on campus, but insisted that there were more to look for than "all the really good lookers are pretty standifhish; he said. "They know that they’re a minority here and they use that fact.

Despite its source, a typically sex-starved dorm dweller, its statement may have some merit. At almost every party on this campus, including those thrown by sororities (at fraternities, of course), show a predominance of males. Face it, no party on campus comes because of lack of guys (although some Kappas I know claim otherwise). Are all IIT women a little choosy?" "We’re no choosier than any guys," insists a commuter who is engaged to something the size of a mountain. "Some of the guys in this are real jerks. They won’t even glance at you unless you’ve got a perfect body and blonde hair."
The men find this attitude a little odd, though several men claimed that, because of their scarcity, women were treated better. Women that are average looking anywhere else are a lot of attention at IIT. A lot of girls are treated like one of the boys.

A freshman noted: "Women at IIT get a lot more respect. They’re peers to the men. It’s hard to look down on a girl that does better in class than you do."

Not all women share this view, in fact, it was a minority opinion. Most of the women I talked to did not think men treated women better because of their rarity. There are no superstitions about men place their hands on a door before them, they are too afraid," said one dorm resident. "They’re not very good at men, I’ve been rather the other way.

Another girl mentioned the fact that if a male student did put forth the effort to meet a girl, they expected to score right away. "The women here just aren’t like that. They’re not so easily conjured on page 17"
The Association of Tech Students has had a busy 1984-1985 Academic Year. It has co-sponsored many events and services to students. Some of these are: Connections, the IIT Student Directory, the Fall Leadership Conference, College Bowl, the ATS Student Forum, teacher evaluations, the changing of the freshman exam period from 1:00 to 11:00 am on Tuesdays, University Relations (concerned with arranging hometown newspaper releases, among other things), and the upcoming Spring Conference, which will be held on April 30 in the HUB mezzanine in rooms 302 and 303.

In order to continue to offer these events and services, they need your help, as an IIT student, to select new officers for ATS. The positions of president, vice-president, secretary, and assistant treasurer are to be voted on Tuesday, April 30, from 12 to 2 p.m. in the HUB Commons, and on Wednesday, May 1 from 12 to 2 p.m. in the HUB Commons and from 5 to 5:30 p.m. in the HUB Commons and at Dorm cafeteria.

All IIT full-time graduate and undergraduate students are allowed to vote on these positions. There are also positions available for the spring term. The elections are democratic. Now, here are the candidates for the ATS offices and don't forget the ATS Correspondence President Martin will be attending and refreshments will be served.

Freeli Parikh
Dear Student:
My name is Freeli Parikh and I am running for President of the student government. During the past year, I have assumed leadership roles in several organizations through which I have gained experiences in relating to and working with people. As an ATS Connections (student directory) committee director, and International Festival fashion coordinator, I have gained managerial and organizational skills. As a communications representative, and Preview Day and a Firstright of the Technmate program I have gained communications experience. With these skills I feel I am qualified to fulfill the demands and responsibilities of Vice-President.

If elected Vice President, I intend to continue to do all these things to promote the administration of ATS. I believe ATS has made significant advances in the areas of security, course curriculum, leadership transition and teacher evaluations. As a member of the executive board, I would be able to innovate and encourage ATS to further its accomplishments to fully serve the student body.

I will work to hear the students' voice and represent them. In this decision the committee of ATS, I would work on strengthening lines of communications between ATS and other student organization so that the needs of the student body, vote for me, PREETI PARISH; for Vice President and you will be proud of a productive and representative student government.

Annette Vujovich
Many IIT students are not aware of the activities of their student government. Did you know that you are a member of the student government association? As a member you have the privilege to have your opinions presented to the faculty and administration. Views would otherwise be unheard and unanswered. As an assistant treasurer, primary responsibility is to see that the money is properly spent. I am also concentrating on increasing student satisfaction among the various student organizations, increasing interaction between these organizations, and the general task of the continued representation of the student body to the faculty and administration.

This year has been an incredibly rewarding experience for the thanks to ATS. I ask you to allow me to repay the organization and student body by serving as president during my senior year.

Raynor Collier
I've been actively involved with ATS for the last two years. Currently I am vice-president. My past accomplishments this year have been attending coordinating ATS events, working closely with the President and the student organizations to discuss concerns and exchange ideas, and organizing the Springfield Green and taking part in the golf tournament.

If I'm elected to be your President and I'm running for Secretary of ATS. I am an MAE major here at IIT. As an qualifications, I have experience working as a security guard. Currently I am an Administrative IIT student leader with the IIT Emergency Services and Disaster Agency (Civil Defense). If I have served for two years as an executive board member, I am currently vice-president of the student organization and I am a skilled leader. I am an IIT student leader of a Boy Scout troop. While in Boy Scouts, I attained the rank of Eagle, a rank only made by 19% of all increased financial aid.

The office of assistant treasurer would be my best opportunity to provide for the continued growth of ATS, something our administration has been very concerned about. This office would challenge my creative talents. The job calls for responsibility with ATS, developing leadership skills which I have.

So come on out and vote; after all, it's your right.

scouts
Someone asked me what my goals are as secretary. My goals are simple: to become a channel for students to directly receive information about ATS as well as to relay information from the students to ATS. Too many times the voice of the student is cut short at IIT. I can guarantee one thing: any opinions given to me by any students will be relayed directly to ATS. Your opinion does count, you are our student government. Show that you care by voting in a qualified individual as secretary of ATS.

ATS: A very productive year

The Association of Tech Students (ATS), IIT's student government association, has experienced an unprecedented productive year. ATS is responsible for presenting student opinion to the faculty and administration for negotiation. Numerous committees have convened throughout the year to address the issues brought forth to the ATS assembly. At least four times each semester, the ATS Security Committee, chaired by Amy Yang has met with Don Mielnsikas the Director of Physical Resources to discuss matters regarding campus safety ranging from students to the academic buildings to the residence hall to the frats.

A successful foot patrol, student assistance, lighting security systems and campus development were also among the issues being negotiated. In addition the parking fee has been frozen for the second year.

Freeti Parikh, chairperson of the ATS Connections Committee, organized the type-setting, printing, sales, and distribution of the student directory. This was the first ATS has published the booklet. With Armour College as the model, the ATS Teacher Evaluation Committee, chaired by Raynor Collier, has worked with different college representatives to develop a T-Val form. Distribution should begin this coming week. The results will be tabulated and published for students to use during registration.

To show how an active student organization can engage with its target audience, the ATS Leadership Transfer/Opal Committee chaired by Milla Rice, has organized a new yearbook. To develop this form an official university document and are pleased to announce that the placement office.

In an attempt to promote "continues on page 10"
In praise of the Tech News staff

To the editors and staff of Tech News:

We the undersigned members of the Tech News Governing Board, are pleased to report that your readers find the paper interesting and newsworthy as never before. Even the April Fool's Day issue was marked by a superior brand of humor and control over the facts.

All of this is in that the paper, under your unprecedented efforts, has last reached a degree of professional journalism that we long hoped to see possible. You have set a challenging high standard of excellence for your successors, and if they are faint-hearted at the prospect of meeting it, we have only to point to your exemplary work and say, it can be done!

And you have done it despite certain-weighty administrative problems that resulted from our own efforts to try out a new system of operation; to mention the hundreds of hours you have spent on the company's accounts, the weekly edition is a laborious task that many are like to take a large class as a freshman.

Therefore, if you consider that you are not perfect, we think you are making a good start, and if you do not think you are making a good start, we think you should be making a much better start, and if you do not think you are making a much better start, we think you are making a much better start.

We, the undersigned, are pleased to see that the paper is being printed on high-quality paper, and we hope that you will continue to produce it in such a manner.

Sincerely,

Jim Longworth, Ph.D. Visiting Professor of Physics
Leon Mason, Ph.D. Lit. D. Professor of Anthropology
Janice Dawson, Asst. Dean of Student Life
Joe Gatto, ATS representative to Tech News

A commentator speaks out

Dear Editor,

In an earlier edition, your paper featured a tongue-in-check article explaining the problems caused by committing students in maintaining the integrity of the paper. The paper stated, that this was the result of students turning in papers that were not original or went beyond the scope of the assignment. I urge you to consider this a matter of concern.

As a commuting student, I am one of those students who find it necessary to use available computer resources creatively. As a commuting student, I often have large blocks of time between classes. I try to use this time to complete assignments. The biggest obstacle to this end is finding desk space where you can sit down, spread out your books and get to work.

As a solution to this problem, I suggest that the room that once housed the Stuart Library be turned into a study hall. This area seems to naturally draw students because the adjacent lounge is always filled with people.

John E. Jermoin

A tradition of cheating at IIT

Dear Students,

There is no deficiency of IIT that is often talked about, but no action is ever made to correct it. Cheating is a tradition of cheating, it can no longer be ignored by saying that "cheaters are the rule, not the exception." As students, we need to actively pressure the administration and faculty into recognizing the problem and stop it.

Every person at IIT is affected by cheating. Students who earn high GPAs honestly have their achievements diminished. Students with average grades work only to see lower scores than they would have if there was no cheating.

The administration loses. Too many companies hire high GPA individuals who turn out to be incapable of helping the company. Placement rates remain low. It's time to start hiring more IIT graduates. As far as IIT's reputation is planning, the administration cannot afford inaction.

Professors are left in the middle. If they give an honest effort and catch a cheater, there is little effective action they can take. If they conveniently "don't see" what is happening, their personal gratification is greatly diminished.

Contrary to the esteemed President Moore's reputation, cheating is a problem that a 3.0 GPA here is equivalent to a higher GPA elsewhere, a 3.0 GPA here should be equivalent to a 3.5 GPA. A 4.0 GPA here is a 4.5 GPA, a 5.0 GPA here is an 8.0 GPA. I argue that these grades are merely self-serving, not necessarily beneficial to students. Cheaters are receiving greater than 3.75 and less than 2.0. They are able to cheat in classes such as Math and Chemistry and Indian and any combination of the above. They are in every academic major. And they are cheating every honest student, every professor, and every member of the administration. Who cares if they cheat themselves?

But I care when I spend an entire week studying for an exam, only to have my grade wiped out by the cheaters.

It is time for students to demand that President Martin do something for us. In the process he will be helping himself and the sagging reputation of IIT. It is time for students to get off their butts and walk around the classroom during an exam. Professors cannot give exams where cheating can be falsified. For example, open book/open note exams, essay questions, and real exams are hard to cheat on. Of course, this means more work for the instructor, but also more accurate results. One additional comment for the feasibility of this is that you may want to remain seated when the exam is over and pick up the exams. I have seen three pages of an exam in two and a half minutes walk to the front of the class.

The administration is the final step to exterminating scams from IIT. Any undisputable case of cheating should result in immediate expulsion on the first offense. If there is some doubt as to the offender's guilt, have the suspect as soon as he or she is caught, take the oral examination with the radiology expert, another professor of the same discipline, and an administrative representative in attendance. The second professor and administrator are there to act as moderators and witnesses, if the first professor is still in doubt, he is not the one to prove that he was honest, he should be happy to prove he is an honest person and that cheating is being taken seriously.

This whole process of exterminating the rodents of IIT begins with you, the student. Go to your next meeting, tell your professor totech News; write to President Martin; write to the Board of Trustees; ask your professor to address the problem. This may be a long struggle, but if you stop cheating; do something for yourself.

Cheaters, you are warned.

Cheryll L. Kofstad

Dorms or Frats: A tough choice

Choosing a place to live is a crucial decision; freshman must make. Having lived in both a fraternity and a dormitory for one year, I have acquired strong opinions on both.

Originally, I decided to live in the dorms because I thought I would get better opportunities to meet people as the dorms were the best place to be. My father advised me to find out where all of the students were and asked me whether I could get help if I needed it. I was placed with many other students in 3rd floor Fowler Hall. I made friends quickly and my independent lifestyle seemed bearable.

As time passed, I noticed that I was losing weight at an astonishing rate, and the food was getting worse. Then my stove broke due to faulty wiring in Fowler. My grades were far from the best and I felt I was home for Christmas weighing 15 lbs less than when I arrived at IIT.

Then I discovered the dorms. I discovered the people and many of their varied beliefs. Contrary to male public assumptions, there is a wide array of experiences. In my case, the people seemed nice and the facilities... adequate. I did manage to love it. I understood I started to fall I decided it was time for a change.

Having looked at all of the possibilities, I considered all of my options. Each house had its own individual strengths and weaknesses. I had to make the best decision possible. I was better off out of school, something I was not getting at the dorms. I ended up at KEPF. I had a great time; it was a great place to grow up. Because I was a relative stranger in a foreign place, I encountered resistance. Nothing I could not handle, but enough to make me excel in school as a result of fraternity living. As I look back on pledging and Initiation.
More dollars, less aid

WASHINGTON, D.C. (CP)—"The budget has lowered the amount of financial aid dollars we have available for college for any given student," said Peter Peterson, President of the College Board, in an interview with The Washington Post. Students and their families were shocked at the sudden reduction in financial aid, because much of the aid that is available must be paid back over a longer period of time. The studies found that in all, students will get nearly $18 billion in federal, state, and institutional aid this year, about the same amount as in 1981-82 and up 1.6 billion from its 1980-81 low, according to the latest data released by the report by the College Board's Washington office.

Stryker

also honored the recipients of the Awards for Excellence in Science, the Illinois Student Legislative Association, and scholarships from the Mechanical and Aerospace Engineering department and the Materials Engineering Department.

Faculty

continued from page 1

election position has not yet been determined and will go from Dr. Bob Roth, the head of the Chemistry department to either Dr. William Weigand of the Chemical Engineering department, Dr. Robert Laderdon of the Philosophy department, Dr. Anthony G. Lutkenhiser of the Mechanical Engineering department, Dr. Margaret Henning of the Office of Education and Research. The present Academic Affairs officers have been taken by Dr. Nelson from the Civil Engineering department and a new one will be appointed later.

The secretary position will go from Dr. Peter Land of the Department of Public Health and Regional Planning to Dr. Joan Waller-Hillst or Dr. James Longworth from the Physics Department. Election ballots were sent out two weeks ago and are currently being collected by Dr. Stewart.

Evaluation

continued from page 1

Thus, students will not have the opportunity to participate in the teacher evaluations. The questionnaires will be distributed by the departments to the student in the class. They will be collected in the classroom as well. Moreover, the results of the evaluations will be made available in the form of a reference booklet. The booklet will contain the results of the location of each of the libraries, the DOLS office, or both.

Raising optimistic, the teachers believe evaluations will begin this semester. She is also eager to hear suggestions from students, faculty, or staff. If you wish to contact the library simply call the reference desk at DOLS (North east corner of HUB).

Finally, it should be noted that not all evaluation forms ask for "additional comments" to be included on their blank letter. The Teacher Evaluation Committee encourages use of this space for constructive criticism of suggestions.

Entrepreneurs

continued from page 1

candy vending machines in a laundromat. Because his business is located in a large Hispanic area, he gears his products towards the Hispanic community.

Later, the other half of the entrepreneur has a microcomputer consulting business. He provides custom designs, software development, computer-based data acquisition/control systems as well as custom software for interfacing with analog or digital devices. He specializes in Biology and Psychological services.

A recent winner of the Entrepreneurs contest was a microcomputer consulting business owned by Dr. Richard Rettig, Faculty Advisor of the group, and Anne Wilkins, Director of the Entrepreneur Center.

State increase funding

NORMA, N.J. (CP)—In one of the ratchets of academic phenomena, Princeton's president has publicly attacked a Princeton alumni group.

The dispute between President William Bowen and the Concerned Alumni of Princeton University centers on the university's policy of not issuing alumni cards to those who have not paid their full tuition fees by June 1.

"We've previously been held by lower-level bureaucracy at Princeton, but this is the first time we've gotten the matter attention," explains Dr. O'Souza, editor of the conservativeness alumni magazine.

But Bowen, apparently worried about the impact of alumni contributions, fired back an angry letter to alumni in December, calling CAP's charges "outrageous.

"If you have David Condell had charged university administrators supposedly.

Princeton's president pissed

PRINCETON, N.J. (CP)—In one of the ratchets of academic phenomena, Princeton's president has publicly attacked a Princeton alumni group.

The dispute between President William Bowen and the Concerned Alumni of Princeton University centers on the university's policy of not issuing alumni cards to those who have not paid their full tuition fees by June 1.

"We've previously been held by lower-level bureaucracy at Princeton, but this is the first time we've gotten the matter attention," explains Dr. O'Souza, editor of the conservativeness alumni magazine.

But Bowen, apparently worried about the impact of alumni contributions, fired back an angry letter to alumni in December, calling CAP's charges "outrageous.

"If you have been a student at the school, do not mean the distribution of university cards among the student body.

The conservative alumni organization has made several complaints since it was founded in 1972.

This time, O'Souza says, the group will take a different approach in its letter to alumni, and concentrated on specific criticism.

The facts shock up a lot of alumni," O'Souza says. But more students believe credit for convincing university administrators to stop using the cards as a student decals, and to fire the school's football coach.

32 pregnant students who sought abortion, the school's health center decided to have abortions. Concerns about "therapeutic abortion." In his four-page response, President Bowen said no more than one abortion in 1983-84 had involved fewer than 100 of the school's 71,000 students.

"If you have been a student at the school, do not mean the distribution of university cards among the student body.

The conservative alumni organization has made several complaints since it was founded in 1972.

Gnu Bored

After many hours of interviews, evaluations, and interrogations, the 1985-86 Union Board has been chosen. This new board hopes to do its best in filling the shoes left by the 84-85 board (and are they big shoes). Though it was somewhat of them to leave (graduation is no excuse), the board extends good wishes to its departing members:

Ted Tamburini, President; Dan Slavik, Executive VP; Douglas White, Executive Secretary; Pat Houston, VP of Public Relations; Cameron Burke, VP of Financial Affairs; Kelly Cox, Editor of UB Spoken Here; Allison Field, Visual Design Director; Jennifer Song-Quee, Treasurer; and Mike Vila, Special Projects.

Their shoes will be difficult to fill, but the new Union Board has already taken (seized) control. They will even meet this summer to make plans for the next school year. If you are interested in becoming one of the few, the proud, the Union Board Committee People, please contact a UB person.

And now with no further ado...

P.S. This being the last issue of UB Spoken Here, "Happy Summer!" from the entire Union Board.

NEW & IMPROVED 100% FAT-FREE SALT-FREE SANITY-FREE

UNION BOARD 85-86

President: Tom "Big Brother" Lynch

Visual Design Director: Ken "Where Do You Want That Poster?" Akels
Advisor: Russ "Join a Committee" Johnson
Advisor: James "Sign This" Vice
Advisor: Eric "Defilin and" Sampson
Advisor: Mike "Sure I'll Draw a Poster" Lacy
Ghost Advisor: Wallace "Casper" Gooce
Restaurant review: Greco's

GRECO'S RESTAURANT - 3020 W. 95th St., Evergreen Park. Although the dining room is cramped, this restaurant on Chicago's South Side serves a true Italian meal. Instead of the usual, pizza. The traditional red and black of Italian restaurants add to a pleasant atmosphere. The ingredients, complete with beef and vegetables, tastes better than the clam chowder. Seafood appetizers, such as clams and oysters, as well as sausage with green peppers or garlic bread are other beginnings to a detectable meal. Baked is offered with all meals; the lettuce is crisp and flavored with garlic and onions. For the main course, pastas fill the menu. Spaghetti with meatballs is the traditional favorite. The meatballs are flavored with fennel seed to improve the other wise plain meat taste. Uniquely with clams has pepper added to enrich the taste of the noodles. Penne alla Alfredo, a mixture of feta cheese and milk poured over wide green pasta noodles sprinkled with Parmesan cheese, is another delicious meal. Desserts include ice cream and cannoli. Greco's choice with bits of chocolate in a pastry shell. The house wine is Italian red.

Drinks average $3.00, and meals range from $3.00 to $20.00. On Friday and Saturday, a second dining room is opened because half of the main dining room is converted into a night club. A band, with a true Italian singer, plays adult contemporary music on these nights to stir dancing in this area (occasionally the singer will perform a solo). Lunch is served Mon. thru Sat. Hours: 11 a.m.-2 a.m. Mon.-Thurs., 11 a.m.-5 a.m. Fri.-Sat., 1-11 p.m. Sundays. Children, Handicapped, No private rooms. American Express, Reservations: 429-6505.

Why?

Why do people join Tech News? For the power? For the position? For the money? Partly perhaps, but the single most important reason is - the knowledge.

People that join Tech News gain a greater understanding of their school, their community, of other people, and most of all, of themselves. They come to know about responsibility, politics, economics and even graphic design. They learn what it takes to run a business and serve a community.

And isn't learning what college is all about?

Technology News is now accepting applications for the positions of Editor in Chief, National Business Manager and Local Business Manager. Drop off your name, position desired and qualifications at the Tech News office on 5th floor, Main Building before April 29. All positions salaried.
The Koltz fair plan

Steve Koltz, an alumnus, served on the first A.W. "Bill" Wheeler Society, 1970-1980. He continued on and completed a thesis on the 1980-1984 period, which is his Master's Degree in City and Regional Planning from IIT. In 1984, Koltz was awarded the title of Professor Peter Belitscher and Professor George Sharpe and Kevin Harrington.

The Koltz Plan locates a "y" shaped fair site along the South Branch of the Chicago River between Roosevelt and Halsted Streets. It has a leg connecting the River to the lakfront between 18th and 19th streets. Koltz discovered that by moving the fair site west to the River, on which is now 80% vacant rail and industrial land, that it would have the highest potential for future use in the downtown area to include utilities and transportation improvements, and jobs for many. For the fair 3rd Ward buildings and historic renovation, parks, off-site housing and revitalization of surrounding commercial and residential neighborhoods will help protect the surrounding neighborhoods from fair visitors.

Koltz was commissioned by the National Bank of Athens in 1984 for his master's thesis and to build a colorful World Fair by his thesis. He has since then influenced many people and helped them in their professional careers. At the Fair Authority to include this site as an alternative if the Lakefront Site does not get approvals from the environmental impact statement due to the end of this year. The Koltz model has traveled all over the city in banks and libraries for a year now and found its way back to IIT. The model has influenced and educated the general public and I am sure there is another available site sitting along our Chicago River.

Chem department holds chemical trivia contest

by Cara Daniel

IIT's Chemistry department held a trivia game titled "Uncommon Common Names A Heuristic Approach," which was an exercise in chemical nomenclature. "Common" names were given and the contestants were to name the chemical to which the "nickname" referred. The winners were chosen in 3 categories: graduate students, undergraduates, and faculty.

The first place winner of the trivia game was Joe Barlow, 23 of 25 of his answers were correct. Second place was won by the team of Gino Pernice and Natasha Richardson, who answered 18/25, Professor Fanto answered 20/25. His answers are posted. Winners should contact Professor Miller before the end of the semester.

The following are Professor Miller's comments on items not included in the posted answers:

1) A brine is a solution of NaNO3 (source unknown).
2) Diclducleotide - His guess is that this is Hg prepared by reduction of HgO by sugars, a known process.
3) Catriocalcium Acid - Given by Jim, and Natasha, as a common medicine or panacea.
4) Alum Branch - Jim says strong acid (CO2), which cannot confirm.
5) A by-products are chlorine, fluoride, acetic acid, who have no clue, and acetic acid is Greek for auditory things.

Itt to host illinois rha conference for first time

For the first time in its history, the state Illinois Residents Agreement (RHA) Conference will be held at IIT. The ten-day conference will be sometime in the spring of 1986.

Dr. Donald Pontillo, Chairman of the Student Conference, with the approval of Robert Morgan of the Student Conference, submitted a bid to the officers of the state RHA of which was the estimated costs of $53 per delegate, including hotel accommodations at the McCormick Inn, and scheduled entertainment. The costs will be handled by the sponsoring student and funds possibly provided.

According to Pontillo, this will be the first time a school the size of IIT will hold a conference of this magnitude.

The purpose of these conferences is to give interaction between students, discuss matters of student life, and discusses matters of student affairs.

The money and facilities necessary to house the 300-400 delegates in attendance have in the past come from ISU, U of I, and Eastern. But the administration has not made any efforts to make up for anything that the students have not asked for.

On April 11, President As Pontillo stated, "We are here because you would have us hold big 10 large-scale school."
Do You Want VISA & MasterCard Credit Cards?

YES! I want VISA & MasterCard credit cards. Enclosed find $15 which is $1000 refundable if not approved immediately.

Cada named scholarship winner

by Carol Martinelli

Junior Kelley Cada was recently named the recipient of the Schommer-Welshman Scholarship Award. This award is based on scholastic achievement, athletic ability, and contribution to her team and the athletic department.

In her freshman year, Kelley was voted the volleyball team's Most Improved Player, the tennis Rocks of the Year, and the Freshman Woman Athlete of the Year. That year her tennis record was 8-14.

As a sophomore, she improved her tennis record to 11-11, and was voted Most Valuable Player. Kelley also made the IIT (volleyball) Invitational All-Tourney Team. She completed her second year by being voted Woman Athlete of the Year. This year was her 3rd on the tennis and volleyball teams. Kelley finished her tennis season with a 12-9 record. She was also voted co-captain for next year for both tennis and volleyball teams. Her combined record for the volleyball team for the past three years is 76-25.

Along with this, Kelley received the highest award given to any athlete at IIT, the Schommer-Welshman Award. As an accounting major, Kelley has kept an above Dean's list GPA, and also has an internship at the Standard Oil Company. This award is well deserved; congratulations Kelley!

NROTC rifle team takes second place

The IIT Reserve Officers Training Corps Rifle Team traveled to the University of Illinois at Chicago to compete against nine other teams, and came away with the second place award. This is the second award the IIT/NROTC Rifle Team has captured in the last two weeks. On April 8th the team returned with the second place trophy from the Ohio State University meet.

The Rifle team was lead by Midshipman Dennis Quick (Phys-Ed.) and Bill Johnson (ME-Soph) with scores of 783 out of 800. Other shooters were Midshipman Steve Rioux (ME-Fr.) with a score of 767 and Mark Bowen (UC-Eng) with a score of 436. The team placed ahead of such schools as the University of Missouri, Purdue, Kemper Military, and the University of Illinois Navy.

This was the last meet of the semester for the Rifle team, but practices will continue throughout the summer in order to make the team even more competitive next year. Of our top five shooters, all will be back next year to compete. The Rifle team is proud to represent IIT and the NROTC Unit in the professional manner which both deserve at these meets, and will continue to do so next year.

Good friends keep you going when all you want to do is stop.

Your feet hurt. Your legs hurt. Even your teeth hurt. But your friends thought you looked terrific. And with them urging you on, your first 10 kilometer race didn’t finish you. You finished it.

Now that you have something to celebrate, make sure your support team has the beer it deserves.

Tonight, let it be Löwenbräu.

Löwenbräu. Here’s to good friends.
