Faculty proposal accepted
by Natasha Richardson

Thursday, May 2nd there was a meeting of the IIT Faculty. A mere 57 of the 270 faculty members showed up for the meeting. At the meeting President Martin announced the decision of the Board of Trustees to accept the faculty proposed document "Interim Procedures and Standards for Reductions, Mergers, or Eliminations of Departments at IIT.

The document was approved by the faculty at their meeting on April 11th and amended by Martin and the Executive Committee. In its resolution to approve the document, the Board expressed appreciation for the faculty's effort and participation in the document's creation.

Four other resolutions were made at the April 19th and 20th meeting of the Trustees. The first is an "affirmation of support and confidence in continuity of IIT." The second is an order for Martin to act with

Galvin, Pritzker meet faculty
by Natasha Richardson

On Friday May 3rd a very special faculty meeting was held. Robert Galvin, Chairman of the Board of Trustees, and Robert Pritzker, Vice-Chairman for Education attended the meeting as "the eyes and ears of the Trustees." An unusually large number of faculty members attended the meeting to express their thoughts and concerns.

The meeting commenced with an eloquently worded motion by Dr. Zafar Zaman, Dean from the Mechanical Engineering Department. The motion expressed a deep appreciation by the faculty to Pritzker and Galvin for their willingness to talk with the faculty and to the entire Board of Trustees for inviting the Senate Coordinating Committee to the Board meeting held last Friday and Saturday.

The motion also noted the amount of hope these actions have given the faculty in regards to communication. The past year has seen a substantial improvement in communication between the administration and faculty. Zaman included the motion the faculty's continued on page 7

Ernst: The year in review
by Natasha Richardson

At the beginning of the fall 1984 semester, IIT was in a state of political turmoil. As a result of a budget reduction procedure initiated by President Martin, 24 of IIT's faculty, including a substantial number of tenured faculty, were in danger of being fired. In July of 1984 President Martin received a letter from Robert Galvin, Chairman of the Board of Trustees, telling him to balance the budget. The plan Martin came up with was to reduce the size of the faculty. The Board of Trustees accepted Martin's proposal August 17th.

Dr. Frederick Ernst from the Physics department was Chairman of the IIT Faculty Senate at the time. He was on vacation when 30 faculty members received letters saying that they could be one of the 24 that would be fired. When Ernst returned on August 20th, faculty members were considering strikes, rallies, and attention from the news media. At that point, nobody had any idea what action to take to keep the faculty (both tenured and untenured) from being fired. By August 22nd Ernst had come up with a plan that prevented a major crisis on campus. At the faculty meeting on August 23rd, Ernst made the following motion:

"Whereas the plan of President Martin has been put forward in an atmosphere of crisis and haste, and whereas such a plan is unacceptable to the faculty, therefore, be it resolved that the IIT faculty request President Martin to accept the offer of the Senate Coordinating Committee to work for the development of an alternative plan by October 15th, 1984."

The faculty originally wanted the deadline for the plan to be January 1st, 1985. October 15th was the latest date that Martin would accept. This meant that six weeks the faculty had to come up with one million dollars in savings and have some form of a long range plan.

Martha Evans wins teaching award
by Maria Rodriguez

Dr. Martha Evans from the Computer Science department has been named the recipient of this year’s Excellence in Teaching Award. The award will be formally presented on the afternoon commencement May 19th. She will be awarded a framed certificate and $1,500 prize money.

The Excellence in Teaching Award has been given since 1981 to a full-time tenured faculty member nominated by graduating seniors. A committee made up of 2 students, the president of Tau Beta Pi and the president of ATE, and 2 faculty members, the chairman of the Faculty Senate and the previous year’s winner, make the final decision.

Dr. Evans came to IIT in 1975 as Assistant Professor of Computer Science and since 1981 has been Associate Professor of Computer Science. She has taught a wide range of computer courses from undergraduate to graduate and research work. Dr. Evans commented, "I believe education is about truth, that is, saying, 'I don't know,' then being able to take the initiative to find out."

The award is administered by James Vice, the Dean of Student Life. All registered students are encouraged to participate in the selection process.

**IIT...**

119 WAYS TO GET AHEAD THIS SUMMER

Whether you are after a head start, making up course deficiencies, preparing for professional schools, speeding up your graduation, or just speaking out your workload, Summer School at IIT can fill your needs.

You're almost certain to find what you need among the 119 graduate and undergraduate courses offered in Biology, Chemistry, Physics, Computer Science, Mathematics, Engineering and Engineering Sciences, Liberal Arts and Humanities.

Registration: June 6 or 13. Classes start Monday, June 17 and run for either six or eight weeks, days and evenings, at the Downtown Center, Main Campus, North Central College, Naperville and Harper College, Prospect Heights.

Main Campus is easily accessible by rapid transit, bus or auto and provides ample parking.

Special reduced tuition for Friendship and Sophomore students.

For information on how you can get ahead this summer, contact:

**ILLINOIS INSTITUTE OF TECHNOLOGY**  
Office of Educational Services  
3300 S. Federal Street  
Chicago, Illinois 60616-3793  
312 567-3300
**Graduation Tickets**

Graduation Tickets may be picked up from the Student Life Office starting May 6. Have you turned in your Ticket Order Form? If not, bring it with you so that you may receive your graduation tickets.

**Become a TA**

The department of Pre-University Programs is looking for teaching assistants for their summer program. Students interested in applying should stop by the Prep dept. office located in the basement of the Commons to pick up applications and schedule an interview. Deadline for the submission of applications is Wednesday, May 8, 1993 at 3:00 p.m.

**Jazz Showcase**

The IIT Jazz Band will play two shows (at 9 and 11 p.m.) at the Jazz Showcase in the Blackstone Hotel at 633 S. Michigan Avenue on May 14.

Admission to Jazz Showcase is $7. To purchase tickets in advance, contact Dean Vice in the Student Life Office or call 567-3268.

Proceeds for the evening will go towards the purchase of a new piano for the band and of music.

**Technology News**

This issue marks the end of the Technology News Fall '94 - Spring '95 publication schedule. This year has marked a 350% increase in the size of our staff overall, as well as phenomenal growth of our reporting capability and ad revenue generation. We have hope you have enjoyed reading the publication these past two semesters. We have tried to make it as informative and enjoyable as possible, as well as provoke your thoughts and comments from time to time. We accomplished this depthless full time course load as well as all the other problems that come with trying to run a business in this magnitude. We look forward to serving the needs of the IIT community in the coming school year. Remember, this is your paper, the only mass media source of information and freedom of expression on the IIT campus.

In closing, the outgoing staff would like to extend the best wishes to those who will be following in our footsteps. We would also like to extend a very grateful thank you to those staff members (especially the production staff), writers and administrators who have helped make this year one of the most productive in our history, and many curses to those narrow minded individuals and groups that have hindered.

EIC: Technology News, one hell of a year

Like the Grateful Dead sing: What a long strange trip it's been. I sit at my desk and stare at all the files of Tech News completed so far this semester. It was one of my news editor's more esoteric ideas to pin each edition to one of the walls of the Tech News office. At first I liked it-I enjoyed looking at the proof of all our hard work, and I was proud to have visitors point out a particular issue and comment on an especially good story. This diligence lasted a about two weeks. I began to notice all the empty space on the wall that still remained to be filled. And then I began to think of all the hard work ahead of us. Sadist, sadist, sadist.

It's now Saturday morning. The layout staff is in the next room frantically working on that precision magic. I look at the wall and wonder if there's not a small bit of space left to fill.

One more issue, the last one. I look at the headliner on those other twenty-seven editions and let my mind wander. Faculty reductions. Appendices A and B. Bursar's robbed. Students robbed, Mugger stabbed, Help Jackie. Bag close. Bog remains open. 7-11 planned. 7-11 open. 7-11 late. Late and late again. Tillion up. Financial aid down. Faculty member receives award. Faculty member retires. Staff member resigns. Martin keeps his promise.

It seems to have finally learned how to communicate and this can only mean a brighter future for IIT. Tech News had a great deal to do with improving that communication by presenting the facts of the matter in an even-handed manner. I feel this is the main role of a newspaper and in this role Tech News is an unqualified success. The layout staff is gone now. The paper is complete save for a large patch of white waiting to be filled by this editorial. Looking back on the last year I don't seem nearly as long as it was at first. I have the staff of Tech News to thank for that. They truly are the finest group of people I've ever worked with and I'll miss them all. I'm sure they'll continue to provide you with the quality paper you've come to expect and I wish them all of the best in the coming year.

The wall now looks like a photo album filled with the faces of old and dear friends. The time has come to fill the last space on the wall.
Be in the Forefront of Today's Technology as a Scientific-Engineering-Officer

On every Tuesday and Thursday, we are planning and designing tomorrow's weapon systems today. Many are saying that it is a great day for engineers because we are engineering the future. Our scientific and engineering materials are the basic building blocks that will be the foundation of the world tomorrow. Our work is not just for the future, but also for the present. We need people who want to make a difference, who want to create and innovate, and who want to be part of the team that is leading the way in the world of science and engineering.

The University of Massachusetts Amherst's College of Engineering is one of the top engineering programs in the nation. Our faculty and staff are dedicated to providing our students with the best possible education and opportunities. We offer a variety of programs in engineering, computer science, and related fields. We are proud to say that our graduates are making a difference in the world.

The Army is constantly looking for talented people to join our team. If you are interested in a challenging and rewarding career in the engineering field, we encourage you to apply. Our recruitment team is currently on the road, visiting colleges and universities across the country. We are looking for hard-working, dedicated individuals who are passionate about science and engineering.

If you are interested in learning more about our programs and opportunities, please contact our recruitment team at 123-456-7890 or email us at recruit@umass.edu. We look forward to hearing from you.

College now recruiting by video interviews with professors, administrators, and students about their programs and opportunities.

Aeshka Heights, OH (IPS)

- The home video revolution has come to the couch.
- High school students intent on getting a close-up look at college campuses before deciding where to enroll — by watching a prospective of disease hitter and yon — now need only a home video camera to do the trick.
- A new Ohio firm began marketing a series of video tapes aimed at 25 colleges earlier this month.
- If they injected a measure of believability into a market broached last fall by a North Carolina firm.
- And although a handful of the others, the firms rent video cassettes that profile colleges for as low as $25.
- For $12 per week (plus shipping charges), the Ohio firm will offer on the Glas of the campus itself.
- The idea is to change the campus for as low as $25.
- College students can now rent video cassettes that profile colleges for as low as $25.
- It can be used as a tool to help students make their college decisions.
- The video cassettes include footage of campus life, such as dorm life, classes, and social events.

Learning Resources Network of Durham, N.C., the leader of the college video firms, rents up to four cassettes for a week for $25, including shipping.
- The firm's president, Robert Chapman, notes that nearly one of every five colleges now have video cassette recorders. That's up from the one of every five or so that came on the market a few years ago.

Hoptcraft. Ltd., in conjunction with Northwestern.

Learning Resources Network (LRN) has about 200 schools in its video cassette program. Those schools paid between $12,000 and $22,000, depending on whether they produced the video themselves or had LRN do it.

Chapman says he is filing about 100 orders a week for video rentals about 95 percent of which are from parents.
Proposal continued from page 1

number of tenured faculty last fall.

Five requirements of the tenured faculty for the
resolution... They are: 1) assurance of academic freedom for
the faculty, 2) protection of the faculty from
charges of insubordination to the administration of the
college, 3) an understanding of the need for
them to establish and enforce exceptionally
high standards of research, 4) understanding of
the faculty's performance and professional character from
"tenure-seeking faculty.

President Martin's report also included a statistical summary of IIT's enrollment, admissions, degrees granted, number of graduates, faculty members, the library collection, numbers of administrative staff, the operating budget, and fund raising.

Martin pointed out that $18.5 million have been used for improvements on campus.
The bulk of the money was spent on the Downtown Center, which used $6.9 million. Academically, getting $17.2 million, the Hub needed $1.4 million, and the renovations in the library have required $5 million.

In the fund raising report, Martin noted that there was a record of $12 million earned this year. The closest IIT has come to this figure in the past was two years ago with a total of $8.3 million. The Alumni Fund made a record of over $12 million. When two weeks ago IIT received a record for its class gift of $546,730.

In his summary, Dr. Ed Steuben, Vice-President, made a report on enrollment figures and admission trends.

Steuben's report showed a decline in minority enrollment, with especially sharp decline in the enrollment of black students. Dr. Steuben, noodling over corn, Professor of Marketing and Finance, asked what was being done to improve minority enrollment.

Steuben admitted that the level of black and foreign students' enrollment has accounted for the decrease in the size of the student body because while the student enrollment has remained constant, he explained the high number of black students in 1981-82 reflected lowered admissions standards, and this process for increasing admissions has been suspended. He went on to say, "we don't believe we can substantially increase that; there's simply too much competition with new students who meet regional standards."

He added that there was a potential for a substantial Anthony Wojcik from the Computer Science department.

Huyck's subcommittee adopted the first draft of the document that was reviewed by several times by the Faculty, President and the Board of Trustees. The document is entitled "Interim Procedures and Standards for Reducing Merger, or Eliminations of Departments at IIT." It was approved by the Board of Trustees at their two day meeting last Friday and Saturday. Wojcik's committee was responsible for coming up with the ideas to accommodate the preferred savings required of Lewis College.

The meeting of the Board of Trustees last weekend represented the climax to the crisis. Huyck presented the faculty's original alternative to Martin's plan to fire 24 faculty members (see April 28 issue of Technology News). A revised version of the document was accepted by the Board at the meeting last weekend.

IIT had never had a crisis of this magnitude. To keep the crisis from becoming a major tragedy required a great deal of leadership, patience, and imagination. From August 20th, Dr. Ernst took charge of the situation and provided the guidance needed to overcome the situation. Under Ernst's chairmanship the UPPC has become a crucial and unprecedented bridge for communication between the faculty and administration.

Ernst hopes that the UPPC will continue to be a permanent committee of the Faculty. He will not act as chairman, however, because the outline of membership and governance requires that the Faculty Senate chairperson also chair the UPPC.

Next year the Faculty Senate chair will be Dr. Bob Roth of the geology department.

Want to be a DJ?

WOUH is looking for people with an interest in radio broadcasting for the Fall of 85. If you are interested in joining our staff, stop by at our meeting on Tuesday, May 7th, at noon on the 5th floor of the Main Building in the WOUH office.
Cults infiltrating city campuses

Reports of incidents of student harassment on IIT's campus and at other colleges and universities in the metropolitan area, by representatives of various religious organizations, have made it necessary to review the nature of such activity and means for coping with it. The tactics and mind-set displayed by members of certain groups suggest a cultic quality in their structure. Increasing frequency of encounters of the type at IIT over the past several weeks also point to the possibility that outside members of such cults are capitalizing on the emotional stress experienced by students as final examinations approach. Given this situation, it is helpful to recall some salient aspects of cultic behavior. The pressures and problems generated among students at this time should prompt a cautious attitude towards getting involved with groups which they later regret having joined.

Be on guard against persons or groups that offer simple answers or "truths" to all of life's problems. Many human situations do not admit of simple solutions.

Be on guard against persons and groups who attempt to define your circle of friends for you. Such choices should be each individual's right and responsibility.

Look out for groups which will make you feel critical, ask questions, and have the only "correct" answers. Maturity comes in learning to listen, but also in processing what we learn. We may trust others, but not blindly.

Be watchful of those who try to get you to join their group by appeals to guilt and emotions. "Guilt tripping" is hardly a concerned and respectful manner.

Be on guard against someone who invites you to a weekend workshop but who is vague about the goals, or who breaks up happiness and friendship by the experience. Such qualities of life require time for development.

Although the names of some groups may appear respectable, it's always a good idea to investigate further before becoming involved with them. Recall the psychology of "mind control": if you get a person being the way you want, then that person will begin to believe what you want. The key to the process of being manipulated is higher during times of emotional and environmental stress. There has been a sudden change in environment or usual support systems. Second, the person may be undergoing a change in exams, in homesickness or when a relationship is broken.

We all pass through periods of confusion or feeling overwhelmed and lonely. At such moments let's not be afraid to reach out to a known friend, family, or counselor in the areas of Student Life, the Chaplains, priest or pastor, or Psychological Service.

We all need help in order to grow.

IIT students enrolled in Anthropology 491 and working in the Washskie Basin of Wyoming this summer may be discovering dinosaurs in a way that is much more likely to find fossils of extinct mammals. The reason is being offered by Prof. Kurt Luchterhand, part-time instructor in the Department of Earth Sciences and the Field Museum's Affiliate in the Department of Geology at the Field Museum. The fossils being dug in the Washskie Basin were deposited between 40 and 50 million years ago, a time that saw more than 200 species of land-walkers after the last dinosaurs died out," said Luchterhand. "But the students working in the Washskie this summer should be able to find the remains of large rhino- ceros-like mammals called Titanotheres, as well as teeth and bones of many smaller animals. The Field Museum has been working in the Washskie for historical reasons. But when he added, "so we are virtually guaranteed to find interesting things at one time or another. There are far more than 100 collecting localities we already know. And one of the projects for the summer is to search for new localities in beds that we already know have fossilized mammals." Students enrolled in Anthropology 491 will earn 3 credits by working in an area of the country rich in fossils, collecting fossils, mapping localities, and surveying for rocks that could be further studied during the project, and students must provide their own transportation and equipment. Since the Washskie Basin localities are located more than 700 miles from Chicago, and the rugged terrain, all the students must be in good physical condition.

There is no prerequisite for the course, which will be taught from approximately 10 a.m. to 4 p.m., through a personal interview with Dr. Luchterhand and his consent is required for admission to the course. Enrollment is limited to 5 students.

Call the Department of Social Services at 567-5219 for further information or one-on-one interview with Dr. Luchterhand.

Dorms catering to students

NORMAN, OK (CPS)—For college students, access to cable television, automated banking machines, an occasional lobster dinner or late night pizza used to mean having to go off campus. Not anymore.

Thanks to administrators' worries about attracting students to their dorms and intensifying competition for rents with off-campus apartments, campuses are increasing the number of schools are offering a smorgasbord of on-campus amenities for next fall.

At the University of North Dakota, some dorms have weight rooms and saunas. At Eastern Michigan University, some on-campus residents have access to computer rooms in their dormitories, and offered 12 month leases.

At the University of Oklahoma, free cable television in dormitory rooms, a pizza bar, and an automated banking machine are in the works for next fall. The school also has hired a new food service director and given free reign to plan what administrators call "monetary breakers," such as fortoh dining rooms.

"Try as we might, there are some areas in which we just cannot compete with apartment complex owners," says OU assistant housing director Craig Lithgow.

"But there is an awful lot we can do.

Dormitory residents are not pampered at every school. Many institutions still face perennial dormitory overcrowding, particularly at the beginning of the school year.

"It's sporadic across the country," says Jim Grimm, housing director at the University of Florida and president of a national housing officers group. ""Officially"" estimates that between 20 and 25 percent of the nation's colleges now have to keep in touch all four (5) years.

5. The Alumni/Admissions Office has grown as it seeks to develop a student market outside the Chicago area.

Besides constantly having to work on getting an adequate market of students, the admissions office also has other problems to worry about, the major one being competition from the Illinois State system. The national climate is also a problem, leaning towards financial aid and loan cuts.

A minor problem is the location of ILT, but it usually doesn't interfere with admissions.

The Undergraduate Admissions Plan for 1984-85 had begun a restructuring of student services. The admissions staff began filling a position which provides the initial point of contact between prospective students, financial aid, placement testing, and freshmen counseling as well as handling the admissions decisions.

Sailing

continued from page 12

C"E" Eliminations. The top three teams in Area "C" (Illinois, Wisconsin, Minnesota, and Iowa) compete in the Midwest Championships with teams from eight other states. The top two teams at this regatta quality for the National Championship at Old Dominion University in Virginia with the Country's other top fourteen teams. The Sailing Club will hold its last meeting of the Semester at 12:00 on Tuesday, May, in room 306-HUB.

LANDLORDS OFFERING

Still full are offering students more to stay on campus, if only to keep their dorms as attractive as those on other campuses. Grimm notes the University of Florida is establishing dormitories with a strong academic, thrust: computers, quiet halls, and live-in faculty advisors.

In some cases, innovative university administrators are acting on their own initiative. In others, they have no choice.

Norman, for example, has developed a massive apartment glut off campus, Pulliam points out.

Landlords are offering a range of inducements to attract students, including a month's free rent.

Other forces worked to undermine the university housing program. When the state's minimum drinking age rose to 21 last year, the school was forced to issue citations for underage drinking in the dorms.

"We don't have the luxury of saying we're not going to enforce state law," Pulliam says.

The number of OU students living on campus reached an all-time high in 1982-83. Dormitory enrollment has declined by about 10% since then, and school officials expect it to go down again next year.

ATS election results

Paul Valentino has been elected to the office of President of ATS for the second consecutive year. The new Vice President, Secretary, and Assistant Treasurer are, respectively, Preoti Parikh, Cathy Paul, and Annette Vujovich.

The results of the election for the executive officers of the Association of Tech Students are as follows:

Vice President—Preoti Parikh 161 votes, John Schmaltz 91, Tom Baggio 28, others 2.

Secretary—Cathy Paul 159 votes, Jim Kinzales 129, others 4.

Assistant Treasurer—Annette Vujovich 153 votes, Rayney Gatter 129, others 1.

ATS election results

Mark Salla, Chairperson of the election committee, was pleased with the large number of votes cast. He noted, however, that many ballots were incomplete and that twelve write-in votes were not counted since they were not written correctly.

Mark stated that in order to cast a vote for a write-in candidate, the voter must write the candidate's name under the proper category, draw a box or circle beside the name, and then check off the box or circle.

He added that it is the candidate's responsibility to inform his constituents as to the proper method for write-in votes. In any case, the eleven write-ins would not have altered the outcome of the election.

Liquor

continued from page 6

years for accidents, crimes and injuries resulting from institutional negligence.

Cases involving such schools as Ohio State, Virginia and Oregon, to name a few, have held student organizations and fraternities responsible for the actions of intoxicated guests, Hammond points out.

Even raising the legal drinking age can make colleges more vulnerable to lawsuits. In Minnesota, for instance, the drinking age may soon jump from 19 to 21, greatly increasing the chances of colleges accidentally serving liquor to minors, and opening up tremendous liability potential, warns University of Minnesota attorney Mark Karon.

"If you were at a fraternity, a sorority, or a dormitory or any other kind of party and you gave liquor to a minor, you

impose the possibility of common-law negligence" by selling liquor to underage students, he warns.

"In the wake of all these law changes and crackdowns, what's happening is that someone drinks himself blind, goes out and wraps his car around a telephone pole or crashes into another car, and then the victims and their families sue the bar or fraternity for huge financial settlements," says Donna McKenna of the Minnesota Insurance Affiliates association.

That's why (insurance companies are dropping alcohol liability.

If more insurance companies quit offering alcohol liability policies, colleges may find it increasingly costly to serve liquor, or to allow alcohol on campus at all.

SMU is a completely "dry" campus now, says Auxiliary Services Director Gordon. Other Massachusetts schools soon will do the same thing, he predicts.

Without liability insurance, "many colleges around the country may decide to simply ban alcohol from campus rather than face the risk it poses to the institution," says Louisville's Hammond, noting a number of campuses already have gone dry even with liability insurance.

"It's not something I agree with," he adds, "but it's certainly making more and more sense—at least financially and legally—for colleges to get away from alcohol altogether."

Sportsfest

continued from page 11

then "Fugowee," with a burst of strength, would regain this lost ground. After three minutes of intense pulling, both teams were exhausted beyond belief but "Fugowee" survived and defeated "Water Inc." "Fugowee" was crowned the Sportsfest '85 Champion!

Immediately after Sportsfest; there was a barbeque and later on, a party on 2nd Floor for all Sportsfest contestants and spectators. However, hours before the party started there was one last event. Since it was so cold outside, one of the games dealing with waterball- loons was abandoned.

Therefore as an added attraction and post game competition, 150 waterballoons were laid on the field and a free-for-all prevailed. This was the largest waterballoon fight in H.U.'s history and helped to make Sportsfest a smashing success.

Those directly responsible for Sportsfest's ultimate success could be found in committee meetings months before the actual event. Mike Brown, a Scottish exchange student and ornamental architect, was the chairman of several of these committees and was instrumental in Sportsfest's primary organization. However, Sportsfest was a team effort and everyone should be proud of their fine accomplishment.

Congratulations!!!

Mike Brown, one of the Sportsfest committee chairman added, "I would just like to take this opportunity to thank all those people who helped me.

Finally, I would like to thank all the Sportsfest '86 committee members for working with me, and for putting up with my strange Scottish ways. I will not name anyone fully for fear of embarrassing them but they all know who they are and I must apologize if I miss anyone.

Thanks to: Wendy, Paula, Yumi, Donna, Karyn, Kristen, Jim, Ray, all those on Fourth Floor (especially Kevin and Veli), Paul K., Chuck, Ed, Tho, Carl, The Chaplains, Lynn, Mary Beth, and Breene. Finally, my special thanks to George and Dania for their friendship and support."

GET A STUDENT LOAN FROM CITICORP SAVINGS AND EARN SOME EXTRA CREDIT.

Getting a student loan through Citicorp Savings now earns you a few "extras." Among them, a VISA card with a $300 credit line.

There's a checking account and an electronic banking card for you, too. It's all yours with our low-rate Illinois Guaranteed Student Loan.

With Citicorp Savings, you can borrow up to $2,500 per academic level. For graduate students, it's $5,000. Use it to pay for tuition, books—even living expenses.

More Than Just A Loan.

A Citicorp Savings student loan is good for more than just cash. With the VISA card, you'll establish a good credit rating for the future.

You'll also have greater day-to-day spending power and security when unexpected bills pop up.

The checking account will give you more financial flexibility. With an opening deposit of only $50, you'll get full checking privileges, 50 free personalized checks and no first month service charge.

With the electronic banking card, you can get cash 24 hours a day. Use it at over 400 electronic banking locations at Citicorp Savings offices, Jewel Food Stores and White Hen Pantries.

Send Now For Your Free Loan Kit.

Our student loan isn't just better. It's also easier to apply for with our free Student Loan Application Kit. For your kit, just send in the coupon below, call our Student Loan Department at (312) 977-5810 or drop by one of our 60 convenient offices statewide.

So come to us for your student loan. We'll give you the cash you need. And the credit you deserve.

Citicorp Savings

Main Office: Dearborn and Madison, Chicago, 1-312) 977-5000. And other convenient offices statewide.

Soccer team fights to a draw
by Mike Brown

Indoor soccer is a game of great speed and skill in which the players' resources are tested to the fullest. The two major differences between indoor and outdoor soccer are that in indoor the team comprises of six players and the ball is kept in play by a component called the "plug", which surrounds the smaller pitch. It is normal for a team to 'keep substituting fresh players throughout the game for those who are too tired to keep up with the pace of play.

Last Saturday, April 28th at 9:00pm, the indoor soccer team beat all the odds and tied the number one team in the league, with only a squad of six players to meaning all players had to play for the duration of the game. Although the first period of the game went scoreless, we were treated to some exciting, and skillful play. The opposition, who were a physically larger team, had quite a few chances, but the calm, determination of our team pushed them from grabbing an early lead. With some hard defensive tackling Martin Brandt played a key role in defense. Goalkeeper Bill Gallagher provided some brilliant saves not only in the first period but throughout the game.

The second period opened with the first goal of the game. Captain Jim McNulty took the ball on the run at center field and in an inspired piece of play struck the ball sending it flying straight into the top corner of the net. The goalkeeper never had a chance. It was a great goal, a goal of such strength and accuracy, reminiscent of perhaps Sammy Lee the Liverpool and England forward. But the opposition came back quickly to score the equalizer. By now our team was starting to show the strains of not being able to make substitutions but this did not dishearten them. They soon took the lead again with a goal. One of the newer, less experienced, but talented players, George Ghantous took a rebound from the side wall and skillfully turned it into a goal with a clever switch to his left foot, catching the goalkeeper off guard.

The third period opened up with the opposition scoring two goals in a row to lead the game 3-2. The score stayed the same until the last ten minutes of the game despite attempts by both sides. Then Juan Aparicio cornered the opposition's goalkeeper in a scramble for the ball which he won, taking the ball to the side of the pitch managing to shoot out a right angle which had the keeper beat. So the score stood at 3-3 with only a few minutes to go.

The closing minutes of the match saw both teams in a frantic struggle to clinch the winning goal. Our defense held up and we had another coup of chances, such as when Bob Kubas ran a long ball up the right half. However the win wasn't to be and the game closed with a 3-3 draw.

Our team must be commended on their play at this game. They worked well together as a team and even when the pressure was on and the fatigue started to set in they still fought with such spirit. Every member played a part in the team, but I must make special mention of Goalkeeper Bill Gallagher who not only played an excellent game in goal, but also played an important role of keeping the team going. If I were to pick a man of the match I would have to be Bill. I feel that the whole team should be congratulated on a great show of skill, talent, and sportsmanship.

---

We're banking on your future.

We're here to help you succeed. From undergraduates to graduates, from undergraduate studies to graduate studies, and from $2,500 a year to $5,000 a year for students, we have the right loan for you. To request an application, call us at (312) 407-3413 or 407-3420.
Women’s softball wins first

IIT’s Women’s Softball team won their first game of the season this past Thursday, beating Mundelein 12-11. The close game ended in dramatic fashion as Michele Monahan raced across the plate with the winning run in the bottom of the last inning.

The Hawks collected 14 hits and 6 walks, but the victory was not easy. It took great defensive plays by Kelly Cato, Joan Biemes, Sheila Moran, and Roberta Dillerburg to nail the fast runners at the plate. Great substitution work was provided by Celia Bueno and Loranne Makar.

This past Tuesday, the Hawks lost a bitterly disputed 25-23 game to Kennedy-King.

The women put up a great defensive front, but the second base umpire didn’t seem to agree. The offense was awesome, belting out 26 hits with 9 walks and dazzling base running. Donna Jurkiwski led the hitting attack with a screaming 3-run homerun blast to left, a double, and 4 singles. Cathy O’Brien also cracked the ball, contributing 2 massive doubles, a triple, and a towering sacrifice fly. Multiple hits were also collected by Sue Lukasiak, Tracy Wragge, and Diane Dolliber.

Though this spring was unsuccessful, there is great potential for a much improved season next year.

Sailing team finishes fifth

On Saturday, April 20, the IIT Sailing Team competed in the annual Purdue Spring Regatta. IIT finished fifth, ahead of Purdue who edged them earlier this season. Aaron Houston had his strongest performance of this season finishing second in his fleet despite being disqualified in the first race for an alleged rule violation. The team consisted of Team Captain Aaron Houston, Skipper Tom Berns, Crews Marianne Haake and John Grunin. The Team will begin the National Championship Circuit on May 11 at the Area continued on Page 9.
