I Have Been Hypnotized By Freezer Meat Ads

A bait and switch meat operation is a method used by an unscrupulous person or persons to sell meat of the highest quality or meat of meat products other than those advertised in newspapers, radio, television, and TV are not as often used to advertise because of the cost of meat. Bait and switch meat products are often advertised with the assurance of free meat or meat products at a reduced price.

Criminal law governs bait and switch advertising under Illinois Revised Statutes (not, like here at IIT). Chapter 55, 1/2, Paragraph 313, Section 13, Subparagraph G.

The following features appear with regularity in bait and switch advertising and some items, including wording, have been unchanged for nearly 20 years:

1. No money down (on approved credit to unqualified customers).
2. Money is rarely ever refunded, but guarantees are often stated to be guaranteed for three years or more.
3. Ads are most commonly found in color and in Sunday newspapers, particularly in television commercials.
4. Examples of prices are usually advertised based on lowest weights available.
5. Chart or ad often show beef cuts, but is too unreadable and often illegible.
6. An incentive is usually offered to customers who call within 24 hours.
7. A "small freezer special" is common.
8. Details on hanging weight, cutting charges, etc., are usually found in a small, barely readable box entitled "Attention."
9. Ads will often list only small sections called "Premium" or "Special." A "Pre-Trimmed Oats" rates double to quadruple the main features shown.
10. Free or mileage reimbursement is sometimes available.
11. Sometimes a repeat customer discount of 5-10% is offered.
12. The "Food Stamp Shoppers' Welcome" appears in every ad.
13. A listing of credits accepted, usually with their illustrations.
14. The ad usually states "Prices for Volume Buying."
15. Bundles such as "Loin Rib, Loin Round, or Rib Chuck" are offered with a list of cuts included. Approximate weights for each type of cut (such as 12 pounds or steak, 30 pounds of hamburger) are probably not listed.
16. Commonly available include 5-10 pounds of hot dogs, 5-10 pounds of chicken, such as the IIT administrators, 5-10 pounds of bacon, or 50 p.c. of pork chops or steaks. Sometimes the customer is given a choice of any or several, or is given the option to buy them for a nominal amount.
17. The ad will say "same as cash."
18. You must call for an appointment.
19. Orders will be custom-cut to your specifications "while you watch."

Student Life Meets

The Internal Revenue Service recently signed up to help correct students with defaults on their student loans, may now get in the business of deciding if students are telling the truth on their aid applications.

To "catch errors" on student aid applications, the Office of Management and Budget (OMB) said last week it will ask Congress to give federal agencies access to IRS records.

Claiming student loans have the "highest error rate" of any federal benefit program, OMB spokesman Steve Tupper says the plan could save the government at least $1 billion.

But some student aid officials say the OMB insists on overestimating the error rate but they also feel Okay, fine. This story doesn't have the least bit to do with the Student Life Meeting, but who really cares anyway?
Hey Stupid
Hey stupid! Quit sending us these! Quit sending us these!...Quit sending us these!!!

DCC Contest

IIT's Dormant Computer Center (DCC) is sponsoring a contest in which students are asked to submit guesses as to the ratio of (hours up)/(figures down) for the Grime computer. (HINT: The network is running smoothly so the advantage of having your printout in your mailbox within 48 hours will be awarded to the closest guess. There is, however, a small catch: guesses must be submitted through the "mail" feature in the Grime. *i.e., you first have to get on the computer. GOOD LUCK!

WIOU TELETHON

The campus radio station, WIOU, is holding a "Dire Straits" telethon to raise money to purchase new albums to expand their musical library. The station is requesting that anyone who wants to pledge megabucks so only the finest quality new records will be purchased; otherwise, the campus will be subjected to listening to an entire week, non-stop, of Dire Straits' tune "Money for Nothing" to further emphasize their point.

Finals Rescheduled

Following are several corrections to be noted for the Final Exam Schedule:

- All Tuesday exams will instead be on Monday, in addition to the Monday exams, except the "a.m." times are to be "p.m." times, and vice versa so that no conflicts exist.
- All Friday exams will be rescheduled, who wants to be here on Friday? (Grades for these courses will be based on the average of the first exam and all homeworks divided by the number of assignments.)

The aforementioned changes are part of a new "Condensed Studying Program" which has been proposed to test whether even well-prepared, confident intro-als can fail morably.

Workshop

The Craft Center Workshop for this week will be on Toy-Making. The guest speakers will be two of Santa's elves, respected and honored by all their colleagues. The workshop will be held in the HUB cafeteria (so the large tables can be utilized). it will be held from 12/15 to 12/24.

Humanities Colloq.

The Humanities Department is sponsoring a colloquium next Wednesday at 4 PM in the EC: entitled "Things You Should Have Already Learned Before Now." The colloquium will cover basic writing skills including the correct use of prepositions, nouns and verbs, and the importance of the complex compound sentence. Such advanced topics as adverb and adjectival usage may also be discussed, in the question-answer session, time permitting.

PST Event

PST (Party Some Time) will be having an exciting event for all those interested in some serious food (all you can eat), and a generally great time. All are invited and admission is free, so PLEASE COME

IEP Sale

I Eta Pi (IEP), the culinary fraternity, is holding a bake sale on Friday, in the HUB lobby from 12-2 PM. All students are asked to bring something to the sale, as our officers will probably have worked all day and will have been asked to stay for the evening. You're invited to enjoy a great time.

EB Movie

"Extemally Bored" presents a newly released film which is truly the nature of our organization and therefore expected to be very popular if ever done. The movie, "Emotions of Inequality," based on the book by Jean Jacques Rousseau, will be shown only once, this Saturday night at 9 PM in ilD Miss.

Restaurant Review: The Gourmet Indian

Wanting something different for a change I decided it was high time we tried the Chopstick Tepee for a taste of American Indian food. The Chopstick Tepee, a branch of the Nest Ltd tribe, have a unique diet all their own. The Chopstick Tepee, near the north-east of Chicago, is located in a rundown old garage, a refreshing change from the ambiance of other establishments.

Although the menu was fairly sparse, the dinner was on it was excellent. The hot food dinner, Shoo-ka-kah

Excellent. Fettid-fido-a is basically buffalo hide which is nailed down to a busy staircase for three weeks. Then it is boiled in buffalo stock for several days or until almost tender. It is then served with mashed potatoes. However, the aromatic dish was not conspicuous, and that it was perfectly safe to finish the course, which did with relish.

Immediately after this mishap, a piece of chicken consisting of a jucy-hara came over and played some cultural Indian music for us. We thoroughly enjoyed their rendition of Ten Little Indians and "Happy Trails To You!"

After such a long wait we were glad to see theicky-toofa cola was nearly done. But as luck would have it, the cola was not filled with the cloudy drink, it was a very nice cola.

But to our surprise, the cola was not filled with the cloudy drink, it was a very nice cola.

ATS College Bowl Held

Last Wednesday and Thursday ATS sponsored the annual Intercollegiate College Bowl. Organized by mechanical eng. major Tom Baglio, the trivia competition was a big success. For the second year in a row, the AICHE team won the championship.

The competition commenced with a game between the faculty and administration. Playing for the faculty team were Margaret Huyck (team captain), Earl Zwicker, Ben Stark, and Sheldon Mostovoy. The administration team consisted of Nate Thomas (team captain), James Vice, Joel Friedland, and Dana Price. The game was close, but Ben Stark led the faculty to a 110 to 100 victory.

Once the 2 teams the ATS team was picked by AICHE 115 to 35. The ATS team started Cathy Paul (captain), Crystal Garry, Sandy Marcus and Sid Chadda. The victorious AICHE team was headed by John Gossage (team captain), Rich Chylia, Sue Hammond, and Dennis Di Marco.

The game was selected by Dr. Betz Pi's Honorary Society 35 to 25. Two of the AICHE team members, John Gossage and Rich Chylia, were selected for the All-Star team. The All-Star team was selected by the number of votes.

King Celebration Planned

by Milch Davis

On January 29, 1967 Dr. Martin Luther King was born in Atlanta, Georgia. After studying at Morehouse for three years he was ordained. A year later he entered Crozer Theological Seminary in Chester, Pennsylvania. There he was one of six blacks in a class of 100 students. He was president of the class, the "most outstanding student," and a recipient of a fellowship for graduate study. He received his graduate degrees at Boston University. After marriage to Coretta Scott June 18, 1953 he accepted a role as pastor of the Dexter Avenue Baptist Church in Montgomery, Alabama, after rejection of several other prominent positions.

New Alumni Tuition Plan

A new IIT tuition grant program will provide $1,000 per year towards tuition for the children and grandchildren of IIT alumni. The program will begin in the fall of 1986 and will be for the incoming full-time freshmen and transfer students in undergraduate studies.

"The alumni contribute financially and volunteer time to IIT. The program is one way of saying that we appreciate what they are doing," said Ellen Rotzler, Associate Director of Admissions. The program has been well received by alumni Rotzler has talked to Rotzler believes." The program will encourage more alumni children and grandchildren to attend IIT.

The tuition awards are not based on financial need, and will not preclude other institutional scholarships.

No School on 1-20

Due to the observance of Dr. Martin Luther King Jr.'s Birthday, classes will not be held on Monday, January 20, 1986. Spring semester classes will begin on Tuesday, January 21. Registration will continue through Wednesday, January 22.

who were children. This made many teachers realize just how "free" blacks really were. They witnessed the injustice firsthand on television. The sight was astounding.

In memory of Dr. King and his message of tolerance, the Concerned Black Students' Student National Technical Association and National Society of Black Engineers, and Alpha Phi Alpha fraternity will host a series of events kick off on January 24, 1987, continuing through February, black history month. On Saturday, January 24, there will be a Grand King's Birthday. Singers, dancers, and a slate of activities will be a part of the celebration. On Saturday, January 25 at 7:30pm the Joseph Holmes Dinner will be held. On Sunday, January 26 Alpha Phi Alpha will host a forum. Additional activities will be held throughout the month of February and will be announced early next semester.

Entrepreneurs

Tech Entrepreneurs will hold its next meeting on December 10, 1985 in the HUB Field Room from 12-2 PM. The topic of discussion will be the Coleman/Fannie Mae Candy Foundation.

Rec Center Slashing

For the last week of classes and finals, the HUB Rec Center has slashed its hours drastically. Monday, Tuesday, Wednesday, and Thursday of the last week of classes, bowling is only 3:00 pm, pool is only 11:00 pm, and football is only 11:00...THE NIGHT IS A GAME OF Partially open.

Durian finals week, prices are rock bottom! Bowling is 2.5 cents per game, pool is 3.00 cents per game, and football is 2.00 cents per game. These prices are good all during finals week, so come into the HUB Rec Center and have fun at low, low prices.

Now Forming...

Spring Bowling Leagues are now forming in the HUB Rec Center. There will be three leagues Mondays at 3:00 pm and Thursdays at 7:30. Teams are made up of four members and each week you bowl against another team. Both leagues are handicap so all bowlers have a chance to win. For more information, please contact the HUB Rec Center. Call us at x3079 for info and to sign up.

Hey Laura

Congratulations Laura! — Your Friend Patty

Alternate Realities

The IIT rugby club will hold its last meeting of the semester on Wednesday, Dec. 11 at 12:10 pm in the Crown Room in the SR corner of the HUB. Don't miss this exciting conclusion to the semester-long weekly Diplomacy game. This will be also your last chance to arrange for gaming sessions during the break. New members are always welcome.

Pro's

Student comments on INSAs

Greetings from Lyon, France. I am an IT student at Lyon Tech in the exchange program INSAs de Lyon. This is the time of year when a certain selection of students will receive a letter offering them the opportunity to participate in IT's exchange programs. As this decision comes at a very important time in one's student life, I have a few words of advice for those students considering going abroad in this particular exchange to France.

First of all, if you are considering this program, you know what your first thought is: "No, you can't go to Europe, number one answer: probably Culture, History, I can't. I can't leave."

But there are many other ways. GN. First, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Secondly, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Thirdly, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Fourthly, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Finally, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Save $800.00 when you buy a Zenith Z-148 PC at our Special Student Price and we'll throw in a Zenith 12" Monitor—a $140 value—ABSOLUTELY FREE! The IBM PC-compatible Z-148 PC offers 256K of RAM—upgradable to 640K without additional expansion cards. 70K of floppy disk storage. The ability to support most peripheral right out of the box. And the MS-DOS operating system—the one most used in the business world today. So now you can run virtually all IBM PC software—and it goes up to 66% faster than the IBM PC XT at a fraction of its cost.

Student Comments on INSAs

Greetings from Lyon, France. I am an IT student at Lyon Tech in the exchange program INSAs de Lyon. This is the time of year when a certain selection of students will receive a letter offering them the opportunity to participate in IT's exchange programs. As this decision comes at a very important time in one's student life, I have a few words of advice for those students considering going abroad in this particular exchange to France.

First of all, if you are considering this program, you know what your first thought is: "No, you can't go to Europe, number one answer: probably Culture, History, I can't. I can't leave."

But there are many other ways. GN. First, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Secondly, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Thirdly, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Fourthly, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Finally, if you want to go to Europe, do not do it only because you want to see Europe. Think about what you want to do in Europe. What do you want to learn from Europe? What can you learn from Europe that you can't learn from your home country? What can you learn from Europe that you can't learn from your home country that you want to learn from Europe?

Bring down the cost of your education.

Student hassled by thefts

I have been a part-time computer science student here for three semesters now, and it's been really enjoyable. I've had a string of top-flight teachers and have learned a great deal, but unfortunately I will not be returning to IIT in the spring. I can't. The "extracurricular" costs have become prohibitive.

On October 8, my car, which was parked in an IIT lot, was broken into; one of its windows was smashed, and an incredibly few fairly inexpensive items were stolen.  I was furious, that having been the first time I was victim of such a crime, but I rationalized the incident by telling myself that I was better off, that everyone should have such an experience once, and so on. This grand experience cost me $200 out of my own pocket.

Four weeks later, on November 5, my car was broken into again. Another window broken, another bunch of piddly items stolen, another $200 for me to repair the damage. This time I have no rationalizations, just the beginnings of an ulcer. And a rapidly declining bank account.

Response to EIC editorial

Mary E. Germany's Nov. 18 editorial provides interesting insights into the mind of a campus liberal—although probably not the ones intended.

Ms. Germany recalls IIT's role, the open expression of conservative views convinced her that "it would be in my best interest to remain quiet with my political views." This indicates either a paranoid fear of suppression by jackbooted Young Republicans, or a lack of courage in her convictions.

Ms. Germany insists that those who supported Epton for mayor did so because "they couldn't bear to vote for a black," and declares all other reasons offered to be mere "exuses". Unless she's telepathic, there's no way she could know that assertions like hers are an admission of unwillingness to engage in rational debate.

Most revealing of all is Ms. Germany's refutation of the "old" simplistic, black-and-white arguments rife with the tired cliches of dogmatic liberalism and following that sorry recital with a claim to having "an open mind".

And to think I once supposed the smug superficiality of Ed Sabin's political pronouncements was without equal.

Mark Pandure

Another response to EIC editorial

It is stimulating to read the musings of a directed edifice-wielder whose social and political perception of the world generates a focal point of creative tension with the ideological statements previously appearing in Technology News. For some time one was waiting expectantly for a reaction to what appeared to be a monochromatic view of international geopolitics. A catalyst to encourage principled technical atmosphere at IIT was provided and hereof one might profitably the spirited exchange of student opinion.

The very involvement of students in matters concerning the campus vindicates the attempt to broaden the forum and learning process which seeks to resolve the complex issues in the development and peaceful maintenance of the human planet. IIT represents at a dinner last week honoring student tutors and professional role models for young people in this area, a twenty-four hour chapel vigil by Airforce ROTC members remembering the fallen. A Miss in Action, donations of clothing and other resources by faculty and students against the backdrop of the Yule Christmas tradition to look to the needs of those about us, and cooperation with the National Science Research Center and the American Cancer Society in the great American Smoke Out Campaign—all are elements of an educational experience which integrates professional growth with the human dimension of education.

Technology News deserves appreciation for its role in helping to further such public consciousness.

Annelie Amadio

A student's opinion of COMFIT

For the April Fool's joke issue of Technology News last semester a story was run entitled "Martin Fires Faculty." It was indeed a joke.

In August 1984 President Martin presented a plan to scale IIT's budget. In Martin's words, "We're in a situation where we have some departments that are over-sustained and others that are underfunded. In the process of addressing this problem, it became necessary to develop a new policy which would allow us to restructure programs and which reduction could lead to the elimination of both non-taxed and concessively tenured positions.

The policy in short: Faculty cuts. The faculty became outraged and the controversy even mirrored on a student interest. For the next eight months, the faculty, students, and the administration neared impasse.

This fall President Martin revised the first draft of the document composed by the committee for the future of IIT (COMFIT). On the very last page of the document Martin stuck a section entitled "The Present Situation and Its Remedy.

The "Present Situation" is the same as it was a year ago - IIT is in debt. The "Remedy" is also the same - faculty cuts.

Of course the plans are not the same. In 1984 the plan was entitled "IIT in the Decade 1985-95." In 1985 NewSpeak version it is entitled "A Second Century of Excellence." The wording of the plan would please George Orwell.

The major difference between the plans involves the concept of tenure. In the first document Martin announced the probable dismissal of tenured faculty. As a result, "Interim Procedures and Standards for Reduction of Faculty, Mergers, or Elimination of Departments" was composed by the faculty and administration. That document received Martin's seal of approval. However, it was a formal newspaper dictionary that defines the ground rules for the necessary reductions (firing, elimination, etc.)

It is obvious that the school cannot continue to operate on the same budget plan, but are faculty cuts really necessary? Most students chose a college to attend on the basis of the school's quality: Quality in the programs the school offers. Programs that are instructed by good faculty.
Dirty Harry

Do you have six finals, or only five? Well, in this excitement we kind of lost track ourselves. But seeing as this is Dirty Harry, the most powerful Clint Eastwood movie ever made, and could blow your mind clean away, you got to ask yourself just one question. Do you really feel like studying? Well? Do you, punk?

Shown in the HUB auditorium:
Thursday, December 12 at 5:15 pm
Saturday, December 14 at 7:00 pm and 9:30 pm
Admission $2.00

And Happy Holidays to all

A Penny Gillette Adventure - Episode 7
A How-To Fix Your Calculator

by Dr. G. Brubaker

What’s troubling you, buddy? Say you’ve got an exam 90 and you’ve got one of those TI calculators. Say when you did the problem last night, the three button did nothing. Say when you pressed the button you got zero. Think that’s the way your grades will be computed? What’s troubling you, buddy?

Well, read on buddy, and find out how to cure your ills, improve your grades, and save the price of another calculator. All you need is 5 minutes, a green thing, the guts to dismantle your TI, and a casual interest in brain surgery. Before you attempt this procedure, you’ll need:

1. A TI calculator with one of those economical key-boards; the little TI-35’s are most prone to the problem.
2. A green thing. This is a piece of plastic, or a screwdriver, or a rubber band, about one inch square. Eight of you can share one Scotch tape pad if you take turns out of class. Use it for the back out of the way (but where you can find it, later should you succeed in this procedure).
3. The display and processor (yes, there is one chip in there) are attached to the board of interest with a short flexible conductor; it looks like a chicken with its head cut off (as Grandma often said).
4. (Optional) Six inches of Scotch tape (please pass these instructions to the 3M recruiter when you’re done; not to the TI guy). It’s the simplest step by step instructions:

1) On a suitable surface such as a table in the HUB, pry the back from the calculator. You can do this with a table knife (also available from the HUB) or a fingernail. The batteries will probably fall out if you have not already removed them. If you’re in the HUB, look for them stuck yesterday’s RC pudge under the next table. At one of the many in the kitchen, the batteries will be under the fringe. If you are elsewhere in the house, they will be either in the register under or the carpet. New batteries are stocked in the HUB. Replace the back out of the way (but where you can find it, later should you succeed in this procedure).

2) The display and processor (yes, there is one chip in there) are attached to the board of interest with a short flexible conductor; it looks like a chicken with its head cut off (as Grandma often said). If the polarizer falls out — if it does, put the battery back in the cell pocket (whenever you can find it). The card of interest is white and is attached to the case front with several tiny plastic tabs. There is one tab near the display end (to your left if the display is face down and away from you). Carefully pry the tab up and the card away from the case using the nail or knife used in step 1. Do not turn the front half case over. To do so will spill the buttons into the same place with the batteries! Leave the case halves alone. The guts of the calculator are now in your hand; a white plastic card with the IC and display attached via a flexible planar cable.

3) The flexible card is the culprit. On one side please find a black Mylar film covering the key switches. You may play with it if you are so inclined before you take it apart. It should not be left keycapped or you press on the buttons. You will now remove the black Mylar film from the white plastic card. Start at the edges, lifting carefully. Do not tear the Mylar film or separate the metallic conductors from each other or from the display… sometimes I have done that experiment…I do not think it will lead to improved calculator function. If you plan to try it and will not accept responsibility for your attempts tell me now. If you insist, there is six to eight sticky spots holding the interior of the Mylar film to the white card so work slowly and carefully. No tools are needed. The black Mylar film may be completely separated from the white card. It has several rows of cone metal buttons joined by relatively fine conductors of the same material. Do not separate anything from anything on the Mylar film.

4) Here’s where the “green thing” comes in. The “Scotch Brite” material is about as abrasive as a medium steel wool, but not electrically conducting so you don’t need to worry about little splinters in the circuits. It is also as soft and conformable as steel wool, making it much easier to use for brain surgery than sandpaper. Polish the conductive metal buttons using the green thing and on the white card. If you start with the Mylar film, you’ll find more enjoyable polishing you need to do have an effect. If your mother sees you doing this, you may experience a loss of metal in the future. Ditto the NORTC Unit Commander.

5) Once the metal pieces are where you want them, be sure to put the Mylar film back in place (i.e., get it back together). Simply undo the above steps. You may use the optional Scotch tape, or the “Scotch Brite” film to the card (along the edges). I do not bother. Press the card into the case. Reassemble the halves of the case (which should still be face down on the table if you don’t want to play with loose buttons (on the other hand, this is an opportunity to prepare a trick calculator. Let the next guy to borrow mine be a quit Savannah)). If the polarizer has come loose, put it back. It is somewhat like a 2 x 2 slider; most of the ways is fits are wrong. You can tell if it is in wrong simply by looking at the display. If the polarizer is backwards (or upside-down, etc.) the display is blank (under which circumstances keyboard bounce is a negligible problem); turn the polarizer around on either or whatever. Press the back in place. Back the batteries in place (pay attention to the signs; solid side are sensitive to both the signs and magnitude of the voltage). The battery cover should be put in place and the calculator should be put in the case. (You wouldn’t do it for the works of a freshly rebalanced calculator, would you?)

6) Try it. If it works, you can’t trust your calculator, what can you trust?

Bowling

Continued from page 1

The All Stars pulled away in the second half to post a 258,7 to 105. The All Stars will go onto, Regional competition in February at a location not yet determined. The All Stars was composed of the 3 members of AVA, Kung, 3 members, Chicago Select and Natasha Richardson. The committee and chairman Tom Baggs, a third Stimel, take good care of Bill Ernst for donating his time, a judge, the moderates Joanne Dussauds and Paul, and Union Board for setting up the event. They make the All Stars have a wide, run, enjoyable, and entertaining College Bowl.

BOWLING

Continued from page 2

Illinois, Illinois State, and the University of Illinois. The Hawkeye’s total score is only 4- 8, but the team has defeated some tough Division I opponents. The team average is 100 per game. This, in addition to their experience will make the Hawks very tough to beat next semester.

Kathy Conlin, who finished with a series of 778, led the women’s team to a seven pin victory at the University of Illinois against the U of I, with a total best 235. This is the highest game an Illini bowler has bowled in the past 4 years.

All five women ranked in the 10th frame to insure the victory. Unfortunately, the national ranked U of I, team won the next 4 games and the match.

Barbara Boyden bowled head-to-head against the 1984 amateur bowler of the year, Michelle Muller, who has just finished representing the United States in international competition.

Technow News Actors of the Week

keith evans basketball

Keith Evans, a senior from a state school major, is 6’ 4” forward on the basketball team.

Keith averaged 11.6 points per game and came down with 28 rebounds in his 4 games, last three outings. He has scored 58% of his field goals and 43% of his free throws.

Renee Mayden Bowling

Renee Mayden is a senior business major and a member of the women’s bowling team. She leads the team with a high 162 average. In the Hawkins match against the University of Illinois Champaign, Renee shot an 892, 5 game series against Michele Muller, the “Women Amatuer Bowler of the Year”, but was narrowly defeated in the fifth game by a single point in the outstanding 07, 3 game series (210, 188, 206) in the same match, Renee will have the opportunity to gain an award at the end of the season.

Ryan Kirkland Basketball

Ryan Kirkland is a freshman from the Chicago H.S. Ryan is a business major and a 6’9” guard on the basketball team. In the last 4 games he had 19.3 points per game and had 12 rebounds and 15 assists. Ryan shoots 63% from the floor and 64% from the line.

Brad Novak Bowling

Brad Novak is a freshman major in Architecture and a member of the men’s bowling team. Brad bowled a 1041, 5 game series and captured 4 of 5 games in the match against the University of Illinois Champaign-Urbana. Overall, Brad had a 106 average.

No faces cancel one another. Call us.

AmeriCan country society

On the leading edge of technology.
COMFIIT
continued from page 5
The University Faculty Planning Committee (UFPC) evolved from the faculty cut crisis last fall. In October, they presented an alternative plan to Martin and the Board of Trustees. Their suggestions included reductions in teaching assistants, part-time teaching staff, and non-academic staff. They also found statistics showing how the administrative and non-faculty staff has grown too much for the size of the school, hint, hint.
Sure, these cuts still mean that people are fired. However, the UFPC also proposed that substantial funds could be raised through grant proposals, and endowments and gifts that are not being used. It appears how far these suggestions got.
So HFT is going to have a Chancellor. What will the Chancellor's job be? He or she will effectively be the chief operating officer and academic head of HFT. Obviously, the chancellor will take over some of President Martin's responsibilities. Why? To give Martin more time to discipline his faculty, care.
Of course not. Martin stated last February that he will be freed to do other work for HFT—"funding and development" in particular. Time will tell.
Now the big question. How will this new administrator be paid? Five more faculty don't even think it. Last February one proposal (which has since been canned) was to eliminate the School of Advanced Studies. After this issue of Tech News the decision may be to eliminate Tech News.
So where is HFT headed? Toward further debt, a staff of 3 faculty members (for the one student move enough to enroll in such a school, or total bankruptcy?) Toward better planning and improved communication between faculty, students, and administrators? Who knows? Perhaps we should worry about it. I'm sure Big Brother is taking care of everything.

EIC comments on Christmas spirit

It's the end of the semester for Tech News, and it's the end of my term as EIC. It's sort of a tradition for the outgoing EIC to write a final editorial reminiscing about the semester gone by. Last year the EIC wrote an excellent one that I couldn't hope to match. But the sentimentalism in me still wanted to write something. I started thinking about the holiday season coming up and I thought I should write something appropriate. Then I remembered a student who came up to our office early in the semester and asked us to write an editorial about this cause. At the time I had other things to do (Tech News not being able to undertake certain political policies without some discussion with our governing board). It's not good to make waves here at HFT. Well anyway, he handed me a brochure and went on his way. I stuck the brochure in my backpack and promptly put the matter back into the part of my brain that habitually forgets things. However, each time I removed my backpack, I couldn't seem to throw the brochure away. Something kept holding me back. I rationalized holding on to the new lettered brochure by saying one more piece of paper in my backpack can't hurt.
The first brochure was from Amnesty International. I quote: "Amnesty International is a worldwide movement of people acting on the conviction that the governments must not deny individuals their basic human rights." Amnesty International became well known when it received the Nobel Peace Prize in 1977. Amnesty International works to free prisoners who are "prisoners of conscience" and have not used nor advocated violence.
When I read the brochure I was deeply moved. In addition to the general information about Amnesty International, they published letters from released prisoners.
"When the first two hundred letters came, the guards gave me back my clothes. Then the next two hundred letters came, and the prison director came to see me. When the next pile of letters arrived, the director got in touch with his superior. The letters kept coming and coming three thousand of them. The President was informed. The letters still kept arriving, and the President called the prison and told them to let me go." a released prisoner from the Dominican Republic.

My God, the simple task of writing a letter could halt the torture or spark the release of a prisoner.
"For years I was held in a tiny cell. My only human contact was with my torturers... My only companions were the cockroaches and mice... On Christmas Eve the door to my cell opened and the guard tossed in a crumpled piece of paper. It said, Take heart. The world knows you're alive. We're with you. Regards, Monica. Amnesty International. That letter saved my life." a released prisoner from Paraguay.

Then I started thinking about what I had said about moral education a few issues back. Most of the time people don't get involved with social issues because they don't know what to do that will have an effect. I also started thinking how much of us send out Christmas cards. It wouldn't really be an imposition for any of us to send out one more Christmas card. One more Christmas card sent to one of these prisoners or their government would really embody the spirit of Christmas: Peace on earth, goodwill to all people.
So I contacted Amnesty International and they told me about a college student at the University of San Carlos named Irma Maria Husco Ramos imprisoned in Guatemala. She was a twenty-three year-old economics major when she was abducted in May of 1984 by armed men believed to be from the Security Forces. The Security Forces abducted her not for any crime she committed but to intimidate others from protesting.
So this year when you are sending out your Christmas cards, spend a few more cents and buy some airmail stamps and send a card to:
General Oscar Humberto Mejia Vittore Palacio National Guatemala City, Guatemala
asking her whereabouts and about her disappearance. And this year truly have the Christmas spirit.

Mary T. Heimann

Basketball Team Wins

Our Scarlet Hawks basketbacl team is in high gear as they have won 3 out of their last four games. The only loss during that time has been to Division I Western Illinois. Victories have been enjoyed over arch rival University of Chicago and CCAC members of Roosevelt University and Rosary College.

"We are 3 and 1 against teams that had comparable talent. We are playing about as good as we possibly can now, and if we get a little more help from the bench we could continue on in the winning ways," stated Coach Bob Tupper.

Standouts for the Hawks during the last few games have been Keith Evans, Ryan Kirkland, Cory Musser, Mike Divito and John Mahoney. Everyone has contributed to the team's success and recent history attests to that. The Hawks take on the preseason favorite for the CCAC crown, St. Xavier College tonight at 7:30 p.m.

Hawk

IFC Volleyball Closing

by Pieter DeVaal

In case some of you have never had the pleasure of watching an interfraternity volleyball game, I'll tell you a little of what they're like. If volleysballers play by the rules, they cannot touch the net at all, and carries are often called. This is not a hand-the-rules type of volleyball at all. Some teams switch their players after the serve in order to get them in the right positions such as getting the best server in the middle front. These games are very exciting with many spikes, blocks, and saves.

Some of the best athletes on the quad have been the volleyball courts. Probably the most important skill that these players have is their sense of timing. They have to know when to leap for the spike and block, they have to have the timing right for setting a ball. Hand-ay coordination is important in serving, spiking, and setting. Overall physical talent is very important, too.

Interfraternity volleyball kicked off this year with a new name among the main stars. Alpha Sigma Phi has emerged as one of the leading candidates to win this year's competition. For the past couple of years, Delta Tau Delta and Phi Kappa Sigma had been dominating the sport. Last year, the Delts won the championship with a close win over the Phi Kapps. This year, it looked to be the same story as the Delts and Phi Kapps cruised through their schedule with little difficulty. The Delts and Phi Kapps looked forward to their game which would probably decide the championship. The Alpha Sigs were taken lightly by the Delts and surprised them by winning convincingly. The Phi Kapps took the Alpha Sigs more seriously and beat them. This makes the Delts-Phi Kapp game more important because if the Delts win, there will be a three-way tie for first place. If the Phi Kapps win, the championship will be theirs.

NAIA Award

ITT Varsity volleyball player Joan Benes was named to the National Association of Intercollegiate Athletics Academic All-American volleyball team. Joan was one of the leading spikers for the Scarlet Hawks, and a junior majoring in Chemical Engineering.

Bowlers Win

Freshman Brad Novak and senior Mike Wilk led the ITT keglers to a convincing 61-19 victory over the University of Illinois-Champaign on Saturday, November 23rd. This was the first match in their last four meetings that ITT has defeated U. of I.

ITT won 4 out of 5 games while surpassing the "100" goal twice in the game series of 1014 and 1006. Brad Novak won 4 games and had a 217 while averaging over 208. His high game was a fine 234. Mike Wilk, who also won 4 games with an average of 196 and had a high game of 223.

Freshman Andy Labin won 5 of his individual matches and rolled a personal best of 212. Senior Captain Mike Millette bowled a 215 for one of his 2 victories. Kevin Walker also picked up 2 individual wins. This win is another big stepping stone for the men's team since they have now beaten Loyola, Northern...
It all began two years ago when Dr. Michelob warned that a large meteor was on a collision with IIT.

Then last month, it happened. This is the fountain before the radioactive meteor landed.

First to be affected were the mice. The school had plenty of large holes to accommodate them.

Nobody was safe from these killer mice.

Another fragment crashed into the library.

Of course the school called in professional exterminators.

This student threw his tricycle through the foam and then it came to life.

The mad tricycle killed an innocent bystander.

It attacked another student but was surrounded.

The lynch mob went crazy...

... and strung it up.

One student came in contact with the radioactive foam.

This was the grisly result.

Students all over the campus began going insane and beating their heads on baseball bats.

The IIT Hawk got sick of being used as filler on the sports page and went on a rampage.

(Bruce Lee lives!)

We had to put in this photo of Bridgeport to take up space.
