Renovation Nears Completion

COMFIIT: The New Plan

Chancellor Search Continues

Campus Life Meets

Fire Damage To Alumni Hall
Anti-Technology

The rules are simple: Think up a fantastically funny caption for the photo and send it to Tech News (5th Floor Main Building) where it is awaited with bated breath. Entries must be received by September 20. The prize is the orgasmic fulfillment of your fantasy of seeing your name in print.

And the winner...

"Mary, I told you not to eat any more of those microwave dinners."

Ricardo Perez

**Placement Update**

All seniors who will be graduating this December or May are encouraged to register at the Placement Office located in Farley Hall, 4th Floor. In order to register, you are asked to do the following:

1. Submit 30 copies of your resume to open a file
2. Attend a CPC form to the front of each resume
3. Attend a workshop on interviewing skills. (See concurrent announcement for workshop specifics)

Sign-up for interviews will be held at 3:45 PM on Mondays for all the next two weeks. Please review the campus calendar to make sure you are available for all the interviews.

Information sessions and upcoming events will be discussed. Let’s make this another successful year by giving you our participation and attendance. We’re looking forward to seeing you there!

If you have any questions or concerns, please call Fran Hensper at 842-4691.

**Basketball Meeting**

All those interested in trying out for the basketball team, along with all team members, should meet in the gym on Sept. 26 at 12:15.

**Alternative Realities**

Attention new students! The Student Life Office is hosting an open house for all new students. This is a great opportunity to meet new people and learn about the various organizations on campus.

**UB Positions**

Union Board is now interviewing interested students for positions within the Union Board and Major Columns. Applications are available at the Director's Office and the Student Programming Office in the Hub. For more information, call 656-6879.

**Intramural Football**

Pick up roster this week from Coach Popper in Keating Hall; they are due Friday, Sept. 9th before 12 noon.

**Varsity Basketball**

Any newcomers interested in playing varsity basketball, as well as all returners and renews, are to meet in Keating Hall on Thursday, Sept. 26 at 1:15 for an organizational meeting.

**Set Priorities**

There will be a Counseling Center workshop on "How to Set Priorities" on Friday, Sept. 12, from 12:15-1:00 PM in the Hub.

**Co-op Information**

The Cooperative Education Office, better known as the Co-op Office, has started placing students in work sites for the Spring '85 term. Students participating are receiving hands-on professional experience in their major field of study. The Co-op Office is currently working with over 85 major companies across the United States.

**Night Students**

Commander F. Higgs of the Campbell Police and Dean Jamey Brown of the Campbell Campus have organized a water hop this year for a 6:00 PM game against the Minnesota Twins. For free admission, simply show your I.D. card at the pass gate. Please arrive at the side of the street by 8:30 and 34th Streets.

**Cello Recital**

Debby Barton Frank will give a recital on Friday evening, September 20th, at 8:00 PM in the Armoury. She is excited about the opportunity to meet new people and learn about the various organizations on campus.

**STUDENT ORGANIZATION FAIR**

Tuesday Sept. 17
Noon to 2 pm
HUB Corridor
All students and faculty invited to attend.

**BECAUSE OF CHEMOTHERAPY KAREN ANDERSON IS A STATISTICIAN.**

**THE KIND OF STATISTIC WE LIKE TO BRAG ABOUT.**

When Karen was 18 years old, she discovered she had a deadly form of leukemia. Facing incredible odds, Karen spent two years in intensive chemotherapy. Now, eight years and two additional forms of cancer, Karen never suspected that she had lost her fight. Her tireless work with more than 15,000 Americans every year.

Karen's work helps us find it as a statistic, but her story inspires us all.

**SHARE THE COST OF LIVING**

American Cancer Society
The survivor continues in a separate series.
WOUI Meeting

On Tuesday, September 10, WOUI (IIT Radio) will hold a meeting for all returning staff members and anyone interested in joining WOUI Staff. The meeting will begin at 12:30 in the WOUI office (11th floor, Main Bldg.). Any returning staff member who cannot attend this meeting must contact Kevin Marin (225-5685) or Ed Hasloures (842-6271) or leave a note for one of the Executive Board members at the WOUI office. Anyone who does not attend this meeting or contact one of the Executive Board members may be dropped from the staff.

Ski Trip

Once again the IIT Ski Club is sponsoring a ski trip to an outstanding ski area this year. In the past, we have run very successful trips to great destinations such as Vail, Colorado, and Jackson Hole, Wyoming. This year we have sponsored the famous college town of Steamboat Springs, Colorado. The price of $300 includes six nights lodging in high class condos, five day lift tickets, transportation, and free parties. You have your choice of dates: Jan. 1-9 or Jan. 9-16. There will be an informational meeting on Wednesday, September 10, 1:30 PM in room 308, HUB, located above the HUB cafeteria. For information call John Esteas at 225-8666 or X1014, or Lisa Gwiz at 236-2524.

IEEE Meeting

There will be an organizational meeting of the IEEE Thursday, September 12, at 12 noon in the Peristyle auditorium. Everyone is encouraged to attend and participate in the planning of another great year.

EROS

The Chemistry Department will be holding a colloquium on "EROS: A Computer Program for the Prediction of Chemical Reactions and the Design of Organic Syntheses." The quantitative prediction of chemical reactivity from qualitative data would constitute a powerful means for the efficient planning of experiments. The most relevant numerical techniques for exploring novel reaction paths from known reactants will be discussed.

The colloquium will be given by Prof. Dr. Dr. J. Geiger of the University of Chemistry and Technology in Prague, Czechoslovakia, and Prof. Peter Johnson, HBT, and will be held on Friday, September 14, at 4:00 PM, 11816 Hitchcock Hall.

PTS Hot Dogs

PTs Ski Club will hold its Hot Dog Sale Tuesday and Wednesday, September 10 and 11 from 11:30-1 to 1:30 in front of the cafeteria at the corner of the HUB.

EIT Manuals

Pi Tau Sigma, Illinois Tech Delta Chapter of the National Mechanical Engineering Honor society will again be selling Engineering Technology Manuals. The price is $40 (in book form) and will be sold for $29. Prices will go up with our next shipment. Get your copy while supplies last.

Co-op interviews

Students interested in participating in the Co-op program, or those with questions about its benefits, are encouraged to attend the Co-op interviews with the following companies in Farr Hall, Room 403, on September 10.

Wednesday, October 16:

TV Steet, Requesting EE, ME, METM, 2.7 GPA, permanent residents.

Tuesday, October 22:

U.S. Dept. of Labor (OSHA), Requesting all. Chemistry, Physics.

Tuesday, November 5:

Dow Chemical Requesting ME, CHE, EE with power option. 2.7 GPA.

All Golfers

There will be a golf team forming for fall matches. Any golfer with a handicap or better, please contact either Olber Baumann (392-5635) or Donn Hahl (236-1001). The first match will be on Monday, September 9 at Wedgewood Golfcourse, Plainfield, Ill.

Metal Club Picnic

Any freshman or sophomore metallurgy or undecided engineering student is invited to the Metals Club Picnic on Saturday, September 21, 1985, 1 pm, at Willow Springs Woods. Details are available in the Metallurgy Department on the second floor, phone extension 273. Please notify the department by Wednesday, September 16, 1985.
UFPC Recommends

Two subcommittees of the University Faculty Planning Committee made great progress in their areas over the summer. The UFPC is chaired by Dr. Robert Roth of the Biology Department, and is composed of faculty members who are concerned about various IT policies.

One committee is the Undergraduate Program Task Force chaired by Dr. Zia Hassan. This group examined the undergraduate program at IIT - how it should be structured, the courses and the general education requirements. They also discussed the general philosophy of IIIT's objectives overall. The committee looked at what IIIT should accomplish as a school. From this discussion, many of the questions "What type of students are appropriate for IIIT?" and "How should IIIT go about recruiting these students."
The Undergraduate Task Force Committee produced a rough draft report that will be presented to the faculty for review. The faculty members will be invited and comment on the report. A final draft will be voted on this fall.
The other committee concentrates its efforts on the Graduate Program and Research. The chairman is Dr. Hassan. IIIT has an advantage over the other area schools in the area of graduate study. It has had a graduate program for 40 years, which is more than any other school in this area.

According to Dr. Roth, the research needs to be emphasized so that IIIT can maintain its distinction that aspect. Yet the research and graduate programs must work hand in hand with the undergraduate program for IIIT to be successful.

This committee is also working on a report. The report will be submitted to the faculty for approval this fall.

New Harza Eng. V.P.'s

Ray J. Bany's received a Bachelor's degree in Civil Engineering from IIIT in 1958. He went on to earn a Jurdit Doctor in Law at DePaul University and is a member of the Illinois Bar.

Fukuda joined Harza consulting engineering firm in 1979 as an engineer of the firm. He is responsible for the safety, quality, and economy of all electrical engineering at Harza.

IIIT Graduates Ray J. Bany's

New Hispanic Resource Service

Newly developed resource are now available to Hispanic students studying or considering study at IIIT in 1985-1986. These include the Office of Hispanic Educational Development (OHED), operating from IIIT's Admissions Office, a combined Latin American Cultural and Resource Center, a Faculty Advisory Committee for Hispanic Academic Advisor, and formalized open access to additional academic and financial aid sources outside IIIT. Added to the list of a better outlook in this year's affairs for the Hispanic student is the newly appointed LIFE's Executive Board, which will pick up the load and follow through LIFE's 1984-85 remarkable accomplishments with even a larger and better structured working team. A vote of credit should especially be given to Ms. Eulina Perez, LIFE's first female president, for her outstanding leadership qualities, dedication, and commitment. She will continue to work for LIFE as a student advisor to the Executive Director.

The OHED, which took off full swing merely before summer started, can be described in short that an "institutional support system of immediate access" for the Hispanic student pursuing a career in advanced science and originally hired in 1984 as Assistant Director for the PREP Program, is responsible mainly for the increased Hispanic representation on campus - a goal attained through successful implementation of imaginative recruitment and development strategies. Mr. Almenas is also LIFE's advisor.

The Latin American Cultural and Resource Center is an important part of the whole being by selected LIFE members. Featured in this year's activity plans, following the Inauguration Fiesta, will be a series of cultural and educational events. These include music, mini art exhibits, books and artwork sales, Latin American regional food sales, slide shows and talks, and possibly a Latin American Film Festival. Many thanks to new board members still on the drawing board. The Center is located in Far Hall, Room 302 (2233 S. Michigan Ave.). The unveiling ceremony of a framed "artistic" poster designed for LIFE by the renowned local artist Gamaliel Ramirez is scheduled to take place soon. For further information regarding these events, please contact Eberto Almenas by calling 567-1114.

The Hispanic sector at IIIT cordially welcomes all students and urges especially those that identify themselves with the Hispanic culture to make maximum use of these resources.

HELP WANTED

Students needed to work on a phone-a-thon Sept. 24 - Nov. 14
1 to 3 evenings a week
Hours: 6:00 pm - 9:00 pm
Tuesday thru Thursday
$4.10/hour

If interested, please contact:
Ruth Erickson
IIT Undergraduate Admissions
101 Perlstein Hall
567-5193

The NROTC Unit is considering an escort service that would be available for students during the evenings, beginning in the fall semester. The midshipmen will escort the student to any location on campus. We would like your help in determining how best to plan this service. Please fill out the questionnaire below and return to the Dean of Student Life Office.

Would you use the escort service? Yes No
If yes:
What times would you use it?
How often? Once a week More than once a week
Where would you need to go?
From where?
EIC: Mrs. Pynchon and You

I've never been in a "real" newsroom. To me the typical newsroom is something out of "Lois Grant." I'm sure you all remember the staff at the fictitious Los Angeles Tribune-Building. I admit, I'm a bit young, attractive reporter torn apart by the injustices of our society. I'm a bit aggressive, somewhat ob-

sed reporter who could get a story the day after the best man at the wedding. I have a bit of trivial bit of information. Donovan, the cool, collected photographer, was a bit of a peculiar photographer with the quirky nature that made him a star. Mrs. Pynchon, the aristocratic, venerable publisher. Of all the characters on the show my favorite was Mrs. Pynchon. She reminded me of my great aunt. She would promise to play circles around Emily Post and her book of etiquette, yet cut her toenails with a pair of scissors on the floor without even raising her voice. Mrs. Pynchon was like
to answer to a governing board but our publisher never says anything. I never have to go on an assignment. I can work with the publisher and answer ques-
tions about any story a certain story. I must say that's great! Well, I don't think so. I'm tired of hearing our publisher mumble about what he didn't do in this week's paper, never a definite criticism or suggestion. I had just mumble, mumble, mumble, do some investigative reporting, find you some dirt on the administration, mumble, mumble, mumble. Does the publisher speak up, voice his opinion? Well speak up though! That's right, speak up! You, Joe Blow average IIT student, the publisher is of no interest to him. I'm just a muckraking? Then when you see something or hear about something call Tech News and tell us about it. You want investigative reporting? Call Tech News. You are a top publisher, you have the responsibility to make sure this goes on as much as possible. The staff of Tech News is your
test to make you work for

Impoverished College Graduates

College graduates are having smaller families and the society itself is being debased. Such things as cars and homes because they are leaving a debt burden. That's why there are increased很多玩家, according to preliminary results of a new nationwide survey of aid recipients.

The lack of funds means fewer of many college aid experts that a continuing reliance on loans will be more bureaucratizing and skyrocketing tuition rates have forced students to borrow more than they can reasonably, repay after graduating.
The student debt issue, moreover, plays an increasingly important role in how financial aid is structured, as well as the amount of money any aid might entail. We are seeing instances where students' lifestyles are more than cut back. In some cases, the amounts of money they have to pay back when they graduate are so high that they can't even afford basic necessities. This is, in part, the reason why Martin, assistant director of the National Association of Student Loan Administrators (NASFAA), who sponsored the survey of 3,000 Guaranteed Student Loan (GSL) borrowers from colleges around the country.

Among other things, the stipulation of the GSI is that students are expected to delay raising families, buying homes, and purchasing cars because they can't afford the added financial commitments, they can't afford the basic necessities.

The survey, which Martin calls the most extensive study of GSL borrowers ever undertaken, also shows that younger, more recent grad-

uates are having the most difficulty with their loans because they had to borrow more to meet soaring tuition costs.

Single women, too, have more trouble repaying their loans. While men's average annual salaries — only $47,000 a year, compared to $32,000 for men after graduating, the study shows.

"That's no surprise to many of us," says Arnold Mitchem, executive director of the National Council of Edu-
cational Opportunity Programs at Marquette University.

"I think there is growing evidence that the student debt burden is affecting their long-term career prospects and that of their owners." Mitchem notes. "And it also appears to be affecting the number of students who don't go on to graduate school because they are already so heavily in debt."

Female, minority, and low-income students are hit the

hardest, he says, because they typically borrow more to attend college and pay more to graduate when they graduate. In fact," Mitchem points out, "it can be shown that most poor minority students never earn their bachelor's degrees, so they are stuck with repaying huge amounts of education that they never finished."

Mitchem, along with many other educational experts, believes the federal government's increased reliance on loans over grants for the poor is making the problem worse.

In the early 1970s, nearly two-thirds of all student aid came through grants. In 1987, that proportion dropped to about 30 percent.

Besides increasing grant money, the government should also return some of the high loan limits, Mitchem adds, "because it would only allow more students to graduate and then they are capable of repaying." But the American Council on Edu-
cational Opportunity, and recently asked the House Postsecondary Subcommittee on Education to raise the student loan limits from the current annual limits from $2500 to $3000.

There's a lot of concern over student debt, but there is more

on page 9

Colleges Face Lawsuits

DENVER, CO. (CBS) - In a situation where the hotshot school attorneys call a very "troubling case for colleges and universities," a judge has ruled the University of Denver must pay $5 million to a former student who injured himself at a campus fraternity house.

Among other things, experts say the ruling fuels an emerging trend for courts to hold colleges more and more accountable for students' behavior.

The trend, which in recent years has cost colleges money in legal fees and damage awards to students who have had misfortunes on campuses, is convincing many schools to increase drinking ages, impose tougher dorm regulations and give suspended students a second chance.

At DU, student Oscar Whitlock, now confined to a wheelchair, became paralyzed after falling off a trampoline in his university-owned fraternity house four years ago.

Whitlock sued DU, charging the university, as owner and operator of the property, was responsible for its safe upkeep.

A Denver District Court jury agreed with Whitlock, and in 1982 awarded the quadri-

plegic student $5.2 million in damages.

On August 8, 1985, after several appeals, the Colorado Court of Appeals upheld the jury's $5.2 million award to Whitlock.

Expanded Writing Clinic

What Something New? Some students are more conditionally and Absolutely Free of charge. For Everyone at IIT? IIT Writing Clinic Adds Graduate Students to Its Program.

"An emphatic yes to both questions," answers Dr. Barbara Balch, chair of the IIT Writing Clinic located in Life Sciences. For the first time, the clinic is accepting both ESL (students whose second language is English) and native speakers (students whose first language is English) who are eligible to use the Clinic's free, one-to-one tutoring services.

For the first time in its eight year history, the Clinic will tutor graduate students as well as undergraduates. Any IIT student may attend the 30-45 minute, individually tailored tutoring sessions with free, without fee and without grade.

Students who want help should sign up by calling x3465 or by signing up in 108 LS, and ESL will receive help from Ms. Susan Shaw in 108 LS.

Students should bring a sample of their writing to their first individual consultation and this should bring the assignment and a first draft of any paper with them.

The Clinic emphasizes self-sufficiency: its goal is to help students develop their own, edit their own, by enabling them to "clean up" general problems with finding something to say, organization, sentences, grammar, word choice, punctuation, and so forth. The Clinic is neither a thesis writing nor an editorial service. Tutors will furnish students with names of editors on request.
Free.

Get our new $49 software module when you buy an HP-41.

It's a deal that has no equal, for a calculator that has no equal.

Our new HP-41 Advantage software module packs 12K of ROM. One and a half times the capacity of any other HP-41 module. Large enough to hold the most popular engineering, mathematical and financial programs ever written for the HP-41.

You get comprehensive advanced matrix multi-functions, roots of equations and polynomials, integrations, base conversion and logic functions, and time value of money functions.

Our new module is also sub-programmable. So you can quickly access just a portion of a program or transfer that section to your own program.

And it's even menu-driven. That eliminates overlays and reduces the number of prompts.

In short, you get everything it's going to take to help you make the grade in everything from Linear Algebra to Physics to Electronics to Statics and Dynamics.

The HP-41 is a deal all its own. Its operating system is so advanced, it doesn't need an "equals" key. Little wonder it's preferred by more engineers than any other calculator.

This is a limited time offer. Call (800) FOR-HP/PC/Ask for Dept 6598. We'll instantly give you the name of a dealer who has no equal.

Do it now. The phone call is free.

But our new module won't be for long.

HEWLETT PACKARD

I'm a student who has no equal. Here's my proof-of-purchase to prove it. Please send me my free software module.

Name:

Address:

City State Zip

Phone Number

HP-41 Serial Number

Mail coupon with proof-of-purchase to:

Hewlett-Packard Co., SO/DC Direct Mail

P.O. Box 350103

Portland, Oregon 97230

Offer not available for resellers. HP-41 must be purchased from an authorized HP dealer. Each coupon must be enclo- sed with the complete coupon, and should be sent within 30 days of purchase. No cash value. Offer good only in the United States and Canada. Offer cannot be combined with any other offer or discount. Authorization does not apply to accessories. Allow 4-6 weeks for delivery.
Can you rewrite this paragraph?

There was a party. It was held Wednesday. The time was 7:30. Music was playing. Gobs and gobs of people attended. Wow man the colors. I had a good time.

If you can, you were born to be a Tech News writer. Take this test and bring it to Tech News today (5th Main). Tomorrow, you could be well on your way to being the next Bob Krumins.

However, if the above test utterly confused you, you still can serve a useful purpose. If you have a car and know how to drive it, we can use you. We are still looking for a distribution manager. Stop by Tech News today.

All positions salaried. Questions? Call 567-3085 or stop by our offices on 5th floor main.
COMFIT 85 will submit a first draft of its report to President Martin on September 20. By October 1 Martin will have reviewed this draft and revised it as he sees fit. He then will submit his draft to the Board of Trustees. The tentative date for the final approval of the draft is December 17.

The COMFIT 85 members are Truex representatives Robert W. Galvin, Robert A. Prizer, members of the boards of Overseers, and members of the Audit, Finance, Educational Resources, Enrollment/Marketing, and IIT Center committees.

Student members are Jo Ellen Nielsen, Kay Vuk, Ed Siffer, Raymond Adomatis, Stephen Varley, Thomas Yassen, Douglas White, and Mary Ann Johns.

Corigulations continued from page 8

Stony Brook partly responsible for the rape of a student in one of its dorms because officials failed to lock and secure the entryway.

Another student successfully got payment from the University of Alabama for a rape in an off-campus house owned by the school. The survivors of a gruesome kidnapping and murder case at North Carolina Wesleyan are suing the school for not properly lighting a parking lot.

Students should guard against tailoring courses strictly to draw additional corporate support.

Impoverished continued from page 6

also a lot of concern over the fact that loan limits aren't keeping pace with college costs, explains ACE policy analyst Scott Miller. A lot of people want the limits doubled," he says. "We're recommending what we think is a reasonable increase in limits, but not one that is big enough to add significantly to the debt burden problem.

8-star CLINT EASTWOOD
Film Fest

Kelley's Heroes

An all-star cast: Clint Eastwood, Telly Savalas, Don Rickles, Donald Sutherland, Gavin MacLeod, Carroll O'Connor. A disrespectful Army outfit decides to take on the Germans for its own reasons - to steal $16,000,000 in gold.

The Good, the Bad, and the Ugly

During the Civil War a mysterious nomad (Clint Eastwood) enters into a macabre partnership with a Mexican gunman (Eli Wallach), a man with a price on his head. Eastwood keeps turning him in to the authorities for the reward money and rescuing him at the last minute. They end up joining a sadistic criminal (Lee Van Cleef) for much bigger stakes.

Shown in the HUB auditorium
Thursday, September 12 at 5:15 pm
Saturday, September 14 at 7:00 and 9:00 pm

The Force will be with us... but it doesn't equal mass times acceleration.

Voice Your Opinion Survey

The Special Projects committee of Union Board is bringing back the Trike Race. We are considering combining it with two other races to make a Triathlon. These two races would be a Romper Stamper Race (those cups with strings from Romper Room) and a Hippity Hop race (remember those huge balloons to bounce on).

I would rather...
- Have the Trike race alone with an additional Modified Trike heat.
- Have the Triathlon which would still contain the Trike Race and Modified Trike Race.
- Which date would be best for you?
  - Thursday, October 10th
  - Saturday, October 12th

Please return this survey to the Programming Office (west side of HUB).
Any questions, contact Laura at x5329.

Wanted

Feel like a faceless social security number? Have no influence at IIT?
Well, take some action! Make things happen! Become the Executive Vice-President or Director of Major Concerts on IIT's Union Board. UB is now interviewing for these positions.
Applications are available in the Director's Office and the Programming Office in the HUB. For further information, call 567-8870 (campus extension 8870).

Tribulations of a Turtle

by Tom Finn

A turtle is a weird looking creature - a cross between E.T. and an old man. All their goodness is in their bodies being covered by shells. Can you imagine how ugly their bodies must look underneath? Not much is known about turtles; they hatch and disappear into the depths of the ocean. Most of what is known about them is when they are in the water. They don't lie around long enough to have offspring and then to die. Big spines stick back up from the water.

Attempts to obtain information by tagging turtles have been unsuccessful. Any sort of tag or marking system has been removed or removed as it grows to thousands of pounds. Turtles have been seen swimming in the water, but these need to be followed closely as the turtles avoid the surface of the ocean and you trail a balloon on your summer vacation...

It is said turtles live for 100 years or more. Researchers who study them always die first and are unable to tell us anything.

Turtle young are hatchlings from a hatchery and hatch from the water. Some turtle young are hatchlings from the ocean and hatch from the water. The next day they are dropped into the pond and raised in the water. They grow up and live to 40 or 50 years.

A vague division of labor occurs when digging out of the ground and the other one is raised from the sand. It is scratching the surface and the ones at the edges underneath the shells. The other one is responsible for eating the sand and the turf and the other one for eating the shell. They are not really very good at eating the shell.

The good news is that they have never seen.

If this experience was lost on you, just picture it as a graduating class of seniors.

There are many species of sea turtles, among them the Pacific ridley, flatback, loggerhead, hawksbill, leatherback, and the green. The green turtle is the best known since its flesh is most highly esteemed for its flavor.

The moral of the story is that the race does not always go to the swift. Ours was a race that should have been

"That was the last turtle story we'll have in this issue. By the time our last issue comes around you'll have the facts all straight"

Byron Pilgrim

High Speed Fun on the Outer Drive

by Conrad Pilgrim

My clearest memory of this event was about a year old, at my house in South Shore Drive at 50 mph. Leaping into the air, I found myself with my head out of my car. In that moment of fear, I realized that I was not wearing my seatbelt. I was on my way to the hospital. The attitude is in me now, like a steel figure. I can get a job, but I can't talk my way out of a ticket.

There were three of us in my car, my friend Roger, a friend of Roger's, and a friend. We drove to Chicago to see a movie. My friend Roger stopped looking at the road, jumped out of the car, and ran back inside. There is no doubt in my mind that LSD is the most exciting ride today, but what kind of excitement I can do without.

Lake Shore Drive is the most exciting road in Chicago because it can be extremely fun to drive, it is safe and it is exciting. When there is less traffic, the lights are longer, and the level of law enforcement drops down to a normal level of annoyance. The Drive is filled with sharp, deceptive curves that will throw you into an embankment in the blink of an eye, so be prepared to bump into a car. Plus, there is the scenery. The Drive belongs to two worlds at night: on one side you see the beautiful beaches and on the other you see the lake, equally vast, black, night, completely devoid of light. You could get lost for hours and it's not like you have a light guide if you are looking for turtle soup.

I had been hanging around the Union Office and the HUB, hazing around with some friends on the Union Board. We would sit in the office and shoot paper clips over the walls, hoping to hit one of the assholes who were sitting there before we began. The scabs would sit right on the other side of the office, and if one of them fell off a chair, we would shoot and hear a curse, so we knew we were scoring hits, too.

Ed walked in with some other incomers and one of the incomers, who was well known for giving HUB tours, and Ed. I found out later on, had joined the tour in an effort to escape the police. Ed is a pretty good talker. After the sporting cut crew he had been helping his way. He stayed in the office after the others left and asked questions about the movies the Board showed. Later on, about four of us went down to the HUB and had some beer, and Ed came along. He had that puppy-dog quality that we tolerated, and after a few beers he straightened out nicely.

He was a strange creature. Fresh out of some tiny high school in Lisle, Illinois about 58" and 140 pounds, with a black hair and a few acne scars. He drank a little and smoked a little, which seemed to be about normal. He meant nobody, gets into drugs and alcohol until they've gone to jail for a while. Ed played hockey, though, so I figured he'd pick up a few more vices in the year ahead. When I met him I met him again the next day to introduce him to Rogers, the ex-computer turned head of 104, and the two of them got along nicely. They both lived in North Halsted and had the underage of Rogers to S. 19.58 began to sink heavily.

The second week of school, Rogers and I met in his room for a cigarette, and he told me about Ed. "He's the horniest mother I've seen in a long time. He doesn't even draw on his cigarette. I would have never believed it, but he has every piece of budding published since 1978. He always tries to find some excuse to get up to the Women on the fourth floor, and two days ago some chaps locked his face in my face and we heard chopped his nuts off."

"What did you say to her?" I asked, accepting the cig off him.

Rogers told me, and I started to laugh. Sorry, folks, but there are some things that don't look good in print. We've got to do something about that boy."

The turtle soup is still the same, but the turtle soup is still the same. It is made from petroleum and vegetable oils - not turtles. It is made for consumption. "You can't eat that. It's all used except the oil."

Turtles don't oink but the sentiments are the same.

How do you know the time? by the turtles!" zoologist Jack Rodda writes in the aphrodisiacal properties of the sea to all turtle's private, humanLEGEND states a man took a look at this ingredient. After drinking down the concoction, he was instantly impotent, his effect on the creature to fulfill his wildest dreams and desires. It is said that for weeks afterward the man had an embarrassing problem - the effects would not go away. He stayed home until he was forced to go out and buy food. He wore very, very, very funny clothes, walked around making funny embarrassed hops, and spent a lot of time standing behind shutters and curtains until his problem finally subsided.

And that tapless man was a Chippewa nurse. Her attitude towards her "turtle syndrome" would have been readily comprehensible to the women of watching Mary Ann Children on the Channel. News and his wife of what he should have dis-a-pa-pear.

As children we all heard the story of "The Tortoise and the Hare." Allegory or simply called "The Turtle and the Rabbit," especially since the story is for children, but you know what those literary types are.

Anyway, in that race with the hare, the hare was too confident and assumed he would easily win even without running in the race at the same time. If you (saw what I was going to take a poke at the eye). So, you were wrong. He woke up at the finish line, only to witness the steady, plopping turtle win the race.

The moral, of course, is that the race does not always go to the swift. Ours was a race that should have been

"That was the last turtle story we'll have in this issue. By the time our last issue comes around you'll have the facts all straight"

Byron Pilgrim

Lonnice Brooks

Standing Room Only

On September 6th, 1985, history was made in the Bog. Lonnice Brooks' performance was one of the largest turnouts of any concert ever held in the Bog. The turnout for Lonnice Brooks made last year's turnout for Tyrant look like an ATS meeting. At 6:30 pm, the Bog was absolutely packed. There wasn't a seat to spare. The crowd was almost all the seats were taken. By 9:00 pm (when the concert started) there was "standing room only!" People saying that simply said "That's nice" and paid the $2.00 a ticket. At 9:30 pm, the crowd was still growing. The official attendance for the concert was 200 people. Lonnice Brooks' performance was definitely worth the $2.00 to hear a guitar behind his neck to playing with his teeth from the slow rhythm and blues tunes to the upbeat almost rock songs, there was no doubt in anyone's mind why all those people were there. Lonnice Brooks' performance are one of America's best collection of musical talents. The two guitars, plus a bass, before 1940 and one electric piano kept the Bog poppin' and movin' from 9 until 11. Lonnice Brooks left us all happy. The band left.

Patrick Feindler, director of Union Board Mini-Concerts, was quoted as saying: "I don't see why this is a kick-ass concert!" He made this much $2.00 in money. This is a kick-ass concert!" His excitement was justified.

This week's Union Board Mini-Concert is Dave Rudolf. Dave offers a very amusing and entertaining variety of songs. Although his performance probably won't break Lonnice Brooks' record, it should still be just as enjoyable.

Techopinion asks:
How are you going to pay for tuition this semester?

Hani Khellili
Thanks to S&C Electric Co.

Dan Todd - EE
Don’t tell anyone – I’m not paying.

Vanessa Z. Acoff - EE
I'll have a Live Aid concert.

Antonio Darden - METM
Scholarship and summer job earnings

Sneblin Ince - Biology
Mom and Dad

Joe Kong - EE
I'll put my Lottery winnings into good use.

Nguyen Tuan Ba
Pell Grants and loans.

Donata Greenwood - EE
By hook or crook.

An alternate view of the library

This letter is concerning the rumor that was placed on the front of the library this past week. I have a few things to point out to people that may not be general knowledge to most.

ITT is well known for its architecture and design schools. I know this is hard to believe but trust me, some of the world’s finest have graduated or taught right here at ITT.

Every year at graduation, President Martin tells everyone to walk over to Crown Hall and see the wonderful accomplishments of our students. “These are the people that are going to shape the future.”

But do you know what happens year after year? We hire outside people to do the work that many of our own students are capable of doing. Just to name a couple:

1) ITT paid someone over $500.00 to arrange the furniture in the Cohic Lounge of the resident halls.

2) ITT paid over $300.00 to have someone arrange framed photographs in an office. I won’t name whose office, because I think he is already embarrassed that two of the pictures were put up crooked.

The reason I am telling you this is because you should be aware of these services. When you finally get a job after graduating from ITT, you will buy furniture and you will have picture frames in your house or apartment. You will obviously be too stupid to know where to put these articles, so who will you call? Call one of our administrators and ask for the number of these wonderful people. Hopefully, they will not be too busy telling IIT how to arrange flowers and will take the time to assist you in making your house aesthetically pleasing.

Now to the library. I know you all are wondering who designed that object sticking out of the entrance to the building. Well, I have found who did the work from a very reliable source. No, it was not anyone from Crown Hall. In fact, why would we ever want to consult with them - they have only made designing things their lives. No, the person who chose that yellow, blue, white, green and red steel war was a little boy named Timothy Tucker. Timothy Tucker is a 5 year old student at the local kindergarten. He has been studying art now for about two years and his teacher says that he is really producing some great work.

Among Tim’s accomplishments is a great purple and green drawing of a sunrise in Cleveland. Besides having the ability to choose great colors in order to capture the reality and feeling of a sunrise, his teacher feels that what made this piece great was that Tim only went outside the lines four times in the drawing.

The library is being called one of Tim’s greatest accomplishments by his family and some of IIT’s administrators. Our administrators came across Tim’s talents when searching for some replacement administrators. We should be happy that they found someone so talented. The total cost of that canvas was only $625,000.00. That’s a bargain when you consider that the State of Illinois paid over $1 million for the “art piece in front of the State of Illinois Building.”

Problems with Housing

Many students this summer received a letter confirming their reservations for a single room for this semester. They probably sent their $150 deposits on time to insure that there would be no complications in receiving their single. Unfortunately, many students who reserved singles for this fall, didn’t receive them. Instead, they received a roommate. Most students were unprepared for this, and considered their single rooms here (sic). Those students found problems along the route also. Since school was about to start, it would be extremely difficult to get an off campus apartment before classes started and under class seniors (sic) can’t get apartments in the city. They were forced to rent to dorms of IIT.

What was going on? There was no explanation for the mix-up in rooms, and no evidence of anyone trying to remedy the situation.

The Resident Advisors, and Housing Officials said there were a lot of students who applied for rooms late, and some floors in the dorms had been closed. This forced the Housing Office to consolidate people in double rooms. The unfortunate thing that bothered a lot of people was that Housing’s dilemma was not made public by printing notices, so the students could understand what was going on. But maybe Housing didn’t need to since they have the legal right to put students in the dorms that best fit their purpose. A lot of students didn’t read their Housing Contract which gives them this right. But things were still organized in such a manner that no one dared to explain.

Seniors and Graduate students were placed with other undergraduates when in many cases both people requested singles. Phyllis Turner, a senior chemical engineer, returned to a double room and roommate when she was confirmed a single by housing for this semester as she had her parents to pull strings to get her single. This should not have happened considering there are upperclassmen who received their 2nd and 3rd floor singles without any trouble at all. Why wasn’t their single given to the people with the highest tally of credit hours?

Garrett Bradley also received a letter this semester notifying him that his single room was waiting. When he went to
Trip on LSD

continued from page 11

"Don't worry," said Rogers. "I already solved the problem. Instantly I was alert. Ever since he left Wshinch to join the ranks at Crown Hill, Rogers has been a little off-center. You have to worry about a man who spent three years of his life searching for the perfect hash brownie. "How?" I asked.

I found him a woman who's open minded, nurtures, " said Rogers, grunting out the roach and lighting another. "Hash." said not at school, you didn't.

The story came out gradually and very vague, as the first cigarette was affecting your Author, but I'll summarize it here: Rogers has a great number of contacts among drug circles in Chicago, and one of these contacts is a Mexican named Rudy. Who was on a business trip to Peru. Rudy left behind him a small apartment on the North Side, many bills, and a lonely girlfriend named Lula.

"Rudy's gonna be gone for a month," explained Rogers, "and Lula's just going crazy by herself, rubbing up against the furniture. So I introduced her to a lady. Now he goes and sees her twice a week, and everybody's happy.

Rogers, you twisted pig, thought. I never suspected that you had a streak of pimp in you. But that was not the case. No money was exchanged in these encounters, just good old friction. No one was being hurt, either, and Ed was so cheerful I could see no harm being done.

But when Ed asked me if I would drive him up to the North Side on Saturday night so he could see his new girlfriend I said yes. Rogers and I had planned to spend that night on the road anyway, cruising around the town with a fifth of Jack Daniels and a few grams of Lebonese hash, and I figured we could just drop him off and continue on our way.

There are advantages and disadvantages to being a student with a car. Mobility is nice. It's a great feeling to be able to get the hell away from the campus whenever you want without the hassle of public transportation. The disadvantage, of course, is that all your friends want to share your good fortune, and if you don't have a good reason, it's hard to say no without bruising someone's feelings.

I didn't foresee any problems as Ed and Rogers climbed into my car that night. It was already 11 pm when we left the campus and headed north on Lake Shore Drive. Traffic was light, and I reached the Loop exit with no great delays.

Ed gave me the address: a small apartment building not three blocks from the exit. I double parked in front and he climbed out, carrying a bottle of wine, 7-11, and wearing a huge grin. I went in the house without knocking as Rogers outlined our plans for the evening. I sipped from the Jack Daniels while we spoke.

Then I heard the shots. Two flat explosions, muffled by walls. I walked up in a wooded area and I could feel the difference between a firecracker and a pistol shot these came from a gun. The door to the apartment was flung open and Ed tumbled out, a broken bottle in his hand. He ran for the car, screaming at the top of his lungs. Another figure appeared in the doorway, a massive person with dark skin, holding a gun, also running. Holy Smokes! Tune in next week for the exciting conclusion of "High Speed Fun on the Outside Drive."

Turtles

continued on page 12

with countless eggs. Like the week after Thanksgiving Day, predators cannot afford to waste food at hand, leaving some of it to eventually crawl away. It's also the same way the city budget works. The aldermen's fists can hold only so much money. Some remains to purchase materials for our oatmeal cookie streets and to fund our great educational system.

For all their defences in the water, large turtles are relatively helpless on land. Gravity acts on their heavy shells and bodies, nearly immobilizing them. Many have heart attacks digging their nests, withMadisr miles away.

Like most animals of service to man, turtles have been abused. Their numbers are greatly diminished and some varieties are endangered. Some countries such as the United States, Britain, Mexico, and Brazil have established turtle sanctuaries which are protected by law from poachers. Some conservation areas hatch the eggs, raise the turtles, and release them at a size where the mortality rate is lower.

Turtle researchers and conservationists are gathering more information about turtle, population size in the hope that governments will increase their conservation efforts before their numbers are reduced past the point of no return.

Sometime tonight, near some remote ocean beach, a turtle scientist will go to sleep with the sound of the crashing surf near him. Before he dozes he will think of his friends, the hatchlings, and the Turtle-Sanctuary's Prayer:

Dear Lord, as we save the tortoises,
Do not let man thwart us.
Hear my pleas, Lord, hear it well.
Save the green guys with the shell.
**Pre-Season Win**

The women's volleyball team is looking forward to another exciting and successful season. The Hawks are hoping to improve on last season's 27-15 record.

Nine players are returning from the 1984 team and there is a great deal of experience playing together. The Hawks trained during the off-season and competed in United States Volleyball Association tournaments.

Coach Chris Meyer has installed a new fast offense which should make the team even more exciting and effective. It is similar to the offense used in international volleyball, featuring quick spiking combinations.

An informal pre-season match with Loyola University proved that our team can play at the same level as the Division I Rams. The Hawks held an exhibition game against Loyola, and lost the following games by scores of 16-14 and 15-13.

Returning members of the team are seniors Kelley Cada, Lorraine Makar, and Ruth Zeldenrust; juniors Joan Banes, Jennifer Glick, Kevin Murphy, and Cathy O'Roeder, and sophomores Jajja Kula and Michele Montahan. The new members of the team are Donna Juniewicz and Susan Topolski.

The official opener is September 10th at the University of Illinois-Chicago at 7:30 p.m. The home opener is September 12th against North Park College at 7:30 p.m. Come and cheer for the Hawks as we see some exciting volleyball.

Based on 8 monthly payments.

*VCR @ $17.95 per month = $215.40
Based on 8 monthly payments.

STUDENT ID GETS YOU 10% OFF

Now you can have a roommate you're guaranteed to get along with. And all you have to do is call Granada TV Rental.

At Granada, companionship comes cheap. When you rent 'till the end of the school year, your student I.D. gets you a Magnavox, RCA or Hitachi color TV for as little as $13.45 to $23.35 a month. A VCR for as little as $1795 to $2295 a month.

And our incredible combo offer—a TV, VCR and stand—for just $2995 a month.

Make your payments with a major credit card, and you'll save another $300 a month. And, let's face it, you don't have to have a PhD in economics to realize they're the best deals around.

What's more, our low rates also include free service and repairs, usually within 24 hours. And if we can't fix it on the spot, we'll give you a free loaner.

So give us a call today and let us set you up with an ideal roommate. Just think, if it ever gets on your nerves, you can simply shut it off.

Choosing a long distance company is a lot like choosing a roommate.

It's better to know what they're like before you move in.

Living together with someone for the first time can be an "educational" experience.

And living with a long distance company isn't any different. Because some companies may not give you all the services you're used to getting from AT&T.

For instance, with some companies you have to spend a certain amount before you qualify for their special volume discounts. With some others, voice quality may vary.

But when you choose AT&T, there won't be any surprises when you move in. You'll get the same high-quality, trouble-free service you're used to.

With calls that sound as close as next door, Guaranteed 60% and 40% discounts off our Day Rate—so you can talk during the times you can relax. Immediate credit for wrong numbers. Operator assistance and collect calling.

So when you're asked to choose a long distance company: choose AT&T. Because whether you're into Mozart or metal, quality is the one thing everyone can agree on.

Reach out and touch someone®

AT&T
The right choice.
