Campus Police Foil Robbery Attempt

by Alvin Cheeks

At approximately 4:50 p.m. Friday, October 25th, two males attempted to rob the Bursar’s Office, holding everyone present at gun point. The older of the two, Edgar Campbell, age 53, entered the office of Larry Latman, Director of Purchasing and Business Manager, and pulled a gun on him. He told Latman to take him to the door to the cage where the money was kept. The door was locked, however, so Campbell took Latman and members of his staff into the Bursar’s Office, where the younger suspect, Carl Jones, age 33, was holding the exigent changes.

The suspects made their way to the Bursar’s Office by the back door. Two atlas bags of money were taken totaling approximately $24,000. The two suspects were located by Bursar Dan Jones when he had entered the Bursar’s Office, and they hit the silent alarm.

The dispatcher in the Campus Police Office turned up the volume on the camera that monitors the Bursar’s Office to hear what was going on. The dispatcher called the Campus Police, called the Chicago Police, and called the Bursar’s Office.

By this time the suspects had taken the money and fled. The Campus Police met them before they got to the stairs. Shots were exchanged. Campbell was critically injured with shoulder and stomach wounds, and was subsequently taken to William Terrill Hospital. Campus Police Officer Larry Walker shot at the right shoulder and was treated and released from Mercy Hospital.

It is theorized that one of the suspects may have been an ex-employee judging from their plan of attack. They also may have known that the Bursar’s Office would contain a large sum of money.

Grosslight called the police at 3:50 p.m.

However, the two suspects were identified by fingerprint analysis on Monday, October 28th.

Jones was stopped by Campus Police officers Mendoza who was driving the JIT mini-bus. The policeman stopped the bus and jumped out when he noticed the suspect running with a gun. The suspect was identified by Latman and arrested.

Dipti Mehler, who was ascertained by the security system, replied, “This incident shows that the system worked 100%.” It was also generally agreed by those present that the Campus Police did an excellent job in handling the situation.

New Curriculum Changes

by Fred Paify

ITTC’s Curriculum Committee met on Tuesday, October 8th, and discussed a variety of issues including several minor curriculum changes.

The curriculum committee approved two changes in Humanities course classifications. First, Philosophy 192 (Symbolic Logic) will no longer satisfy general education requirements.

Faculty Senate Meets

On October 15th and 23rd the IIT Faculty Senate met to discuss several important issues. The two main items of discussion were the reports of the University Faculty Planning Committee Task Force on Graduate Education and Research.

Dr. Peter Lykos of the Chemistry Department made a motion to replace the phrase “centers of excellence” with “Research Centers” throughout the report. The motion was seconded then passed by voice vote.

There was a lengthy discussion of the idea of having a Vice President for Research. The Task Force report states that a person in such a position is necessary to

Computers Donated

by George Jawny

IT has received an equipment grant from First National Bank of Chicago. The equipment is being handled through the Stuart School of Business Professor Martin Barish, professor of accounting and information resources management, stated that this grant came about as the result of a recent re-evaluation by First National of their computer equipment. They decided that the equipment was no longer satisfactory for their current needs. First National then contacted the Stuart School and asked if they are any of the other departments could use the equipment. They then donated the equipment and provided delivery.

Professor Barish also stated that about half of the old Stuart School will be used by the business school for four types of facilities. The first is the computer lab, which will include a DEC PDP-11/34A computer with 16 terminals, 2 printers, and 2 disk drives, a business telecom lab with a Data General 31/2, an expert systems lab, and a manufacturing systems information control lab. The business school also received

Prof. Smarr Speaks

by Emily Nelson

Last Wednesday, a seminar was held by Dr. Larry Smarr, who is the head of the newly launched Supercomputer faculty day at University of Illinois at Champagne-Urbana. The first half of the talk centered on the applications that a capable supercomputer could handle with ease. Numerical simulation of supersonic gaseous jets, ranging from a hole in a pressurized tank to an

College Work-Study Funds are now available to eligible students! If you applied for financial aid and are interested in working on campus, please contact Ann Harrison in the Office of Financial Aid, 212 Main Building. 567-3303.
DPE Bake Sale
The Sisters of Delta Phi Epsilon will have a bake sale on Monday, Oct. 28. We'll be selling rossets, rice crispy squares, brownies, cookies, and more.

Get Connected
AT&T will be publishing the telephone, address directory connection. The pre-publication will be the same as last year, only a $1.00. If you have information about the United States, check this directory, pick up a delegation form at the front desk. Delegation forms must be turned in by Friday, Nov. 1. You may come to our booths on Sunday, Monday, Wednesday, or Friday from 12:30-1 pm in the HUB and Commons or on Tuesday or Thursday from 4:30-6:00 pm in the resident halls. Don’t delay! Order your copy today.

LIFE Meeting
During the past two weeks, LIFE has held a series of presentations. The next program was Saturday. It was given by Mr. Arturo Guerrero, an alumnus and past LIFE President, from Honeywell. These presentations are planned to continue through the end of the semester.

We are proud to present our next guest speaker at our next general meeting on Thursday, Oct. 31 at 12 noon in the HUB mezzanine. Everyone is invited to attend.

Unstable Chaos
Dr. Thomas C. Cooke of the IIT department of Mechanical Engineering will give a colloquium on Unstable Chaos in the HUB Room 206. The colloquium will begin at 3:30 pm on November 3, 1995.

ASCE Tour
All students who would like to see the completed S-Curve can come to the ASCE tour on Wednesday, Oct. 24 at 6:30 pm in the Kline Building.

Be Your Own Boss
On November 16 the College of Business of Illinois will sponsor a conference at the Westin Hotel, O'Hare. Successful entrepreneurs will address topics such as business planning, business plan development, small business management, and marketing.

NWF $$$
The National Wildlife Federation is calling for its Environmental Conservation Fellowships Program for the 1987-88 academic year. As an Environmental Conservation Fellow, a graduate student can receive a maximum grant of $4,000 per year to do research in fields related to wildlife, natural resources management, and protection of environmental quality. The National Wildlife Federation carries a cash gift of as much as $2,500.

Quenching Atoms
Prof. David Gutman of the Chemistry Department will host a colloquium entitled "Quenching Reactions of Excited Xe and Ne Atoms in Organic Solvents" on Monday, Nov. 6, 1995. The colloquium will begin at 3:30 pm in the Kline Building. The colloquium will be open to the public.

Fulbright Scholars
All students who applied for the Fulbright Scholarship Program will be notified of their status in mid-December. The applications will be reviewed by a panel of experts in the fields of science, technology, and humanities.

All Saints Day
In observance of All Saints' Day, a Eucharist-Holy Communion will be celebrated by the IIT Chapel on Friday, November 1 at 12:15 and 5:15 pm. The church is located just north of the Student Residence Lounge.

Coleman Speaker
Tech Enterprises and NSF will hold a meeting on November 29 in the HUB room 206 to discuss the Coleman/Pammy Ray Foundation. The meeting will begin at 3:30 pm.

ASME Party
The American Society of Mechanical Engineers is sponsoring a faculty/student party on the Wednesday, Oct. 31 at 9:00 pm. Special holiday decorations will be featured.

MAE Seminar
The American Institute of Aerodynamics and Astronautics would like to announce that the next Midwest Mechanics Seminar, sponsored by the Department of Mechanical and Aerospace Engineering, will be Wednesday, Oct. 30 at 3:45 pm in the Auditorium (104 E).

Fulbright Scholars
All students who applied for the Fulbright Scholarship Program will be notified of their status in mid-December. The applications will be reviewed by a panel of experts in the fields of science, technology, and humanities.

Luckily no one in the office was hurt. Lower right: The door through which the suspects thought they could gain access to the "cage" where the money was. (Photos by Andy Labeis)

Holiday for Foreign Students

Holidays are usually the most difficult times for international students in the United States. Most U.S. students go home or away for holidays, while international students have usually been involved with their families and friends, especially if they are away from home for the first time. If you are an international student or scholar, you may already be thinking about your day Thanksgiving holiday weekend, November 27 - December 1, 1985. What will you do? How will you spend your time with your family and friends? Thanksgiving is a time of thanksgiving and a tradition of giving. It is a time to give thanks for all of your blessings and for all that you have. It is a time to express gratitude for everything that you have received. It is a time to reflect on your life and your experiences. It is a time to remember the past and look forward to the future. It is a time to be with family and friends. It is a time to be thankful.

This unique Thanksgiving Homestay Program is organized by members of the International House on the University of Chicago campus. Last year, 217 students, faculty, and staff members participated, and everyone reported that the experience was interesting, enjoyable, and one of the year's highlights. Many students have been invited to remain in the host family for three months, and others have been invited to participate in other activities. Those who have participated in past years are always the first to sign up early each year, and they encourage other students to participate.

The holiday weekend begins on Wednesday afternoon, November 27, 1985, when participants board a chartered plane to a remote location on a remote location International House which takes them to their host community. With the help of their host family, they will live as members of the family until Saturday, December 1, 1985. On Thursday, students experience the traditional Thanksgiving dinner, although the tradition of the main dish is retained. For the first time, families will participate voluntarily and receive no financial assistance in order to participate. They participate because they are interested in learning about other cultures and because the program has built up a reputation of being enjoyable and informative. All international students and scholars should have already received detailed information about the program at their mailing addresses. Applications and further information are available at the International Office, Room 103, Fair Hall.

If you are undecided about participating in the program, talk to an advisor in the International Office and to students who participated last year. You will probably be convinced that this is a great way to spend the Thanksgiving holiday weekend.

A View on South Africa

by Ed Powers

In rebuttal to the article by Ed Sabas, "The Hypocrites of South Africa" in last week's News, I would like to address some facts and observations and to offer a different point of view. In your article, Mr. Sabas, you state that "the apartheid system ranks low in the degree to which it oppresses a whole or part of its people." But you failed to mention that the South Africa government, along with the Soviet Union, has violated the human rights of blacks and has mistreated its citizens. Rioting in South Africa has taken more than 700 lives, and I would like to consider the taking of human life as the paramount violation of the rights of human beings and that of their right to life itself. Yes, it is true that other countries do not act justly toward their citizens, but the South Africa government's apartheid and the insistence of the Pretorian government to continue this practice, which is the same old game of politics in Washington.

In your last article you asked the question "Would our nation have survived 100 years ago if our allies would have politically criticized and economically sanctioned us during the dismantling of slavery in our own civil war?" To this I would state that sanctions by the French against the South because of its slavery practices played an important part in the victory of the North. The Civil War was not fought against slavery; it was fought to unify the nation. Lincoln's Emancipation Proclamation declared all slaves free, but it freed no slaves during the war. The Proclamation was, in fact, a sham political move by Lincoln to prevent the French from supporting the South; it in fact made the French appear to condone slavery if they sided with the South. In fact, the French abhorred slavery and could not have afforded criticism from other European countries in supporting it. Indeed, perhaps we need now is a twentieth century Emancipation Proclamation to prevent the U.S. or any other country to support slavery in Pretoria through corporate investments.

With regards to your asking why the U.S. hasn't acted to orally admonish Ethiopia for its policies toward the stoning masses, any second glance at
Men Wanted

The sisters of the Delta Phi Epsilon sorority are holding their second annual Deepher Dude contest, November 13th in the Bag at 9:00 p.m. Interested contestants can sign up now by calling Joanne at x5879.

Fun Bus

On December 28, 1965 the IYT Athletic bus will leave for Florida with 20 IYT students for two weeks of fun in the sun. For only 40 dollars they can enjoy two weeks of fun while your fellow students shovels snow. The bus will drop you in Ft. Lauderdale and pick you up there on January 13th for your return to IYT.

Spring Registration

All full time undergraduate and graduate students can pick up their Spring registration packets at the Office of Student Records and Registration (104 Mf) on Thursday, Nov. 14 from 9:00 a.m. to 4:30 p.m. or Friday, Nov. 15 from 9:00 a.m. to 3:00 p.m. Unclaimed packets will be mailed on Friday, Nov. 15 at 3:00 p.m. A valid ID card is required. Packets must be returned, with appropriate signatures, by November 27. All partial packets will be mailed.

PTS Meeting

A general meeting is scheduled for Wednesday, December 2nd at 12:10 p.m. in room 123 E. Members will pick up their certificates, keys, and membership cards. Initiates must stop in to pick up their project assignments at this time.

New DPEs

The Sisters of Delta Phi Epsilon would like to congratulate their new sisters, Terri Lynn Correa and Gretchen Stahl. Congratulations also to the Iota Pledge Class: Michelle Kochan, Chris Martin, Cindy McDermott, Tonya McFarland, Cindy Morris, and Lisa Suchak.

Come Sail Away

On Saturday, November 2, the IYT Sailing Club will host their annual Fall Regatta. Fifteen boats from 16 states will participate on Belmar Harbor of the Chicago Yacht Club. The high level of competition will provide a great opportunity for the members to experience the sport of sailing. The air will be the coldest at the West Coast, you are invited to join us in helping out at the regatta, intercollegiate racing, or just sailing for fun at the sailing club meeting Tuesday at noon in room 306 of the HUB.

Placement Sign-ups

Interview sign-up for this week begins at 3:45 p.m. in Ferr Hall, Placement Library, room 409, at the following positions:

- National Science Foundation March Workshop Center, Naval Ship Weapons Engineering Station, Staunton, Virginia
- U.S. Navy Office Program
- Wednesday, October 30 - 2:00 - 4:00

Companies Present

Students who are interviewing with or are interested in the following companies are encouraged to attend their presentations this week:

- Kalamazoo State University, Naval Ship Weapons Engineering Station, Staunton, Virginia
- U.S. Navy Office Program
- Wednesday, November 2 - 2:00 - 4:00

Take Note

This week’s Counseling Center Workshop will be “Solving Small Problems.” This week will take place on Friday, November 11 from 12:15-1:15 p.m. in the HUB mezzanine.

AICHE Presents EPA

AICHE is having a general meeting on Tuesday, October 30 from 12:15 p.m. in 131 P.A., Speaker will be from the Environmental Protection Agency (EPA). The EPA will host a plant trip in conjunction with their regular meeting to the EPA labs downtown on November 5.

Technology News

continued from page 1

The committee recommended that the current proposals for formal reviews of the undergraduate degree programs.

Faculty Senate

continued from page 1

is responsible for the development of graduate programs and academic standards. The committee was also responsible for the development of a coherent curriculum which will make for IYT a niche which will attract top students and which will stress on honors program. We are also advocating the return to the traditional curriculum that we are working together to the creation of a true version of what the report says with the good, old, active curriculum. He added that "it's a nationwide belief that engineering education is in a crucial state. A non-engineering department to maintain comprehensiveness and excellence is a crucial point".

The document was discussed, and Dr. Harold Spector of the Physics Department recommended the report with instructions to reform based on the suggestions in the committee's report. It was agreed that the committee draft the report in the next two days so it could be mailed out on the following Wednesday, October 23rd.

Dr. John Snapper, Associate Professor of Humanities, made a strong objection, pointing out that the committee's report is not comprehensive. The committee has no desire to sit down for the next 48 hours and work on the document all over again. We were sick and tired of it! After much discussion, another motion was made to reject the report. This motion passed by 10 votes, and the report was vetoed. October 23rd. The new draft, now four pages long, was presented to the committee on October 22nd. The faculty review was prepared by Dr. George Brubaker of the History Department, Paul Barlow of the Humanities Department, and Dr. Gerald Gaus of the Electrical Engineering Department.

On Wednesday, October 23rd. The discussion continued. Seats are few so don't miss this deal of a lifetime. Reserve your seat early; just call the driver/tour guide Mark Planty at 2240-4221 or 3292.

Donations

continued from page 1

from the Naval Engineering office including four Wang word processors and audiovisual equipment.

The school of Industrial Design also received some equipment including a DEC computer, a color printer, and ten terminals. In the Academic Computing Center received a high speed printer and eight Technocracy terminals and was able to begin using this equipment should be fully operational within the next few weeks.

South Africa

continued from page 4

the political situation would suggest that the problem is anything but simplistic. Africa has been stricken by famine for years now; food is not a weapon of the Marxist government. The South African government has provided no food aid to the starving, even though they have had a reasonable grasp over annually. Moral outcry against the European government and its policies is of increasing relevance to our actions against apartheid.

Adequate agreement that South Africa has the gross national product of Africa, but the real question is not the wealth but the distribution of that wealth and the means employed to achieve it. By U.S. investment in the South African industries, we in a sense condone those actions andaran on this investment. American investment keeps South African industries secure, while the U.S. investment and promotes apartheid. The U.S. therefore has an active role in the brutal drama of Pretoria, and the situation there is likely to push by many in the U.S. for disinvestment. There are several routes the U.S. can take to help the oppressed while at the same time helping to diminish the problem.

In short, Mr. Sabas, I would like to point that it is more than appropriate for America to seek a solution to the African problem, regardless of the irrelevancies of the irrelevant or how the issue has been left. Sabas laying there is no hypocrisy in Washington. I support a more modern Emancipation Proclamation, "developing" democratic countries with the means to end poverty in Pretoria. And yet the disinvestment of America's industry is one good option the opportunities for the blacks to flourish in South Africa.
Commando: A Review

by Kevin Eng

Ever since Robert DeNiro strapped on his gun in "Taxi Driver," there has been a long line of movies in which the main character has armed himself to the hilt with every conceivable weapon. Films such as "The Terminator" and "Rambo" have become box office smashes because of the weaponry and violence integrated into them. The recently released film, "Commando," fits into this category. The movie stars Arnold Schwarzenegger as John Matrix, a retired Army officer. As in "Terminator," Schwarzenegger plays a seemingly unstoppable opponent. However, in this movie, he is a man rather than a machine and a good guy instead of a bad one.

The basic plot of the movie is that Matrix, the daughter played by Alyssa Milano, is kidnapped. The kidnappers attempt to force Matrix to do something against his will, and for this they must face his wrath. Although he is highly skilled at disposing of his enemies, Matrix relies on the help of a stewardess named Cindy, played by Rae Dawn Chong. Cindy is just one of those people who is in the wrong place at the wrong time, but turns out to be very useful. For the most part, the movie focuses on the fact that Matrix can kill anyone and anything like it. Scenes such as Matrix's fighting off a mall's entire security force make this an action-packed film.

One real disappointment in the film is Schwarzenegger's acting ability. In "Terminator," he plays the role of a super-robot. His halting mannerisms and limited lines were well played; but in "Commando," it is very easy to see through his lines. However, a very good performance is turned in by Rae Dawn Chong, who plays a very convincing and likable character.

"Commando" comes across as an unpolished version of "Terminator." It is filled with action and should satisfy most people who prefer "shoot-'em-up" type movies. Therefore, there are three movies for thrill-seeking viewers, two for everyone else.

Servant Auction Success

by Jenny Podraicz

Last Thursday, October 24th, Lewis Association of Women (LAW) and South Wing Association of Residents (S.W.A.R.) held their third annual servant auction. Nineteen people and one werewolf from the six residence halls were bid on for a grand total of $145.75.

Halloween Horror at IIT

by George Jawny

It was a dull, cloudy afternoon. The day was overcast. Contemporaneous reporter that I am, I was going around campus looking for anything that might make a good story for what was left of the News. The darkened sky and occasional lightning made the atmosphere like a horror movie. A perfect day for Halloween.

We needed a good front-page story, but nothing was happening anywhere. No riots in the BoQ, no robberies in the Commons. Even the el stop was quiet. I decided I might as well go back to the office and tell the editor that nothing was happening. I knew she wouldn't like it, and I wasn't going to lie telling her, so I decided to kill some time before I had to do so. I went through Hermann Hall to play some video games. When I ran out of quarters, I went toward the Main building, passing several of the study cubicles on the way. As I passed one of them, I glanced at the student in it. He had a strange look on his face. Not a definable look, just an overall look that I was to see after a frat party or before a big test. This was something different.

I tapped him on the shoulder and asked if he was all right. He was staring at a picture of a woman that was slumped over dead! I looked him over and saw that he had been crying and had a picture frame in his hand. Someone neither had a sick sense of humor or I didn't even give the or a serious look after vampires and creatures of literature and movies.

Whoever or whatever did this, it was a story, and a big one. Someone killed in the hall. The strange thing was, there was no blood on the floor or the cubicle. I called the campus police. The coroner, and the Chicago Police left, I continued over to the Tech News office. I had enough story to write, and I knew it was going to be a good story. Student killed in the HUB, and the cause of death was lost of blood. All this and Halloween too. The stuff of which great stories are made.

I got to the Main building and pushed the elevator call button. Ten minutes later, I got to the fifth floor. I walked into the office and told the story to the editor. When finished, she looked me rather strangely and said it didn't matter! She smiled, revealing a pair of crooked teeth, then said "Well, I guess you're going to have to write it. It's not a joke, you said, and I really mean it." The story was finished quickly into a strange gleam in her eyes.

Suddenly, she stepped forward and flipped a table aside as though it made it cardboard. Now I was starting.

The Anti-Technology Challenge

Due to the fact that there is a smaller space for this column, plus the fact that the picture run two weeks ago was incredibly stupid, we will not run that picture again this week. We did get one caption, but no one could understand it so we will not run it here.

I would also like to repeat my plea for you, our loyal readers, to send in pictures that we can use on this page. The best will get their name and picture printed as well as having their picture used for this space. The picture this week is one of the very few interesting ones left. Please, boys and girls, help us out. I'm getting sick of stupid pictures.

And now, on to the Challenge...

Union Board's Movie of the Week

**Follow the newest cat-and-creature game as played through CAT'S EYE.**

Three tales from the twisted mind of author Stephen King, all of which revolve around a feline's attempt to save a young girl from the boogie man, a short green creature that lurks in the walls of her room, and wants to take her breath away (and we're not talking velamints). Come one, come all, come in costume.

**Special contest for those who come in costume on Halloween.**
Shown in the HUB auditorium
Thursday, October 31 at 5:15 pm
Saturday, November 2 at 7:00 and 9:00 pm
Admission $2.00

Next Week on the HUB silver screen

November 7, 9  **Red Sonja**

It's coming... **Homecoming '85**

Saturday, December 7
This incredible dance party featuring a live band and DJ will follow IIT's basketball game against Oakland U.

Get ready for nominations of King and Queen of the Homecoming Court.

Plus 8-man Cheer Contest

Door Prizes, Souveneirs and a Great Time for All.

Stay tuned for more information.

And the winner of the contest with very simple rules is...

**Michele Hines**
just go to the movie of your choice (sometime this semester) with your student ID.
Technopinion asks:
Why did you come to college?

Phil Balthazer EE
I've done enough dead-end jobs and this is probably my last stab at getting a degree.

Sanjay Gupta ME
To achieve my dreams to be an engineer.

Denise Allen CS
To better my life... people go to college to get a good job...Hopefully.

John Zepliotos EE
I've always wanted to drive 25 miles to school everyday.

Linda Urzundeski METM
Nothing better to do.

Jennifer Giask CS
I haven't figured it out yet.

Halloween
continued from page 6

to get worried. She was hardly weakening but she couldn't or shouldn't have the ability to do that. I grabbed a handful of darts out of the board on the wall and warned her to keep back. She kept coming, so I threw them at her. Every one of them hit her, and everyone of them bounced off as though it hit a force field. Several stuck in the floor when they fell.

I grabbed two pencils and formed them in the shape of a cross. She laughed and grabbed them from my hands. "You've been watching too many Dracula movies" she said.

"Crosses, daylight, and all those other things only stop vampires in the movies," I remembered that while I was waiting for the police, I went to eat. They had arrived in the middle of my meal, so I had put some in a bag which I still had with me. I had a small RC and the hardest objects known to man - cafeteria french fries! If they didn't work, nothing would. I hurled them at her. Those that hit had no effect, even though one that missed went through a window and stuck a passing student, killing him instantly.

Now I knew I was in trouble. I ducked out the door and ran down the stairs. When I got to the first floor, I looked back. She was at the top of the stairs, framed in the stained glass window like a scene from one of those Dracula movies. I turned to run and saw to my horror that she was now in front of me, blocking the door.

I yelled for help, but she smiled and said "Those mortals cannot help you now. Nothing on earth can save you. You're mine." She began to come toward me again. There was nowhere to go. In desperation, I ran back up the stairs. I called for help on each floor, but nobody seemed to hear. It was as though she had taken all, or maybe me, in some sort of trance.

I got back to the fifth floor, winded from running up five flights of stairs. She seemed to glide up the stairs and wasn't winded at all. There was still nowhere to go. Then I ran toward the fire escape at the end of the hall. I might not get away, but I wasn't going to make it. I got to the door and found that the fire escape was gone! I turned and looked at her as she said "I thought you might try that. There's nowhere left to go. You're mine now. Come to me." As she came to get me, I had one last chance. I dove aside and pushed her through the door.

She tried to grab on but couldn't. She fell screaming through the door, sighted with relief and went into the office to call the police. They came and made a report. I got my story and nothing else happened on that full, stormy Halloween afternoon. There was one thing that bothered me though. The police searched and searched, but they never did find her body.

IIT BOOKSTORE
PRESENTS
"PRODUCT FAIR AND BARGAIN DAY"
WEDNESDAY OCTOBER 30, 1985
10 AM - 4 PM
THE FOLLOWING PRIZES
WILL BE GIVEN AWAY IN
A FREE DRAWING
IIT BEER MUG - TECHNICAL PEN SET
CALCULATOR - IIT JACKET AND MORE...

Free! Free!

ALL STUDENTS, FACULTY AND STAFF ARE CORDIALLY INVITED TO JOIN THIS SPECIAL BOOKSTORE FAIR IN THE COMMONS BUILDING

COLLEGE REP WANTED to distribute "Student Rate" subscription cards on campus. Good income, no selling involved. For information and application write to: CAMPUS SERVICE, 1745 W. Glendale Ave, Phoenix, Az 85021
Spiikers Now Ranked Second in NAIA

The IIT Women’s volleyball team enjoyed another successful week, winning the Rockford Invitational and improving their record to 26 wins and 4 losses. They are ranked second among NAIA teams in Illinois and are recognized for their excellent record.

At Rockford, the Hawks won the conference match—making four straight wins without dropping a game. IIT defeated Rockford, Judson, Beloit and Elmhurst with preliminary matches and then defeated Beloit 15-2, 15-8 in the semifinals. The Hawks then defeated Eureka in the final 15-10, 15-11.

Jennifer Glik was named the tournament MVP for the third consecutive year. Ruth Zeldenrust was voted to the all-tournament team.

On Tuesday, the Hawks faced off against Olivet Nazarene College. IIT crushed Olivet in the first two games 15-1, 15-5, but ran into trouble in the third game and lost 15-13. The Hawks regained their composure in four sets and won 15-11. Jennifer Glik was the leading player with 5 kills. Jennifer Glik had 9 aces.

The Hawks traveled to Chicago State University on Wednesday and won an extremely hard fought match 8-15, 15-12, 15-9, 14-16, 18-16. In the fifth game the Hawks were down by scores of 12-2 and 14-7 before a key scoring burst by Rosemary Lake sparked the comeback. Janice Kuta had 14 kills in the match, and Jennifer Glik had 24 assists.

The final home match is Tuesday, October 30. 26-3 against Trinity Christian College. It is fan and parent appreciation night with refreshments in the Schommer Room after the match.

Swimmers’ Intersquad Pineapple Meet

Sophomore Mike Muesler won all five events last Tuesday to win the Varsity swimming team’s annual intersquad meet for the second year in a row. Mike’s victory came in his specialty, the 100 and 200 yard backstroke and 50 yard freestyle. The 400 yard butterfly and 200 yard breaststroke event. Mike was an all American last year in 3 events, and the way he’s going right now, he could repeat in the NAIA National Championship.

A surprise second in the meet was freshman Dan Hightower, who scored three first place victories in the 200, 500, and 1000 yard freestyle events as well as a second place in the 100 yard freestyle event.

The meet was hosted by IIT’s distance freestyle event.

The couch for Doug Lovato, IIU’s ace diver and all-american last season, easily dominated the 1 and 3 meter diving events, even though he felt he had a very bad day.

Other events in the meet were junior Aaron Henley in the 100 breaststroke, junior Daryl Peters in the 200 yard individual medley, junior Fred Paffy in the 200 yard breaststroke, and freshman Patrick Grage in the 200 yard butterfly event.

Team captain Chuck Hefter, who was supposed to give Mieser a pass for the meet pulled a muscle in his first event and had to sit out the meet. Last report, though, is that Fee is okay and will be competing in the team’s varsity opener.

Greeks Pledge Football Championship

After house football is completed, the pledge class of 1989 took on a great responsibility, the football tournament, and every team had to be an on-field day and wear blue and white for the whole school. The tournament scheduled for Oct. 22, 1989, Delta Tau Theta, Xi Sigma Phi, and Alpha Kappa were the top teams, had to have an off-day and wear blue and white for the whole school. The tournament scheduled for Oct. 22, 1989, Delta Tau Theta, Xi Sigma Phi, and Alpha Kappa were the top teams, had to have an off-day and wear blue and white for the whole school.

Delta Tau Theta, Theta Xi, Sigma Phi Epsilon, and Theta Nu Xi made up the bracket. The other bracket was composed of Alpha Epsilon Pi, Phi Kappa Sigma, Pi Kappa Phi, and Alpha Chi Phi. The winning teams of these brackets would play each other for the championship.

Theta Xi had many of their pledges play for their house team. The experience of the game was invaluable. They were matched against the Sig Eps, an inexperienced team except for an outstanding receiver. The defenses held the opposing offenses, and on defense, the regulation game ended 6-6. The Sig Eps’ got a touchdown on a 50 yard run, but Delta Tau Theta could only manage a safety.

Delta Tau Delta was matched against Triangle. The Delta Epsilon expected a close game but their anxieties were unnecessary. As the game progressed, the Delta Eps took control of the game and away, Trang 100 yard pick 6, never gave up and fought until the end.

Alpha Epsilon Pi beat the Phi Kappas in the first round 8-1. The Pi Kappas beat the Alpha Sig’s 10-0 and then won the second round with a 50 yard convincing victory over the Delta Epsilon.

The Delts met the Sig Eps in the other second round game. The Sig Eps jumped out to lead but then on the downs dominated to a 20-20 victory.

The Delts and Pi Kappas met head to head in the finals. The Pi Kappas had exploited a weakness in the Delta Epsilon to win the house championship. However, in the third round, the Delta Epsilon offense found the team to set up their subsequent touchdowns by throwing two "bombs" and scoring one other touchdown. The Pi Kappas finally managed to get the ball towards the end of the game but the end the Delts won the game and pledged football championship.

CONSULTANTS TO INTERNATIONAL FIRMS
We have clients seeking qualified individuals with language and area expertise regarding foreign markets. Part-time and full-time assignments available. Foreign nationals with advanced degrees from American universities needed as visa restrictions will not affect certain projects. Technical fields in hard sciences, computers, marketing and finance most desirable.

Send resume, including telephone number to:

Basketball Season Preview

As the Hawk Cagers continue to work hard in their pre-season camp, a note about their upcoming season and opponents seems to be in order. Scheduling seems to be quite an easy task. But according to Coach Bob Topper (5th year at IIT) it is probably one of the most difficult tasks.

The only easy part of the total scheduling process was with the CCAC team. This year all of our sports compete in a conference and obviously we're not involved in playing each of the member schools twice. Then the difficult part begins.

The Hawks have what some people call "built in losses" in their schedule. We have three Division I teams on our schedule. There is no way we should ever defeat any of them and that is exactly why they schedule us. However, we schedule them to receive the necessary guarantee. In essence, they are paying for a victory. We are playing them only to bolster our basketball budget.

Then the Hoopsters play five Division I teams and again they fit into the category of "built in losses." If we can defeat one of the Division I teams and maybe two of the Division II teams we could have a great season. Regardless, if the Hawks have a high enough Dukie Rating they will be invited to post season play in District 20 of the NCAA. The Dukie rating system takes into account your won-loss record, the difficulties of your schedule, the margin of victory or defeat and the number of home and away games. There are 13 NAIA schools in District 20 that sponsor basketball and the Hawks will be continually competing with all of them for one of the 8 play-off berths.

"We are looking forward to this season. Camp has been going well and we realize that we have a very difficult season ahead of us. However, if we can play with the Division I and II's and do well on the road and in Florida along with being competitive in our new conference we can go to the District Playoffs. That is certainly our goal and a realistic one I might add," stated the highly excitable coach Topper.

As we look at the Scarlet Hawks with their built in losses, they are already 0-8. If they play 500 ball for the remainder of the games their overall record will be 10-19. "We think we can surprise a few people with our added speed, quickness, jumping ability and a newfound spirit. Time will tell," stated Bob Topper.

"We really are tough and I know the team or the coaches would not be satisfied if we did not upset a few people to improve on our record. We hope that the games will be attended because you will be in for a good time watching exciting play from such standout as Cary Musker, Keith Evans, Rory Brown, George Mari, Mike Kloak, Tom Rozzak and many others," stated an optimistic Bob Topper.

Athletes of the Week

Volleyball

Ruth Zeldernutz is a senior who is majoring in marketing. On the women's volleyball team, Ruth plays the middle hitter position. She was voted to the all-tournament team at the Rockford Invitational.

Soccer

Jim McNulty, a graduate of Brother Rice High School and captain of the '85 squad, is a senior electrical engineering major and the sweeper on the soccer team. Jim, who has played in every minute of every game for four years, is a durable athlete who plays a punishing physical game. "If I were given eleven players who train the way Jim does, it would be impossible to lose a game," stated Coach Fay.

AT&T Research & Development
We've made it easier

Now, when you want to interview with a major force in America's research and development community you only have to sign up once.

AT&T's R&D effort...
is constantly pushing back the frontiers in the areas of photonics, micro-electronics, computer hardware and software development, with applications in switching, transmission, networks, military systems, business systems and manufacturing systems. We also work in the areas of energy extraction, conversion and combustion.

Our Mission...
is to advance fundamental research in the physical sciences, material sciences, communication sciences, information sciences and manufacturing sciences to provide technology for the marketplace.

We want to talk to...
BS, MS, or PhD degree students in Computer Science, Computer Engineering, Electrical Engineering, Systems Engineering, Mechanical Engineering, Operations Research, Nuclear Engineering, Applied Engineering Mechanics, Human Factors, Physics, and Material Chemistry, as well as MBAs with a BS or MS in Engineering. BS/MS candidates must be U.S. citizens or permanent residents. Citizenship is required for employment at Sandia National Laboratories.

Our facilities are located...
in New Jersey, Illinois, California, Colorado, Georgia, Indiana, Massachusetts, New Mexico, Ohio and Pennsylvania.

We will be on campus...
November 14
