**Mies Centennial exhibit**

This summer IIT will host the centennial exhibit, Mies van der Rohe: Architect as Educator, at S.R. Crown Hall. The exhibit illustrates the influence of Mies's work on architectural theory and education.

The second and third sections, the heart of the exhibit, are devoted to the activities of Mies at IIT and the undercurrents that changed his teaching. The fourth section, focusing on the works produced by graduate students in the late 1950s and 60s, and early 70s under such well-known architects as profiles, residents are influenced by IIT's graduate studies. Of particular interest is the student thesis of Mikio Sakaki for a cross-braced design of the John Hancock Center.

The exhibit also includes illustrations of buildings produced by architects whose work was influenced by Mies's architectural style. Among these was the design of the John Hancock Center. The Mies Centennial Project members: Rolf Achilles, George Danforth, Charlotte Wieland, and John Vava were responsible for putting the exhibit together.

The exhibit has been made possible by the generous support of the Frahm Foundation and the Humanities Studies in the Fine Arts, the National Endowment for the Humanities, and the Council of States. Phyllis Lambert, and numerous foundations.

**Collins wins Guggenheim fellowship**

John Collins, Associate Professor of Physics here at IIT, has won a fellowship from the John Simon Guggenheim Memorial Foundation. Prof. Collins is one of the 272 new fellows chosen from 3717 applicants in the United States and Canada. The Fellowship awards total $1,000,000.

The Guggenheim Fellows are appointed on the basis of unusual talent and achievement in the past and exceptional promise for future accomplishment. Not only scientists, but scholars and artists are considered.

**Spring Conference held**

The ATS Spring Conference event, "IIT and Your Future," was held on May 1, 1986. This year the Foundation has emphasized the importance of offering distinctive graduate programs. The program was attended by approximately 25 students.

**Design student wins $10,000**

Monica Xavier, a recent graduate of the Institute of Design, has been named the first place winner for the Burroughs Co.-Lucent National Student Design Competition. Ms. Xavier's entry, entitled "Automatic Retailing System," was picked from a field of 89 other products submitted for the competition. Her design, a modular, hot/cold food and merchandise storage/dispensing/transaction system, allows vending machine owners to custom tailor their machines to the specific needs of each machine's location (see picture on page 7). The design was recognized for its creative approach to assembly and testing thermostatic cells that would keep the food hot or cold, to figuring out how each module would attach and lock together. One of the judges, a continued on page 7
DO YOU WANT TO BE A DJ?

WOU! IS LOOKING FOR PEOPLE WITH AN INTEREST IN RADIO BROADCASTING FOR THE FALL OF 1986. IF YOU ARE INTERESTED IN JOINING OUR STAFF, STOP BY AT OUR MEETING ON TUESDAY, MAY 6TH, AT NOON ON THE 5TH FLOOR OF THE MAIN BUILDING IN THE WOU! OFFICE.

\textbf{AIChe Elections} \\

The following people were elected AICHE officers for the 1986-87 year: Sheila Moran, President; Oliver Baumann, Vice-President; Cindy Sullivan, Secretary/Treasurer; Mark Wehling, Plant Trip Chairman, Jim Biebel, Legislative Representative; Bob Krumins, Newsletter Editor. Congratulations!

Final Reflections \\

The concluding gathering of the "Bible and You Today" Study Group will meet Tuesday, May 6, 1986 in room 315 on the HUB Mezzanine at 11:00 a.m. The student and faculty members will complete their sharing of insights and reflections on the Book of Job and its concern with the meaning of adversity in human life as it relates to God's reality and presence. The IIT Community is cordially invited to participate.

High Energy \\

The Physics Department Colloquium, "High Energy Channeling," will be given by Dr. Richard A. Cangan Jr. from Fermilab on Wednesday, May 7, 1986 in Siegel Hall, room 217 at 4:00 p.m. There will be a pre-colloquium social in Siegel Hall, room 202 at 3:30 p.m.

Taking Tests \\

The IIT Counseling Center will hold a seminar, "Taking Tests Successfully," on Tuesday, May 6, 1986 in room 105, Farr Hall from 1:00-1:45 p.m.

Earn a Degree \\

The Co-op Office is accepting applications for all students interested in joining the co-op program for the fall term. It is suggested that you turn in your application no later than Friday, June 6, 1986. See Cathy Robinson in Farr Hall Room 402.

WOU! Meeting \\

On Tuesday, May 6th, WOU! will hold a meeting for all staff members and anyone interested in joining the WOU! staff for next fall. The meeting will start at 12:00 noon in the WOU! offiice (S5 level, Main Building). Please bring a copy of your class schedule for Fall '86. We will be picking discs for next semester.

Travelers \\

The International Traveler's Association of Chicago, a group of people who have travelled widely and are interested in other cultures, would like to invite IIT international students to a tea on Sunday, May 18 from 3:30 to 7:30 p.m. in the lobby of Dunbar High School at 3131 S. Drexel. The group would like the opportunity to meet informally with international students. Additionally, if you would like to perform for the group, they are soliciting more information and to sign up, call the International Office at 587-3307.

ASME \\

At the May 1st meeting of the ASME officers for the Fall semester were elected. They are Holly Holcomb, President; Santo Campione, Vice-President; Jim Zimbro, Secretary; Barb Jefferson, Treasurer; and Bob Devine, Chairman of Leadership Conference Committee. We thank all of those who attended the meeting.

Stamp Club \\

We apologize for the recent confusion in scheduling our last two meetings. Please watch for future meetings. Just a reminder, Anterplex '86 will be held May 22-June 1 at The O'Hare Expo Center. Any interested members of the Stamp Club will receive a free ticket to Anterplex should you stop by room 112 E and ask for Ed; call extension 3895. Also, look for our next Southside Stamp Fair, the last one was a complete success. Thanks to all our members for a fun first year.

E.S.P. \\

End of the Semester Picnic \\
Come and Celebrate \\
Dinner at 8:00 p.m., May 14, 1986. \\
Time: 12:00 noon. \\
Place: In front of the Tennis Courts. \\
Pack your picnic baskets and join us!!! \\
CALL FOR STUDENT OFFICE FOR DETAILS.

\textbf{IEEE has successful year} \\

by Ed Poore, IEEE Chairman \\

IEEE has been more successful this year than it has been in the 85 year history of the IIT Student Branch. This year IEEE has received national recognition for winning every major award available to IEEE student branch and their members.

Jim Hooker and Maurice Givens recently secured for IIT the Vincent Bendick Award of Allied Corporation. They received a $500 grant to cover expenses for their project entitled "Goat Ultra High Speed Data Link Electronics System." The project is to design a microprocessor-based electronic control unit which would be able to convert an operating at 100 MHz and providing highly detailed information. Only 14 such awards are given worldwide each year.

Maurice Givens outlined the same project and compared it in the IEEE Region IV Student Paper Contest held at NIU on April 18. Maurice prevailed over engineers from nine midwestern universities, coming away with first prize of $500 and the publication of his paper in the national IEEE journal "Industrial Electronics." "I feel very good," said Givens, a part-time IEEE student, and it was good practice in writing and giving presentations. "I feel like I've got to do it again next year." Maurice also thinks that the same project and competition may be held in the IEEE Region IV Student Paper Contest at NIU next year. "I feel like I won," said Maurice. "I feel like I've got to do it again next year."

\textbf{ITF election winners} \\

On Wednesday, April 30 elections were held for the Interfraternity Council. Elected officers were: President-Mary Gemery (Phi Delta), Vice-President-Sam Unishek (Sigma Phi Epsilon), Secretary-Ron Snukal (Delta Tau Delta), Treasurer-Chuck Free (Alpha Sigma Phi), ARTS Representative-Steve Hinken (Delta Tau Delta), Delta, Sports Chair-Phil Anderson (Delta Tau Delta), Social Chairman-Tom Walsh (Delta Tau Delta), Trophies Chair-David Leath (Sigma Phi Epsilon), IF Chair-Steve Sandoval, Chris March, and Jorge Zepeda for making the IIT Student Branch the most successful branch in the entire region.

Conference continued from page 1. \\

For their efforts to improve the quality of education offered at IIT and that they do want to participate in the planning of the COMFIT-85.

In response to the call to participate, the program ended with the presentation of a proposal for the formation of a standing committee within ASME to be called "ITSC (COMFIT-85: Student Advisory Committee)." The committee would be set up to establish communication and on behalf of students with the faculty and administration regarding the evaluation and development of the specific of COMFIT-85. The committee would like to participate in this committee or contribute their efforts to the program by contacting ATS, at attention 3074. The moderator of this program, Prof. Greg Parker, likes to thank all participants. ATS believes that this program has served as an initial step in establishing networking link which should result in providing a channel through which the student input will be heard. ATS has become adept at providing such channels and will continue to do so in future administrations.

Don't turn your back

by Mitchell Davis

Many blacks today, especially our generation, have a diluted perception of reality. Yes, we have gotten as far as we have by our own unique individual qualities. If it wasn't for us, our people, who were willing to fight for us to have a chance to reach our fullest potential, we would not be where we are today. The spirit of previous generations has definitely died down, and our generation is the prime candidate to rekindle that spirit.

Most of us don't even realize what contributions black people have made to the world. As we travel through various cities and countries, we often overlook the fact that much of the beauty and historical landmarks is the result of the hard labor of many enslaved black people. These slaves were taken from Africa and eventually settled in different parts of the world.

After enslaving black Africans, white settlers of various ethnic backgrounds (Portuguese, Dutch, French, and English) discovered the riches available in Africa. They fought with one another over these resources. After much fighting it was agreed that Africa should be divided to put an end to the warfare. This essentially meant, with the allocation of sections of Africa to each ethnic group. The black tribes, even then, did not sit back. They fought long and hard to retain their land. Now, South Africa is the final region.

In closing I would like to share an excerpt from an article entitled "Those Who Have Turned Their Backs" by Gregory Campbell.

"When Jewish and various other caucasian nationalities, and to some extent Hispanic groups, or individuals preach and promote their ethnic unity, heritage, community involvement and encourage seeking mates within their own ethnic groups they are widely considered to be promoters and legitimate representatives of their people. They are applauded as concerned citizens, and are looked at as motivators. The Jewish people fought and worked for and eventually obtained the United States support a separate Jewish nation with dual citizenship. But on the other hand if a black, especially an Afro-American tries to duplicate and promote these same attributes for Afro-Americans the response would be a deafening tone of negativity. You will probably be called a racist, a militant, a crazy trouble making nigger; even by some misguided Black-Americans. Because, many Afro-Americans are afraid of losing material and social gains of main stream status and feeling the wrath of Caucasian and Negro peers, they simply avoid any signs of being sympathetic or helping their own people. Many Afro-Americans have turned their backs, blanched their minds..."

The bottom line is that a house divided will soon fall. No other racial group, except the native American Indian, has more of a claim to the fruits of America than Afro-Americans. Black Americans cannot be a successful and respected people until they stand united in the community and with one another. There is strength and success undiscovered when there is disharmony.

There is much work to be done! There is no reason that organizations such as NAACP, NAACP, and the Urban League should have to beg people for membership. LET'S WAKE UP!!

A student's reflections

This column will basically be my reflections about IIT. What qualifies me, you ask. Well, I am in the rather unique position of having been associated with IIT for twenty-two years. That's pretty good considering I'm 23 and currently working at Computerland of Lincoln Park. I entered IIT officially in August of 1980, pledged Alpha Epsilon Pi Fraternity in 1981; majored in Management Information Systems under the auspices of the StuArt School; graduated in 1984 with Honors; entered graduate school in 1984 and stayed a year. Full-time graduate school just wasn't for me. I got a job. Currently, I keep in contact with the school through friends, my graduate class and my girlfriend.

Well, what I'd like to do in the following weeks is relate stories about life at IIT as a kid, as a student and as a recent alumnum. Right now, I'd like to offer a bit of advice, for what it's worth. In my interview, there were five dominant factors that affected what the interviewers thought of me. First and foremost was my D.P.A. That must be kept as high as you can keep it. Competition is fierce and that is the first level of filtering. I know it sounds like I am being a dead horse but it's true. Secondly, experience in your major like summer jobs or co-op.

Thirdly, activities. The more activities in which you were involved the better they like it. It shows ambition and leadership. Hold an office in a club! It gives you something to talk about and can be, or more, used as a complement to experience. Fourth, enthusiasm. Be enthusiastic about the company but don't over do it. And finally, BE YOURSELF! They can smell a fake a mile away. If you can just be yourself, you can relax during an interview and answer questions truthfully, sound and with confidence. Believe me, that will come across. That's also an excellent way to judge if the company is for you is that it is vitally important to your mental health. If they don't like you for yourself then why work there. You need to feel comfortable. It's as simple as that.

Well, I hope that bit of advice helps. When I finally

SUMMER IN CHICAGO AT IIT FOR 119 WAYS TO:

- Get a head start
- Fill prerequisites
- Make up a course
- Speed up graduation

• 119 undergraduate or graduate courses to choose from
• 4-week summer sessions—June 16 to August 18
• Day and evening classes
• Main Campus and Extension Centers
• Simple FREE parking
• Mail pre-registration available

Dr. Charles N. Haas (left) is the principal investigator for the "Process Design Manual for Waste Water Disinfection." Photo courtesy of University Relations.

Haas contributes to research

Dr. Charles N. Haas in the Environmental Engineering Department has been selected to contribute key research for "Process Design Manual for Waste Water Disinfection." Several thousand copies of the manual, published by the Environmental Protection Agency (EPA), will be released in October.

The two and a half year project began in late 1981. The EPA contacted people with the most expertise in the area of disinfection, setting up groups at Oklahoma State University, Colorado, Nevada, and IIT. Dr. Haas and the students working with him were chosen to research how to design systems to disinfect waste water with chlorine. The other groups are studying waste water disinfection with ozone and ultraviolet light.

The four groups have been meeting for approximately three years. A three year milestone was set at the EPA.

Anthropology

Students worked on the Washakie project, prospecting for fossils, mapping localities, measuring geological sections, and collecting and cataloguing 40 million year old bones. "They were a terrific crew," said Luchterhand, "and I'm very enthusiastic about taking another group of IIT students to Wyoming this summer."

"The rocks in the Washakie Basin were deposited between 45 and 49 million years ago, during the middle part of the Eocene epoch," he added. "The Eocene was a time when many archeaic types of mammals were being replaced by the earliest representatives of living groups of mammals, and the students will get a chance to collect many different kinds of fossils."

"The Field Museum has worked in the Washakie Basin for nearly 30 years, and we have a hundred localities in the basin that have already produced fossils," said Luchterhand.

Hass continued from page 4

Research Lab Headquarters in Cincinnati, Ohio. However, most of the correspondence between groups was made over the phone and through piles of letters. The manual is currently going through EPA editorial changes.

Dr. Hass received a BS in biology and a MS in environmental engineering from Iowa State University. "I went to the University of Illinois-Champaign-Urbana for my doctorate degree work, and then returned to IIT as a professor of environmental engineering."

The classes Dr. Hass instructs are Introduction to Environmental Engineering (ENVE 310), Fundamentals of Water and Waste Water Treatment (ENVE 402), Water and Waste Water Treatment (ENVE 541), and Biochemical Engineering (ENVE 513), and with the aid of

Greeks continued from page 11

offered on the campus level," he said. "Hopefully people won't get bad ideas from the book."

"We're trying to be more like just a social life, and then get more involved in the community," he said. "We hope people join for more reasons than just a toga party," he says.

Egan doubts his book will damage the responsible-yet-fun-loving-reputations greeks want to present.

Reflections continued from page 4

followed his advice, I found that I got further along than I used to when I was at IIT. I am happy that people have been good for the university and I am happy that this is the path I wanted to go down."

"I am happy that I am doing good things and that people are working together."

Headache continued from page 3

There is an initial interview about these factors and a one-hour physiological assessment. A medical doctor is examining factors that might lead to sleep disorders in the elderly. This study is currently being designed.

Research assistants can expect to spend six hours per week working on one of these studies and a full academic year commitment is required. Three units of credit are provided per semester.

A variety of skills are utilized on these projects including computer work, research design, technical, and biological chemistry. If you are interested in one of these research positions, or would like more information, contact Paul E. Sheehy at 567-3214.

Centennial continued from page 1

private donors."

Macintosh Plus

Finally someone has come up with ways to help the faculty get through college.

Our Macintosh Plus personal computer, and our Macintosh SX2 enhanced personal computer.

Macintosh Plus is designed to give more power to faculty members. It has a full megabyte of 1M memory and a double-sided, 800K internal drive. It is considerably more affordable, yet still has enough power to run hundreds of leading software programs.

As well as help you with extra-curricular activities like research, budgeting, administration and publishing.

However, if you're concerned with economics, you might want to consider our Macintosh SX2 enhanced with it newly added double-sided 800K internal disk drive. It is considerably more affordable, yet still has enough power to run hundreds of leading software programs.

And should your workload grow so your Macintosh SX2 all the way up to Macintosh Plus.

Of course, thanks to our advanced point-and-click mouse technology, both Macintosh computers are incredibly easy to use. So you can immediately do useful things, without spending a useless week in remedial computing class.

Visit your campus microcomputer center or authorized Apple dealer for more information and a demonstration.

After all, students aren't the only ones who need a little help getting through college.
Spring job prospects not optimistic

Evanston, IL (CBS) - Spring grades' job prospects may not be as positive as previous years, according to the latest reports from hotels and businesses.

The hotel industry, however, says they expect a slight increase in job openings compared to last year. "We’re seeing more people applying for jobs with us," said a spokesperson for a large hotel chain. "We’re also trying to hire more seasonal workers this year, so we expect to see a rise in job openings.

On the other hand, the manufacturing sector is predicting a decrease in job prospects. "We’re facing more competition from overseas manufacturers," explained a representative of a major manufacturer. "This is causing a decrease in job openings in our industry.

In education, the outlook is mixed. Some schools are reporting an increase in job prospects, while others are seeing a decrease. "It depends on the specific field," said a representative of a local university. "Some fields are in high demand, while others are not.

Overall, it seems that job prospects are mixed. It’s important for job seekers to stay informed and adapt to changing market conditions.
Optimistic Chaplain

To the editor:

The 1986 Winter-Spring semester entered like a lion and seems to be concluding with a similar roar. Disruptions have reached an intensity that even conjures up cosmic breakdowns: epidemic terrorism; seige mentality at Tokyo's economic summit; the industrialized world and the strains of end-of-the-world Armageddon scenario.

When multiple nuclear reactor core meltdowns with far-reaching potential for radioactive contamination of human, animal and plants from the Soviet Ukraine to Central and Northern Europe; travel and student-exchanges are suffering substantial setbacks, yet at the same time seeds of hope continue to flourish indicating that the human species can adapt to a variety of threats.

A Chicago metropolitan conference hosted by Northwestern University's Soviet-U.S. person-to-person encounters and communications, coupled with a stimulating week-long IIT forum designed by ATS and the Intersecticy Council on "Our Future in Space" generate renewed confidence in the irrepressible spirit of man and woman. Such events reflect a concern for the future of a human community able to develop even further in potential and imagination that belies the oft occurring feelings of dominant self-focused individualism stemming from the political and corporate arena. "Hail and Farewell, Class of '86: your heroes and heroines are not all gone."

Anselm H. Amado
Institute Chaplain

MUD SLING FEST. IIT STYLE.

Flash your I.D. for up to 20% off on your fare.

Just present this ad and show us your student I.D. when you buy yourself a Midway Airlines® ticket to any one of our destinations—that includes Florida and the Virgin Islands —and we'll give you 10% off any round-trip purchase.

Show us your first ticket's passenger coupon and flash your I.D. for a second time and we'll give you 20% off another round-trip ticket.*

Travel must be completed by December 31, 1986. That means you've got time for a Spring break, an away game, come home in the Spring and go back in the Fall, or whatever.

When you need a break, Midway gives you a break. Call Midway Airlines at 1-800-621-5700, in Chicago (312) 767-3400, or call your travel agent.

*Proof of first student reduced rate ticket and travel necessary to receive 20% discount coupon available at all Midway ticket counters.

Current student I.D. must be presented at time of purchase and travel.

Travel Agent: This ad must be attached to auditor's coupon at time of booking.

The Swinging Party

by Sadie Carr

"Oh, got dressed. They are having a swinging party. We got to go. Not too early. We should be there about 8 or 9. We are not too worried, though we are," he is telling me this. Should I go or what?

At the swinging party. The heat and the sweat burst upon you like a forcing wind. It is a truth that when our hormones spew out they give you a chance. They are a party-wrong. They are hating...it. Some are summer. help. Some are fall. Others are winter. Help. mom, summer...Running through the Robert Taylor Homes. One of Chicago’s most exclusive hot spots. And here I am, right in the middle of the hoopla. I feel absolutely specialized. In fact, I am glowing.

Back at the Swinging Party After Being Cannibalized at the Robert Taylor Homes

The reason I am glowing. Yes. Being cooked in a gaseous oven. Albatross with my name. Strange family. I gave them my wallet. I still have my pride. Isn’t that what matters? Tranquility by acts of cannibalism so close to home, I’m really nervous. Eight screwdrivers do the trick, and I’m happy again. The vodka and blood stream through my veins as one. Mom, you must try it sometime. Really.

On the dark floor, in a corner, dying slow. Everything is pulse, glitz, and it’s pretty damned hip. I’m in love. With this boy. I want to be with him. I want to talk to him? Yes? No? Tell me. I need to know. And I need to know now.

What’s this? A gorilla and his sidekick are escorting me to the dance floor. I can stand these guys. Much less dance. That’s OK. They don’t dance either. Garrison’s smirking and has sunk to the bodice of his friend’s成立了. His name is ‘Bravo’. His name is ‘Bravo’. Bravo. Bravo. You do it so well.

The boy is in love with me. Fast. I can feel it in my bones. Hello, love. I love you. Can I help him that? I tell him that. Maximum big mistake. He puts me on the dance floor and I am an ass out of yourself at a swinging party. It happens every time.

Mending a Broken Heart with Mr. Jack Daniels

It’s either suicide or this. So I take the easy way out. Oh. Jack. Jack. Me and Jack and the bartender are great, but I’m telling them about my awful rejection.

"Listen, hon. There are tons of other boys here. Go find yourself one." I look into his gentle engineer face. "I hate boys," I don’t smile when I say this. He takes it the wrong way. He runs out screaming, "AIOS, AIOS!" What a dork. Some kind of Kool-aid? Acquired immune deficiency syndrome? No. It’s gator-aid. It’s got to be.

Being So Smashed That Nothing Matters at the Moment: Not Who Sees You, or What You See

Drumming and waving my arms on the dance floor. Spastic, inebriated, unhindered. All those feelings that make the morning after real hard. Dance away the heart ache, dance, dance, dance. With anyone and everyone because no one cares anyway. I am getting sick.

Getting Sick on 35th Street and Michigan Ave.

It is a wonderful place to get away from the world, the ways, the thought. The dark, damp sky expands then finishes. Once in a while a car rolls by, a slow, drooping pace, armed and curious. Looking, searching through the night. Desert dry. Linear, airy, airy. I feel fine now. It’s all gone. Dust. Pure blood flows once more.

Looking in People’s Windows

Walking back to my room. Watching in people’s windows. People are asleep. People are awake. People are studying. Back up. Oh my God. That girl is studying. I press my nose up against the window, with a hungry wail expression of ‘why’? She closes the shade on my face.

Not Being Able to Sleep

Because the Room is Swirling

Sometimes it doesn’t stop for a long time. Well folks, it’s swinging tonight. It gets real awful after about the thirty-second revolution. It’s bad on top of the bed, worse underneat. It is the time where we all look upon the night with an ascetic air. I’m never going to drink again and in the morning I’m joining a convent/nunsterity. Getting a drink of water from the fountain in the hall. The water is not cold, is not pleasant. Feeling a hell of a lot better with water sloshing in your empty stomachs. I stay awake in the bed until the sun comes up and saves me. People are pretty much done with the psycho candy. Everything is pink and misty. Little birds sing and all this that. In the café and everybody comes down scratching their ribs and smacking their mouths. I say, "Oh hi!" to her. Her response sounds something like ‘glug’. A girl just fell on her face and now she’s moving. People are careful to step over her. She looks pretty funny, lying there in a ‘Cara Bears’ nightie. I have to go to work.

The problem we have with it is not political, but ethical. The reputation of the Greek fraternity, "Kappa Alpha Theta," a major Greek organization, is being demonized. The fraternity has been blamed for everything from rape to hazing to drug use. Recent incidents, such as the death of a student at the University of California, Berkeley in 2000, have sparked widespread outrage.

Fraternity and sorority membership has been declining since the mid-seventies when the Vietnam War era had emptied chapter houses. In 1984, membership totalled 200,000 compared to 180,000 in 1965. In the 1980s, fraternities are targeting more scholarly, more diverse groups. Fraternity and sorority life is undergoing a renaissance.

Opportunity knocks!

Now—enjoy a job for MBA’s while studying to be one:

IIT’s New MBA with a Management Internship

But hurry, program begins June, 1986. Act now to reserve your place!

This new, full-time, six semester day program includes two summers in which you will be placed with major Chicago corporations. You can earn over half your degree requirements on this management emphasis. This is your opportunity to advance to full-time employment with your internship company.

Assassins run rampant

It was reported that approximately 81 assassins were called into action last Monday evening to eliminate a student campus to eliminate students of various nationalities and majors. The list included on the hit list were the advisor of the resident assistant staff. By the end of the week, there were 78 offers of assassination and 14 fatalities since the only weapons allowed were water guns, paintball guns, air soft, rackets, bats, pianos, shampoo bottles, and syringes. This ruthless shoot-out gun-firing death squad was organized by Fowler Hall Council in an event known as the Assassin Game.

The Assassin Game gives the participants a chance to track down a predetermined target, Y, and terminate the person using a stream of water. However, the only weapon left that is another assassin, Z, whose assignment is to eliminate X. After a kill, the assassin accepts the target of his victim and continues on in the game. The game ends when there is only one assassin remaining. Due to time limitations this year, three assassins were declared the other half to offset the costs of Sportfest. At the end of the day when points were totaled, it was decided that the Brews Brothers were the winners of the field events with 53 pts. and overall Champions of Sportfest with a grand total of 89 points. Fugueewa placed 2nd with 54 points, the Spoggles placed 3rd and 3rd again, the Spoggles placed 3rd and 3rd again, and Rude took 4th place with 40 points. Awards were presented at a reception hosted by Quest and a special Sportfest dance was held later that night.

Dave Paukner, this year's chairman of Sportfest, would like to thank all those who made Sportfest a success with the work or resources they provided. These people include Reverend Anselm Amadi, Richard Weller, Joe Baste, John Podrazil, Yumi Masuoka, Laura Beltemacchi, Mike Bray, Rhoda James, Mike Schmidt, Terry Shipt and Quest Management, Dennis Hull and Dennis Matuch, Bob Morgan, HUB Director's Office, all the committee chairs, and everyone who participated in this year's events, ground crew, judges, and the Brews Brothers who were gracious and sportsmanship like champions.

Sportfest final results:
1. Brews Brothers 69
2. Fugueewa 54
3. Spoggles 48
4. Rude 40
5. Brew Crew 30
6. Off 18
7. Pounders 15
8. Victory 13
9. Hank Boys 10
10. Trackers 8
11. Sweetness 5
12. Challenge 4
13. Muza 3
14. Deel Pagals

Your Graduation Present Is Waiting at "Z" Frank.

Announcing easy-to-get 5.9% financing for new grads!

It's time to cash in on your college degree at "Z" Frank Chevrolet. Now, new grads can buy a new car or truck at the lowest financing rate available through GMAC's College Graduate Financing Plan. Making for as little as 5.5% annual percentage rate is available now at "Z" Frank. You needn't have an established credit history to qualify. At "Z" Frank, you won't have to dig up a large down payment, either. Just 5% of the purchase price! And your payments won't start for 90 days. You even have the option of leasing and reducing your monthly payments. Remember when your folks said you couldn't go wrong with a college degree? Stop by "Z" Frank Chevrolet...and see how right they were.

Plus sales tax, license & title. For example: a brand new 1986 Chevette 2-door with full factory equipment, cash price $5713.
Baseball team wins again

The IIT baseball team completed another winning week, defeating three of the five opponents they faced. The Hawks' first victim was their conference foe, Northeastern University. The game, played on Friday April 25, ended in a 5-2 victory for IIT. The Hawks hitting attack was led by Jack Ciaccoipo, who batted two doubles. Dominic Pistarella pitched the entire game for IIT.

The Hawks split a doubleheader with the visiting Division I team from Valparaiso University. The first game was decided in the ninth inning with two outs, two men on and IIT trailing 4-3. Bob Ryker at the plate for the Hawks, smashed the game-winning hit, a three-run homerun. Other offensive power came from the bats of Scott Carpinelli, who slugged his ninth home run of the season, and Mike Carpinelli and Chris Konecki, each with two hits. Chris Lindley was the winning pitcher in the 6-4 victory.

In the second game of the doubleheader, the Hawks had some fine hitting but were unable to hold back Valparaiso. The result was an 11-6 defeat for IIT. Mike Carpinelli and Jack Ciaccoipo had two hits each while Greg Flores and Mike Carpinelli slammed individual homeruns. Pitching for IIT was Kevin Hyams.

The Hawks tamed the Cougars of St. Xavier College on Monday April 28, winning by a 12-10 score. This was the big game of the week with several great defensive plays. The Hawks hitting attack was spectacular and was led by Jack Ciaccoipo with four hits (2-1B, 1-3B, 1-HR). Scott Carpinelli with four hits which included his tenth homerun of the season. Mike Carpinelli with three hits and Bob Ryker with another towering homerun. The winning pitcher for IIT was Paul Nykaza.

On Thursday May 1, the Hawks were defeated 11-1 at home against Lewis University. This week the baseball team will face Wheaton College at home on Tuesday May 6 at 1:00 PM, Judson College on Thursday May 8 at noon at home. The game against Aurora College away at 12 noon on Saturday May 10. All home games are played on the baseball field behind Keating Hall and fans are always welcome. Come out and cheer your Hawks into the conference playoffs!

Sportsfest continued

After everyone had finished drying themselves off and eating lunch, the field events began with the Kangaroo Hop Relay. The purpose of this race was to hop a predetermined distance around a chair and back with a plastic waterball placed between one's knees. The ball was too slippery for most teams, but the Brews Brothers appeared to have the stickiest knees and came across the finish line in first place. OFF was a close second while Fugawes and the Kitty Hawks took the third and fourth place respectively.

The Jello Race involves the transport of multi-colored jello from a plate on a table to a plastic jar 25 yards away. However, the jello had to be stored in the contestant's mouth only and the use of hands was illegal. These rules gave way to a less than sophisticated competition. The Brews Brothers were not inhibited and gladly accepted the 10 points and first place.

Shark defense class to be held?

The Physical Education Department is sponsoring shark attack classes in the near future. Aquatics director Dennis Maluch stated that we are in the process of renting or buying the mechanical great white shark used in the movie Jaws, and if we acquire this mechanical monster, we would be able to bring great realism to the class. With the shark attack season soon to begin, the East and West coasts, as well as the Florida area, it would be a great help to faculty and students alike who vacation in these areas who might just need this type of course.

ID's beat architects in S.R. Crown Hall softball game, Belt- emacchi sore loser

The great beers of the world go by one name: Löwenbräu. Brewed in Munich, Sweden, Canada, Japan and here in America for a distinctive world-class taste.

This World Calls For Löwenbräu.
