Accreditation Board visits IIT programs examined

IIT will be reevaluated by the North Central Association in March, 1987. The NCA accredits colleges, universities, and high schools. In preparation for this routine evaluation, IIT's administration has undertaken a self study of all its departments (academic and non-academic).

Dr. Geoffrey Higgins, Dean of the School of Advanced Studies, is the chairman of the overview committee. He is also coordinating the self study, as the director of NCA's field visits. The committee will review the final draft of the self-study. The self study was completed in September, 1986. The revision of the evaluation process is expected by late 1987.

The self study was begun about eighteen months before the expected 1987 evaluation.

The self study consists of about six educators from other universities who will be given a copy of the self study two months before their visit to IIT. This visit will cover three days in March 1987. During that time, the team will observe all academic and non-academic departments including the master's and doctorate degree programs.

The next step in the evaluation process is the comparison of the department's objectives, self study, and the educator's observations. After that the evaluators evaluate how well the department's objectives are being met. The feedback from these visits is expected in 1988.

The accreditation process, which is fully compiled four to six months later, concludes with a visit by President Thomas Martin.

IIT has been continuously accredited since 1940, and is expected to continue to be reaccredited in 1988.

Dr. Grace M. Hopper as she received the Heald Award to outstanding dedication and service to human progress last November.

Admiral Hopper returns to speak

Dr. Grace M. Hopper, Vice Admiral, U.S. Navy, a computer pioneer and creator of the computer language COBOL, will return to Illinois Tech on Friday, April 25, for a talk and informal reception with students, faculty, and staff at 2:00 p.m. in the Hermann Hall Ballroom. Admiral Hopper received the Heald Award, given by the university to a person who has shown outstanding dedication and service to human progress, last November at a formal dinner at the Ritz Carlton Hotel.

Admiral Hopper, PhD in Mathematics from Yale and, at 73, the oldest officer on active duty in the U.S. Navy, has led an incredible life. She has been recognized for her告诉大家 can-do spirit both inside and outside the Navy and in the world of data processing.

IEEE/HKN opens library lounge in SH

Vouvar and Dr. Saletta were very supportive of the proposals, and with a week, IEEE and HKN were given approval to establish the facilities in Siegel Hall.

During the past month, HKN and IEEE members have been hard at work moving furniture and equipment, cleaning and organizing the rooms. The library and lounge, formerly the office for a number of EE teaching and research assistants, was given a new look with a conference table and chairs, bookcases, a filing cabinet and a couch. The electronics lab, currently sharing a room housing equipment and workspace for the IIT Amateur Radio Club, was changed to include.

Financial aid discussed

Are you currently receiving financial aid? If you are, it is in your best interest to attend the first event of ATS' 86 Spring Conference. It will be a Federation of Independent Illinois Colleges and Universities (Student Advisory Committee) (FICU-SAC) presentation on current financial aid legislation and how it will affect us. It will be

Hours: Mon-Fri. 8-5

Colored ink and paper available
**Announcements**

**Early Registration**

Advance Registration for Fall 1986 Registration Packets for the fall term can be picked up at the Office of Student Records and Registration (room 104 Main Building) on Tuesday and Wednesday, April 15-16. A valid ID card is required. All packets not claimed by 3 p.m. that day will be sent to the Office of Student Records and Registration. Room 104 MB prior to April 18, 1986.

**Courses**

**Counseling**

The IIT Counseling Center will hold a workshop on Friday, April 11 at 12:15-1:00 p.m. "Scheduling Your Time" will take place in the HUB Mrezanne.

**Athletes**

All varsity athletes who earn letter awards should place their orders on April 10, Thursday, from 12:15 to 2:00 p.m. in the Schommer Room at Keating Hall.

**International Grads**

International graduate students who are planning to return to their home countries no later than May 1887 are invited to apply for participation in two professional enrichment opportunities sponsored by the Institute of International Education. A symposium on Technology in a Changing World will be held in San Francisco in early June 1986, and will include visits with corporate executives and specialists in the electronics industry. A symposium on Natural Resource Planning will be held in Portland, Oregon in late June 1986 and will focus on the policy making process that is involved in land use, project planning, and environmental policy. For further information about these programs and application materials, come to the International Office, Room 103 Farr Hall.

**Law Day**

Harvard Law Professor Arthur Miller will deliver the Law Day keynote address at 8 o'clock in the IIT Auditorium on Thursday, April 17. Law Day ceremonies begin at 4:00 p.m. with student, alumni and BALSAA award, followed by Professor Miller.

Arthur Miller has taught at Harvard Law since 1971. Professor Miller also writes occasional columns on law for various newspapers, including USA Today, and hosts a weekly television show on the local cable network in Boston called "Dialogues." Since July, 1980, Professor Miller has been making weekly appearances as a law commentator on ABC's "Good Morning America." Professor Miller has a B.A. undergraduates degree from the University of Rocheastle and a law degree from Harvard Law School. Professionally he is nationally known for his work on court procedure, a subject on which he has authored or co-authored more than 25 books. He has held many public service positions, the most notable being as a Commissioner of the United States Commission on New Technological Uses of Copyrighted Works.

The public is invited to attend and admission is free.

**PS On Physics**

Freshmen, you know that big physics exam that's coming up? The one you're so confused about? Well, Phl Eta Sigma, the freshman honors society, is holding a physics tutorial from 12:45 until 1:45 p.m. Thursday April 10 in the Siegel Hall Auditorium. So show up and wade your way through your frequent problems.

**ATS Elections**

The ATS Elections will be held on April 9 & 10, 1986. The elections will take place from 11 a.m. to 1:00 p.m. in the HUB and Commons from 4:30 p.m. to 8:30 p.m. in the Residence Halls on Wednesday, Thursday and Friday. Room 104 MB will be open until 11:00 p.m. on Tuesday and noon to 2:00 p.m. in the HUB and Commons and from 4:30 p.m. to 5:30 p.m. room 122 at noon in the HUB. Write-in candidates are responsible for completing and returning the completed write-in form within 48 hours of the election. The Office of Student Affairs will provide the "Ballot Box Manual of Instructions" for Illinois Election Judges, 1985.

**Future in Space**

Do you care how much of national budget is spent on space exploration? Does it matter if we "get" out there first? Do you feel about civilians risking their lives on space missions? If you have an opinion you would like to share with the IVT community, ATS and IIE are sponsoring "Our Future in Space" week as part of the ATS Spring Conference. Different issues will be discussed during the week and the results will be written into a paper sent to the White House. For more details, see the article on the program in this issue of Tech News. Everyone (students, faculty, administration, staff) is invited to participate!

**FIICU-SAC**

All students are invited and encouraged to attend a FIICU-SAC presentation & discussion on current financial aid legislation. This event will occur on Tuesday, April 1, 1986 in HUB Mrazanne from 12-2 p.m. Please see the article in this issue of the paper for further information.

**Watch Your Car**

Once again we experienced in February and early March a sharp upturn in the number of thefts from automobiles. Some thieves have been caught, but the problem is perennial. Some of the cars involved in this week's thefts, were locked, with keys left in the ignition in the front or back seat. There were no thefts from car trunks.

An experienced thief can break into and remove things from an automobile with the use of simple tools in less than five minutes. The only protection need is leave nothing in sight in front in the car. Store everything in the trunk. This includes even magazines and loose papers, since the would-be thief may break into the car just to check to see what he sees is of value.

**Entrepreneurs**

Tech Entrepreneurs next meeting will be held in the HUB Field Room from noon until 2:00 p.m. on Tuesday April 8, 1986. We will be electing new officers and members are required to attend. All members are encouraged to run for the offices of president, vice president, and secretary/treasurer. For further information please call Claudine Geis: 714-8795.

**Echo Gases**

The Physics Department Colloquium, "Photo Echoes in Gases" will be given by professor Isaac Albert A from the Department of Physics at the University of Chicago will be on Wednesday, April 10, 1986 in Siegel Hall Room 217 at 4:00 p.m. There is a colloquium social in the conference room in Siegel Hall room 202 at 3:30 p.m.

**Gaming Club**

Alternate Realities, the IIT gaming club, will hold its next meeting on Tuesday April 16 at 12:15-1:00 p.m. in the Crown Room in the Hall of Commerce. Come to meet the players of strategy and role-playing games. Everyone is welcome, especially beginners.

**AIAA Meets**

The American Institute of Aeronautics and Astronautics will meet on Wednesday, April 9th at 11:00 a.m. in room 123 E1. We will be discussing our trip to United Airlines, the ATC Space program conference, and the Mechanical and Aerospace Engineering Department newsletters. All AIAA members are encouraged to attend.

If you can't make the meeting give us a call at x1085 or stop by our office, room 112 E1.

**MAE Seminar**

The American Institute of Aeronautics and Astronautics proudly announces the next seminar sponsored by the Department of Mechanical and Aerospace Engineering. Professors Salmi B. and Bricker G. will speak on "High-Temperature Combustion of Chlorinated Hydrocarbons". The Lecture will be presented in Crawford Auditorium (104 E1) at 11:45 Wednesday April 9, 1986. Coffee will be served at 3:45 in room 247 E1. All are encouraged to attend.

**Reflections**

The book of job continues as the biblical text for reflection with "The Beel and Yodle Agenda" student-faculty study group, meeting again on Tuesday, April 8 at 12 noon in room 305 of the HUB Mezzanine. The complex issue of justice and suffering is the focus of Job's writing in this brief passage. Use this time to dialogue about the implications of the character of humanity in the contemporary world. The IIT community is invited to participate in an opportunity for personal growth.

**A Thought**

"The Implications of Philosophy for Science of Theology" is the theme of a series of presentations by Dr. Nancy Murphy of the University of California, Berkeley at a symposium hosted by the Theological Center at the University of Chicago and IIT's Religion and Life program. The seminar series continue on April 7 and 9 (Monday and Wednesday) at the Lutheran Seminary of Theological, 710 East 55th Street, Hyde Park beginning at 7 p.m. The program will involve the thought of Karl Popper, Thomas Kuhn, Alasdair Macintyre, Imre Lakatos, Hans Kung and others. For further information about the program contact 427-1380.

**Pluralism**

Prof. Robert McAfee Brown of Yale and UCLA will speak at North Park College, Foster and Pulaski Ave., on Tuesday, April 15th at 8 p.m. His topic addresses values, humanism, and liberal education.

**Hey Deepers!**

Hey Deepers–Greek Week approaches and this is the perfect time to show that we are the most spirited house on the Quad. So wear your letters, paint the rock every chance you get and show the rest of those deadheads what you're made of. And don't forget to KICK BUTT DURING GREEK WEEK!!

Chain Reactions

The Chemistry Colloquium, "Laser-Initiated Chemical Chain Reactions: Quantum Yield vs. Laser Wavelength," will be given by Dr. K. V. Reddy of the Amoco Research Center of Naperville, Illinois. The talk will concern Laser Initiation of chemical chain reactions and their potential commercial applications. We have studied determination of methane and hydromethylation of ethylene at laser wavelengths of 193, 248, 308, and 355 nm. The yield in the hydromethylation varies with laser wavelength and pulse energy. The kinetics of these systems will be discussed. Continental will be served at 3:30 p.m. in the Wishnick Lecture. Lectures are held in room 188 Wishnick Hall. The date is Wednesday, April 9, 1986 at 4:00 p.m.

Time

The Counseling Center Workshop, "Scheduling Your Time," will be held on Friday, April 11 in the HUB Mezzanine from 12-15:10.

SWE Elections

There will be a SWE meeting on April 9, 1986 in room 118 E1. Guest speaker: Rosetta Clark from AT&T Bell Labs. Also...ELECTIONS!!!!

IEEE Meeting

Due to the low participation of April 3rd’s meeting, IEEE will hold another meeting. The date will be April 9, 1986 in Siegel Auditorium at 10:00 p.m. The topics for discussion are nominations for office of all committees: library/fab introduction & rules; and goals for next semester. Attendance is very important!!!

PTS Meeting

All initiates and members please attend the Pi Tau Sigma meeting on Tuesday 4/8/86 at noon in room 112 E1.

Accreditation

Board for Engineering and Technology, the National Architectural Accrediting Board, the National Association of Schools of Art, the Committee on Professional Training of Chemists of the American Chemical Society, the Council for Rehabilitation Education, the American Bar Association, and the Association of American Law Schools.

UB Spoken Here
The Major Concert
Clearlight — Reflections of Pink Floyd

Out of the great white north comes Canadian rockers Clearlight, whose standards raise the premise by which the term "Copy Material!" is used through its presentation of a live Pink Floyd Tribute Show. Among the material that is performed are stunning renditions of Pink Floyd classics (Time, Pigs, Money, Comfortably Numb, etc...) which typifies Clearlight's ability to adopt Floyd's music as if it were their own. This band, which averages 300 one-nighters per year includes Kevin Briggs, lead guitar; Mark Didero, drums/vocals; Ken Jaap, bass guitar/vocals; Jerry Kaufman, lead vocals/rhythm guitar and Ross Thompson, keyboards.

This is it, see them!
April 18, 9:00 pm
HUB auditorium

Tickets on sale now at the HUB box office and at Ticket Master.
$5.00

Listen to WOUI 88.9 FM to win free tickets.

Wanted: Roadies and ushers for Clearlight.

Admission $2.00
$3.00 with dorm meal card

Next Week —
To Live and Die in L.A.
Alloy research conducted

Dr. Philip Nash is an Associate Professor of Metallurgical and Materials Engineering at IIT. Dr. Nash is in charge of six research projects in the METM department besides teaching three undergraduate and four graduate courses and staying raquetball on the side.

Nash serves as a category editor for nickel binary alloys and nickel higher-order alloys for the Data Program for Alloy Phase Diagrams. He has authored and co-authored over 30 papers on phase equilibria and phase transformations. In addition, he is assisting in organizing a conference on applications of alloy phase diagrams. The conference will be held in Metals Park, Ohio in conjunction with the ASM's 1989 Materials Week. It will illustrate the need for and applications of phase diagrams to industrial problems.

The focus of the program will be structure and high-temperature alloys, electronic and magnetic materials, ceramics, composites, and the synthesis and processing for obtaining novel alloys. Dr. Nash's specialization is on alloy phase diagrams and their various applications. He has also been involved in the development of phase diagrams in nickel-based alloys. His research involves the use of computer graphics and database applications in phase diagrams.

He has earned a B.S. in metallurgy from City of London Polytechnic and a Ph.D. from Queen Mary College of London University (UK). His current research at IIT involves six projects. One is a National Science Foundation project on particle coarsening. This relates to alloys used in high-temperature applications such as turbine blades in jet engines. Copper alloys are also the subject of another study. These are being rapidly solidified in the laboratory at approximately one million degrees Kelvin per second. An application of this research is in rocket nozzles.

Other projects are an alloy phase diagram program, the experimental determination of nickel-copper phase diagrams, and the mechanical alloying to produce amorphous alloys. The mechanical alloying is done mainly with nickel and titanium so far.

All of these projects are directed by Dr. Nash and include a total of seven graduate students. His sixth research study is computer representation of phase diagrams. A project, which incorporates both graphics and database structures, is being run by Nash alone.

The undergraduate courses Nash instructs principles of phase transformations (METM 357), alloy thermodynamics (METM 413), and scanning electron microscopy (METM 472). He also teaches dilatometry at METM level, advanced physical metallurgy (METM 548), and mineralogy continued on page 10.

Flash your I.D. for up to 20% off on your fare.

Just present this ad and show us your student I.D. when you buy your own Midway Airlines ticket to any one of our destinations—Florida and the Virgin Islands—and we’ll give you 10% off any round-trip purchase. Show us your first class, executive or frequent flyer club member’s ticket and we’ll give you 20% off a return trip.

Travel must be completed by December 31, 1986. That means you’ve got time for a Spring break, an Away weekend, or a vacation in the Spring and go back in the Fall, or whatever.

When you need a break, Midway gives you a break. Call Midway Airlines at 1-800-621-5700, in Chicago (312) 776-3400, or call your travel agent.

*Proof of first class, executive or frequent flyer club member’s ticket and travel agent for details or for discount coupons available at all Midway ticket agencies.

The V.I.P. Society’s first class, executive or frequent flyer club member’s ticket and travel agent for details or for discount coupons available at all Midway ticket agencies.

Student I.D.

Midway Airlines serves Boston, Chicago, Cincinnati, Cleveland, Dallas/Ft. Worth, Detroit, Fla., Ft. Lauderdale, Fla., Houston, Indiana, Kansas City, Miami, Minneapolis/St. Paul, New Orleans, New York (JFK), Orlando, Philadelphia, St. Louis, St. Thomas, St. Louis, Tampa, Washington D.C. (National), West Palm Beach and White Plains.

**Student government officer candidates**

**Tina Kula**

Remember to vote Wednesday and Thursday to save democracy.

**Preeti Parikh**

If elected, I would make the social life of the Illinois State, give the campus a suburban setting and insure that everyone involved would benefit. I would also strive to do the following:

1) widen the scope of ATS and maintain strength
2) promote the role of the student in faculty and administrative decisions, especially those affecting the students' education
3) increase communication among resident halls, fraternity and commuter students
4) promote full student participation, so student government can be truly represented.
5) work to continue resources between ATS and campus groups for the benefit of the student body.

I have been involved in ATS for the past two years and served as vice president this year. I am familiar with the structure of ATS and the responsibilities of president and I will pursue the successful fulfillment of the demands of this office. Cast your vote on the ballot for me, Preeti Parikh, for president and I will work to make you proud of this student government. Come and vote on April 9 and 10 - it’s your right and it will make a difference.

**Cathy Paul**

Since I’ve been at IIT, I have been more and more students take the initiative to learn about and influence their school environment. Part of my role as vice president of ATS is to motivate students to get involved on ATS committees and encourage them to speak for themselves to achieve their goals. I am truly involved with the ATS community, and I will continue to make the campus a safe and welcoming environment.

**James Kiriazes**

Now is the time for a change in ATS. It seems that IIT has been a place for students to meet their representatives to represent the students of IIT. How many students have ever heard of IIT by their own means? (Or, for that matter, how many students have never heard of it or even heard of it?)

Could it be that the current student body of ATS do not want to listen to their constituents? ATS has allowed one week for campaigning. Can a student who is not running for an office, and alone, qualify the student to be a candidate? I am not afraid to listen to the students in this school. As a fact, I encourage anyone who sees me to stop me and tell me what they think needs to be changed in the school or how they feel, as a student, on certain issues? I feel that any ATS office has given students this opportunity. When you vote, I will be glad to tell you my qualifications and ideas for an effective student government - a student government that includes you, the student, for a change. I look forward to meeting you and hopefully serving you as your Vice-President of ATS.

**Crystal Gary**

I am seeking the position of vice-president because it is vital in any organization to maintain correspondence and records. I believe that communication and establishing a line of correspondence is my major responsibility. I have been involved in ATS and I have worked on the connections committee. My goal this year is to promote communication between ATS and other campus groups.

**Matthew Chin**

My name is Matthew Chin and I am a third-year student at the IIT architecture office of Assistant Treasurer. I feel that I am qualified for the position of Assistant Treasurer because of my previous experience. I have worked as an intern for the architecture firm and have taken on various tasks that include budgeting and financial planning.

**Patty Murphy**

My name is Patty Murphy and I am a junior majoring in Electrical Engineering. I am running for the position of Treasurer of ATS.

**Spring Conference**

Students involved in ATS are a part of the larger student community, looking out for the best interests of the IIT community. They represent the opinions and feelings of the students to the faculty and administration. It is hoped that all IIT students will take an active part in ATS and other campus organizations. This, as well as promoting student awareness on various issues, is a major goal of the Spring Conference. The Conference consists of several programs scheduled for the day, and is open to all students. The programs include a FICCU-SACF event, a debate on the future of the space program following the Space Shuttle Tragedy, and a leadership potential program. A major goal of the Spring Conference is to promote the ideas of President Martin's COMMIT plan. Specific information on each of these will appear in future issues of Tech News.
AUSTIN, TX (CPS) - University of Texas students are up to their old anarchic ways again.

Some of them hope to abolish their student government for the second time in five years. It is in the same area that, in the process, they may help feed a reform wave now washing over most student governments nationwide.

Schools as diverse as Notre Dame, Colorado State University, the University of Texas at Austin and the University of North Dakota are among dozens of others that have been going through similar measures to restructure, weaken, and, in some cases, get rid of their student governments altogether.

It wouldn't be the first time.

Five years ago, reformers at Texas, Georgia, Virginia, Clinch Valley College, Oklahoma, Arizona, Arkansas and Maryland, among other campuses, moved to dissolve all or parts of their campus governments.

In most cases, reformers argued the governments were ineffective or meaningless. They actually succeeded in abolishing governments at Texas and Virginia.

At both those campuses, administrators eventually helped rebuild student government.

But now at Texas and some other campuses, reformers are at it again.

In October UT sophomore Richard Munster, along with a handful of fellow members of Young Conservatives of Texas, sued UT President William Cunningham and Student Association President Scott Sabolich for 'using SA's money to fund a student group that is trying to endorse certain Democratic candidates for state office.'

While the controversy grew into an abolition movement that collected some 700 signatures to get a dissolution measure on the next campus ballot, Munster now says his group - CRAPM (Committee to Retire Aspiring Politicians) and STOMP (Students Tired of Manipulative Politicians) - will

"just sit on the issue" until spring.

"It took four years to get the issue of reinstating the SA on the ballot. It took two weeks to get the issue of dissolving it on the ballot," Munster says.

"It's an interest seems to be spreading.

Students for a Better and Balanced Education (SBBE), composed primarily of College Republicans members, have now joined to weaken New Mexico student government by drastically reducing its budget and voting to deny school funding to gay and ethnic groups.

While the Republican effort lost by a 10-1 margin, it did increase voter turnout in the subsequent campus-wide election.

And the the New Mexico student government's vote of confidence was strong, it was singular. At many schools, talk of reform and reorganization usually reflects a serious lack of confidence.

At Notre Dame, members of the student body tried last week dissolving the Student Senate because "it doesn't get anything done.

One-fifth of Bradley University's student senators resigned because their organization was "traveling down the wrong road.

The University of Tampa recently formed committees to reorganize the student government and its constitution. A Villanova committee, charging "the current government is inefficient and stagnant," is fighting to eliminate two presidential positions as part of a major reform proposal.

To forestall discontent, Brigham Young's student body voted to hold a "Student Body President for a Day" contest, giving students a chance to find out how their system works.

Swarthmore Student Council Co-President Hajen Nadao is proposing drastic changes in his organization, and one SC member says

"We are looking into the penguin of Bloomington" was named second in the student government of president of Gorgeous Associations.

"And, as happened five years ago, a conflict with student governments is also showing up in increasing numbers of absurd candidacies.

Faced with a choice between the two candidates, Eastern Illinois students elected a Stillness Party candidate "a platform on a graft-free, corruption-free, and lies." Andrew Williams, Open the penguin of Bloomington" was named second in the student government of president of Gorgeous Associations.

At Maryland, Monarch Party President Charles P. Adams III, and Thomas Cooper, won by promising a "benevolent rule" and "work to get the campus filled with cold weather," after capturing the endorsement of both the largest student groups and some administrators.

Nadao's proposals include

1. Exempt students from registration fees
2. Large-scale, low-cost computer science classes
3. A "bureaucrat" to handle student complaints
4. A "bureaucrat" to handle student complaints
5. A "bureaucrat" to handle student complaints
6. A "bureaucrat" to handle student complaints
7. A "bureaucrat" to handle student complaints
8. A "bureaucrat" to handle student complaints
9. A "bureaucrat" to handle student complaints
10. A "bureaucrat" to handle student complaints

Attention everybody. The time is now for our tenth annual sports event sponsored by RHA and Quest Management Service Inc. This year's sports fest will be held on April 15, 1986 at 9:00 am to 5:00 pm.

One major change in that has been taken place is that this year's eligible competitors will include all IIT faculty and students.

1. IIT faculty
2. IIT students
3. IIT students
4. IIT students
5. IIT students
6. IIT students
7. IIT students
8. IIT students
9. IIT students
10. IIT students

Registration packets must be in me as soon as possible, registration form in the residence hall cafeteria during the dinner hour. This year's events will be disclosed at this time.

Alloys (METM 519), and transmission electron microscopy (METM 520).

For five years at IIT Nash enjoys his work as a professor at RHA. He says that this has given him a "great deal of freedom in being able to choose what research you want to work on." He joined the faculty of IIT in January, 1981 and was granted tenure last year.

"Hopper continued from page 3

She became an accountant and was an associate of the Bureau of Ships Computation Project at Harvard. There she worked on the Navy's Mark 1 computer. She stayed on at Harvard after the war and left

Sportsfest X planned

Attention everybody. The time is now for our tenth annual sports event sponsored by RHA and Quest Management Service Inc. This year's sports fest will be held on April 15, 1986 at 9:00 am to 5:00 pm. We have only one day for our ten sports events.

After the games come an end, there will be a barter fair where you can exchange old, unused, and broken home food service. The awards ceremony will be held at 7:00 pm on May 15. A total of $250 awards will be given to this year's winners.

In addition to the sportsfest committee feels that this year's events are fun in nature and not as competitive as the previous sports events.

The hope that this year's sportsfest will be as enjoyable and spirited as the previous sports events.
Before you make a long distance commitment, make sure you know what you're getting into.

If Fletcher Christian and Captain Bligh had known what being stuck in the same boat would mean, chances are neither would have set foot aboard.

And if you're stuck in the same boat with a long distance company that doesn't give you all the services you need, it's easy to harbor mutinous thoughts.

But when you pick AT&T as your long distance company, you know you're in for smooth sailing. You'll get trouble-free, reliable service. Immediate long distance connections—even at the busiest hours. And long distance operators to assist you with immediate credit for wrong numbers and collect calling.

And you'll get discounts off our Day Rate on your state-to-state calls. With savings of over 50% during weekends until 5pm Sundays, or nights from 11pm to 8am, Sunday through Friday. And 40% discounts evenings between 5pm and 11pm, Sunday through Friday.

So when you're asked to choose a long distance company, sign aboard with AT&T. With AT&T Long Distance Service, you'll never be left stranded. Just call 1 800 222-0300 for more information or to choose AT&T. Reach out and touch someone.

AT&T
The right choice.
B-ball returns from Fla.

The IIT baseball team recently returned from their spring break workout held in Jacksonville, Florida. The Hawks competed in the Florida Classic Tournament along with other fine baseball teams from the northern states.

According to Coach Darrah, "the team's record of 4-5 is misleading. We actually played very well. Our pitching and team defense was excellent and if not for a lack of some timely hitting in a couple of games, we would have finished well above the .500 mark."

The people of Jacksonville are still talking about the monumental home run hit by junior catcher Bob Ryley. An estimated 450 foot home run not only cleared the left field fence but also carried over a house beyond the ballpark.

Since coming home, the Hawks defeated Concordia College 11-1 in River Forest behind the fine pitching of Chris Lindsey and a 13 hit attack from the bats of IIT, capped by another long home run by sophomore Chris Malajewski.

Remember the Hawks home opener will be Tuesday, April 8th at 3:00 against the St. Xavier Cougars.

Basketball signs recruits

Both Kevin Curry and Tom Beaton have signed letters of intent to attend IIT and play on the basketball team.

Kevin Curry, 6'3" forward-guard from Whitney-Young High School averaged 18.8 points per game and nearly 10 rebounds for Young as they played in what some consider the stiffest competition in the city, the Red West Division. He was named to the All-Tourney Team of the Johnson-Ben Wilson Thanksgiving Tournament and Honorable Mention in the Public League Red West.

Curry is said to be one of the top three scholar athletes in the city as is demonstrated by him receiving the Motorola Scholarship and being selected as an Illinois State Scholar, a National Achievement Scholar, and a Beta Lab Finalist. Curry captained both the basketball team as well as the baseball team his senior year at Young High School.

Kevin is living proof that athletics and academics do

Sig Eps win IFC basketball

by Pieter DeVeal

Sigma Phi Epsilon capped an exciting IFC basketball season by stunning Pi Kappa Phi 32-29 for the regular season title. The Pi Kapps had momentum coming into the final championship game having beaten the DeTs in the semifinal game.

The Pi Kapps carried this momentum into the first half of the title game and led by five points at halftime. Mike Grubich and Steve Arakawa led the Pi Kapps with twelve and seven points, respectively. Brent Bontrager, 7 points, and Dave Butkus, 8 points, paced the Eps.

continued on page 11

Rude Boys win over Sixers

The Intramural Basketball season came to an end on April 1st. The Rude Boys were victorious 40-32 over the Sixers. The Sixers stayed close throughout the first half trailing only 18-16 at halftime. In the second half, the Rude Boys pulled the ball out forcing the Sixers to get out of their strong 2-3 zone defense into a man-to-man defense. This strategy by the Rude Boys allowed better offensive rebounding which won the game for them.
