ANNUAL FRESHMAN HANDSHAKE WILL OPEN TECHNICAL SEASON TOMORROW EVENING

TUESDAY, OCTOBER 1, 1934

Dean Heald, Professors Schommer and Amoura, Counsellors Wister, Baum, and Stagg to Speak

SINGING AND REFRESHMENTS ON PROGRAM

Directors Survey of Steel Cold Industry for N.R.A.

Linking up with past activities in the department of mechanical engineering, students are urged to attend a meeting of the American Society of Mechanical Engineers to be held in the Auditorium at 5:30 o'clock on Monday afternoon, October 16th. Professor Robert H. Peabody, the faculty member in charge, will present a talk on "Diesel Engines." This talk will be in connection with the studies of the students in the course on "Power Plant Engineering."

Students from both east and west will be present at the meeting, since the two sections of the class are meeting during the week.

ARMOUR'S (7) YEARBOOK

In the more voluminous sense one can find an article announcing the staff appointment of the Cycle, Armour's yearbook. This information, while interesting, was not altogether in the nature of a surprise.

The past record showed that for the last four years, the two key posts of this publication have not been allowed to wander about on the loose, but have been long in rather restricted company. During this time, few without the right fraternity affiliations made it, a few persisted to try, but were reached the rank of business manager or editor-in-chief.

It is much more pleasant to say nice things about people and brother publication, but at times these sweet sounding phrases are hard to reconcile with one's conscience. As an example of the bookmakers' and the engravers' arts, last year's publication was a success. It is only to be regretted that, considering the amount of money expended and the effort put forward by the engravers and printers, that the student staff did not exercise a little extra care in the editing of copy, reading of proof, and selection of pictures.

As we see it, the defects of last year's yearbook is due in large measure to the lack of staff selection. If the Cycle is to continue to have on its files "published by the students of Armour Institute", candidacy for the staff positions should be open to and every student of Armour Institute and selection based on ability and effort put forward, not on extra fraternity due to which position.

We believe that the present editor is capable and that he might very conceivably have achieved his position regardless of the method of selection. This is not a bit of support for an either—wise or unwise our selection. However, it is our belief that this method of selection is a widespread handicap to anyone, other good, or bad.

The faculty members of the Board of Publications are to be commended for their willingness to give student government a trial. However, they should be ensured for not interfering when student government fails.

Each Armour student, through his payment of his student activity fee, has two definite rights. One is the receipt of the publication, the other is the chance to show his qualifications for work on the Cycle staff. If these responsibilities for the continuation of present conditions do not take immediate steps to remedy it, the faculty control group should justify its existence by intervening.

"The Slipstick"

Closer to "The Slipstick", let the Slipstick fly where it may.

The Letter Box

Editor's note: This column is open to any expressions of interest to Armour students.

September 26, 1934.

To the editor of the Armour Tech News:

At Armour an unbridled esteem of addressing faculty members is ingrained in our consciousness. We, the students, and with a few of the few faculty, have endeavored to make such a practice as to observe any formality or deference in any thesm or form of speech. This, to our knowledge, is not to be minimized. In writing it is proper to address a man; but nothing is gained by the continualprefixing of a title to his name as a convention.

In addressing a faculty member it is certainly more courteous, more human, dignified, and polite to say "Mr. Thompson" instead of "Professor Thompson" or "Doctor Thompson". In fact, I know that Mr. Thompson would rather be called Mr. when students speak to him. Such a practice once instilled would make possible a better real cordiality between the faculty and students.

Consider how axiomed it would be to the industrial world to sell Mr. Hunt, Engineer Hunt, or Engineer Hunt, or Manager Hunt, such times you addressed him in a conversation. Thus, why may we not as a means of our institutions of learning, particularly Armour, maintain as an artifact a habit? At Chicago's most famous university, it is the custom for all faculty members to be addressed as Mr. when they are spoken to. Let's start this at Armour.

With this on my mind, while the first semester is just getting started, many ideas will be brought to the faculty by many of our students and faculty for an onивision of opinions. However, in the end it will be up to the student body to initiate the change. Let us have a chance to show the information and organize it into a campus opinion by discussing the matter with other students and with individual members of the faculty.

Think this over—what is it more natural, more democratic, and more American in spirit?

Sincerely,

Edward F. Botticelli.

Freshmen Given Rules for "Caps"

In an effort to stimulate keen interest in technical school work among the freshmen and thus make it possible for them to develop to the best of their ability, a list of rules has been formulated and is now in effect for the current year.

1. No student will be allowed to wear at all times after the Freshmen Handbooks, in accordance with the latest requirements.

During the winter, only will be allowed to remain on St. Patricks' Day and only one "Cap" allowed each student in the entire freshman class.

4. Freshmen are not allowed to wear the caps of any other school or university except at freshman banquets and spring assembly.

5. Freshmen must wear their caps at all times when in school or on any campus activity except when engaged in athletics.

6. Freshmen are not allowed to participate in any social activities or parties except those sponsored by the Freshmen or approved by the Freshmen Council.

The rules were drawn up by a committee of Armour students and are designed to foster a sense of community and pride in the freshman class.

Tech Music Clubs Plan Active Year

The Armour Tech Music Clubs under the direction of Mr. J. A. Cramer, will open their season by giving a concert at a Custer Hospital on Saturday night, October 13. It has been announced that some of the finest soloists and orchestra personnel in the city will be present to add interest to the program. The music will be in keeping with the interests of the students and will be performed by the Armour Tech Music Clubs.

W.E.S. Officers Lay Plans for New Year

Plans are being rapidly formulated for the coming year by the W.E.S. of Armour. The officers of W.E.S. will meet with the new officers to plan the activities for the coming year. The officers will be elected by the students and will have the responsibility of planning and implementing the activities.

Will Announce Essay Contest Winner Soon

Dr. Kops is the secretary of the Electrical Engineering Department and is responsible for the organization of the essay contest. The contest is open to all students in the Electrical Engineering Department and the winning essay will be selected by a panel of judges.

Miss Steele Answers Queries on the History of Mission Building

It's pretty evident that Miss Steele is the one who has been responsible for the Mission Building. She has been working on it for a long time. Anyhow, when she is finished with it, she will present it to the Armour Legion.

The idea is this: the institution was founded by the first president of the Armour Legion. The fund was raised through the sale of prints and postcards. The money was then used to purchase the land and build the Mission Building.

We hope she will see it finished soon, and we will be able to see it completed.

Sidelines (Continued from page 1)

As a character, The Tin Man was already associated with Tins and his friends. He was the first to suggest the idea of a "Tin Man" who could communicate with Tins.

In fact, it is said that Tins first appeared on the cover of the Tin Man's newspaper, which was called "Tins and His Friends." This newspaper was distributed to the students of Armour College and was widely read.

It is interesting to see the growth of the "Tin Man" as an organization by an ordinary student, who was interested in technical education. The "Tin Man" quickly grew in size and influence, and was soon accepted by the technical departments of many colleges and universities across the United States.

The "Tin Man" continues to flourish today, and has become an integral part of the educational system. Its influence is felt not only in the classroom, but also in the lives of the students who participate in its activities.

After Every Class It Rings the Bell!

Plunge Albert is made of the finest quality materials. And because it is packed in that tiny and special package, it makes a great Christmas present. So, don't forget to pick up a Plunge Albert for your friends, whether it's in red or green, you'll find it's just what they need this Christmas season!

INTRAMURAL BALL GAMES TO START IN COMING WEEK

Opportunity Offered to Try Out for LETTERMEN TO ENTER
Baseball activities have reconvened this week in preparation for the annual intramural baseball tournament. The beginning of this week will be taken up with practice sessions and the championship games will take place next Wednesday. Intramural tournament rules allow only the practice plays for each team before the scheduled games. Each team will be divided into baseball, basketball, and matched games for both practice and scheduled games, but will have to furnish their own equipment, uniforms, and gloves.

LAW SCHOOL
All LSW classes are eligible to play as their respective teams, but baseball intramural will not be permitted to play the regular procedures. The baseball master will play for the junior and sophomore classes and the varsity master will play for the junior and senior classes. Managers and coaching of the various teams will be elected at class meetings during the week and all freshmen and sophomore interested in playing are urged to sign up.

Practice Schedule
Seniors vs. Juniors, Tuesday, Oct. 1
Junior vs. Sophomore, Thursday, Oct. 1
Freshman vs. Sophomore, Saturday, Oct. 3

Annual Armcor Golf Tournament Saturday
First round for the annual Armcor golf tournament gets underway this coming Saturday, October 1, at the Armcor Golf Club, Stil Bo and Western Ave. at 9:30 a.m. The customary green fee of fifty cents will be charged all entering players.

ALL TECHENES
Any Armour student is eligible to enter as a member of the golf teams. This year's competition will probably be under the direction of members of the golf team. However, it is hoped that Professor Ledergerber, golf coach last year, will continue the guiding hand of the tournament. Players will be given handbooks and the best possible advice will be given to those wishing to enter. The winning trophy is to be held for the year by the team that wins.

ARMOUR TECH NEWS

TECH SHORTS

THE GOLF TEAM lost a valuable player when Ted Tracy was called to serve in the armed forces. The "dozens" begin their first season on the gridiron. Spectators are invited to watch the members of the gridiron staff as they prepare for the season.

ARMOUR'S FOOTBALL Coaches have expedited their move to new staff positions.

Armour Captain Larry Beavers has announced his plans for the incoming football season by breaking in new men and making the necessary moves. The team is expected to be larger than ever.

ARMOUR UNIVERSITY of Chicago FOOTBALL games are always available for Armour. Armour's team will play with Ohio State, Michigan State, and Lake Forest. The games are scheduled to be played with Chicago's Central and General Williams. The season will be completed after four or five more games and then will be completed by the Armour team.

Due to the absence of last spring's intramural basketball tournament, a similar event is to be held for this fall. However, this time we will have a basketball faculty. Board the details on page five.

A number of takers for the TECH SHORTS section will be announced.

OTHER NEWS

ARMOUR'S FIELD hockey team has scheduled two games with Wheaton, Indiana State Teachers, DePauw, Michigan State Normal, and Lake Forest. The games are scheduled to be played with Chicago, Notre Dame, and General Williams. The season will be completed after four or five more games and then will be completed by the Armour team.

Due to the absence of last spring's intramural basketball tournament, a similar event is to be held for this fall. However, this time we will have a basketball faculty. Board the details on page five.

Advance news of the coming sports program is in need of further action. Captain John Olson is in charge of the Armour team. Although the squad is in need of a good drive there is room for several new additions.

CONTEST FOR NEXT WEEK'S COVER

The Autumn Sports Program is open to all Armour students. Stories and poems are invited by Armour's young writers. The stories and poems are to be sent to Armour's Press, Armour College, Chicago, Ill. The winning cover will be announced on the bulletin board. This contest is sponsored by Professor Olson, baseball coach, and offers him an opportunity to see up the material available for the spring sports schedules.
