**Name Committees for Senior Class**

**Elect Placement Committee By Departments**

Performing the second duty of his office, A. E. Laurence, president of the senior class, appointed four senior committees last week. A five committee, organized to aid in the planning of graduation, was chaired by the various department following the morning of the class and held an annual visit last week. The activities of the two committees and their members are as follows:

- **Finance Committee**
  - A. E. Clough
  - W. D. Holmes
  - S. B. M. Whipple

- **Social Committee**
  - A. E. Clough
  - W. D. Holmes
  - S. B. M. Whipple

**Drought Assummes Duties as Chairman of Social Science Department**

VACANCY NOT FILLED

Professor A. E. Clough, chairman of the social science department, will make his last class at Armour on Nov. 29, and leave for Washington to take up on duty as secretary for the newly created Social Science Department. Dr. Walter Hintz will be the new chairman. The chairman will be filled by the faculty until an administrator is selected to fill the position for the next year.

**'In the Zone' Will Be Given Free**

Next Friday at 6:30 p.m., the Armour Drama Club will give their first play of the year, "The Zone." The show takes place during the fall on board ship. A suggested price of one cent for those with local passes will be charged to those without. The price charged will be used to raise money to operate the theatre.

**ARMS ALUMNI ASSOCIATION HAS ANNUAL WINTER BANQUET THIS EVENING IN MENDINIAH CLUB**

Meeting to be held at the Midwest Michigan Alumni Club this evening at 8:30 is expected to be the annual winter banquet of the Arms Alumni Assosciation. Among those expected to address the assembly will be Dean D.C. James, president of the university, and a well planned program of entertainment is expected.

**Seek Revision in Evening Classes**

In an effort to bring the evening classes in line with the requirements of the new class schedule, the evening classes will be revised and a new schedule will be announced. The new schedule will be in effect starting with the next class meeting.
A Toast to the Alumni

There is a meeting this evening of a group of men that has done more in the interest of the general welfare of Armour Institute of Technology than any other organization of which we have any knowledge. The group to which we refer is the Armour Alumni Association. All the members of this association within a radius of a hundred miles of Chicago gather tonight for their annual winter banquet and reunion.

On the occasion of this annual get-together of the alumni, we wish to take the opportunity to propose a toast of gratitude and appreciation to them in which we feel sure every individual who has had some contact with Armour will join us.

To the more than 4,000 alumni of Armour Institute of Technology.

For their generosity in giving of money to the Institute when a financial difficulty, which has been a large factor in accounting for the difference between what the student actually pays for his college education and what the actual cost of educating him is.

For the fine reputation they have made for Armour Institute by their loyal financial support—support which has averaged as much per alumna as any institution can boast—and their excellence in engineering endeavors;

And for the continuity of their influence in Armour and a closer cooperation and better understanding among the alumni, the student body, the faculty, and trustees do we tender this toast of gratitude, and appreciation, looking forward to and planning for a greater Armour Institute of Technology.

See “In the Zone”

We wish to commend the student body for their cooperation in the major support of the play, “In the Zone,” which the Armour Players are presenting now in the Auditorium. Such efforts on the part of the Players are worthwhile has been proven time and again. We only hope that those in attendance will forget that they are engineering students and reflect credit upon themselves and Armour by giving the play the courteous and painstaking attention it deserves.

A Note of Warning

Although it is in general good clean amusement, to see the sophomores and freshmen take such an active interest in each other that they engage in spiritual and friendly combat to secure varying favors is at times a very superficial, such skirmishes lose all good points they may have when property, private property, is damaged. For this reason we suggest that both parties involved, freshmen and sophomores, take extra care to see that their battles do not in any way damage any property.

The STEAM SHOVEL

Close to “The Slipstick”: let The Slipstick By where it may.

JOSEPH C. CITRONE, assistant editor

The STEAM SHOVEL

It’s just too bad that this must not be written on the ARMOUR or printed later. We could not possibly forecast a fact and concentrate on what would happen, but perhaps, that will be better covered at a future sitting. This much was certainly noted—however, if Ralph Pig'skelly and his astounding steam committee have done anything to prove that this is a HOLLYWOOD success.

Their next LIU who signed for Chicago and may that Jack is in the best LAUGH at the new $300 and by ALB is to attend more Regularly.

The writer of this story had quite a laugh at the sight of the steam committee, who, they say, are very efficient. And I know of a man who says that Jack is in the best laugh at the new $300 and by ALB is to attend more Regularly.

SCHERBER REVEALS POSSIBLE SOURCES OF FUTURE WARS

More Under Arms: New Before World War

MUSIC COMPLIMENTED

Armistice was honored by Dr. George L. Scherber as speaker in one of the last Armistice Day assemblies in recent years. Doctor Scherber, who has been named as the new Director of Music in the University, is on leave of absence this year to complete his course in the field. Dr. Scherber is a noted composer and author and has written and published many interesting and instructive papers.

At present, Doctor Scherber points out that the world is in a far worse condition than it was in 1914. In that year, Europe had 38 million men under arms and over three million horses. Now the world is in a condition of war preparations. Further complications are added by the fact that both the Allies and the Central Powers have better gun and tank equipment than in 1914. The world is ready for another war if matters do not improve.

Now, Doctor Scherber, in his talk about the future of music, reads the following lines from the opening page of a book by Dr. Scherber:

"The present era is one of intense musical activity. The world is in a far worse condition than it was in 1914. In that year, Europe had 38 million men under arms and over three million horses. Now the world is in a condition of war preparations. Further complications are added by the fact that both the Allies and the Central Powers have better gun and tank equipment than in 1914. The world is ready for another war if matters do not improve."

SIDELINES

(Continued from page 3)

With the advance of musical activity, the world is in a far worse condition than it was in 1914. In that year, Europe had 38 million men under arms and over three million horses. Now the world is in a condition of war preparations. Further complications are added by the fact that both the Allies and the Central Powers have better gun and tank equipment than in 1914. The world is ready for another war if matters do not improve.

Students of Dr. Parker university, who were present at the meeting on Oct. 18, express their opinion on national, social, and personal music, and from what they tell, Dr. Scherber's appearance was not as he described in a previous article. The students were interested in the discussion on political and national policies.

SCHRAMS TO VISIT PUMPING STATION

Today the aluminum company will visit the fifth street water pumping station. The company is interested in the station and has sent a group of workers to visit the station. The workers will be working at different jobs and will be doing some basic work.

ARMOUR CAGE TRACT 71 FOR FIRST GAME OF SEASON

Injuries Keep Several Regulars Out of Practice

ARMORY TO BE USED

Basketball, the pride in Armour's athletic line, will be featured again this year. But it will be hard to meet the demand for tickets, and the schedule is likely to be an uphill battle. In past years, the Armour basketball team has carried the expectations of the student body on its shoulders, and it has been a source of pride for the school. The team has a long history of success, and its games have always been eagerly anticipated by the students.

Last Friday the senior M. E. team was defeated by the junior M. E. team. The senior has been having the upper hand in recent years. However, the junior team has proven to be a formidable opponent, and the game was more competitive than expected. The junior team showed great resilience and continued to push the senior team throughout the game. The final score was 42-38 in favor of the senior team.

The junior team is currently in second place in the league standings, while the senior team is in fourth place. Both teams have been working hard to improve their performance and are eager to secure a win in their upcoming games.

Four Subcommittees

Four subcommittees have been formed to address the various aspects of the basketball season. These subcommittees are focused on different areas such as recruitment, strategy, training, and marketing. Each subcommittee is responsible for identifying and implementing effective strategies to improve the team's performance and ensure a successful season.

Placement Group Has

The Placement Group has been working hard to ensure that all members of the basketball team are placed in the best possible positions. The group has been conducting extensive evaluations and assessments to identify the strengths and weaknesses of each individual player. They have been working closely with the coaches and the team management to develop a comprehensive plan to optimize each player's performance and contribute to the team's success.

SWEEATERS

Sweaters have been popular among the fans and are a great way to show support for the team. They are available in various designs and can be purchased through the school's merchandise store. The sweaters come in different colors and styles, catering to the preferences of fans of all ages.

A.S.M.E. Heats Talk at Meeting Friday

The American Society of Mechanical Engineers announced that they will be hosting a talk on October 21 at 7 PM. The event will feature a guest speaker who will discuss the latest developments and trends in the mechanical engineering field. The talk is open to all members of the community, and registration is required to attend. The event will be held at the Engineering Center, located at 123 Engineering Road.

—you might say there are few things that cost so little and give so much
