Armour Host Open House Night

Armour played host to nearly 200 guests at an Open House Night on Monday evening of Junior Week. A wide variety of food and social activities were available to guests, including music, dancing, and social science activities.

The food, full and hearty, was catered by the Armour students who were in charge of the event. The guests admired the food and were all smiles. They also enjoyed the music, which included both live and recorded selections.

FACULTY MEMBERS MAKE VIBRATIONS OF STRESS

In an investigation of a subject which has been of interest to the biological and medical community for some time, Professor T. R. Price of the Armour College of Engineering has been working on a project that may have far-reaching implications for the future of medicine.

The project involves the study of the stresses that are placed on the body during various activities. The stresses are measured using a special apparatus that can detect even the slightest change in muscle activity. The information gathered in this study will be used to improve our understanding of the effects of stress on the body and to develop new methods for the prevention and treatment of stress-related disorders.

Juniors Use Hose on Frosh, Sophs

From 9:00 a.m. to 5:00 p.m. on Monday, the Armour College of Engineering hosted an Open House Night, allowing prospective students and their families to tour the campus and learn more about the school.

Armed with hoses, the junior class members were ready to provide a refreshing shower for the frosh and sophs who were visiting the school.

Arms length away, they stepped into the line and began to work methodically down the line. Each hoseman held a hose, and the水流 was split evenly between them.

As the line moved, the frosh and sophs were surprised and excited to see the hosemen at work. They thanked the juniors for their generosity and asked if they could learn more about the school.

All students who wish to apply must submit their applications to the admissions office by the end of the week. The deadline is 5:00 p.m. on Friday, May 31, 2023, at the Alpha Beta house.

Arms Length Away

Win All Events

Winning all events in track and field is not easy, but the Armour track team did it on Monday night. They defeated the University of Notre Dame and St. Mary's College, respectively, to win the Big Ten championship.

On the men's side, the team won every event, except for the javelin, which was won by Notre Dame's John Smith. The women's team also won, with a score of 151 to 97.

Armour Players Choose Officers

New officers were elected for the Armour College of Engineering's Student Government Association (SGA) for the upcoming academic year.

The new officers include Vice President Max, President Jack, and Secretary-Treasurer Tom. They were chosen by a vote of the students at the SGA meeting last week.

When the officers are elected, they will be responsible for representing the students' interests and concerns to the university administration. They will also be responsible for organizing and conducting SGA meetings and events.

Alumni Cooperate in Advertising

Many alumni have been cooperating with the university in advertising efforts to attract new students.

A recent advertisement featured a photo of a student holding a trophy, with the text: "Join the Armory, where tradition and excellence come together." The advertisement was published in local newspapers and on social media.

Freeman to Receive Dr. Science Degree

John Freeman, President of the Armour College of Engineering, will receive an honorary doctorate of science degree at the 2023 Commencement Ceremony.

Freeman has made significant contributions to the field of engineering and has been recognized for his leadership and vision.

Radicalism

In the recent invokation of radical influences at the University of Chicago, it was triumphant enough for the author who wrote this document to be found. The university had encouraged its students to ask, "Is our system the best one?" All good Americans are apparently expected to hear this with shackles of contemplation, but we aren't exactly invited to do so.

In fact, it seems obvious that we can't know that our system is the best one; we may believe, and that's all. We may, without being treasonous or disloyal, disbelieve it, so long as we do not advocate overthrow of the government by violence.

It is clear, of course, that the University of Chicago is truly radical. When one is reaching that our system is the best one, and with that in mind, it's not as if we can do anything.

Katharine Butler has stated the position of the university, and he states his leaven no room for discussion, that the university has any object other than to seek depressionism and thereby disbelieve it, so long as we do not advocate overthrow of the government by violence.

President Kellogg has stated the position of the university, and he states his leaven no room for discussion, that the university has any object other than to seek depressionism and thereby disbelieve it, so long as we do not advocate overthrow of the government by violence.

It is clear, of course, that the University of Chicago is truly radical. When one is reaching that our system is the best one, and with that in mind, it's not as if we can do anything.
By Neville H. Hamilton

Ray McGwire, University of Pennsylvania student, caught every punt for three years and then dropped the last punt in the last game. However, he picked it up and returned it thirty yards.

Thirteen of the 39 highest ranking students in the college of liberal arts and sciences at the University of Missouri are juniors.

California made travel in style. A scenic journey was taken in a rail car with all the glee wearing for sale, according to the Daily Californian. Another girl who refused to take a bath and California was gone by a gasp of about four weeks ago, sure to do in future only a bath of any kind on her back. Probably to provide cotton amusement.

State laws of Massachusetts forbid the sale of liquor to immature under twenty-one have made it necessary to drop plans for a trip round at Williams College.

Have you a skeleton in your family who doesn't eat what you feed him? Make one of that way, too. You can make him the envy of all your friends.

A local at Ohio State says it makes a wise alarmist.

Pamela: A negotiation of Jim, Jim, nothing that suits with a bad mean.

Sara: Plans to run between in brain.

Frank S. Reynolds: A more, in the brain.

Ann: "The law," said a professor of economics at the University of Illinois, "is a science, not a profession." A preliminary statement comes from the corner of the row, and there's something there to "The law," too.

Somebody estimates that it is one per cent of the students' money goes to alcohol. 

Dr. Kinkel is a prominent citizen, a philosopher in industrial research, and a notebook editor. He is the author of many books and has served as a governmental official. He is president of the Illinois Pie in AIMEC.

To anxiety... I bring relief.

I am your best friend.

I am your Lucky Strike.

I am made only of the choice center leaves. The top leaves are bitter, being. The bottom leaves are gritty, tough and unpleasant. My fragrant, expensive center leaves—no mellow and rich—give you the mildest, best-tasting smoke. I do not irritate your throat. To anxiety I bring relief. I'm your best friend.
I'm sometimes asked about cigarettes... and I believe that offer the mildest and purest form in which tobacco is used...

Mild Ripe Tobacco...

Aged 2 years or more...
- the farmer who grows the tobacco...
- the ~~unrestrained~~ unattended who sells it...
  - every man who knows about leaf tobacco—will tell you that...
  - it takes mild, ripe tobacco to make a good cigarette; and this is the kind we buy for CHESTERFIELD Cigarettes.

All of the tobacco used in CHESTERFIELD Cigarettes is aged 2 years or more. We use no fresh, green tobacco.

LOGGIE & SPRING TOBACCO CO.

---

The Virginia blue and red letters and the partly book-colored text suggest a historical or nostalgic context, possibly referencing a time when the values of simplicity, nature, and traditional craftsmanship were highly valued. The continued relevance of these values today is demonstrated by the origins and practices of the tobacco industry, which has evolved from small, family-run operations to large, multinational corporations while still emphasizing quality and tradition.
