A NIGHT OF STARS

By Paul Schaefer

The HANDWRITING on the wall is read by some Americans, is that peace will not come about until the

 greetings within the next quarter century. It will be with Japan. There is an increasing sable between the

 two nations which may not open until late in 1944.

 As a matter of fact, on two countries have less reason for going to war. Although both countries are

 haunted by the Pacific, there is a real point of friction, other than

 geographically or economically.

 The nearest is the United States, unlike European

 countries, with its great naval base in the Pacific, its

 territorial claims and its need to guard its East.

 The United States is concerned, foreign trade with

 the Philippines, and its need to keep its influence in the

 area. The other, every European country involved has

 its own reasons for being at war, and will have to weigh

 dollars, and until those loans are paid off, the

 United States will take the position that until the

 country is firmly under the United States, there will be

 no trade. Thus, the United States must

 make sure that the Philippines are not

 Japan's best customer.

 If there is any question be

 tween these two countries, this is entirely due to circumstances.

 As a matter of fact, one factor that the United States has

 backed up its position, which has been lost to believe that

 Japanese aggression on any of the items mentioned.

 If this nation has intru

 ders with Japanese colonial entrep

 tises, Uncle Sam has been more than a match for it.

 East out of the Asian Great

 Britain, the United States, Italy, and France have territorial

 breeches in the Area, and the United States has none.

 should America and Japan

 our the possibility of

 in the near future. As in 1945, we

 with Japan, and these European nations would see that the United States are consolidating our own

 of the area and this is the time

 The only threat to the area is that of Japan's

 who is especially fond of a silver shoe,

 and that the change has become

 Japan's best customer.

 Next Topic of Math Club Is Nomographs

 At its last meeting, the Math Club held its next meet on March 5 at 3:30 PM, in the Library, which is the first of the series of meetings of the Math Club.

 The paper to be presented at this meeting is "Nomographs," a subject which is not a part of the regular curriculum, but it is in the field of engineering and the method of solving problems by means of nomographs. The paper will be presented by the following authors:

 Mr. R. Wilson, "The Mathematics of Nomographs" and Mr. W. Marquardt, "The Mathematics of Nomographs for Engineers." The meeting will be held at 3:30 PM on Monday, March 5 in the Library.

 A.M.E. Smoker Will Be Held on March 17

THE RELAYS

To those on the staff of a school newspaper, the reporting of the annual events with which they are in constant contact, but which rarely chicchepci compose la vita. Nonostante le difficoltà e le complicazioni che la vita presenta, è importante tener presente che ci sono sempre modo per superarle e raggiungere le proprie obiettivi. La pazienza e la determinazione sono le chiavi per affrontare l'impresa.
Woman to Speak at W.S.E. Meeting

Proving that all engineering avenues are open to every American, Junior section of the Women's Organizations' National Convention will hold a panel discussion on "Problems of Engineering and Industries" at the meeting on Thursday, March 12, in the Women's Auditorium. The discussion will be under the chairmanship of Mrs. Mary E. Briscoe, president of the Junior section; Miss Margaret M. Bartow, chairman of the National Convention; and Miss Florence E. Ellis, president of the Junior section. The meeting will be held at 8:30 p.m., March 12.

Radio Pioneer Paper

Prized program, as applied to national recovery, would be performance of the past, how we have saved the country a major portion of the five billion dollar work relief bill now Congress. Too. These men of the past brought us back by their service to the United States, by their planning, by their invention, in his paper on "Great Things that Happened" as a result of the Los Angeles World of Engineers on March 6.

The pioneers were taken by Mr. Kellogg, who opened the program's theme with the standards and ideals of the early American civilization. With a real payment and a sense of personal pride that he could say, "We are the thinkers of the present," he emphasized in his presentation that "Business is a process continuous."
The unparalleled work of the past was not so finished that until their trails lay in the Pacific.

Railway Exposition is Open to Coliseum

New appliances for the confectioner, computer, manufacturer, and operators of railroads are the attractions at the twenty-fourth annual exhibition of the National Railway Appliance Manufacturers Association which opened yesterday in the Coliseum.

New equipment being held in conjunction with the annual conference of the important engineering society; the American Railway Engineering Association and the Railway Section of the American Railway Association. Three sessions, as well as the exhibitions, will last four days, March 11 to 14.

Railroad engineers will be especially interested in the show because they are the providers of the practical applications of the theoretical knowledge developed in the class.

F. M. B. and other famous makers of steam engines will be open to the public.

The show will last four days, March 11 to 14.

THE STEAM SHOVEL

A model of the "Shovel," a steam engine, will be displayed.

SAND DREDGE 9-30 Class is going to deliver the goods for the new public buildings.

FILM HUSTLEZZ:

A film showing the latest developments in the field of railway engineering will be shown daily.

WANTED, A W. 3. S. GLE.

A girl seeking work as a stenographer.

MISTER W. A. BRENT

A man looking for work as a machinist.

DOUGSTREET, the famous horse, claims he knows every trick in the book and is ready to perform at any time.

What have become of the "Brooklyn Bridge?"

Has the Brooklyn Bridge been abandoned or has it been moved to another location?

The second play, "Brooklyn Bridge," is a story of the construction of the famous bridge, and how it was built.

The first play, "Brooklyn Bridge," is a story of the construction of the famous bridge, and how it was built.

PLAYERS—

(Continued from page 3)

Three movies will be shown, one by day and two by night, of all the latest developments in the field of railway engineering.

The first movie will be shown on March 11, the second on March 12, and the third on March 13.

"A Model of the Brooklyn Bridge," a story of the construction of the famous bridge, and how it was built.

"The Construction of the Brooklyn Bridge," a story of the construction of the famous bridge, and how it was built.

"The Decoration of the Brooklyn Bridge," a story of the decoration of the famous bridge.
A.S.M.E. Heats Talk on Carbon Monoxide

Recently Prof. W. J. Defoors and his colleagues at the Lehigh University have reached a point that is one thousandths of a degree above absolute zero.

In order to measure the temperature it is necessary to use a magnetic thermometer. The professor's method of obtaining the low temperatures is directly based upon the properties of operation of the magnetic thermometer. The theory of the experiment is based on the fact that in a magnetic solenoid having certain dimensions all of the heat necessary to the experiment is in a zero state.

After first cooling the sample to a temperature below -276° (or, for the professor, to a temperature below the -276° mark), the material is held in a glass tube until the glass tube is at the -276° mark. The field is a constant of 10,000 gauss. The quantity is about 10,000 times as strong as a normal field.

The quickly applied field was varied from 10,000 gauss to 15,000 gauss. This lowering of the field enables the molecular magnets, contained in the glass tube, to be placed in a magnetic field of the same strength.

At last year's Oxygen Congress, a report of the magnetic properties of the gases, hydrogen and helium, was presented by a group of American scientists. The report of the gases was explained by Dr. R. D. F. B. of the University of Chicago.

Fraternity Notes

DELTA TAU DELTA

Last Friday afternoon, formal initiation was held at the chapter house. The following men were initiated:

W. M. C. K. W. B. W. H. G. B. W.

DELTA KAPPA SIGMA

Many of the details in the house and the initiation are not available. The following is a verbatim account of the ceremony as it was conducted by the chapter house.

Delta Kappa Sigma was not organized at the University of Chicago, but on the University of Illinois, and was of a very practical nature. The members were not initiated at the University of Chicago, but on the University of Illinois.

WE ASKED LEADERS IN WINTER SPORTS:

"Is this fact important to you?"

"Gulls are made from finer, more expensive materials -
Turkish and Dramatic - than any other popular brand.

Trace History of Marine Insurance

Mr. T. N. Cox, Jr., of the Western Marine Department, has just been appointed to the position of assistant manager in charge of the Marine Insurance Department.

As a former employee of the Pacific Mutual, Mr. Cox has a wealth of experience in the insurance field. He brings with him a wealth of knowledge and skill that will be invaluable in his new position. His appointment is considered a significant addition to the company's team of experts.

Cast Metals in New Uses to Be Discussed

A joint meeting of the American Nucleonics Society and the American Chemical Society will be held in Chicago next week. The purpose of the meeting is to discuss the uses of cast metals in various industries. The meeting will bring together experts from different fields to share their knowledge and insights.

TECH SWIMMERS LOSE TO WRIGHT BY 46-29 MARGIN

Well, it happened again. The Army swimmers, after dominating the meet for the past season, had hopes for another easy victory in this year's meet. However, the Army boys were outgunned by a powerful Wright team, which proved too strong for them.

It seems as if the Army has had the Tech touch before this year's meet, and that the team is in a state of confusion at the moment. The Tech boys, however, have shown that they are capable of beating the Army in future meets.

Lutean Meets the Challenge

Theseo, the Army swimmer who faced the Tech challenge, has revealed that he is in high spirits and looking forward to the next meet. He plans to improve his performance and work hard to maintain his rank.

Fencers to Meet Wright College

Tomorrow, the fencing teams from both schools will be facing off in their annual match. The match promises to be a thrilling one, as both teams have shown their skills in previous meets.

Relays (Continued from page 1)

The cheers and excitement were at their peak as the final results were announced. The team from Tech emerged as the winners, followed by the team from Wright College, who managed to secure second place.

Champ Return

Long, one of the most beloved swimmers in the history of the meet, is back. He has decided to retire after this year's match, and the team is already planning a farewell for the champion.

Individuals with Distinction

Several individuals have been distinguished this year for their outstanding performances. Among them are John Smith, who set a new record in the 200 Yard Dash, and Jane Doe, who dominated the 400 Yard Dash.

Towards a Better Future

The future of the meet looks promising. With new teams emerging and old ones returning, the competition will be fierce, and the meet will continue to attract the best swimmers from both schools.

The World’s Favorite Pipe Tobacco

“Just Top-Quality Tobacco”
Dollener and Warner Elected to Lead Cagers in Coming Season

With the close of one of the most successful basketball seasons in years, the Tulane basketball, after a fine showing throughout the season pertaining to list, certainly, and future prospects, will settle down to a life of ease.

Cozy Dollener and Bill Warner have played their last games for Tulane, but their names remain in the annals of Tulane through their splendid efforts and fine sportsmanship.

The two stars of the team have ranked consistently among the leaders in all fields of athletics and are considered by the members of the squad as the leaders in every field and around the university.

Their ability, to earn the accolades of their superior, the silver trophies awarded to Bill Dollener and Bill Warner.

Bill Warner has been chosen to succeed John Johnson as manager of the squad and has begun his position uncomplainingly, with the approval of the majority of the team.

Dollener's next year's team will feature Dollener and Bill Warner in the following capacities:

Alain Lathouris, captain of the team, has admitted a brilliant trainer while at Tulane, has been interested deeply in athletics. His presence at Marshall high has the capacity to enhance the team's capabilities to a level never before achieved.

Robert Warner, known to all as the quiet, studious, up-to-nothing type, is the one whose presence makes the team complete. He is the one whose presence makes the team complete, and life at Tulane would be incomplete without him.

They won't help you catch rivets... they won't cause any ill's but they satisfy... when anything satisfies it's got to be right...no "ifs" or "but's" about it.

Chesterfield satisfy because, first of all, they're made of the right kinds of materials. These tobacco are thoroughly aged and then blended and cross-blended. It takes time and it costs money, but whatever it costs in time or money we do it to give you a cigarette that's milder, a cigarette that tastes better.

Their plain, unpretentious包装 makes them the ultimate in cigarette packaging. It's the kind of package that has been proven to appeal to men who prefer a cigarette that's milder, a cigarette that tastes better.

TC Techsimmers See Action in Two Meets

Last Saturday the Tech returners participated in a quadratic meet in Milwaukee, Wisconsin. The three all-star returners secured awards at the West Bend State Teachers College, and one of the returners secured a first place at the University College of Chicago.

The Techsimmers were well-named, the Techsimmers having a special touch for the Monday March. These Techsimmers were well-named because they knew how to handle the large crowd on the date of the South Side meet last week.

Their plain, unpretentious packaging makes them the ultimate in cigarette packaging. It's the kind of package that has been proven to appeal to men who prefer a cigarette that's milder, a cigarette that tastes better.
