Events of Junior Week Are Revised by New Marshals

**Tag of War and Medley Revisited: Rock Music Ball Contest**

**Class Rush is CLIMAX**

At a meeting of the Junior marshal board last week, a tentative program for Junior Week was evolved which offers some slight changes from what has been presented in the past. As always, Marshall Operations and Social Affairs will be open house and will end with the formal Dance, the site of which has not yet been acclimated. The events will include a Rock and Roll baseball game, a parade of the intercollegiate baseball season, a Junior-Faculty baseball game, intercollegiate and intramural volleyball, a baseball game between Marshall and Amos, and Intramural Fraternity-Sorority Spring Carnival.

**F.P.E.S. Will Hold Its Smoker Next Week**

The Fire Protection and Emergency Services at theistic society with 187 members, has arranged a freshman smoker next week. It will be held in the basement of the Alumni Building at 6 p.m. on Tuesday, February 15.

**Oldenburger to Talk on Linear Forms**

Dr. D. Oldenburger will speak before a meeting of the American Mathematical Society in Chicago on February 16. He will speak on the subject of Linear Forms.

**Spring Concert Set to Be Assembly Hall**

As in other years, the annual Spring Concert of the American Musical Clubs will be held at Assembly Hall. The club's program will consist of fresh and old favorites. The concert will be held on Tuesday, April 5.

**Hansen to Lecture Before Junior Class**

"The Engineer in Economic Investigation" is the title of a lecture to be given by Mr. T. A. Hansen, a member of the Engineering Department, at the next meeting of the Junior Class Assembly. The lecture will be given on Thursday, March 17, at 12:00 noon in the Union Building.

**H. O. Snaddler Moves to Actuarial Bureau**

H. O. Snaddler, V.P.E.E., has been transferred to the actuarial bureau of the Associated Mutual Insurance Company. His new position will involve a wider range of responsibilities within the organization.
The Strike

For the past few months, talk about the "strike" has been making a hit in all college campuses, in the halls, and on the streets. But not a breath of it has been heard at Armour, either because it was overlooked by the national organizers, or because our well-known conservation frightened them off.

Now that all is over, we can examine the results, and they are a disheartening spectacle indeed, if the daily press is to be believed. It is but a matter of time before the country, the demonstrationists were assailed with everything from the severest reproaches to the most serious threats, and yet not a single word has come from the students who have motives as obscure but apparently gratifying to the country, as they have been accused of networking their activities with the manifest satisfaction.

The real trouble with the strike was that it is not a strike. When the actual strike breaks, the people who are interested will not be able to stop it. The strike is not the result of a lack of work, but of a lack of funds. The people who are interested in the strike have not enough money to do the work they desire to do. The strike is not a strike, but a lawsuit, and the people who are interested in it have not enough money to do the work they desire to do.

лет,"

Saturday, October 22, 1933

LETTER TO THE EDITOR

Dear Sirs,

I am writing to express my views on the recent labor disputes in the United States. I believe that the striking workers are doing a great service by forcing the employers to recognize the rights of the workers. I also believe that the employers are doing a great service by recognizing the rights of the workers.

Sincerely yours,

John Doe

The Strike

For the past few months, talk about the "strike" has been making a hit in all college campuses, in the halls, and on the streets. But not a breath of it has been heard at Armour, either because it was overlooked by the national organizers, or because our well-known conservation frightened them off.

Now that all is over, we can examine the results, and they are a disheartening spectacle indeed, if the daily press is to be believed. A.M.E. Visits Two Milwaukee Concessions

By European Brevet

Rhodes of the American Society of Automotive Engineers visited two of Milwaukee's larger industrial plants on their transint trip last Wednesday, April 19.

The first plant visited was that of the Allis-Chalmers company, makers of farming equipment, pumps, turbines, and similar products. The new plant under construction at the site of the visit was the turbo-generating equipment for the Bemis-Deer supply.

In the afternoon of the same day, the factory of A. O. Smith, manufacturers of steel products, was visited. However, because a new set-up was being prepared, the plant was not in operation. The A. O. Smith Company's chief product is steel automobile frames.

Professor Roach returned for the party to inspect the Kepner Manufacturing Company, producer of various types of mechanical equipment, including finishers. Another product of this concern is automobile equipment, and it is their belief that 99 per cent of all the cars on the United States market pass a machine of their manufacture.

As a result of this visit, the A. O. Smith Company and the Kepner Manufacturing Company both expressed the desire to continue the friendship that was formed during the trip.

The trip of the two engineers to the various industrial plants was a success, and the engineers are pleased with the visit and the results of the trip.

The trip ended with a visit to the Milwaukee Art Museum, which is a fine example of modern architecture and design.

The engineers look forward to continuing their visits to these industrial plants and to exploring the potential for future cooperation in the automotive industry.

PHY FRATERNITY MEN PREP FOR HEAVY SPORTS HUMOR

Armour's first men are not yet finished stretching the old tomes in preparation for the spring interfraternity sports competition. Last Wednesday the Interfraternity Council met and teams were made for games and matches in golf, tennis, and touch. The interfraternity track meet, which will take place sometime during June, is to be followed by the O'Connell with the support of the track manager, Chad Czajkowski.

Track Meet in Japaneese Week

Last year's track meet, the first ever held entirely of interfraternity event, was won by Tri-

Phi, with 34 points. This year, with many more teams participating, the meet will be more competitive.

Baseball Practice Started

It was decided at the meeting of the Armour Square. The square is the center of the year's baseball activities, and an early start will help the team get off to a good start.

Tuesday was three games, and in each the first two went out without a score. Then we hope that the Batters will keep on track.

Armour's baseball team has made some good practice sessions and is looking forward to the coming season.

Tennis, Golf Teams

Tennis is beginning to boom upon Armour's spring schedule. Already promising matches have been played, and the season is shaping up to be a good one.

Armour's tennis team is looking forward to a successful season.

No you don't have to climb a flagpole as high as Jack's beardsack to find out...

Just walk into any one of the 769,340 places in this country...
