In Spring 2000, Illinois Institute of Technology’s Paul V. Galvin Library received $121,000 in grants from the Library Services and Technology Act through the Illinois State Library. Matching funds came from IIT itself. What should be done with this money? A few brilliant minds suggested to build another computer lab. The outcome of this advice is definitely the flagship of IIT’s computer lab system.

Christopher Stewart, Associate Dean for Library Technology, and Shazib Frahim, the library’s Network Support Specialist, presented and talked about the LLC, Library Learning Center.

"The room is a tremendous success," says Stewart. "It is used every day for library instruction, seminars, workshops, and computer camps. We do not allow the general use as a computer lab or a regular classroom." This makes the LLC more exclusive in terms of use and attention.

After Bob Pietrowski’s ideas, a former instruction room on the ground floor of Galvin Library was resized, remodeled, and redecorated by Thomas Brock, an Adjunct Assistant Professor of Architecture at IIT, into an elegant, multi-functional computer classroom. The design includes state-of-the-art computers, smartboard technology, art by IIT alum Amy Segami, and ergonomic Vectra tables that allow the easy reconfiguration of table arrangements without rewiring the computers.

"Everything in this room is a unique design that is as much about form as it is about function," Stewart explains about the special criteria for its creation. "We didn’t want to create just another box classroom."

A look at the floor suggests emptiness. Frahim: "All cables of the tables are channeled into strands so that the floors are free." The tables feature interconnectivity so that only one plug has to be relocated instead of many computers. A look on the tables reveals newest computer and flat screen technology in order to maintain an efficient amount of space.

The workstations are Compaq Pentium III computers with a collection of software products. The network connection is established over a Dual Pentium III 733 MHz server. "We make sure that the computers work correctly and that the software works correctly on them before classes use them," says Frahim, who provides technical support to the teachers that use the LLC.

The smartboard in front of the class can be used as a computer monitor so the instructor can demonstrate the use of software, add his notes to the screen, and mark important program buttons. Integrated in the smartboard are touch sensors that provide mouse functionality. An overhead projector and a video wall combined with VHS and DVD players complete the list of technology items.

While its main use remains the instruction of IIT students in specialty workshops, the LLC can also be used for conferencing and class lessons involving various media. "The vast majority of library workshops please see FLAGSHIP LABS, page 3
Dealing with Loss
Counselling and Health Services

The events of last Tuesday are likely to cause many difficult emotional reactions. One of these involves coping with loss. Many things are lost for people who, like us on campus, are not the immediate victims. We may have lost some sense of our safety in the world and of taking our daily routines for granted. We have all lost fellow human beings. We also identify with people who have lost people close to them.

People cope with loss through somewhat predictable stages of grief and bereavement. These stages have been described particularly for loss of a loved one. They are more or less the same, however, for many different kinds of loss.

The six typical stages of grieving are: shock, denial, distress and anger, production, disorganization, and, finally, resolution. Although described as stages, they may not all occur for everyone. People who also don't always follow one another neatly—people often go back and forth from one stage to another until they can find ways to cope. A guide for people trying to understand their internal reactions over time.

Shock is the immediate reaction. People may experience bewilderment, a surreal feeling, and numbness. This is the feeling many of us had on Tuesday as we first heard the news and watched coverage on TV. The second stage, disbelief, may follow—that the event could occur and did occur. People wonder, how could this happen? How can this be real?

The stage of grief is strong feelings of anger and anxiety. Anger can be at ourselves, people around us, or on what or who caused the event. Not knowing the cause does not lessen the anger. Intense anger may occur which decreases people's ability to think clearly and make decisions with an appreciation of their consequences. Anger is an uncomfortable feeling and people often try to discharge it through aggressive acts. Through anger people might leap to judgment or want to cause damage themselves through retaliation or revenge. Distress takes other forms as well, including sadness and sorrow and fear. Trouble concentrating and sleeping often occurs. We may be more irritable or withdraw from people. Distress may manifest as physical symptoms as well, such as headaches, stomachaches, tiredness, shortness of breath.

Yearning or searching may be a period of trying to come to terms with what has been lost. We want the damage and destruction to be undone. We want suffering not to have occurred and to have a peaceful and safe world. This can be a difficult time as we may be both preoccupied with the loss, sometimes unconsciously, and restless. We want to do something but may not know what to do. Finding some productive response to the loss can help. This may be one reason why giving blood and donations and volunteering to help in other ways helps people during human tragedies.

The yearning for the past may lead to some disorganization. The events and the loss become more real. Our mind no longer buffers us with delusions and we face the reality of the deaths and other losses that have occurred. The significance of the trauma and tragedy for people immediately involved, for us, and for our world is more real. Memories and thoughts and judgments intrude on us when we want to study or socialize or sleep. The tragedy or loss can feel fresh again and our feelings can be raw. We may be surprised at such a reaction not only days but also weeks or months after the event.

Delayed reactions may not be so obviously tied to the events and we don't recognize the part we play in our emotional occurrences and personal lives—including overreaction to things that may happen to us.

Finally, we come to a resolution. We know that what has happened is very real and cannot be undone. Our strongest emotional reactions of distress and anger have been followed with less intense feelings, but also with a sense of innocence. As the news commentators are saying, the world doesn't feel the same. The event and loss remain with us but are not so much a focus of our attention. We become more fully involved in our usual activities and feel like our lives are returning to normal. Even so, resolution may never be absolutely complete. When things happen to remind us of this event or to make us feel vulnerable again, we may repeat some of the stages without quite knowing why. Part of the process of resolution may involve very personal ways in which people make sense of or find some meaning in what has occurred. We aren't the same as we were before, but from even the worst experiences people can often grow in their understanding and compassion.

GENERAL
TechNews is written, managed, and edited by the students of, and funded in part by, the Illinois Institute of Technology. The material herein does not necessarily reflect the opinions of the Illinois Institute of Technology or the editors, staff, and advisor of TechNews. There will be no censorship of TechNews publication by the faculty or staff of IIT. Sole authorship and responsibility for publication and adherence to the values set forth in this policy rests with the TechNews staff.

This paper seeks to bring together the various segments of the IIT community and serves through balance and content to achieve a position of respect and excellence. TechNews strives for professionalism with our respect to the intellectual values of the university and its community. All material submitted becomes the property of TechNews, and is subject to any editorial decisions deemed necessary.

EDITORIAL POLICY
The editors reserve the right to determine if submitted material meets TechNews' policy and standards. When possible, writers will be contacted concerning any revisions made to their articles. This is only a courtesy, and writers of unsolicited material may not always be consulted. Writers of unsolicited articles will not be paid, even if the material is published.

ANNOUNCEMENTS
The announcement and News section contains all items that TechNews editorials cannot be turned into complete articles, and any announcements that anyone may have. To place anything into this portion of the newspaper, e-mail the News editor(ine) at obriens@cc.iit.edu. While every effort will be made to include every submission, no one can always be accommodated.

LETTERS-TO-THE-EDITOR
Letters-to-the-editor may be submitted by anyone, but are subject to review by the editor-in-chief. All letters-to-the-editor become the property of TechNews once they are submitted. The writer of a letter-to-the-editor must type and sign his name (unless the letter is a fax) and leave a phone number or an e-mail address where he can be contacted, for verification purposes. Letters must not be longer than 500 words. TechNews does not accept or publish anonymous letters.

ADVERTISING
Legalized paid advertising, from within or outside the IIT community, which serve to produce income for the paper, are encouraged. TechNews holds the right to deny any advertisement unsuitable for publication. Rate sheets are available upon request. Ad space is limited and is taken on a first-come, first-served basis. Contact the advertisement manager at TechNewsAds@iit.edu.

SUBMISSION
TechNews is published on the Monday of each week of the academic year. Deadlines for all submissions, announcements, and ads is 5 p.m. on the Wednesday prior to publication. Articles must be submitted electronically in ASCII (text) or Microsoft Word format. Unless otherwise stated, all submissions must be emailed to technews@iit.edu.

LOCATION
The TechNews office is located in the Student Organization Center in Hermann Hall. Address: Illinois Institute of Technology, TechNews, Hermann Hall 3241 South Federal, Chicago, IL 60616. Phone: (312)367-3085. Fax: (312)367-3278. E-mail: technews@iit.edu.
NATIONAL TRAGEDY

Ways to Cope With This National Tragedy

COUNSELING AND HEALTH SERVICES

In the aftermath of the disaster that took place in New York and Washington, it is possible that you may experience a number of reactions to the tragedy. Feelings of anger, sadness and fear, disturbances in sleeping and eating patterns, and problems with concentration are just some of the reactions you may experience. And although these responses may be confusing or painful, they are completely normal. It is expected, and a part of the normal grieving process, that these feelings would arise in the wake of such a tragedy. However, there are many things you can do to help yourself and those around you cope with the sense of loss you may feel. Here are some guidelines that may be useful over the next few weeks:

- Take care of yourself: continue to eat and sleep regularly, and remember to exercise.
- Don’t deny your feelings; whatever feelings this may invoke, it will only help to express them.
- Participate in campus activities; there are a number of events on campus going on to help you process this disaster, attend them; express your feelings and opinions there.
- Keep a journal; it often helps to keep a record of your thoughts and feelings regarding the tragedy.
- Try some relaxation techniques; deep breathing can help lessen feelings of anxiety.
- Connect with your spiritual side; at a time of crisis such as this, many people may find it comforting to turn to their religion for guidance.
- Talk with friends, teachers, and staff: they are here for you.
- Stay in touch with family and friends who are not in the area; sometimes feeling the comfort of home can help.
- Donate blood: if you are feeling especially helpless about the tragedy, this may be a way to feel that you are contributing to the effort.
- Reconnect with life; seek out places around campus and the city that are beautiful, serene, and life affirming.

Remember that the upcoming weeks may be difficult for everyone. If your responses continue for an extended period of time, or if they begin to interfere with your daily life and activities, please come in to the Counseling Center. There are people who can help you deal with the reactions you may be having.

FLAGSHIP COMPUTERS
continued from page 1
are open to everyone," Stewart says, "but they are for targeted audiences, such as kids.

Only those designed for special classes will be closed to the public. After its completion in early 2001, St. James Catholic School was the first group to encounter the room’s benefits in late February. Until September, 95
sessions have been taught to a total of more than thousand attendees.

A wide range of workshops are open to any IIT community member as well as to community members of Chicago’s Near-South Side. This Community Information Support Program is part of the funding’s requirements, and has been well-received by the Chicago community. The library personnel teach classes such as "Online Research" and "Career Research on the Web.”

“We will keep this room open through the most valuable technology,” says Rahim. Stewart adds, “This is an IT creation, from the architects to all the people who gave it input to the art on the walls. We want this to reflect the talents of this university.”

Chicago, Illinois
Terrorist, they are wrong: Don’t let the flame burn out
Attack on the World Trade Center, Pentagon struck core beliefs of America

Ankit Mehta
News Editor

On September 11th 2001, America woke up to an attack on not only its buildings, but on the nation’s most valuable commodity, its freedom. The terrorist attacks in New York, Washington, DC, and Pennsylvania is considered more terrible than Pearl Harbor.

I strongly believe that this attack was the worst America has ever had for it was staged against defenseless civilians and it attacked the spirit of America. The United States is a melting pot of a variety of religions and cultures, that lead to a sense of unity — their love for freedom.

The attack by these terrorists cannot be rationalized on an ethnic, cultural, or political battle; but only against the one thing Americans have in common — the desire to live in freedom.

President Bush stated, “Freedom itself was attacked this morning and I assure you freedom will be defended.” The global community has made a clear statement accepting the attacks on the American people for they understand that this attack was against humanity’s right to freedom. There was a unilateral support by the Security Council of the United Nations in passing a resolution against these attacks.

Secretary of State Colin Powell stated, “The UN Security Council resolution, I think, is an especially effective resolution in that it calls on all states to participate and express the UN Security Council’s determination and its readiness to take all necessary steps to respond to the September 11th attacks in accordance with the UN charter.”

Support was seen through the North American Treaty Organization (NATO). NATO Secretary-General Lord Robertson stated that “An attack on one is an attack on all,” in accordance to NATO Article V. Through this support amongst participants within the global community, it proves once again that the essence of humanity was under fire when the United States was attacked.

The events happened on that dreeded Tuesday morning, a sense of insecurity and panic was widespread throughout all of America. Suddenly the United States that is considered to be untouched by any enemy, had become vulnerable.

However the truth is that everyone in our world is vulnerable to people who are consumed with hate.

Drive by dating: When love gets ugly
Being alone has its advantages and privilages when compared to the alternative

Nicholas Williams
TechNews Writer

By now all of you are aware of the story Johnny is a straight A student and finds himself on the Dean’s List. After the summer, he comes back and transferred to the Calculus class for rocks. What happened, you ask.

Well, if you spent any time reading the title, you would know it was: ‘drive-by-dating’. Don’t get me wrong, I do not mean dating in the sense of thrill or cheapness, but a real attack by life’s sweet poison: love. You fall in love with someone, and then they tell you that they return your feelings, and you get your emotions to grow into something that is not designed to be broken, and BANG, one month later they break up with you.

Drive-by-dating by far causes the most destruction in people today. It happens to everyone.

Look up from the paper. What do you see? People, walking on to their destination in the complex Matrix. But remember, anyone of these can transform into an Agent of Love to hunt you down.

So, I am safe because every time I try to be friends with young ladies, they run away screaming. I dare not speculate what would happen if I wanted to develop a relationship. I did have the luxury of being hunted once, but though I fell in love, the other only claimed to return those emotions. Needless to say, I got scared pretty bad. The point is, how can you prevent yourself from becoming a statistic?

Sucker. Did you really think I could tell you how to avoid drive-by-dating? Where love strikes, you have no weapon to confront against it except hate, and that is the one thing worse than unreturned love.

All you really can do is develop your feelings at an equal degree with the other, and hope they are being honest. Love does miracles for the student, however. If you are serious about your life together, you will work with such passion towards the future. You will always feel motivated, and jet high most of the time.

It can also lead to disasters. You might become distracted from your studies, you might have testing moments in your stress level. And, if you break up, you might not recover. But through the crushing of dreams, new lessons are learned. For example, you have developed your emotions at both ends of the spectrum, and you will understand humanities a lot more. It’s little comfort, but perhaps you will learn from your mistakes and have better luck next time. Just don’t get fooled over.
Surveying Students’ Views on the Budget

Mundit Tandon
Features Writer

Carrying out surveys isn’t a pleasant job. You gotta go up to people while they’re eating, standing in line or doing something useless, and start of with “Hey, I’m with Technews”, and hope that you don’t get smacked. Then there’s the ordeal of repeating the same damn questions fifty times. That’s not even counting the ones who acted as if he couldn’t hear my questions and made me repeat each one of them at least 4 times. Then you go home, count the responses and dread the fact that you have to take probability and statistics next semester.

And that’s not all. People may start avoiding you from the fear of being asked what they think of the color of the grass next to EI, or worse—someone may figure out the polls were rigged! Well, it’s a hard job, but someone’s gotta do it...

This week’s survey aims at revealing the awareness rate amongst the student community. Forty-four random students were asked several questions, and it brought up some fairly interesting answers! 45% of the students had no idea about the budget cuts. Most people knew about the tuition going up. One student actually argued that tuition had come down. One did not know whether the tuition went up or down. Just so they don’t come out looking too stupid, I will add both were Camras full-tuition scholars. 85% of the students said they, or an organization that they are part of would be affected directly by the budget cuts. When the respondents were asked if the “budget down, tuition up” business made sense to them, a majority said it just doesn’t make any sense, some had some interesting explanations. “The one million dollar sorority house!” claims one student. Some attributed this to the campus construction and renovation, while others blamed it on inflation.

What is the deal with the budget cuts?

Ronak Desai
Features Writer

As a freshman at IIT I tried to get involved in a few clubs. I went to an SLC meeting and it seemed as though the only major topic of conversation was the recent budget cuts.

Many major organizations at IIT such as Union Board and the school radio station have been severely impacted. Union Board’s budget was cut by nearly $18,000. The major areas that were hit by the budget cuts were films and homecoming activities. From what I have been able to gather, homecoming at IIT isn’t as exciting as before. One of the mainstays of UB has been its showing of new films. Mark Zachar, president of Union Board, remarked that Alonzo Cane a Spider could be the last new film Union Board shows this year. Many student leaders have debated on how to remedy this grave situation. One possible option is for organizations to turn to outside corporate aid.

With the help of corporate sponsors, the budgets for some of IIT’s largest organizations could possibly restored to normal. However, finding sponsors willing to help has been a difficult task. It seems as though budgets will not be restored in the near future and we students must make due. As Dean Shapiro commented, “we’ve got to do more, with less,” and get by until the budgets are restored.
Restaurant Review: Bandera

The giant sign "Bandera" can be seen from Michigan Avenue, but it doesn't seem like much from the outside, just the second story of a building. But upon entering, a door guard opens the glass doors for you (not that service!). The restaurant itself resembles that of a top-end steak house, with black vinyl booths and dark mahogany wood tables, some at the window, which spans across the entire length of the restaurant, giving a pleasant view of Michigan Avenue. At the waiting area, a giant rotisserie oven flame broils a dozen of Bandera's signature roast chickens, a little pre appetizer to stir up the hunger while you wait.

The menu is petite in size, but the food is colossal in taste. The corn bread is served steaming in an enormous cast iron skillet, with the butter melting on top and tiny bits of jalapeno give it an extra punch. The main courses are Asian dishes, ranging from rotisserie chicken, to prime rib, to barbequed blackened fish. All dishes are served sizzling, hot; portions are thick and juicy, and come with mashed potatoes rich with chives and cream or their special cole-slaw. The menu boasts mostly meat, so vegetarians are left with little choice.

Does the service match up with the atmosphere? Even if it doesn't include the door guard opening the door for you and the live jazz band stirring up the soul, being waited on is still excellent. I am an avid believer that t.i.p.s stands for "to insure prompt service" and I don't like to pay for bad service. The only problem is if you go to Bandera with a party of 5 or more, an 18% tip is already included in the bill, but the staff earns that 18%. Waiters and waitresses are prompt and pleasant, which makes dining much more enjoyable, but just remember that all that joy comes with a price. Expect to pay anywhere from 15 to 30 dollars per person. A little less when the price range for a poor college kid, but not every day you get to enjoy fine dining.

I often wonder if I am the biggest slacker around, but then I look at Chicagoans and see that they are just as bad. The other day I went downtown to go shopping and found that the mall closed at 6:00 pm. I thought, who has a mall a 6:00 pm? The next day I went to another mall and discovered it was open until 7:00 pm. But then I saw, I figured I'd stop by at the food court at 6:00 pm. Also, the food court closed. Again, I thought, how kind of morons close a restaurant at 6:00 pm. What ever happened to dinner? You know the thing where one sits down at a table preferably to enjoy a nice meal, perhaps with some good conversation, and visual stimulation.

I am Lately, I've been thinking that I could really use a laptop. I think that if I had a laptop I could get so much more work done in class. I could sit with my laptop and some headphones and listen to my mp3's. At the same time I could be playing my video games, watching movies, or tweeting a comment so that it plays games and movies faster. If the classroom had Ethernet ports I could also talk on AIM and check my e-mail. Yes, getting a laptop sure would be great. I might even take notes on it in class. Just thinking of all the work I could get done makes me smile.

Top Ten Signs It's Gonna be a Long Year

10. Your physics teacher points to you and says, "Why's that moron here?"
9. You gave the bum on the EL a dollar and he's been following you ever since.
8. You go to the HUB cafeteria on Monday and ask for a taco, but they tell you that taco day is Tuesday. You come back Tuesday asking for a salad, but they tell you salads are on Friday.
7. You come back again on Friday and they just tell you that it's taco day.
6. Your roommate has a bladder problem and won't use the coin loss for the top bunk.
5. Your friends finally realize that you're going to IIT, not IT, and can't stop laughing at you.
4. You tell the lady in the cafeteria "I have a one card and I'd like to get a meal." She replies "Well if you ever do you little turd! Now get in line and grab a spoon so you can catch some of theirs ra: droppings when I throw em at you!"
3. You suddenly realize that you're gonna be playing human Frogger to get to classes for the rest of your college career at IIT.
2. Your roommate read a Harry Potter book on the first day of school and has been trying to cast spells on you with a mechanical pencil ever since.
1. They're playing Berney's hot night out with Betsy in the HUB, but only the movie was about purple dinosaurs instead of what you thought it was gonna be about.

Deep Thoughts by SANDEEP GANGIREDDY

I often wonder why everything on campus has to be so compli cated. It makes me think that somebody up in administration is having a good laugh. At what you may ask? At all the things we have to do just to get around. I imagine them sitting there in a big chair laughing about how people get tick ed down even though they have parking permits. I can just see them playing with models can on a scale model of the school, pushing the cars around saying, "Uh oh, looks like you parked in lot A1 Purple...but you're supposed to be in lot A1 34154 Magenta!!! Guess we'll just write you a ticket...No five tickets...NO WAIT...TEN TICKETS...AHARAHANA." (Roget evil villain laughter here)

People I know seem to be a lot more stressed these days. I think it's because of the many silent battles that people face everyday. Like just the other day I was on the train and this huge guy sat next to me and was taking up some of my seat space. I tried nudging him but he just wouldn't move. For a while I tried psyching him out, and then I tried mugging him to make him move. It was a constant battle for that extra two inches of seat. Finally, I knocked his shopping bag over so that when he bent over to pick it up, I shoved myself into those two inches of seat space and for what really? A bloody two inches...the responsible thing to do would have been to simply ask him to move over. Next time I'll try that and make the choice to break an old habit.
THE SCARLET HAWK SAVES THE DAY!

The fight begins with the Scarlet Hawk delivering the first blow!

But what's this?  Mr. E. is not who he apparently was!  He's disguised himself under the mask and now is Mr. P?!

Fool! How dare you try to find out my true identity!  But it's no use.  I am now Mr. PI.

Nice boxers, Mr. P.

Swoosh!

Heh heh!  I got you now!

Suddenly! When all seems hopeless, our hero delivers a deadly blow!

And ... the final move ...

What on earth?  Scarlet Hawk's secret power move?!  Well, all that matters is that IIT is saved by a new undaunting hero ... the Scarlet Hawk!

Cross-country kicks off season at North Central Invitational

Jackie Johnson
Sports Writer

On September 7, 2001 ITT's cross-country team participated in the North Central College Cross-Country Invitational held in Naperville, Illinois. Sixteen teams gathered to compete in the Friday afternoon race. Although the course was a bit muddy from the previous night's rain and the temperature was in the mid-eighties, both the men and women teams finished strong, starting their season with excellent race times.

Contrary to normal race schedules, the men's race was conducted first. The Illinois Tech men finished the 8K (4.8 miles) course with the following times: Matt Rodriguez - 22:24 min., Hussein Chahiri - 25:03 min., Wendell Holmes - 26:09 min., and Lance Pickens - 26:04 min.

The women's team on this sunny evening finished equally as well, placing them fifteenth as a team for their 5K (3.1 mile) race. The finishing order for the women were: Anya Fiecle - 21:46 min., Jackie Johnson - 23:39 min., Kim Smith - 25:31 min., Lauren Raetz - 25:59 min., Clair Whelan - 26:41 min., Rachel Barnes - 26:59 min., and Neva Wheeler - 28:37 min.
