Telecom Magnate Sam Pitroda visits Illinois Tech

KAPIL JHAPPAH
Submission

On Tuesday, April 26, the Indian Students Association invited Sam Pitroda, Chairman and CEO of Wipro Ltd to speak at Illinois Tech. The objective was to provide insight on the road to becoming an entrepreneur. Pitroda drew huge attention from the students.

The session started on an informal note; Pitroda spoke about his journey from his days of studying Electrical Engineering at Illinois Tech to his present position. Moving on to becoming an executive of various companies during his life, Pitroda had gained a vast knowledge of the telecommunications industry. His commitment and patriotism inclined him to improve the telecommunications industry in India. Risking his career, he decided to leave his comfortable position and return to India to mobilize the industry. Understanding the needs of the country, he met with Indian officials, and in eight months, he came up with a comprehensive plan and set up the CDOT (Center for Development of Telematics), the premier Telecommunications Institute of India. Pitroda then came back to Chicago and continued to work on Indian projects in co-ordination with the United Nations. Later, he started his own company in conjunction with two other partners. This was the beginning of WorldTel, now a leading global Telecommunications Company. He talked about his current activities in the company.

The meeting was then opened to questions from the floor. During the session, Pitroda had kept the students in good humor with constant references to personal experiences he has faced during his life. When asked what he felt was the secret to becoming an entrepreneur, Pitroda attributed various qualities such as motivation, courage, conviction, persistence etc. Having experienced all this in his life, he went on to say, "...there is no substitute to hard work, honesty, or courage..." When asked about the future industries, Pitroda cited industries of Biotech, Information Technology, and Alternative Energy.

Prof. M.L. Sundhi, a Senior Professor at JNU College at Delhi and Ex-Member of Parliament, accompanied Sam Pitroda. Prof. Sundhi, in an informal session, spoke about the current situation in Gujarat and Indian policies and its future.

This 90-minute session had provided several insights on Pitroda’s road towards becoming an entrepreneur. The Indian Students Association at Illinois Tech did a great job in providing young would-be entrepreneurs with such success stories.
Announcement
The Rocket Boys
The Illinois Institute of Technology has a new club, one hell bent on breaching the near reaches of space with rockets of their own design. This new club, led by Daniel Cornellius, is determined to set new amateur rocketry records using the knowledge they have gained here at IIT, as well as knowledge they will gain through reading books and testing new designs. The club has already secured an alumnus donor and Dr. Kevin Meade as an advisor.

When asked how high they expected to go, Mr. Cornellius responded with, “As high as we can go... but I think 10,000 feet sounds like a good place to start.” This club is out to set new records and raise spirits as high as they can fly. The first club meeting will be held before the end of the year to plan out the fall semester as well as plan for any things that need to be accomplished during the summer. Come on out and join IIT’s own Rocket Boys (and girls)!”

Announcement
ITNuts and Bolts
Events of the past year have left many people wondering, “Why?” Why would people be so angry as to fly planes into buildings, killing themselves and thousands of others? Why would a country destroy the lives of thousands of innocent poor people by bombing their villages? Why is their so much conflict in the Middle East? Why do people stand for it?
As the IIT No War: Nuts and Bolts of American Foreign Policy, we would like to extend the challenge of understanding why things happen in this world to the entire IIT community. More than that thought, we would like to invite the members of the IIT community to be more aware of the larger world community which we belong to as well and to encourage dialog and debate about national and international political issues that affect us all. To date we have already discussed the Vietnam War, the War on Terrorism, the state of civil liberties in this country since September 11th, and the Palestinian/Israeli conflict.
Those who question the actions of this country and others around the world, those who feel that there is more to the story than what the mainstream media is telling us, those who feel that people really can make a difference, those who might disagree or agree with us: we invite you to join us in a quest for understanding. We invite you to join us in our weekly discussions on Wednesdays at 6:30 in the Humanities Conference Room and to join us in our email discussions by sending email to ITNutsandBolts-subscribe@topica.com.

GENERAL
TechNews is written, managed, and edited by the students of, and funded in part by, the Illinois Institute of Technology. The material herein does not necessarily reflect the opinions of the Illinois Institute of Technology, its editors, staff, and advisor of TechNews. There will be no censorship of TechNews publication by the faculty or staff of IIT. Sole authority and responsibility for publication and adherence to the values set forth in this policy rests with the TechNews staff. This paper seeks to bring together the various segments of the IIT community and strives through balance and content to achieve a position of respect and excellence. TechNews strives for professionalism with due respect for the intellectual values of the university and its community. All material submitted becomes the property of TechNews, and is subject to any editorial decisions deemed necessary.

EDITORIAL POLICY
The editors reserve the right to determine if submitted material meets TechNews’ policy and standards. When possible, writers will be contacted regarding any revisions made to their articles. This is only a courtesy, and writers of unsolicited material may not always be consulted. Writers of unsolicited articles will not be paid, even if the material is published.

ANNOUNCEMENTS
The Announcements and News Briefs contain all items that TechNews finds cannot be turned into complete articles, and any announcements that anyone may have. To place anything into this portion of the newspaper, e-mail the News Editor at technews@iit.edu. While every effort will be made to include every submission, not everyone can always be accommodated.

LETTERS-TO-THE-EDITOR
Letters-to-the-editor may be submitted by anyone, but are subject to review by the editors-in-chief. All letters-to-the-editor become the property of TechNews once they are submitted. The writer of a letter-to-the-editor must type and sign his name (unless the letter is e-mailed) and leave a phone number or e-mail address where he can be contacted, for verification purposes. Letters must not be longer than 500 words. TechNews does not accept or publish anonymous letters.

ADVERTISING
Legitimate paid advertisements, from within or outside the IIT community, which serve to produce income for the paper, are encouraged. TechNews holds the right to deem any advertisement unsuitable for publication. Rate sheets are available upon request. Ad space is limited and is taken on a first-come, first-serve basis. Contact the advertising manager at technews@iit.edu.

SUBMISSION
TechNews is published on the Monday of each week of the academic year. Deadlines for all submissions, announcements, and ads is 5 p.m. on the Wednesday prior to publication. Articles must be submitted electronically in ASCII (text) or Microsoft Word format. Unless otherwise stated, all submissions must be emailed to technews@iit.edu.

LOCATION
The TechNews office is located in the Student Organization Center in Hermann Hall, IIT. Address: Illinois Institute of Technology, TechNews, Hermann Hall 3241 S. Federal, Chicago, IL 60616. Phone: (312)567-3085 Fax: (312)567-3278. E-mail: technews@iit.edu.
Student Donating blood at the blood drive

Red Cross Blood Drive

JATHURSHAN SIVULOGANATHAN
TechNews Writer

The last blood drive of this semester was organized by the Residence Life Office at the McCormick Lounge on the April 24 between 12pm and 4pm. Overall, there were a total of 44 donors, including two faculty members. Around 34 usable pints of blood was collected, as compared to the 37 collected in the previous blood drive. Each pint is divided into three, thus the amount of blood collected would save nearly 100 lives. It is indeed sad to note that, over the last few semesters, the turn out for the blood drives has been decreasing. The amount of blood collected had dropped from 37 usable pints to 34 just between the last two drives.

This blood drive was very special since it also included a newly added 'Bone Marrow Donation' for the first time in a blood drive at IIT. Ganesh Kalyanaraman had also organized a bone marrow donation sign-up through the American Red Cross. On its initial attempt, it was very encouraging to note that 25 of these students also completed paperwork so that they may be added to the bone marrow database for a possible future donation of marrow. Ganesh Kalyanaraman was able to secure money from finance board in order to cover the costs of this bone marrow donation registration process.

Talking about the blood drive, Debbie Dietz, the charge nurse for the Red Cross team noted, "The volunteers were so helpful and we are all thankful to them. Especially Gwenn (Heyer). She did the best she could to get more students to donate blood, but it is indeed a pity that the numbers show otherwise."

The volunteers for this blood drive were Gwenn Heyer (student coordinator), Vishal Patel, Lyridia Aletrias, Jason Girtley, Indrakith Kuttagolla, Saurabha Bhutnagar, Nethi Sandeep, Mark Bhimayan, Owais Bengali, and Selena Gray. The volunteers worked at the registration desk, as donor-room aides, and in the recovery area.

Although our turnout wasn't as large as other drives, every pint of blood is important. We have some very loyal students and faculty. We can always rely on about 25 people who seem to donate at every IIT blood drive. I hope that getting more first-time donors will be able to boost our numbers in the fall," said Gwenn Heyer, one of the volunteers for this blood drive.

This was the last blood drive of the academic year. The next blood drive on campus will be held in September.

Calendar

Monday April 29th
11:00 a.m. World Music Radio Show
WIIT Radio 88.9 FM

Wednesday May 1st
3:30 p.m. MMAE Seminar:

The following article will come in two sections. This is the first of the two explaining US foreign policy relations with Israel and the Arabs. The second will be how this influences US foreign policy in the region.

Ferrusi AL-FAROQUE
Staff Writer

Israel has been at the center of much attention since the Second [Palestinian] Intifada (Uprising) started. Though the Israeli administration still deny that the intifada started when Ariel Sharon "visited" a Muslim holy site, the Haram al-Sharif (Noble Sanctuary) on September 28 2000; it is considered to be the spark that is the cause of all the violence we see in the holy land today. To an average American, comments on higher lifestyle, watching this whole cycle of violence that haunts the region may seem to be meaningless. "Questions of why are they doing this?" and "Who is wrong and who is right?" might cross their minds every now and then, but it is the question that hits closer to home is probably "What does America have to do with it all?"

To understand that question one needs to analyze the relationship the United States has with the region and especially with Israel.

Dr. Nadav Safra, a former soldier of the Israeli Army and an instructor of Politics and Government at Harvard believes there are five points to describing US-Israel relationship. I have gone through some of them and Safra is the best so far at truly grasping the subject, and so I will be using him as a reference for most of my article.

The first point is the intrinsic relationship between the US and Israel. The US or at least American society has strong, often sympathetic, inclinations towards suppressed and persecuted people. Thus when the horrors of the Holocaust were revealed and Jewish aspirations to create a Jewish nation in Palestine reached a climax, the US naturally tended to support them. According to Dr. Safra, due to strong Jewish propaganda from influential Jews and Zionist in America and due to Israel's Biblical connection, Americans sided with the Jews for the creation of a Jewish nation over the Arab case which it did not support very little to date. Another intrinsic aspect of this relationship is that the US has no direct influence on the Israeli government.

The first point is the intrinsic relationship between the US and Israel. The US or at least American society has strong, often sympathetic inclinations towards suppressed and persecuted people. Thus when the horrors of the Holocaust were revealed and Jewish aspirations to create a Jewish nation in Palestine reached a climax, the US naturally tended to support them. According to Dr. Safra, due to strong Jewish propaganda from influential Jews and Zionists in America and due to Israel's Biblical connection, Americans sided with the Jews for the creation of a Jewish nation over the Arab case which it did not support very little to date. Another intrinsic aspect of this relationship is that the US has no direct influence on the Israeli government.

The second point is the influence of American Jewish lobbies in the US government. Though the American Jewish community has never been a strong lobby, it has been influential in affecting US policy towards Israel. The American Jewish lobby has been able to influence US policy through its large network of American Jewish congressmen and senators who are supportive of Israel, and through its ability to influence American Jewish newspapers and magazines that are supportive of Israel. The American Jewish lobby has also been able to influence US policy through its ability to mobilize American Jewish organizations and groups that are supportive of Israel.

The third point is the influence of American Jewish lobbies in the US government. Though the American Jewish community has never been a strong lobby, it has been influential in affecting US policy towards Israel. The American Jewish lobby has been able to influence US policy through its large network of American Jewish congressmen and senators who are supportive of Israel, and through its ability to influence American Jewish newspapers and magazines that are supportive of Israel. The American Jewish lobby has also been able to influence US policy through its ability to mobilize American Jewish organizations and groups that are supportive of Israel.

The fourth point is the influence of American Jewish lobbies on US foreign policy. Though the American Jewish community has never been a strong lobby, it has been influential in affecting US policy towards Israel. The American Jewish lobby has been able to influence US policy through its large network of American Jewish congressmen and senators who are supportive of Israel, and through its ability to influence American Jewish newspapers and magazines that are supportive of Israel. The American Jewish lobby has also been able to influence US policy through its ability to mobilize American Jewish organizations and groups that are supportive of Israel.

The fifth point is the influence of American Jewish lobbies on US foreign policy. Though the American Jewish community has never been a strong lobby, it has been influential in affecting US policy towards Israel. The American Jewish lobby has been able to influence US policy through its large network of American Jewish congressmen and senators who are supportive of Israel, and through its ability to influence American Jewish newspapers and magazines that are supportive of Israel. The American Jewish lobby has also been able to influence US policy through its ability to mobilize American Jewish organizations and groups that are supportive of Israel.

The sixth point is the influence of American Jewish lobbies on US foreign policy. Though the American Jewish community has never been a strong lobby, it has been influential in affecting US policy towards Israel. The American Jewish lobby has been able to influence US policy through its large network of American Jewish congressmen and senators who are supportive of Israel, and through its ability to influence American Jewish newspapers and magazines that are supportive of Israel. The American Jewish lobby has also been able to influence US policy through its ability to mobilize American Jewish organizations and groups that are supportive of Israel.

The seventh point is the influence of American Jewish lobbies on US foreign policy. Though the American Jewish community has never been a strong lobby, it has been influential in affecting US policy towards Israel. The American Jewish lobby has been able to influence US policy through its large network of American Jewish congressmen and senators who are supportive of Israel, and through its ability to influence American Jewish newspapers and magazines that are supportive of Israel. The American Jewish lobby has also been able to influence US policy through its ability to mobilize American Jewish organizations and groups that are supportive of Israel.

The eighth point is the influence of American Jewish lobbies on US foreign policy. Though the American Jewish community has never been a strong lobby, it has been influential in affecting US policy towards Israel. The American Jewish lobby has been able to influence US policy through its large network of American Jewish congressmen and senators who are supportive of Israel, and through its ability to influence American Jewish newspapers and magazines that are supportive of Israel. The American Jewish lobby has also been able to influence US policy through its ability to mobilize American Jewish organizations and groups that are supportive of Israel.

The ninth point is the influence of American Jewish lobbies on US foreign policy. Though the American Jewish community has never been a strong lobby, it has been influential in affecting US policy towards Israel. The American Jewish lobby has been able to influence US policy through its large network of American Jewish congressmen and senators who are supportive of Israel, and through its ability to influence American Jewish newspapers and magazines that are supportive of Israel. The American Jewish lobby has also been able to influence US policy through its ability to mobilize American Jewish organizations and groups that are supportive of Israel.

The tenth point is the influence of American Jewish lobbies on US foreign policy. Though the American Jewish community has never been a strong lobby, it has been influential in affecting US policy towards Israel. The American Jewish lobby has been able to influence US policy through its large network of American Jewish congressmen and senators who are supportive of Israel, and through its ability to influence American Jewish newspapers and magazines that are supportive of Israel. The American Jewish lobby has also been able to influence US policy through its ability to mobilize American Jewish organizations and groups that are supportive of Israel.

New Season Arrives at IIT: Construction Season

Robert Guice
TechNews Writer

It's April at IIT, and that means two things. Firstly, as has been demonstrated already this month, Chicago's twisted weather will constantly change, most likely every ten minutes. Secondly, another adage will be dusted off and brought out of the closet—If it's warm, it's construction season in Chicago.

While many readers won't be affected by the shifting down of lanes and bridges, I have tried to cover the construction projects that will most affect IIT students, including commuters. As if the Campus Center wasn't enough, the City of Chicago and the State of Illinois have joined forces to try and make your commute to and from IIT a little longer, dustier, and noisier than ever before.

So, in no particular order, here are the major construction projects that will be affecting you in either the spring or fall semesters.

Reconstruction of South Lake Shore Drive (U.S. 41)
Rebuilding of 31st Street Bridge
Drivers using the LSD as an alternate to 59th
Bikers and pedestrians looking to get to the lakefront.

Reconstruction of southbound LSD south of Cermak to 67th Street
Who it affects:
Drivers using the LSD going southbound as an alternate to either the Bishop Ford (I-94) or the Skyway (I-90)
As part of Chicago's South Lake Shore Drive reconstruction project, the 47th Street Bridge was reconstructed last year. This year, the southbound lanes will be completely reconstructed by the end of the year, but that means quite a bit of grief in the meantime. In addition, the 31st street bridge at Lake Shore Drive will be completely destroyed and replaced. Access to Lake Shore Drive will likely be rerouted to either Oakwood (at 3900 south) or Roosevelt, so make sure you have an alternate route available when the time comes. Pedestrians can use the 35th Street overpass to access the lakefront, but it's likely that IIT will be isolated from the lakefront for an extended period of time.

For more information, go to the city's South Lake Shore Drive homepage at http://www.ci.chi.il.us/Transportation/lsd/
New Deck at 33rd Street Bridge over the Dan Ryan (1990/94)
Who it affects:
Anyone living in Bridgeport that wasn't affected by the closing of the 31st Street Bridge

IIT Students wanting to use the 33rd Street Red Line Entrance
While the closing of the 31st Street Bridge did relatively little to IIT students (except completely isolate those living on 31st street from Smart Building), the closing of the 33rd Street Bridge will likely affect anyone who intends to use the Red Line during the fall. Because only the deck will be worked on, the 33rd Street Red Line entrance may be kept open during this time.

For more information, the Illinois Department of Transportation keeps a website at:
http://www.dot.state.il.us/road/ scook.htm
State Street Reconstruction
Reconstruction from Archer to 18th, the bridge over the Stevenson, and from Roosevelt to 11th Street
Who it affects:
IIT Drivers who use State St. as an alternate to the Dan Ryan or Lake Shore Drive going downtown.

This project is starting to wrap up around the bridge, but not so at the bridge itself. The work will be there until FINALS Week, so keep using Michigan until then.
33rd to 34th Street Apartment Construction
Destruction of parking lot at corner of State and 33rd
Construction of new apartments and suites
Who it affects:
Any students living in Bridgeport that were affected by the closing of the 31st Street Bridge

Anyone who currently parks in lot 04, currently a red (faculty and staff) and green (commuter) parking lot.

Set for completion in August of 2003, this 367-bed complex will result in the loss of all parking spaces enclosed by 33rd, 34th and State Streets, and the Green Line tracks. Creeks will be breaking ground in early to mid-May.

The school administration is negotiating with Chicago White Sox officials for IIT use of one of the remote parking lots by the stadium. Access to and from the parking lots will be through an additional stop by the shuttle bus, or an additional shuttle bus specifically for transporting passengers to and from the stadium parking lot.

The Master Plan website for IIT is at http://masterplan.iit.edu.
Now that you know what to expect... Construction season is clearly in full swing, so both on and off campus you should be prepared to inhale dust and learn your way around the side streets of construction zones (or crawl through them).
Now that you know what to expect, hopefully you can plan your commutes around areas under construction and get where you're going faster.

meets thurs @ 9p in the HUB
Founded in March 2001, Triple Process was created in the Chicago area by Derek Glowacki and Namky Lim. Both familiar with Chicago music, these two talented musicians had experiences playing in well-known clubs around the city. Tired of the same old rock n roll scene, they began composing digital music with keyboards, samples, sequencing, and guitars. On the band's website, www.tripleprocess.com, the band claims it wants to make music similar to that made by Portishead, Mr. Bungle and Tortoise, but wants "more pop with more of a rock structure." Now, with drummer Jay D'Agostini, Namky doing the vocals and guitar, and Derek Glowacki in charge of keyboards, samples, and sequencing, the band seems to finally be complete. Triple Process's songs have already been played by well-known radio stations in Chicago: WLUP 88.7 and WZZN 94.7 FM, WZZN even named their EP "Demo of the Week" in March 2002.

The group's music seems to be in a category on its own. The band works with a very wide range of genres, crossing them over. The music itself seems very lively and jazzy, yet distant in vocals, making the songs almost futuristic. Using electronics and guitars with easy going beats, the band has an overall style that can almost be classified as acid jazz and acid pop. The band also seems to be influenced by Radiohead and Anemone. The songs however are not your usual pop songs. They seem to be made more for listening; there are no catchy lyrics and choruses. As a group that experiments with combinations of different genres, they sound very professional.

This relatively new, yet talented new band will be performing live at the BOC here at JIT on May 9 at 11:30PM. Prices for admission will be only $3.00. So go see them perform. If you're interested in Triple Process visit their website at www.tripleprocess.com.
