The regular monthly meeting of the American Bowling Congress was held at 3:30 p.m. on Tuesday, March 27, in the City Club on Illinois Avenue.

The meeting will continue with the discussion of the motion initiated by Mr. J.J. Case, president, which reads: "The motion to change the name of the club to the Chicago Bowling Congress." The motion is open for further discussion and the vote will be taken at the next meeting.

Treasurer's Report

The Treasurer's report for the month of March is as follows:

Opening Balance: $100.00

Receipts:
- Membership Dues: $50.00
- Bowling Tournament Proceeds: $100.00
- Other: $50.00

Total Receipts: $200.00

Expenses:
- Office Supplies: $20.00
- Bowling Equipment: $50.00
- Miscellaneous: $30.00

Total Expenses: $100.00

Closing Balance: $300.00

The report was accepted by unanimous consent.

Next Meeting

The next meeting will be held on April 24 at 3:30 p.m. in the City Club. All members are encouraged to attend.

The President

The President thanked everyone for their participation and looked forward to seeing everyone at the next meeting.

The meeting adjourned at 4:00 p.m.
WHATTABOUT AN "E"?

To the Editor,

I am writing to express my disappointment with the way you presented the annual "E" contest. It was an opportunity for students to showcase their creativity and problem-solving skills, but instead, it seemed like a chore.

Another thing that I noticed was the way the judges evaluated the entries. The criteria for scoring were not clear, and it seemed like the judges were not consistent in their evaluations.

I believe that the contest should be more engaging and creative, and it should provide a platform for students to learn and grow. I suggest that the judges receive training on how to evaluate the entries and that the criteria for scoring be more clearly defined.

Sincerely,

[Student Name]

THE SLIPSTICK

Clown to "The Slipsides," let the Slipstick get its way.

"The Slipstick"

By Charles J. Bledsoe

The Slipstick is a common sight during the spaghetti eating contest. It is a small stick that is used to pick up long spaghetti strands. The stick is usually made from a soft wood, such as pine or birch, and it is typically about 12 inches long. The stick is held by one end and used to pick up the spaghetti strand, which is usually held by the other end. The slippage of the stick makes it difficult to hold, which adds to the suspense of the contest.

Huge Telescope Uses a New Quartz Glass

When the telescope is built, it will be the largest in the world, with a diameter of 100 feet. The telescope will be used for astronomical research, and it will be located on the summit of Mauna Kea, Hawaii. The telescope will be equipped with a new quartz glass lens, which will be 100 feet in diameter. The lens will be made of a special type of quartz, which is able to withstand the heat generated by the telescope.

FRAKTUR NOTES

SIGMA ALPHA MU

Sigma Chapter of Sigma Alpha Mu is a national fraternity for men in the fields of business, education, and government. The chapter is located on campus and is active in both social and professional activities.

ROO DELTA SIGMA

Delta Phi Epsilon is a national sorority for women in the fields of business, education, and government. The chapter is located on campus and is active in both social and professional activities.

Huge Boulder Fellows

For Use in "Talk"

The largest and biggest "star" in the firmament of the world is a gigantic red giant, which is being watched by scientists. The giant is a red star, which is much brighter than the sun. It is located in the constellation of Orion.

STANDING INTO A MODERN WORLD

Quantity production of equipment has long been practiced by the telephone industry. Telephone manufacturers have always been accustomed to mass production, and this has allowed them to produce a large number of units at a low cost. This has enabled them to offer a wide variety of units at a reasonable price.

They shut the door on hybrid systems

They shut the door on hybrid systems, which have been used in the past as a way to reduce costs. However, these systems have been found to be less reliable and more expensive in the long run. They have also been found to be less efficient, which has led to a decrease in the number of units produced.

BELL SYSTEM

A NATIONAL-WIDE SYSTEM OF MORE THAN 10,000 INTER-COMMUNICATIONS TELEPHONES

They shut the door on hybrid systems, which have been used in the past as a way to reduce costs. However, these systems have been found to be less reliable and more expensive in the long run. They have also been found to be less efficient, which has led to a decrease in the number of units produced.
The Legend of the Adonis

Near the legend of the Adonis is the theme of the Adonis, as it is known to the people. It is the story of a hero who was known for his strength and courage. The Adonis is a symbol of power and strength.

The Firebird

Edward J. Mayer

President of the Goodwin Foundation

With the announcement of the new era of the Adonis, the Goodwin Foundation was established. The firebird, a symbol of the Adonis, was chosen as the emblem of the new era. The firebird represents the strength and courage of the Adonis.

The Alumni

Frederick B. Parcell, C.E., R.C., the secretary of the Board of Directors, presented the Alumni with a message of encouragement. He reminded the Alumni of their role as leaders in the community and encouraged them to continue their good work.

Better Tires Is Aim of New Rubber Tests

Rubber is now being tested in a government laboratory under conditions that reproduce the wear and tear the tire will meet when it goes out in the form of tires. The rubber of the United States Bureau of Standards, where the work is being done, is trying to find methods for producing better tires. Samples of rubber are placed in a new type of “rubberometer” machine that warms them down to a certain degree of thickness. The durability of various grades of rubber is determined in this way. The new tests are a radical departure from the old method, by which whole tires were tested against a large metal drum driven by an electric motor.

Students at Armour are divided on the advisability of adopting the new plan, which plows through the machines at the rate of half an inch a minute.

The Boulevard CAFETERIA

31st Street and Mitchell Ave. Dining and Dance Hall to dawn or midnight. No cover charge.
