**The Bee I See**

A bee is a social animal that lives in colonies. The queen bee is the only female that mates and lays eggs. The other females are worker bees, responsible for gathering nectar and pollen, and caring for the young. The male bees, called drones, are only present during mating season. The bee colony is a complex social structure, with a division of labor among its members. The queen bee is the most important member, as she is responsible for the survival of the colony.

**FRATERNOITY NOTES**

**Triangulation**

The concept of triangulation is used in various fields, such as navigation, astronomy, and surveying. It involves finding the position of an object by using the angles to at least three known points. This method is based on the principle that the object is located at some point where the three angles intersect. The classic example is the measurement of the distance to the moon using the angles from three different points on the Earth.

**Phi Kappa Sigma**

The Phi Kappa Sigma chapter at the university was established in 1920. The chapter has a long history of service and philanthropy, and has been involved in various activities, including the sponsorship of a local high school debate team.

*The Shellhaw Concerts*

Presented at Volunteer Hall

One of the newest and most interesting events in the occidental world of music is the series of Shellhaw concerts at Volunteer Hall, and given by the best men of the city.

This series is a unique feature in that it is free to the public, and all the concerts are free to the public. The concerts are in three groups a year, being held in March, August, and November.

The concerts are given by the Volunteer Symphony Orchestra, which is under the direction of Albert Schnittke, who has been conductor of the Volunteer Symphony Orchestra for the past three years.

The orchestra consists of 60 musicians, under the direction of Albert Schnittke, who has been conductor of the Volunteer Symphony Orchestra for the past three years.

One of the features of the series is the continuation of the Volunteer Symphony Orchestra, which has been under the direction of Albert Schnittke for the past three years.

The concerts are held in Volunteer Hall, which has a capacity of 2,000 people. The hall is well equipped with all the latest in acoustical equipment, and the acoustics are excellent.

Students to Get Football Passes

According to a statement received from Dr. J. J. Schwab, students who pay for football passes will be issued to Armour students for the Notre Dame game on November 21st. Professor Schwab will be the official host in this game.

Passes will also be obtained for the season tickets. The price for a season ticket is $5.00.

Three passes will be given out by C. E. H. Golden, president of the Armour Athletic Association.

W. S. E. Holds Novel Smoker for Civilians

The Armour branch of W. S. E. held a novel smoker for civilians held at the Sigma Kappa Delta House last Wednesday evening, November 3.

The $300 worth of cigars were won and lost in a Monte Carlo atmosphere of baccarat, whist, bowls of chance, and stage money. The highest winning ticket was awarded prices corresponding to their bids. At the close of the evening the rest of the time was spent in playing bridge and other card games.

Such prosperity must be preserved. Arthur Weld, Dr. J. J. Schwab, and others were present to see the fun.

The performers became impatient and some were seated in the hall in order to remove the smoke. But again the hall filled up and all the performers were present.

**LETTER-BOX**

To the Letter-Box:

"All the more I see the films I have referred to, the more reason I have for making this protest. It concerns us all politically. It is the present political condition in the present Senate, which is the result of the action of the Buchanan and Freerdom class. People say nothing of the members of the various classes but this letter shows that practically everyone in the country of free or five social transmission. There is no reason for such discrimination except that the people were used after the election of class officers. After looking up the names of the classes I found the only 85 per cent of the students belong to social transmission and their social standing is not just above the average of the whole school. Last year, the social condition was made up mostly of free men, and yet the classes had in main all arrangements about the dances, receiving little help or any from the committees. This shows that all the committees had to do is attend the dances for the classes.

Another thing noted about the list of nominations is that some men will not graduate because they have not enough credits. The question then arises, whether or not they can really be called students. Some men say that those on the committees have been active in school work. This may be true, but for giving a monopsony to the traction men. Most of the traction men have to work, earning their tuition in preference to any other job. They may be free to work as soon as they get out of school, but is given them a chance? There is no doubt that many men.
