ITSA Confab Produces New Views on Problems

Thirty-eight Illinois Tech students and members of the faculty and administration took part in the ITSA fall conference held at George Williams College Camp last weekend. The purpose of the conference is to discuss campus activities and problems and to make recommendations which will be considered in the coming school year. The members of the ITSA Board of Control and person, whom they invite attend the fall conference.

The group arrived by car at the camp on Lake Geneva last Friday and had an organizational meeting in the evening. Early Saturday morning at the breakfast meeting, Richard Gregory, ITSA president, divided the group according to the individual's campus experiences. Those categories, groups, were assigned specific topics to be discussed for the rest of the morning and the afternoon.

The advent of the new student union was one of the major topics discussed. It was recommended that exhibits, contests, movies, and fine arts centers be planned for the new union, and a manager of the physical plant be appointed.

Rerorganized of the present ITSA Board was discussed and it was recommended that a coordinator of student activities be appointed.

One of the most important recommendations was that the Board appoint a new student union chairman as a voting member of the ITSA Board. Three subcommittees would be appointed to assist him.

Other suggestions included a fall picnic sponsored by the registrar, and the continuation of the fall sports league later hours for parties on campus.

Name New Members Of Tech News Staff

Bill Siekle, physics 2, has been appointed to the position of feature editor of Technology News for the fall semester by editor-in-chief Dale McDannell. Siekle is a top writer on the feature staff last semester, and authored the column "It", which is a continuation of the column "It" in the spring semester's paper.

Announce Cole New Counselor

Dr. Amim A. Cole was recently appointed by Illinois Tech to the post of admissions counselor for the east coast area. He will travel in an area extending from Boston to Washington, D.C., visiting high school counselors and interviewing prospective students.

Dr. Cole has been engaged in college admissions work for the past six years.

Illinois Tech Prepares For Annual Visitors

Illinois Institute of Technology's annual Visitors' Day will be held from 1 to 5 p.m., October 15.

Visitors who wish to attend after the departmental open houses or any of the special panel discussions are requested to register in the lobby of the Metallurgical and Chemical Engineering building, 10 W. Thirty-third Street, upon their arrival at the campus. Tickets for the guided tour of Armour Research Foundation's computer and research buildings may be obtained in Crown Hall.

There will be free parking in the area east of State Street between Thirty-second and Thirty-fifth streets.

Popular Photography Awards Integral One of 5 Special Photography Awards

Integral, Illinois Tech's yearbook, was selected for one of five special awards in a national competition conducted by Popular Photography magazine. Bruce Downes, Popular Photography Editor, in his letter of congratulations said, "I believe that your work in this book is very strong, and I think it is an excellent example of what a student group can do with a limited budget."

Barbara Reubel was editor-in-chief of the award winning issue. She was elected student of the year and was selected for "Who's Who in American Colleges and Universities."

The greatest portion of the book's photography work was done by photo editor Dave Davis, currently a seventh semester ID.

The jury who made the choice consisted of Jacob Dolch, former editor of the New York Times: Bruce Mayer, assistant in the director of photography: Museum of Modern Art David D. Mica, editorial director of Look; and John Nightingale, executive editor of Magnum Photos Inc.

The award, in the form of a trophy, will be placed in the Integral office.

Reduce Price of Concert

Tickets for Ahmad Jamal

Ahmad Jamal, American jazz artist, will appear in the Student Union auditorium at 8 p.m., Friday, October 14. Contrary to the previous announcement, price of tickets will remain the same.

Apply Now For Treasury Post

Letters of application for the post of sophomore class treasurer are now being accepted to fill the position left open by the departure of John Brom. Applications should be put into the mailbox of the Class of 1965 in the Student Union. They are to include the applicant's name, major, semester, grade point average, other campus offices, other campus activities, and qualifications.
Letters to the Editor

Reader Charges Misuse Of 'Freedom of the Press'

Dear Mr. Editor:

It is my opinion that last week's editorial abused the right of freedom of the press. Whether or not you agree with Mr. Golden's comments, if you are going to present an argument, you should at least address your comments fairly to the arguments introduced in the letter.

Closed Weekends Create Burden

Disputing comments have been flying thick and fast. This is, however, to the main objections to the student groups on the ACSA social calendar, as well (according to the same) the flimsy reasons for closing them.

It would seem, however, that the main objection to the schedule on the part of campus social groups (e.g., fraternities) lies in the spacing of the closed weekends rather than in their number.

The example most often cited is the fact that the APC carnival has been scheduled for October 29, thus clearing the way for all other social events the weekend preceding Halloween. Also, the Toy Harvest and the Integral Ball are to be held on the weekends preceding the Thanksgiving holidays. To the best of our knowledge, the Toy Harvest (Fri., October 11) closes the entire weekend, the I-Ball definitely does. The Homecoming dance, furthermore, closes the weekend before the Christmas holidays.

Better planning is apparently in order.

See Relocation of Farmers As Solution to Problems

"The farmer’s problems will not be solved until we get rid of the farmers..." Such was President Nixon’s total approach. The farmers were heard by millions across the country last Monday night. We suspect that both Mr. Nixon and Vice-President Spiro Agnew would share almost the same sentiments were one able to get them into a bull session at the House.

For such is the farm problem stripped of all the administration and sometimes over-intellectualized trappings. As soon as the farmers have found farms to rent, they调剂

What Responsibilities Do College Editors Have to the Students?

Without a doubt, the primary function of any newspaper is to supply its reading audience with as complete a picture as possible of pertinent and interesting news. As this picture is presented, care must be taken not to color or otherwise opine the information; this is the responsibility of the editor to his audience. At least 80 percent of any newspaper you care to devote to this purpose.

Traditionally, the remaining 20 percent is devoted to the editor’s and his colleague’s views or opinions on matters which they consider worthy of evaluation. In expressing opinions through editorials the editors have to accomplish on two-fold purpose: 1) to present the facts and circumstances of the situation and 2) to attempt to persuade the reader to analyze the problem in a similar manner and draw conclusions that are similar to those drawn by the editor.

Now it seems to become a question of: What means of persuasion are to be considered as critical? Within the bounds of good journalistic practice, I question that all means are not utilized. The editor must consider all students have the tools of proper evaluation and judgement. He has a responsibility to write what he firmly believes to be right, and in an attempt to convey this conviction to others.

Some readers will think he is shallow, some will think his approach to be wrong, some will brand his views those whose views are opposite. Let us hope that this conviction will be genuine, that the editor has not been misled, and that many gain, no one loses.

Apply Now For Danforth Graduate Study Grants

Eastman Kodak Company has announced a direct grant of $1,800 to Illinois Institute of Technology. This grant is part of Kodak's mid-education program which this year amounts to more than $400,000.

IIT Receives NSF Grant For New Math Program

Illinois Institute of Technology is the recipient of a $55,000 grant from the National Science Foundation for the purpose of supporting an in-service Institute of Mathematics.

The Institute, largest of its kind in the nation, is designed to raise the levels of science and mathematics teaching in the junior and senior high schools, increase teacher competence, and provide an opportunity for teachers to raise their level of qualification. Total enrollment in the program is expected to be 50 junior and senior high school teachers from the Chicago area.

Having begun last Saturday, the program will run for nine months. The courses in mathematics, physics, and chemistry will all be on the graduate level.

"His Royal Hipness' Lends Translations From Lincoln and Poe to 'Hipsville'

by Bill Nelson

in Lord Buckley's remixed solo. The "Lord' part was a stage title chosen for effect by an expressionist philosophy relating divine nobility of soul to a universal love gift which he feels in the people of the world one to another.

Happy New, the Hinder

His fame, however, derives from his 'Hipness' portion of Miller's title. The man has a way with hip phrases, in his hip sensibility, William Shakespeare is Wally the Shake (because he shook everybody). "French, Italian, countryman, lend me your ears," becomes "Hipsters, ripples, and finger-popping daddies, knock me your lobes." James of Niswether is the Nazis and the cripple whom He bands is "the buddy with a bent frame" to whom He commands.

"Straighten" and he was sware. "Spill!" says Poe.

Similarly Lincoln... that all men were created equal and that they were endowed by their Creator... transforms into Lucky Linky... that all cats and kittens... were created equal, in front, the last two words meaning what it was before it was counted. The pasting, raven of Poe's poem in 'The Bughole' and "Take thy beak from out my heart, and take thy form from off my door" is appropriated by "Spill!"

Such translations may not necessarily be an improvement over the original but might be viewed as an effort to broaden the audience for versatile pearls of the English language. Buckley calls that high school teachers. See Ya, page 5.

Woodrow Wilson Fund Offers 1000 Grants

The Woodrow Wilson National Fellowship Foundation is offering 1000 fellowships to be used toward the first year of graduate work. The purpose of these fellowships is to encourage promising men and women to consider careers in college teaching. The Foundation primarily supports candidates in the humanities and social sciences.

To be eligible for nomination, less than one year's graduate credit should be accumulated by the fall of 1965.

Any member of the academic profession may nominate candidates by sending the name, address, and college of the candidate to Professor J. Lyndon Shanely, Princeton Hall, Northwestern University, Evanston, Illinois. Nominations should be made no later than October 31.

AIEE To Meet Next Tuesday

Industrial engineering students are invited to the first meeting of the American Institute of Industrial Engineers on Tuesday at 7:30 p.m. in room 120, Economics and Mechanics Building, before the meeting. All industrial engineering students are invited.

What Do You Want To Do?

by MIch Stoklos

Up and Coming

Even though modern electronic computers work at almost unbelievable speeds, the scientist is way ahead of them.

Put simply, scientists have been thinking up complex problems faster than even the fastest computers could handle them. To close this gap, IBM created STRETCH, the world's fastest, most powerful computer. The first STRETCH system will go to the AEC at Los Alamos to aid in nuclear reactor design. This goliath can do a million additions or subtractions a second. It can "remember" 49,000,000,000 characters per minute from magnetic tape. It can print the equivalent of three good-sized novels every hour. It can perform all these operations simultaneously. It is necessary to pause midway in the problem and tackle a more important one.

Creating such tools and putting them to work for science—or for business, industry, or government—is exciting, important work. It calls for talents and skills of every kind, from liberal arts to Boolean algebra to astrophysics.

So whatever your particular talents and skills, there may be just the kind of job at IBM you've always wanted. The IBM representative will be visiting your campus this year. Why not ask him about it? Your placement office can make him welcome. For further information about opportunities at IBM, write, outlining your background and interests, to:

Again Awards

Grant to Tech

The Illinois Bell Telephone company has presented Illinois Tech with an unrestricted $5,000 grant. This is the fifth year that such a grant has been given to Illinois Tech.

In presenting the grant, Mr. M. A. Corbitt, district commercial manager, said, "We know that the Illinois Institute of Technology is making good use of aid which brings comfort directly to our service, and we are pleased to be counted among its benefactors."

Offer Non-Credit Marketing Course

A new non-credit course, entitled ‘Vital Marketing—Mass Marketing for a Mass Production Economy,’ designed to acquaint the businessman with advances in the marketing of products, is being offered this fall by the Institute of Design.

The course, which meets Monday night from 7 to 9:30 p.m. and every other Saturday from 9 a.m. to 12 noon and 1 to 4 p.m., will consider the means necessary to sell the consumer. Registration may be made by contacting Jay Dobrinsky.

Maatman Gives

New FPE Night School Program

Illinois Institute of Technology has devised a new evening division program, “Fundamentals of Fire Protection,” to meet the needs of Chicagoans who perform fire prevention duties.

The courses in the program are designed to give municipal fire department administration, industrial fire prevention officers, and fire insurance personnel, a basic science and engineering background.

The fire protection program is conducted under the supervision of Gerald L. Maatman.

IT’S RIGHT ON TOP

THE NEW ESTERBROOK “101”

Tally! Tally! Step right up and see the marvel of the age... the new Esterbrook “101!” A different type of cartridge pen it carries 2 cartridges in the barrel—one is a spare... so there’s no need to run out of ink.

The new Esterbrook “101” performs more tricks than a trained seal. Change pen points as quickly as you can change your mind. Give you a choice of 22 pen points.

Smartly styled, smooth-writing, the Esterbrook “101” is creating a 3-ring circus of excitement... you’ll see why at your Esterbrook dealer’s.

Do it up big—top everything with the pen that has everything... the Esterbrook “101.” Bester Point Fountain pen.

5 colors, available in seconds—ill, tool $1.95.

Esterbrook Pens

The St. Louis Story

St. Louis, Ill., Sept. 17—Esterbrook, Inc., leading manufacturer of fine writing instruments, announced that it has begun production of a new fountain pen, the “101.” This pen is designed for the businessman who needs a pen that is both practical and stylish.

The “101” features a unique nib structure that allows for easy cleaning and quick-drying ink flow. The pen comes in 5 colors and is available in both ballpoint and fountain versions.

Esterbrook also introduced a new line of rollerball pens, the “2000,” which offers a smooth writing experience with minimal mess. These pens are available in 8 colors and come with a lifetime guarantee.

The company has also expanded its line of erasable pens with the introduction of the “4000,” which combines the convenience of erasable ink with the smooth writing of a traditional pen.

These new products come as part of Esterbrook’s ongoing commitment to innovation and quality. The company continues to lead the industry in developing cutting-edge pen designs that meet the needs of modern consumers.

In addition to its new products, Esterbrook also announced that it will be expanding its distribution network to reach even more customers across the country.

Esterbrook expects the “101” and other new offerings to be popular with consumers looking for high-quality writing instruments at reasonable prices.

About Esterbrook

Esterbrook, Inc., founded in 1914, is a leading manufacturer of fine writing instruments and accessories. The company is known for its high-quality products and commitment to innovation and customer satisfaction. Esterbrook has a strong presence in the United States and exports its products to more than 50 countries around the world.

Esterbrook is headquartered in St. Louis, Missouri, and operates several production facilities across the country.

For more information about Esterbrook and its products, please visit www.esterbrook.com.
I-F Season Starts: First Game Tuesday

Inter-district football will begin Tuesday, October 4 with the defending champion Phi Kaps meeting Sigma Phi Epsilon. The Phi Kaps lost Bill Bannister and Wali Kohlman from last year's excelled team. Leading the Sig Eps will be quarterback Dick Haddadon.

Opening the season in league II will be Alpha Sigma Phi with Maury Andaya and Nick Manley returning. They will meet Theta Xi, led by Norm Sider. Games will be played at Sonny's Acres and Armour Square.

The top three teams in each league will meet to determine the I-F champion.

IF Schedule

League I
Phi Epsilon Phis
Sigma Nu Knights
Phi Delta Theta
Delta Chi Frs.

League II
Alpha Sigma Phi
Theta Xi
Kappa Sigma
Phi Sigma Pi

ARF Organizes First Beginners Fencing Class

Fencing practice will start at 6 p.m. Wednesday night in the gym. Both group and private instruction will be given every Wednesday evening from 6 to 8 p.m. These lessons are given by members of the Armour Research Foundation fencing team. Private lessons for beginners started on September 21. Group instruction will cost approximately $10 for 10 weekly lessons. These practice sessions will be under the direction of R. Apple, the fencing master.

Find Gonzales In Florida Exile

Last year's swimming coach, Bruce Gonzales has been found in Havana, Florida, with the swimming team's schedule. A new swimming coach will be appointed soon.

Boxing Figure Dedicates Book To 'Sonny' Weissman

Tech's Athletic Director Bernard Weissman was recently honored by the dedication of a book to him. Frank Gillmer dedicated his book, "How to Judge Boxing," to "Sonny" and several other prominent figures in the world of boxing. Gillner is chairman of the Illinois State Athletic Commission and chairman of the Public Relations Committee of the National Boxing Association. He was a well-known referee and boxing judge, coach, and referee.

"Sonny" has been a prominent figure in Midwest boxing for the past 20 years. Weissman refereed the Kid Galavan-Boxo Olsen championship fight in 1944.

Glancy Plans Cage Tryouts

There will be a meeting of all those interested in playing on the varsity basketball team at 10:30 a.m., October 10, in the gym. All those who are scholastically eligible (have averages above 1.25) are encouraged to go out for the team. Coach Ed Glancy hopes to see a large turnout, especially from the freshman class. He hopes to improve upon last year's "fair" season.

Placement Schedule

Tuesday, October 4
1. H. S. Smith Corporation
   Alexandria, Virginia
2. L. D. Smith Corporation
   Alexandria, Virginia
   Wednesday, October 5
3. General American Transit Company
   Alexandria, Virginia
   Thursday, October 6
4. United States Department of Agriculture
   Washington, D.C.
   Friday, October 7
5. U.S. Navy Personnel
   Alexandria, Virginia

"I ENGINEERED MICROWAVE TOWER LOCATIONS
ON MY FIRST ASSIGNMENT"

When Bill Pigott knocked on the door of Pacific Telephone, he had two big assets. One was an electrical engineering degree from Seattle University. The other was a craving to jump right into vital engineering problems.

It was not long before Bill was exploring Washington's rugged Cascade Range in a helicopter to find sites for microwave relay towers — part of a multimillion dollar telephone construction job. Today, it's considerable satisfaction to him to see these towers spanning the mountains, knowing that his planning helped put them there.

Other important assignments followed: engineering marine radio systems, SAGE systems—figuring engineering costs for Air Force Titan missile bases.

"Our people respect a man's engineering training—you really get a chance to show what you're worth on the ball," Bill says. "I was up to my neck in tough engineering problems right from the start."

If you want a job where you put your training to work from the day you hang up your hat—you'll want to visit your Placement Office for further information.

Telephone engineer Bill Pigott, left, and helicopter pilot plan aerial exploration for microwave tower sites.

"Our number one aim is to have in all management jobs the most vital, intelligent, positive and imaginative men we can possibly find."

—William S. Knapp, President

Bell Telephone Companies
Bowling Team Joins New Intercollegiate League

The conference will be set up on a round-robin basis. Each team will play every other team in Midwest Inter-Collegiate Bowling Conferences. St. Joseph's College, Valparaiso University, and Notre Dame University are the other members of the new conference. The conference will be set up on a round-robin basis. Each team will play every other team in the league twice. All matches will be held on a home and home basis. Tech's home matches will be played on the campus's bowling alley.

Practice sessions will begin Monday, October 3. Each team manager will hold six games per week, before conference play begins. Conference play will begin early in November. Any full-time student of Illinois Tech above freshman standing is eligible for varsity competition.

Prospects look pretty good for this year's team. Ron Tengersen, Dave Moore, John Rodiek, and Captain A1 Groth, members of last year's squad, will all return. Groth led last year's team with an average of 158. Anyone interested in bowling on this year's team should contact A1 Groth at W5-5444. Interested persons may also contact Lieutenant Kenneth Breyer, bowling coach, at Extension 557.

I M Officials Are Needed

The intramural touch football season is underway. Referees for these games are badly needed and all those who have the time and the ability are urged to apply. Referees will be paid $1.50 for each game officiated.

All football games will be played on Mondays and Thursdays during the free period, so they will not interfere with classes. All those interested may notify intramural director Ed Coven. There will be a meeting of all those interested in being refereed at 12:30 p.m. today in the gym.

Harriers Begin 3rd Season: Hope For Better Record

On Montrose beach next Saturday at 11 a.m., Tech's cross-country team will run against not only the Veloce team but also the U of I at the Illini team in the opening dual meet of the season. Last season the Illini fielded a strong team and won. This year, however, the looks of their potential, they are expected not to lose any of their strength. With Veloce, also perennially strong team, the Tech team enter the contest as the favorites.

Eight men, led by returning internationals Ollie, Hollinger, and Lassnon, are expected to do the running, but the leading runner will be Lynn Johnson, a freshman who was captain of his team at Thornton High School last year. While eight men are ample to run cross country, Coach Connors feels there is a definite need for one more strong runner. As yet this prospect has not shown up but Connors has hopes of seeing a few more good runners show up at the practice meet. However, a much stronger team is not expected than last year's, or the previous year's team. With a sport as this, there is little reason to expect a better season than the previous year's. Last year's numbers are returning than ever before.
