Lipp Names Spring Staff Positions for Tech News

Appointments to the staff of Tech News for the Spring semester have been announced by the Spring Editor-in-chief, Ronald Lipp. The positions are effective at the end of the present semester. Heading the editorial staff is senior associate editor, David Speth. Speth is currently an editorial consultant on the newspaper.

Melynn Sklava will be the third in command as junior associate editor. Sklava's duties will include those of features editor, his present position. Both Speth and Sklava will serve with Lipp on the editorial board of Tech News.

Howard Hemer and Oskar Dmytrotzko will hold the positions of copy editor and assistant copy editor, respectively. Their duties will include editing of copy and gallery in maintain unified journalistic standards and Tech News style. Both Hemer and Dmytrotzko are present members of the newspaper staff.

John Dorf will continue as news editor, a position which he has filled since mid-November. Sports editor is the position which he has been assigned to since January. However, according to Lipp the post will be filled shortly. George Hanover, currently serving as copy editor, will move to the helm of the position of editor unserer.

Next spring's editorial cartouche will be Steve Haras.

Hawaiian Center Offers Grants for Asian Study

Scholarships to the East-West Center at the University of Hawaii, are available to American students. The center is offering 100 scholarships for graduate study in fields relating to Asia and the Pacific Islands, including field research and on study in Asia. The grant is for 21 months and includes round-trip transportation to Hawaii, room, board, books, tuition, and incidental personal allowances, and health insurance. To be qualified, applicants must also include a study grant at an Asian University for a period of 6 to 12 months. Eligibility is based upon academic achievements, health ability to "relate" to Asians, and interest in contributing to the objectives of the Center. Candidates must commit themselves to a concentration in some major aspect of the Asian and Pacific fields. Each student must study an Asian language, choosing from Chinese, Hindi, Indonesian, Japanese, Korean, Tajik, Thai, and Sanskrit.

Appointments to Union Board Positions; Officer Selections to Be Made Soon

Appointments to the executive committee of Union Board were made last Saturday. Appointments were made to the offices of president, vice-president, secretary, and treasurer. The new officers are: Robert Lipp, President; Charles H. Young, Vice-President; John E. Dorf, Secretary; and John E. Dorf, Treasurer.

Among those appointed to the executive committee of the CU are Mike Doonan, George Levinson, John Dorf, John Doer, and Carter Eckert. Appointments have been made to the offices of executive chairman for at least one year.

ITSA to Conduct Board of Control Elections Tomorrow and Friday

Election of freshmen officers and ITSA representatives will be held tomorrow and Friday from 11 a.m. to 2 p.m. The polling booths will be located in the usual places, near the northeast entrance of the Engineering building.

ITSA offices to be decided by this election include such types of representatives, coming from the engineering division, arch-lud, and liberal studies, and the assistant ITSA treasurer. In addition to divisional representatives, the position of independent dean is included in the election. Also on the ballot is the board of freshmen officers, president, vice-president, secretary, treasurer, and social chairman.

Pictures and campaign speeches of the candidates appear on pages 3 and 4 of this issue of Tech News.

According to Edward Turk, chairman of the Board of Control, nine persons are running for the offices of ITSA representatives this year, as opposed to ten last year.

ITSA received a proposal to place voting booths in McCormick Lounge and in the fraternity quadrangle. Edward Turk commented that technical complications arise in having several polling places, therefore, there will be only one voting place. He hopes that this will not prevent anyone from voting.

Only full time student are eligible to vote. No one may vote without their student identification card. Statistics from past elections reveal that last fall 32 percent voted and last year, only 12 percent voted in the Arch-ID race.

Hawaii College Appoints Nelson to High Post

Robert E. Nelson, Illinois Tech Vice President for Institutional Development and Public Relations, has recently been elected to the Board of Trustees of Iowa Wesleyan College. The college is located Mt. Pleasant, Iowa.

Nelson graduated from Northwestern University in 1949. At that time, he was appointed vice-president and director of public relations for Iowa Wesleyan. In 1953, he was appointed vice-chancellor of the University of Kansas City.

In 1961, Nelson accepted an appointment to his present position at Illinois Tech. He is also a member of the board of trustees of the American College Public Relations Association.

Voters Pass Referendum By Overwhelming Margin

Less than ten per cent of the student body decided the fate of the two proposals on the ITSA referendum held December 14. An overwhelming majority of this group voted in favor of both proposals.

The first proposal designated the position of President for the election of the fall semester. The second proposal designated the position of Secretary for the election of the fall semester. Of the 181 votes counted, the amendment passed 100 affirmative.

The ballot consisted of the purpose of the voting, to allow the president of ITSA to vote and to allow the president of ITSA to vote. The amendment received 100 affirmative votes.

The ballot was voted upon by the full student body. The amendment was adopted by the full student body. The amendment received 100 affirmative votes.

The amendment was adopted by the full student body. The amendment received 100 affirmative votes.

Due to final examinations this will be the last issue of the semester. The next issue of Tech News will appear on Friday, February 8 at the end of Finals.

All organizations wishing announcements or news about their activities should send their announcements to the Orientation Week issue must submit copy by Monday, February 6.

The copy should be turned into the Tech News office at 241 S. Wabash, Chicago, Illinois. Type-written copy is preferred.

Letters to the Editor

Dear George:

Black Knight is proud to announce the graduation of the following of its members:

Philip G. Coburnes
Lauren E. Hilliard
Dale P. Rolfson
Harold V. Scotland
Sincerely yours,
Secretary of Black Knight

Dear George:

Since it is a matter regarded by some as rather important it is good to see the problem of the danger of nuclear war receiving some space in the Tech News, as evidenced by your December 7 story about the meeting sponsored by the Federation of Artists of Great Britain. In your story, however, the concept of first and second strike capabilities are rather garbled, and I would like to clarify that point because it is important to evaluate the nuclear direction the world is taking. A first strike capability (massive deterrence) is the ability to saturate the adversary's offensive facilities. For this purpose you do not need missiles that are "hard" (to knock out), but they should be secure and there must be a large number of them. A second strike capability is the ability to retaliate, preferably against cities. Therefore, a country with a second strike only (limited deterrence) policy will not have a nuclear war, but those that it has that will be "hard"—for example, because they are underground, or are in underground bunkers, and therefore hard to find. It will also be possible to fire these missiles down short notice, thereby lessening the tendency to pro-empt in case of suspicious activity in an enemy country.

Hans Bethke, who headed Kennedy's commission to test a new nuclear test ban treaty, recalled that a few hundred "hard" missiles would be sufficient to provide the United States with a satisfactory second strike capability.

George S. Stanford
Reactor Engineering Division

Dear George:

It seems to me that the new library, fine as it is, lacks a very important facility that the old library had. This facility, of which I speak, is the means by which overnight and other reserved books could be returned when the library itself was not open. Since these books are due in the library at 10 am and classes start at 8 am, and further, the library does not open until 8:30 am a bit of a problem arises for those students with classes from 8 to 10 am.

The old Illinois Tech Library had a slot in its door to solve this problem. Although such a slot is not feasible with the glass doors of the new John Crear Library, other possibilities exist to solve the dilemma.

Two such possibilities are:

1. to replace one or both of the end glass doors with an aluminum door with a slot similar to the mail slot found on many office building doors, or
2. an actual engraving into a glass door which would be rendered immoveable by firing it to either the ground or building and which would allow books to be placed into it but not taken out, except by use of a lock and key.

Hopefully,
John G. Cutts, Jr.

Editor Reviews Staff, Cites Term's Progress

Ladies and gentlemen, the staff of Tech News:

Joe Love and Ron Lipp both of whom were printed by official sources.

Your other accomplishments for the which the staff was wholly or partly responsible. For example, this volume of Tech News was one of the largest in the history of the school. (some 123 pages) due to a hard working news and features staff, and an entreprise business staff who supplied the money for the staff's $4,000 in the first quarter.

I would like to thank them all for the fine job they did this last semester. But what did they do?

The first item of note was their coverage of Fall Conference. The Editorial Manager was in on almost all the planning at the Conference. Med Sivertson, David Sperl, and Bard Hardi came back to publish a special fall conference mailing list on all the pertinent topic which were discussed at the conference.

Second on the list were the crusades in which the staff participated. We pointed out some difficulties, with Homecoming which, I hope, will help make next year's affair even better. We tried to spark some life into that basement study room (also the Rec) I think we were responsible for some of the forthcoming improvements in that room.

The sports staff went on a crusade of its own and, as a result, the painting of the gym during class time was stopped.

Third, I might mention the hassle with our worthy opponents at the U of C. Here, again the Editorial Manager came through and I

Future Prospects Create Need for Concerned Voters

ITSA elections are here once more. Tomorrow and Friday, the fate of the current crop of political hopefuls will be decided by an enlightened electorate (we hope).

The present election is especially significant for the student body. As usual, the election will bring a scale turnover in the membership of the Board of Control. This in itself is an opportunity for the voters to make themselves heard.

But even more important is the unique position which the Student Association is in. It has become evident since the last fall conference that the Board of Control and others active in campus organizations have been making a greater effort to meet future needs than has been true in past years.

The newly revived Homecoming, the continuation of a high level of the Interfraternity Open House, and efforts of other groups point to a new vigor in student affairs. Efforts of the Board of Control to coordinate their fiscal planning with that of the University are encouraging.

With such promising prospects for the future, one would naturally suppose that voters turn out in overwhelming numbers to express their wishes in the ballot box. There probably is nothing quite as persuasive to the politician as a group of voters determined to make their will felt. But while we can hope for a massive turnout, all past elections point in the other direction.

In the fall elections held in December, 1961, only 32 percent of the electorate cast ballots. As usual Tech News gave extensive election coverage prior to the elections.

ITSA Must Seek Experienced, Able Members for Pub Board

At the first meeting of ITSA next semester, the Board of Control has the duty of selecting three members of the Publications Board. Last fall in a proposal submitted by Pub Board, a number of changes were made in the relationship of ITSA to Pub Board; these changes have made the members of Pub Board more directly concerned with publications of Tech's campus.

With this in mind we feel that it is important to select students who are more concerned with and more knowledgeable in the field of publications; for without improving the qualifications of membership on Pub Board, the changes in relationship and responsibility will be worth less than the paper on which they were originally proposed.

We would like to see as part of the required qualifications one past member's membership on one of Tech's publications or on the staff of WITI. The reasons for this should be obvious; one could not expect to make intelligent decisions regarding budgets and policies without having had first hand experience on one of the staffs.

Pub Board has required that one of its members be associated with one of the publications or with WITI to better report to the other members of Pub Board on what the staffs are doing.

This, however, only meets the problem half-way. Pub Board might make use of the past editors of publications in an advisory capacity on the board. It seems a shame to waste the experience that these students have gained. These are things that they might do.

It does, however, seem logical to expect better people to apply for membership on a Board which has been giving such increased responsibilities, and this is where ITSA has the responsibility. We have had several opportunities to attend the ITSA meetings, at which the appointments are made, and the general nature of the questions asked by the members of the Board of Control has been extremely sharp.

The members of ITSA should take time out to find out about the problems that the publications might have; they might, also, ask if the applicants have any knowledge of WITI. This has been being time problem because no one on Pub Board or ITSA has any experience in the area of radio transmission.

We hope that the members of the ITSA Board of Control will endeavor to appoint the best possible people to the Pub Board at the first meeting next semester.
Candiates Explain Views, Qualifications for ITSA Offices

Engineer Rep
Bruce Butryn
Math, 5
GPA: 2.2
In most school elections, even the conscientious voter finds that he has little choice as to which candidate he can base his choice for the position. In an effort to combat this, I will try to acquaint you with my record. During the past year, I have served on the Board as Engineer Representative. This alone would not, I feel, insure my qualifications, for some of the Board members do little more than attend the meetings!

During this term, I have been president of S.I.C. In this capacity I have looked into many complaints. In addition to this, I worked closely with Marty Jackle on Homecoming, and I am chairman of the team responsible for changing the accounting system on student organizations.

Joe Cudzik
M.E. 6
GPA: 2.18
Having been in the past as a two term Class Officer, Business Manager of the Tech Directory, and a member of various Committees and participation in the last Fall Conference, I am fully conscious of the obligations of serving you and believe that I can competently administer the position of Engineer Representative, and with your full support not only at the elections but also throughout the entire term.

A prime objective as Eng. Rep. would be to see the capacity of the Rules Committee to foster a true democracy in student government, and to make sure that our students are fully informed on the activities of the Board of Control and the administration.

Dick Meirle
E.E. 3
GPA: 3.0
It is my desire to serve the student and its interests. I feel that I am in a position which would allow me to use my experience and knowledge gained in my extended observation of the functioning of the Board of Control. I believe strongly that all students should be aware of the workings of the Board of Control, and I feel that I am best qualified for this position.

Richard Slato
E.E. 3
GPA: 2.5
I feel that students should be aware of the workings of the Board of Control, and I believe that I am best qualified for this position. I am a firm supporter of the Homecoming Weekend and I would like to see greater student participation in the future.

Arch ID Rep
Alan Glass
Steve Hadar
Arch 3
GPA: 2.7

As a candidate for Arch. ID Rep., it seems redundant to say that I will offer comprehensive representation. I feel, however, that the job includes more than just representation on one side. I have an interest in carrying a job a little further and having a greater say in the process of performing other services which include student activities, panel discussions, and just being a part of the fields of architecture and the related arts.

Wayne Kosterman
Arch 3
GPA: 3.5

The most important function of the Architecture - Institute of Design representative is obviously to represent both students and the students from all classes, not just the department of which he is a member.

Since my personal interests lie in the field of art as well as in architecture, I would be more inclined, if elected, to act with the interests of both architecture and design students in mind, and would protect these interests at all times in the ITSA meetings. Certainly the minutes of the meetings would be posted, together with notices of special interest to students.

Rex Poggenpohl
Dorm Rep
Jerry Gravender
Chm 5
GPA: 2.96

No candidate is a qualification to hold office or seem particularly enterprising. What is important is the qualification of the Dormitory Representative. The position of Dormitory Representative must be of high value and that widespread interest at student affairs exists among the dormitory residents is clearly shown by the small number of candidates for the position over the years. Indeed, there have been (Continued on page 4)

Vote for ITSA Candidates in HUB Lobby Tomorrow and Friday

Asst. ITSA Treasurer
Lee Hughes
MR 3

I have one qualification that I believe sets me apart and that is experience. During the past semester I have served on the Finance Committee and was closely associated with the budget problems of this past semester. I also am a Management Option student with business experience. I feel with my experience I can help solve the problems of the past with regards to budgeting.

My desire to serve is unquestionably no less than anyone else's. I am sure everyone that I will work unceasingly during the next semester to supplement my past experiences with new knowledge of the organization dependent on ITSA funds.

ITSA Finance has progressed a long way during the past semester. For example, the bidding of a student account and the financing of Homecoming. If elected I would continue the progress already made and would devote all of my energies and time to this goal.

Michael Rushing
Fysher 3

During the past year there has been much confusion concerning the student organization bank accounts. As Assistant Treasurer, I will strive to see to it that this condition is alleviated, and in particular that the position of student comptroller is created.

I feel that I am qualified for this position because of my experience in campus organizations. I have been Treasurer of the Union Board, vice president of the Freshman Class Association, and President and Treasurer of the North Down Residents Association.

Frosh Pres
Greg Collins
Biology 1

You, the Class of '66, elected me to the Freshmen Board early this semester when my platform was experience and ability. As a member of the Board, I learned a great deal about the functions of ITSA and the duties of the president of the Freshman Class. On the basis of my past experience in office, I believe I am qualified to serve you again this semester.

I ask you to place your trust in me again by voting Collins for Freshman Class President.

David Chernow
Robert Downer
CBE 1

If elected I am willing and able to serve you. I will do my utmost to fulfill the responsibilities connected with my office.

It would be senseless to list the positions which I have held since they are in the past. As for the future, I hope to bring new and different ideas and the desire to serve in my post.

Steven P. Hosp
ECE 1

In the short time I have been here, I have become interested in campus activities. I presently hold the office of assistant treasurer of ITSA under Donald Harvey and have earned a minor letter in cross country.

If I am elected president of the Freshman class, I will do my best to fulfill the obligations of the office. I have set as a personal goal, the task of uniting the class, since I feel that without unity the class of '66 would exist in name only.

Cliff Walbridge

I'm a non-conformist. I don't believe in bought votes or snow jobs. So vote for the candidate of your choice, but vote.

AT PRATT & WHITNEY AIRCRAFT...

YOUR EYES CAN BE ON THE STARS
BUT YOUR FEET MUST BE ON THE GROUND

The glamour and excitement of space age programs often obscure a fundamental fact: it is simply that mankind must find ways by which Pratt & Whitney Aircraft's position in the world space program has been built.

Almost four decades of solid engineering achievement at Pratt & Whitney Aircraft can be credited to management's conviction that basic and applied research is essential to healthy progress. In addition to concentrated research and development efforts on advanced gas turbines and rocket engines, new and exciting efforts are being explored in every field of aerospace, marine and industrial power application.

The challenge of the future is indicated by current programs. Presently Pratt & Whitney Aircraft is exploring the areas of technical knowledge in magnetics, dynamics, thermodynamics, thermoelectric conversions, high temperature materials, fuel cells and nuclear power.

If you have interests in common with us, if you look to the future but desire to take a down-to-earth approach to get there, investigate career opportunities at Pratt & Whitney Aircraft.

For further information regarding an engineering career at Pratt & Whitney Aircraft, consult your college placement officer or write to Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut.

Peace Corps to Offer Placement Exam To Chicago Applicants on January 26

Placement examinations for appointment to the Peace Corps will be held on January 26. All applicants are required to take an examination prior to appointment.

Applicants must be volunteers, 18 years of age or older and United States citizens. The equivalent of a high school education is required of applicants, but college training is considered advantageous.

Married couples are eligible for appointment if both are qualified. According to the Peace Corps, the examination is not competitive and there is no passing score. The test is used to determine the overall assignment for which an applicant is best qualified.

All applicants for the test must fill out a Peace Corps questionnaire and send it to the Peace Corps or bring it to the testing station. Forms are available at the Chicago post office.

As recipient of the award for the TFX, General Dynamics/Fort Worth continues to pioneer technological development in the Southwest. The TFX is a bi-service (Air Force and Navy) aircraft with many unique engineering characteristics. Its development will afford excellent engineering opportunities to qualified engineers and scientists. To take advantage of these opportunities, contact your Placement Director to determine when a GD/FW representative will be on campus, or write Mr. J. B. Ellis, Industrial Relations Administrator-Engineering, General Dynamics/Fort Worth, P. O. Box 748, Fort Worth, Texas. An equal opportunity employer.

A GUIDE FOR THE UNMONEYED

R. L. Raines was a lean, ambitious lad, and when he finished high school he very manfully decided to go into the future at that. It seemed, however, a foolish hope. R. L. 's father could not send him to college because a series of guards followed him to the brink of disaster. (R. L. 's father raised cattle which, in North Dakota, is a form of entertainment fraught with risk.)

With the help of his uncle, he started selling newspapers. This was a tedious job, but he had a deep-seated fear that life would be too good, that he would never be able to earn a full, busy college life and still find time to do odd jobs and make money.

R. L. visited with B. H. and B. H. gave him the paper. He sold papers on the streets, pondering his dilemma. One day, walking and brooding, he came upon a park bench and sat down and lit a Marlboro cigarette. R. L. always lit a Marlboro when he was lost in his mind. R. L. also always lit a Marlboro when he was nervous. The Marlboro was no occasion—happy or sad, passive or enervated, theory or snob—when Marlboro with its fans and fume flavor is not entirely welcome, as you will discover when you go to your favorite tobacco shop and buy some, as we—the makers of Marlboro and I, R. L. Riggs—hope you will. I read on.

Sitting and thinking and smoking a Marlboro on the park bench, R. L. was suddenly interrupted by a small, questioning voice which said, "My boy, you are troubled. Can I help?"

"Yes, it was hard," the stranger admitted. "But when one is young, all things are possible. I, for example, used to get up at five o'clock every morning and milk a dozen cows."

"That's good," R. L. said, "but I've never milked a cow."

"I know." The stranger was a wise man and he went on. "I know that you want to go to college."

"Yes." R. L. nodded in agreement.

"Then do as I did. Go out and work for four years and then go to college."

"That's good," R. L. said. "I'll do that."
