U. of Chi. Student Government - Red or Just Yellow

Last Friday we were quite shocked to read an article in the University of Chicago’s Maroon. The article concerned a resolution that the student government of Chicago passed, and sent to President Kennedy. Quoting the resolution, “We deplore the actions of the United States in establishing a naval base of any and all weapons shipped to Cuba. . . . The presence of these weapons in Cuba with their use against any other nation cannot constitute an act of aggression against the United States.” We cannot believe that a student body, supposedly hating America’s best interests at heart, could be so foolish as to pass such a resolution. History has shown us that when an aggressor slips us in the face, and we do nothing, he will slip again, only harder. Concessions to Germany before World War II have shown us that such action only encourages an aggressor. All through history we have fought for what we believe to be right, and now, with the freedom of the world at stake, it is time to change policy. Although the action taken by the University of Chicago’s student government was not unanimous (16-9), nonetheless, it reflects poorly upon the school. This resolution by Chicago almost makes one question the motives of the students or whoever is responsible for the action. One might also wonder what kind of education they have received that makes them do something as radical as “deprive” a national policy that was made in the best interest of this country. Now, if ever, is the time that the people of this nation must stand solidly behind our President and support his stand.

The editors of Tech News condemn the action of the student government of the University of Chicago and support ITSA’s stand on the matter.

President ITSA sent the following letter to the President:

“The elected representatives of the student body at the Illinois Institute of Technology unanimously concur with the position that has been taken on the Cuban crisis. We fully support the position which you stated in your address to the nation on October 22.

“We further encourage you to maintain the strength which you last night in your address to the nation and against the presence of offensive Soviet military equipment and personnel in Cuba.

“You course of action in meeting the Soviet challenge to American freedom and security has our complete loyalty and the support of the nation.”

ITSA Weekend Near

“Meet the future, Relive the past” is the theme for the Illinois Tech 1962 Homecoming Weekend, to take place November 9 and 10. Opening the festivities will be Open House parties in both the dormitories and fraternity houses, beginning at 7 p.m. Friday. Decorations will carry out the Homecoming theme, and a trophy will be awarded to the group with the best decorations.

A Shake Dance will wind its way from the quad to the dorms, and then to the HUB, climaxing with the lighting of the Homecoming torch on the lawn of the HUB. The Homecoming queen, to be selected by the students at election Tuesday and Wednesday, will be crowned at this time. Kathy McDonald, Marilyn Miller, and Gail Streed are candidates for the title. Kathy McDonald is a freshman chemistry major, and a pledge of Delta Zeta sorority. Marilyn Miller is a junior chemistry major, and also pledging Delta Zeta. Sexual engineering major, and a pledge of Kappa Delta Rho sorority. Gail Streed is a freshman biology major, and a pledge of Delta Zeta sorority. Closing the official ceremony will be the award for “Outstanding Alumna” of the year, to be given to Dr. John Hutton, a member of the Board of Trustees. Open House parties will resume to finish the evening.

Kathy McDonald’s events will be dinners in the dorms and fraternity houses for alumni and guests. Following the fraternities’

dormitory football game, with two men from each house and 18 dormitory men competing.

At 8 p.m., the Homecoming dance will take place in the HUB ballroom. The Roaring Twenties provide the motif for decorations, with a speakeasy, nickelodeon, and ice-cream parlor. Folk singers Jim Hennan will play on the dance floor, and various groups will perform. Prizes for the best dressed couple, and best picture will be awarded. Ken Eames and his orchestra will play. Prizes for the best dressed couple, and best picture will be awarded. Ken Eames and his orchestra will play.

PLANNING SESSIONS for Homecoming headed by Marty Jablonski (left) hold interest of Bruce Batyous, one of the committee members.

Special Referendum Coming Next Week

Balloting for Homecoming Queen and approval of the proposed ITSA constitution revisions will take place November 6 and 7 between 11 a.m. and 9 p.m. in the exhibition area of the HUB. The winner of the Homecoming Queen Contest will be announced Friday evening at the torch lighting ceremonies. Kathy McDonald is the most popular student to go to the polls and vote for Homecoming Queen and also to approve the proposed revisions. All that is necessary is for you to present your current registration card. Thank you for your support of this event.

The winner of the Homecoming Queen Contest will be announced Friday evening at the torch lighting ceremonies at which time she will receive her crown and award. The Executive Vice-President and Legislative Vice-President, the Executive Vice-President of the Board of Control, and the President of the Board of Control will appoint separate committees to make the required revisions. The following are the proposed revisions:

Board of Control Asks Revisions To Constitution

After nearly a year’s work, many, many hours of study and preparation, and narrowly missing approval at last semester’s general ITSA elections, the proposed ITSA Constitutional Revision will again be submitted to an all-school referendum for its approval on November 6 and 7. (See Election Story, page 4.)

The purpose of the revisions is to cut out the double representation of students on the Board of Control, thereby making it more efficient and effective, by eliminating the divisional representation and giving greater power to the class officers and their offices. The social chairman will be eliminated; in its place the President of the Board of ITSA. The President of the Board of Control will act as chairman of the Board of Control, In-}

Interruption of the Constitution.

Letters to the Editor

Dear George,

Last night I went to the IUR to see "Quo Vadis," a Union Board "Classic Comedians" Presentation. I saw the movie but only after many stoppage to correct the sound and the film. Fast because the movie is supposed to be a classic doesn't mean they have to get a worn-out version of it. (This is not the first time this has occurred.) Many people left because of the extremely poor quality of the film and its sound.

I hope that if the Union Board wants to improve the attendance at its movies, they will do something to improve the quality of its films. Television shows much older movies than does the Union Board's Movie Committee, and that's much better in quality. To get poor quality films just because they may cost less, thus allowing the Union Board to make money, is certainly not doing a service to the students and other people who pay an admission charge to see the movies and therefore are entitled to see a good production of the scheduled movie. I am quite sure someone could preview the movies to check on their quality.

Sincerely yours,
Dave Povilaitis

Dear George,

The Union Board wishes to apologize for the poor presentation of "Quo Vadis," Sunday, October 28, 1962. We wish to assure you that we have taken steps to prevent such happenings in the future. Please bear with us.

The movie committee of the Union Board also wishes to thank all of the persons who participated in the movie committee's poll. Your suggestions were greatly appreciated, and they will be of much use in planning future programs.

Sincerely,
Thomas E. Linnenbrink, Chairman
Union Board Movie Committee

Dear George,

I read last week's Tech News' report of the ITSA Board of Control meeting with interest. The interesting part is what was left out. I attended that meeting and I believe that my report is correct.

The Board moved that a message be sent to President Kennedy seeking the full support of the ITSA Board of Control for the actions the President had taken in the Cuban situation. The message was silent without a dissenting vote, without discussion, and is what seemed to be a serious omission. Whether this proposal has been carried out, or in what manner I do not know.

While personally fully approving every aspect of the President's actions, I seriously question the Board's action, either as a representation or as a speech for the entire Illinois Tech student body. I am sure that many of Tech's students (a) do not approve of the President's action with respect to Cuba, or (b) question his actions, or (c) support his actions only because he is President, or (d) question the wisdom of the ITSA Board's action.

I am glad the Board feels that they should pledge their personal support, and no doubt, Kennedy is glad too.

Very respectfully,
James A. Landfried
P.S. 7

Dear George,

At the present time a student treasurer cannot obtain the balance in his account at a stated time. Unlike a bank checking account which at the end of each month gives him a statement and balances to the treasurer. It is next to impossible to keep a good set of books under these conditions.

The administration is to realize that this is a problem and have decided to do something about any student treasurer being interested. It has been decided that all checks must be co-signed by Dean James Barnett. Thus when I want to pick up some publicity for Center Stage, I am told that my signature on the forty-cent check was not sufficient. Dean Barnett must sign all checks. The Dean informed me that this was a new policy that every check must be co-signed by him.

This is common to all of us, not just to treasurers. All department organizations and ITSA and all of their members have trouble paying their bills. This is written in the hopes that the administration will see how a man is special in the area of accounting to help us all straighten out our present mess and have checks for which he was trained and hired.

Sincerely,
Louis E. Ahmet
Treasurer of the Union Board
Treasurer of Center Stage

Inebriated Editor Writes Again
Comments on TN, Beer Blast

by George Hanover

You will find this issue of Tech News somewhat different from those that preceded it.

First, I am pleased with the number of letters to the editor this week. They reflect interest in various happenings on campus and I am happy to see that some people want to express their views publicly on these matters.

Second, we are running an editorial on the front page. May I only say that I think the situation warrants it.

Third, "Hippie" appears on page 9. We welcome student and faculty opinion on a joko column. In view of the prevalence set, (freshmen ask the seniors) the column will be handled with care.

Congratulations to Marty Jochle, Senior class president, and the rest of the Senior class officers for organizing such a successful Senior Beer Blast. I'm sure all the Seniors that attended enjoyed themselves. Those Seniors who didn't attend, were not the ones who had to take part in a rather unique event.

ITSA, Administration Deter Political Clubs

Recently, the ITSA Board of Control gave recognition to the Young Republican's Club. Despite sporadic activity on the part of political clubs in the past, this was the first political group to be recognized. Although part of the reason for sterile political conditions at Illinois Tech is due to inertia among politically inclined students themselves, in large measure the condition results from the irrelevant attitude taken by the administration.

The administration seems to fear that Illinois Tech will receive a bad reputation from being associated with the views of political clubs. Apparently there are "good" political clubs and "bad" political clubs and one dare not tolerate the existence of groups which might be expressing minority or unpopular views. The ITSA Board of Control itself intimidated this point of view in recognizing the Young Republicans.

The Young Republicans are acceptable because after all, any group with the name "Republican" hooked on it must be within the pale. Since the Board accepted the club with little or no investigation of its real character, perhaps the Student Peace Union or some similar group would also be accepted if it were to change its name to the Young Democrats Club.

We are not endorsing any political group nor suggesting that Illinois Tech become a hotbed of subversion. We are suggesting, however, that active, responsible clubs can become a real asset here as they have on many other campuses.

Get Lucky
Play "Crazy Questions"

SOCIAL AWAWS A MONTH. ENTER NOW, HERE'S HOW:
First, think of an answer. Any answer. Then come up with a nutty, surprising question for it, and you've done a Crazy Question." It's easy the new way for students to make loot. Study the examples below, then do your own. Send them, with your name, address, college and class, to GET LUCKY, Box 646, MT Vernon 10, N. Y. Winning entries will be awarded $25.00. Winning entries submitted on the inside of a Lucky Strike wrapper will get a $25.00 bonus. Enter as often as you like. Start right now!

THE ANSWER: After the ball is over
THE QUESTION: What does the picture below represent?
I'm sorry, I don't know what you're asking.

THE ANSWER: THE JACK OF DIAMONDS
THE QUESTION: What is the minimum age for hunting from the age of 13 to 16?
13

THE ANSWER: 5280 feet
THE QUESTION: How far can a penny go if you tie it to a penny?
As far as you can get it to go.

THE ANSWER: Mein Kampf
THE QUESTION: What is the title of the famous book by Adolf Hitler?
Mein Kampf

THE ANSWER: HORSELESS CARROEGE
THE QUESTION: What is the name of the invention that made travel possible without horses?
Horseless carriage

THE ANSWER: Don't frown until you see the whites of their eyes
THE QUESTION: What is the saying that if you don't believe in yourself, no one else will either?
Don't frown until you see the whites of their eyes

THE ANSWER: The question is: IF SORRATES WERE ALL ALIVE TODAY, WHAT WOULD HE ADVISE SOCRATES? It's a tough one. But, of course, it makes sense to enjoy the fine tobacco taste of Lucky Strike. This taste is the basis for the famous tobacco taste of Lucky Strike. And the same taste is what makes Lucky Strike the favorite regular cigaon of college students. Try it today.

Pi Kaps Appeal $50 Fine
Set by IF Judicial Board

Pi Kaps Phi fraternity has appealed a $50 fine levied against it by the Judicial Board of the Interfraternity Council. The Pi Kaps were fined as a result of the actions of members of the fraternity in forcefully throwing Frank Kulicki of Pi Kappa Sigma into the Sigma Phi Epsilon reflecting pool.

The decision of the Board was announced from a prompt lodged by Pi Kappa Sigma. According to the letter of protest, Kulicki sustained numerous cuts and abrasions when thrown against the concrete sides of the pool. The appeal is scheduled to be considered by the Judicial Board in a meeting set for next Tuesday. The Pi Kaps were found guilty of violating two separate provisions of the Interfraternity By-laws. The first admonishes fraternities and their members to observe standards of gentlemanly conduct and the second provision prohibits any fraternity members from exposing individuals to undue physical harm or hazard.

In further action, the Judicial Board recommended that Greek Week be replaced in future years by a Greek Day, which would incorporate many of the features of the former activity. The Board suggested, that starting in 1963, Greek Day should be held the Saturday of Homecoming Weekend.

The Judicial Board also recommended that spring Rush Week be condensed to three days, starting on the Thursday of registration. In past years, spring Rush Week has begun on the Sunday before registration and lasted until the following Sunday. The Judicial Board has responsibility for the disciplinary actions of the Interfraternity Council. Its membership consists of representatives of the various fraternities in the IPC. Interfraternity Council President Harold Stollard is the chairman of the Board.

Announce Nine New Faculty Appointments

Nine new faculty appointments recently were announced by Illinois Tech, bringing the total number of appointments for the 1962-63 year to 22.

These appointments are part of the proposal made by Illinois Tech President John T. Reitallact last April to expand various areas of engineering, physical sciences, and liberal arts.

The department most affected by the new appointments is the mechanical engineering department, which gained four members. Edmund J. Appleby, PhD, assumed the post of visiting assistant professor of mechanics, following his graduate work at the University of London. Roger J. Fossett, PhD, is assistant professor of mechanics. He recently completed graduate work at Brown University. Tom S. Kim, M.S., former IIT graduate student, is now instructor of mechanical engineering, and also former IIT graduate student Daniel D. Joseph, M.S., will serve as assistant professor of mechanical engineering.

Both the mathematics and electrical engineering departments received two new members. Tade- palli Sastri, M.S., and Chester Taul, M.S., joined faculty as instructors of mathematics. Sastri formerly did graduate work at the University of Wisconsin before joining the Illinois Tech faculty. Alexander S. Sumowski, PhD, comes from the University of Chicago to serve as Associate professor of electrical engineering and Taul, his colleague, Richard Yang, PhD, who was formerly with the General Corporation, is a professor of electrical engineering.

The last name added to the Institute of Design is Lucielle Wais-
man, BA, who assumes the post of lecturer. He is associated with Klein Waisman Design.
Rey de la Torre to Perform Tomorrow

Strains of the classical guitar will echo through the HUB auditorium tomorrow night as Rey de la Torre performs at the third Union Board Concert in the Arts Series '62-'63. The concert starts at 8:30 p.m.

Proceeding the concert, a buffet supper in honor of de la Torre will take place in the Armour Faculty Club, hosted by Vice Presi-
dent for Institutional Development Robert E. Nelson. Those attending will include the Executive Council of the Illinois Tech Parents' Association, approximately thirty student leaders, and representatives of the Administration and the Development office.

Single tickets for the concert will go on sale one hour before the performance at $3 per ticket. Following the concert, Mrs. James Barnett and Mrs. Peter Kehoe, wives of the Assistant Dean of Students and Professor of Mechanical Engineering respectively, will be the hostesses for a reception open to the general public in the HUB ballroom.

Three campus co-eds, Thora Alderfer, Rosanne Page, and Gloria Ray have volunteered to help serve coffee during the reception.

De la Torre has been presenting concerts in the United States and abroad since 1941.

ACP Drafts Free Press Resolution

At a meeting last weekend morning, a committee decided to obtain a mail vote from ACP members, hoping to approve a seven point resolution. The most important provision is that an editor should be fired only by the body or authority which appoints him.

The convention was attended by 840 students and 152 advisors, representing 230 colleges in 37 states, Washington, D.C., and Canada. The convention discussed problems related to the publishing of college newspapers, yearbooks, and magazines.

(hic!)

We went to the mountain to make 1963 Ford-built cars go 30,000 to 100,000 miles between major chassis lubrications.

Quite a task faced Ford Motor Company engineers when they set out to eliminate the traditional trip to the grease rack every 1,000 miles.

Like Mohammed, they went to the mountain—Barrett Mountain on the Continental Divide in Colorado. More aptly, they went to mountains than in the rest of the world combined. And from mountains came the amazing "moly" grease that helps extend the chassis lubrication intervals for Ford-built cars. This grease sticks tenaciously to metal, stands up under extreme pressures and resists moisture, pounding and squeezing. It is thicker than ketchup on toast.

New, improved seals were developed, flushings, bearings and washers of many materials were investigated. Slippery synthetics, like nylon and teflon, were used a number of new ways.

The search for means to extend chassis lubrication also led to New Orleans—where experimental suspension ball joints tested in taxis are in regular service went two years without relubrication.

It took time. And ingenuity. But the effort paid off when Ford-built cars were the first to build in chassis lubrication good for 30,000 miles or two years—whichever came first.

Another assignment completed—another "Ford first" and another example of how Ford Motor Company provides engineering leadership for the American fleet.
Poetry Group Seeks Entries For Anthology

Poetry is desired for the new 1963-64 Inter-Collegiate Poetry Congress Anthology. Selections will be based upon poetic merit, and will be chosen from colleges and universities throughout the country. If accepted, all future publishing rights are to be retained by the author.

All contributors shall be notified of the editor's decision, and shall have the opportunity of obtaining the completed anthology. Those interested may submit entries to the Inter-Collegiate Poetry Congress, 203 South Third Street, Lewisburg, Pennsylvania.

Deferments Clarified For Selective Service

If you are a full-time male student at Illinois Tech, you are eligible for deferment from the draft if as a freshman, you are in the upper half of your class; a sophomore, in the upper two-thirds; and as a junior, in the upper three-fourths of your class.

All seniors, in the upper quarter of their graduating class, will be deferred if they enter graduate school.

Another possibility for deferment is the Selective Service College Qualifying Test, given annually in April. A student with a grade of 70 or a graduate student with a grade of 80 in this test is eligible for deferment, no matter what his class standing.

This grade in no way changes draft status, and does not obligate the student in any way.

There is a relatively low enlistment quota for those with critical skills such as engineering. Those with such skills may apply for a short, three-month term of active duty, followed by reserve duty.

Further information about the draft may be obtained from the Engineering Manpower Commission of The Engineering Joint Council.

PR Department Holds Luncheon; Cites Services

Publicity representatives from over 15 campus organizations lunched at the invitation of Robert Parrish, director of Illinois Tech Public Relations department, last Tuesday in the HUB.

Parrish, assisted by Mike Nore, PR news release director, explained the relation of the PR department to various campus organizations, and outlined how student organizations could have material published in Chicago newspapers.

Nore explained that the professional press is often more receptive to individuals (students) than to public relations departments. At the same time, he emphasized that the PR department would be happy to help organizations with any of their publicity problems.

A publicity "kit" containing general information about Illinois Tech, a list of newspaper contacts, and general news forms was given to each attending student. Organizations that were not in attendance can obtain additional kits from Mike Nore in the basement of the Commons Building.

Also in attendance at the meeting was Mark Bates, Assistant to the Vice President for Development, who explained the work of the development office; George Hanover, Tech News Assistant Editor, explained the paper's general policy towards activities articles; and John Doyle, Tech News Assistant News Editor, explained the results of the Associated College Press conference, and its relation to student publicity activity.

Tech Chorus Will Present "Messiah"

Handel's "Messiah" will be presented by the Tech Center Festival Chorus at noon December 13, in the HUB auditorium.

The Chorus is made up of students, faculty, non-academic employees, and members of the Armour Research Foundation.

Rehearsals for the 1963 Messiah are held in HUB 106, the band room, at 12:15 on Tuesdays and Wednesdays so that students who are not able to attend on one day may attend on the other.

All students, especially girls, says Dr. H. E. Nutt, are invited to attend. The Messiah is as much a performance and also part as it has to be a service. No tickets are required for the chorus.
Coeds Find Tech’s Campus a “Man Mine”

by Louis Wells

Ladies, this column this week is for you. Ladies, for you and I face one central fact: this campus is a ‘man mine’ (or man mine is perhaps a more correct term) for you. I don’t believe any of you would give me an argument on that, would you?

Off this campus, out there in the hard, demanding world, the competition for husbands is stiff. Well, now that I have admitted that you ladies on this campus are like your sisters in that hectic off-campus world, I propose to help you. Although some of you probably don’t know it, you do have a problem. Your problem is the reverse of that of your off-campus sisters. Your problem is too many men.

That’s right, too many men. Surrounded by all of these fine, healthy, red-blooded, unmarried young American men, it is very difficult for you to pick the one you must desire. It is like having a closet full of dresses, all of which you would like to wear to a dance; you can only wear one, so you have to choose.

The best help I can give you is to list some of the types of men that can be found on this campus. The actual selection is, of course, up to you.

The first type is the strong athletic type. We don’t have a football team, but he can be found bouldering a basketball around on the gym floor. He is for those of you who prefer the big-man type.

For those of you who prefer the quiet type who will leave the kitchen, and, as a matter of fact, the entire management of the house to you, I recommend the brilliant, almost-a-genius type. This one will, if he becomes famous, also make you famous.

And last, for those of you who like to feel that you are behind your husband, pushing his career, I suggest the man about campus type. He can be found in any of the campus organizations. He is either the president or the business manager. He is on the way up. He is the future organization man.

All of these, of course, stereotypes. But aren’t stereotypes taken from real life?

THE BELL TELEPHONE COMPANIES SALUTE: CAL CRIMP

Michigan Bell makes few moves in Southeast without consulting Engineer Cal Crimp (B.S.E.E., 1957). Cal makes studies on where to put new central offices, how to expand old ones, and switching equipment to order.

To make these decisions, Cal must interpret forecasts of customer growth. He must also know his equipment and operating costs closely. Such responsibility is not new to him. On an earlier assignment, for instance, he skillfully directed a drafting section of 32 people.

Cal Crimp of Michigan Bell Telephone Company and the other young engineers like him in Bell Telephone Companies throughout the country help bring the finest communications service in the world to the homes and businesses of a growing America.

Bog Open Saturday Nights for Jazz Sessions; Atmosphere to be Improved

Tomorrow night, November 3, is the starting date for jazz in the Bog on Saturday nights according to Carmen Dilligio, Bog Chairman. Because the Tuesday night jam sessions have so well attended the Bog will remain open until midnight tomorrow as a trial run. Dilligio hopes it will prove to be as successful as the Tuesday session, so it may be continued.

The sessions have been postponed on other Chicago college campuses and on FM radio stations.

Dilligio also promises a better atmosphere in the Bog because changes are beginning to take form: the plaques from various student organizations are being put up as soon as they are delivered into the HUB's director's office.

A screen is being designed to separate the serving line from the rear of the Bog, and the lights are being dimmed during "hoots" and jazz sessions. Other changes are still in the proposed stage.

EAT, SLEEP, AND MATRICULATE

The trouble with early morning classes is that you're too sleepy. At late evening classes you're too hungry. At early afternoon classes you're too hungry again. The fact is—and we might as well face it—there is no good time of day to take a class.

What shall we do then? Abandon our colleges to the Ivy? I say no! I say America did not become the hope of mankind and the world's largest producer of buttertails and kilburn by running away from a fight.

If you're always too hungry or too sleepy for class, then let's hold classes when you're not too hungry or too sleepy; namely, when you're eating or sleeping.

Classes while eating are a simple matter. Just have a better lecture while the hungry eat. But watch out for noisy food. I mean who can bear a lecture when everybody is cramming celery or matzo or something else? Serve quiet stuff like matzo balls on a doughnut, or steaming bowls of lamb fat.

And kindly observe silence while lighting your post-prandial Marlboro Cigarettes. Don't be etching lifelike sketches on your jeans. Instead carry an ember from the dormitory fireplace in your purse or pocket. Place the Marlboro against the ember. Light it quietly. Smudges it quietly. Oh, I know it's a great deal. I know that oat's natural instinct upon encountering Marlboro's Sun Barer and filter is to throw back his head and below great, roaring eyes of joy. But you try not. You must contain your curiosity, lest you disturb the lecturing lecturer.

You see, if you don't, present yourself a few small shoulders of pleasure as you smoke, but take care not to to your garments which will set up a clatter when you should—like taffeta, for example, or outer synthetics. Let us turn now to the problem of learning while sleeping.

First, can it be done?

Yes, it can. Psychologists have proved that the brain is definitely able to assimilate information during sleep. Take, for example, a recent experiment conducted by a leading Eastern University (Stadford). A tape recorder was placed under the pillow of the subject, a few minutes after a tape called "Atmosphere's Sunrise.

When Globe was fast asleep, the recorder was turned on. So, all through the night, it repeated three statements in Globe's subliminal ear:

1. Herbert Spencer lived to the age of 109 and is called the "Founder of English Social Thinking."
2. The bunsan plant is a tree but a large perennial herb.
3. The Archibald Ferdinand was assassinated in 1914 at Berlin by a young nationalist named Mifida Covina, who has been called the "Trigger of World War I."

When Globe awoke in the morning, the psychologists said to him, "Herbert Spencer lived to the age of 109. What is it called?"

Globe promptly replied, "Terrestrial Herb."

Next they asked him, "What has Nijsha Covina been called?"

Replied Globe, "Terrestrial Herb."

Finally they asked, "Is the bunsan plant a tree?"

But Globe, awakened from the long information, had fallen back asleep, where he is to this day.

Globe stirs, but you see, are crest, you up and about. Why not improve each morning hour with our fine product—Marlboro Cigarettes? You get a lot to like—filter, flavor, pack or box.
Lack of Applicant Interest Slows Peace Corps Progress

David Fleischer, the Peace Corps representative who was on our campus this past Tuesday, explained the Peace Corps objectives to any interested students. He said that the Corps, now in service only more than a year, has proved to be highly successful.

The Peace Corps headquarters in Washington, D.C., now has about two to three times the requests for corpsmen than they have applicants to fill the positions.

Fleischer also said that it is not necessary to have a college degree in order to serve in the Peace Corps. Volunteers are especially needed to work in Latin America to help supplement President Kennedy's "Alliance for Progress."

Applicants are now invited within four to six weeks after taking the tests whether he will be selected and where he will serve. All fields of study are still needed and the tradition of the following fields are especially requested to apply: plumbers, mechanics, carpenters, farmers, and electricians.

Following selective each volunteer than goes to a training center for several weeks of study and preparation after which he spends several more weeks at the Puerto Rico "Outward Bound" Camp learning how to live under various conditions.

Presently three Illinois Tech graduates are now serving in the Peace Corps. Any interested students can get more information from the Dean of students Office.

Bog Dreams

Exactly brings his date to Bog to flirt. When the crowd takes a break they listen to their favorite songs on the juke box.

Weil Named To Welding Committee

Dr. Nicholas A. Weil, director of mechanical research at the Armour Research Foundation of Illinois Tech, recently was named to the Design Division of the Pressure Vessel Research Committee of the Welding Research Council.

With this appointment, Dr. Weil automatically became a member of the Main Committee of the Pressure Vessel Research Committee.

It's the Same Old Story...

The following letter was sent to the 147 integral business manager. It shows that our present problem, integral debt payment, is not a new one.

Dear Mr. Sachs,

Donna White and I have discussed the sum that the S.A.E. owes the Integral. We have come to the conclusion that this debt should be paid at a much later date, since at the present we S.A.E. organization exists.

Helping you up the students a chance to organize and build a strong team before again calling for the payment of a debt paid by other students who are not elements.

Sincerely yours,

Harry A. Wessel
S.A.E. Organizer

IF Council Revises Rush; Starts New 'Greek Day'

Action on a shortened spring Rush Week, the creation of a Greek Day, and proposals for alteration the fraternity billing system were the chief items of business discussed at the meeting last Wednesday of the Interfraternity Council.

Following the recommendation of the Interfraternity Board, the Council decided to shorten spring Rush Week to a three day affair starting on the Thursday of spring registration. Rushing by fraternity earlier in the week will be illegal.

The council also agreed to create a Rush Day to replace Rush Week, held annually every year in the past. A suitable date for this event is being investigated.

Nancy Witting, IFC treasurer, proposed a revision of the IF By-Laws which would permit advance billing of fraternities for interfraternity events and end deficit spending on the part of the IFC. Action on this proposal will be taken at the next IFC meeting.

Jen, Jen, what did Jan say to Tarran when a herd of elephants came charging down the jungle path towards them?

Jen: I give up, Jen, what?
Jen: Here come the elephants.

Jen: Where, where?

A man with Alopecia Universalis doesn't need this deodorant

He could use a woman's roll-on with impunity. Mennen Spray was made for the man who wants a deodorant he knows will get through to the skin... where perspiration starts.

Mennen Spray Deodorant does just that. It gets through to the skin. And it works. All day. More men use Mennen Spray than any other deodorant. Have you tried it yet? 64¢ and $1.00 plus tax.

Harriers Meet CTC Today In Last Meet Of Season; Hopeful of Win

**Wrestling Team To Open With Tourney**

Wrestling practice started Monday afternoon as over 300 were expected. After a session of exercises, coach Tony Barbo no longer needed a row of white-coated men to replace last year's captain, Dave McGraw, although there are several new men out this season in his weight class. This season's schedule follows.

Mar. 20 - Dec. 1
Mar. 25 - Dec. 1
Nov. 3 - Eisenhower High 4-12
Dec. 1 - Lee High 12-9
Dec. 1 - Chicago 15-10
Jan. 8 - Wright J. C. 6-12
Jan. 15 - S. 19-14
Jan. 29 - IIT South 41-20
Feb. 26 - Indiana Tech 47-3

Tony Barbo, wrestling coach, demonstrates a hold on Captain Steve Nugent as wrestling season begins.

**Bowllers Try Valpo Again This Sunday**

The varsity bowling team made their trip to Valparaiso University last weekend, but did not bowl their match. It appears that Valparaiso did not receive a copy of the league's schedule, and as a result did not know they had a match with Tech. The match had to be rescheduled for this coming Sunday afternoon. The following Saturday matches will again be away at St. Joseph in Indiana.

This season is the first year that the Tech bowling team has had the facilities of the HUB recreation room available for team and individual practices.

**Varsity Swimmers Begin New Season**

The Illinois Tech varsity swimming team began practice last Monday afternoon for the 1962-63 season. Seven lettermen and a few other swimmers, Dr. Deaton's swimming team, against Wright Junior College.

**Gupta Takes Tennis; Navy Leads IM Ball**

Intramural tennis competition ended last week with S. Gupta emerging the victor. Gupta defeated Yoga Desai 6-0 and 6-3; both finalists are Indian graduate students.

In intramural football, the big game last week was between South division and Fowler Hall. South won it 12-0, to take possession of first place in the western division. Quarterback Calabrese had a hand in both TD's, passing for one and running for the other. The latter was preceded by a 40-yard pass from Calabrese to Jim Brown.

In last Thursday's games, the Archibalds split the AFROTC "A" team 15-0 and Fowler hall clipped the North dorms "Bulls" 61-0. The Air Force's defense was in third in a row without a win. The lone tally in the other contest was on a two yard pass.

Tuesday's return new the other North dorm team, the "Bulls", fall before the Junior Community 14-0. The victory kept the Community's hopes alive, giving them a chance to tie for first place in the present Navy "A" lead with an unblemished 5-0 slate.

**Get on the BRANDWAGON...It's lots of fun!**
